Specifications

Product Dimensions	242 x 120 x 8mm / 9.5 x 4.7 x 0.3in (L x W x H)
Product Weight	530g / 18.7oz
Operating Range	Up to 10m / 33 ft
Standby Time	1000 hours
Charge Time	4 hours
Uninterrupted Use Time	120 hours
Working Current	<2.5mA
Sleeping Current	40uA
Working Temperature	-20 to 60°C
Lithium Battery Capacity	300mAh
Lithium Battery Life	3 years
Key Life	5 million clicks

Turning on/off

To turn the keyboard on, simply open the protective case. To turn it off, close the case.

Pairing Instructions

1. Open the keyboard's cover to turn it on. The power button will turn red.
2. Press the Bluetooth button. The Bluetooth Indicator will start to flash. The keyboard is now ready to connect to your device.
3. Activate your device's Bluetooth function and search for the device.
4. Once the keyboard has been found, click on its name to connect.
5. Enter the password code as displayed on the screen and push Enter.
6. Once the keyboard has successfully connected to your device, the Bluetooth Indicator will turn off.

Note: Before you connect the keyboard to other Bluetooth-enabled devices, please verify the device's Bluetooth standard and compatibility.

Power Saving Mode

The keyboard will enter sleep mode after being idle for 10 minutes. To activate it, press any key and wait for 2 seconds.

Charging Instructions

When battery power is low, the Power Indicator will flash red, indicating that it is time to recharge the keyboard case.

1. Connect the micro end of the USB power cable to the micro USB port on the keyboard.
2. Connect the other end of the cable to a power adapter or computer USB port.

3. The Battery Indicator will turn green while the keyboard is charging. Once it is fully charged, the Battery Indicator will turn off.

Note: The built-in lithium battery has no memory effect, so feel free to charge the keyboard case whenever necessary. If the case will not be used for an extended period of time, we recommend that you turn the power switch off so as to conserve power and extend battery life.

Troubleshooting

A. Unable to connect:

- Make sure the cover is open.
- Make sure the keyboard is within operating distance.
- Make sure the battery still holds a charge.
- Make sure the Bluetooth on your device is enabled.
- Make sure the keyboard is paired to your device successfully.

B. Unable to charge the keyboard case:

- Make sure the USB power cable is connected properly to the keyboard and the power source.
- Make sure the wall charger is connected properly to the power outlet.

FCC Certification Requirements

Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the Following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the Receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
