Light: 3-colour LED
Connectivity: Bluetooth 4.0
Input: Micro-USB, 5V, 500mAh
Battery: 300mAh

Emie Technology Co., Ltd. | Designed by [Logo]

Set up on the App to remotely control the Elfy Smart Light

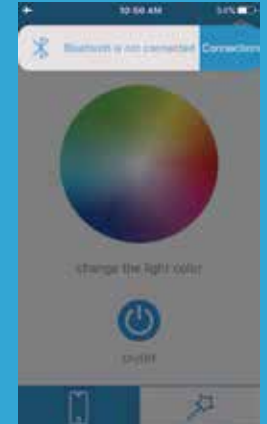

- Remove the seal, rotate clockwise to unbox the Elfy.
- Reinstall the Egg Shell, reseal the sticker, and put your coin through the hole on the top.

The Egg Shell of the Elfy could be used as a money box.

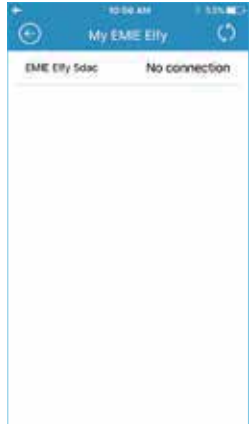

APP INSTRUCTION

Open the App, and click "Connection".

Turn on your Bluetooth, wait until the Elfy is detected and hit the Elfy ID to connect.

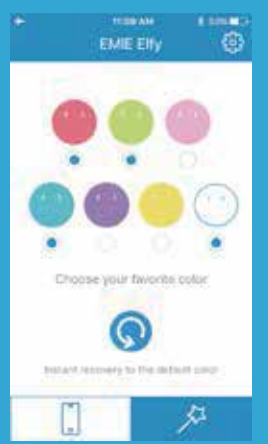

On the Remote section, we have the switches and switch button. Move the colour-picker to change the LED colour. Please be noted that the color customisation on the switches can be applied only once.

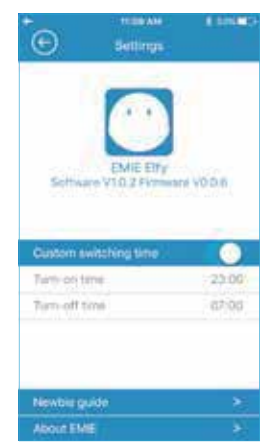

Hit the switch button to remotely turn on/off the Elfy.

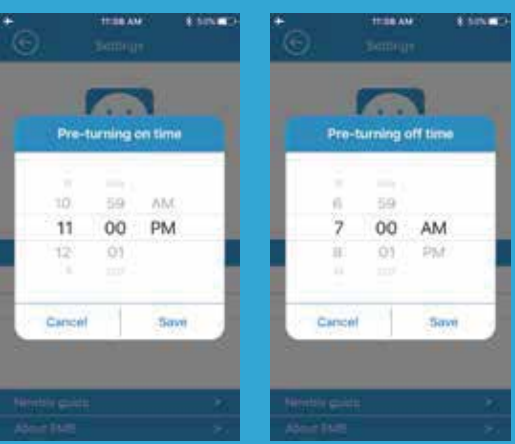

On the Magic section, you can set the colors you prefer for the non-remote status, the changes will take effect immediately. By doing this, you are customising the colors you will see when you tap the Elfy. You can always recover to the default 7 colors by hitting the Reset button.

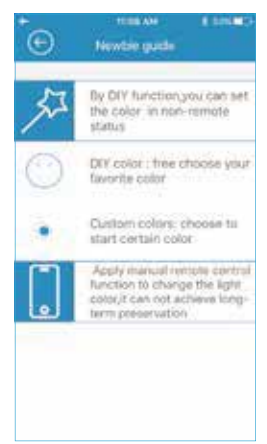

Click the Setting button on the top right of the Remote and Magic sections to enter the setting section.

On this section, you can enable the Custom Switching Time, and set the time you want your Elfy to light up/out automatically.

Or find out what you can do in different sections by checking out the Newbie Guide.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
