PSB #:	PSB.2002.02.001	Authorization:	Kps
Reference:	TI01-30e Rev. A	Total Pages:	1
Product(s):	PowerLite 8150i / 8150NL		
Subject:	EasyMP.net Tablet Overlay Template for the Wacom Cintiq		

This bulletin was created to inform PowerLite 8150i and PowerLite 8150NL users of the availability of an EasyMP.net tablet overlay template for the Wacom Cintiq.

Wacom recently introduced a new tablet that can be used with the PowerLite 8150i and PowerLite 8150NL projectors. This new tablet has a different form from the Wacom Graphire tablet for which there was already an overlay template that could be used with the PowerLite 8150 projectors.

In order to get the new overlay template, please download the file epon10229.exe from the Epson website. In that file, there is another copy of this bulletin along with Sheet410.pdf, an Adobe Acrobat Reader file. You will need Adobe Acrobat Reader version 4.0 or higher to open Sheet410.pdf. The document contains a printable copy of the Wacom Cintiq tablet overlay template. After printing the template, you will need to cut around the outline of the printed template, then lift the protective sheet from the tablet to insert the template under the sheet. Lower the protective sheet and use the tablet normally.

The icons at the top of the template indicate action zones that allow you to enter Epson EasyMP.net software functions. Tap the icon with the tablet stylus to activate the function while the tablet is connected to the projector using one of the projector's available USB ports.
