Radio frequency band and output power as required by the EU directive 2014/53/EU:

Model	Freq. bands	Max Output power
EDGE-MMUL	119-135kHz	0.3 mW
	13.553-13.567 MHz	
	2.4-2.483GHz	2 mW

Touch-Screen Care

Touch screens may be easily scratched without taking the following precautions:

1. Screen should be cleaned using LCD cleaning products only.

- A. Turn device off to lock the touch screen during cleaning.
- B. Spray LCD cleaner on LCD friendly cloth (do not spray cleaner directly on screen or any part of terminal).
 - I. Alternatively, vinegar or isopropyl alcohol diluted (at a ratio of 1:1) with de-ionized or distilled water may be used. Do not use tap water or mineral water as it will leave a film. Do not use solutions that contain acetone, ethyl alcohol, toluene, ethyl acid, ammonia, or methyl chloride.
 - II. Do not use tissue papers, toilet paper or bath/hand towels as the material may permanently scratch the screen.
- C. Very gently wipe the screen in a circular motion. Do not press hard on the cloth.
- D. Remove excess moisture with the cloth. Do not leave any liquid on the screen.
- E. Let the screen dry thoroughly before powering back up.

2. To clean between the front plastic bezel and the screen use a dry, soft, flat swab made of a material that will not scratch or shed debris.

Note: It is the responsibility of the customer to clean the outer surfaces of the Edge product including the touch screen. This service is not covered by maintenance agreement or warranty.
