

PHOTOGRAPHS OF INSTALLATION

This document contains 5 photographs

The user receives the Smoke Detector without the batteries and a Wall Mount separated. The Wall Mount shall be installed on the wall ((photograph No. 1).

For installation, the user must hold the device and insert the 2 batteries at the rear side of the detector (photograph No. 2), where the label is located.

The sample of the detector installation on the wall is shown in the following photographs No 3 to No.5.
