 Facebook Bluetooth® Beacon

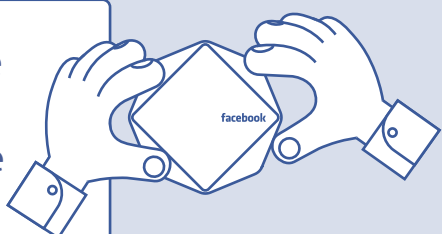

### Installation Guide

Tear card from the perforated line & pull device to **activate**.

Pull the sticker off the back & place it on a wall or counter where it's visible to **customers**.

## What it is for

When people are at your business, they can see information like:

a welcome note from you

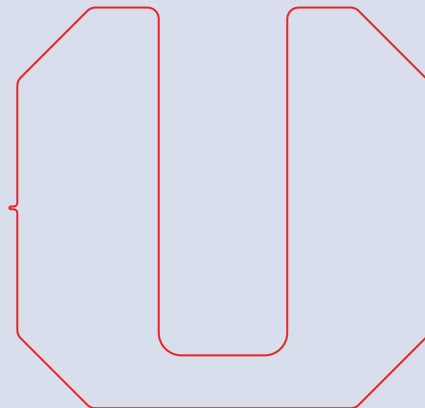

prompts to check in or like you

relevant posts from your Facebook Page

their friends' recommendations about you

## How it works

The Facebook Bluetooth® Beacon uses Bluetooth® technology with the Facebook app to show information about your business. It uses a secure and private signal, can only send information to phones and doesn't collect any information from phones.

Go to [fb.me/place-tips](https://fb.me/place-tips) to set up your welcome note, see a preview of what your customers will see or find answers to your questions.
