

3 Organize your stationery in Synergy's divider

POWER ON/OFF

To turn your Synergy on, press and hold down the **circle button**. The device should power on within three seconds. You will hear a musical sound, letting you know that the speaker is now on.

To turn your Synergy off, press and hold down the power button. You will hear another musical sound, indicating that the speaker is now off.

NOTE: After several minutes of non-use, Synergy will power off on its own in order to conserve its battery.

PLAYING MUSIC WITH SYNERGY

The power button also serves as the "Play/Pause" button for the speaker. Simply press the power button in order to play or pause your music. To adjust the volume, use the **volume up** and **volume down** (+/-) buttons directly on the speaker itself.

USING THE MICROPHONE

Synergy also features a Bluetooth®-enabled microphone. It is located on the inside of the speaker. Use the device as your own personal speakerphone while connected to Bluetooth®.

BLUETOOTH®

Any Bluetooth®-enabled device (4.1) can be paired with Synergy.

A. Turn on your Bluetooth® device and activate it by turning on the Bluetooth® mode. You can find the Bluetooth® menu in the Options or Settings menus on your device.

B. Power on Synergy. When Synergy is turned on, a flashing blue light will pulse around the buttons. The speaker will then enter an auto-pairing mode and attempt to pair with a nearby Bluetooth® device.

C. Once turned on, Synergy should appear on your device's Bluetooth® list. If a message such as "Not Paired" or "Not Connected" appears, select "Synergy" to connect.

D. Once pairing is successful, you will see a solid (non-flashing) blue light on the buttons.

You may now play music on Synergy through your device. The next time Synergy is powered on, it will automatically link with the last paired Bluetooth® device. To pair with a new device, follow step A-C above.

NOTE: A Bluetooth® device must be within 33ft. of Synergy to be paired with it.

SAFETY INFORMATION

1. Read these instructions carefully for best use.
2. DO NOT expose Synergy to rain or moisture. DO NOT use Synergy near water.
3. DO NOT use the Synergy near open flames, such as candles, heat sources such as radiators and stoves, or any other heat-producing appliances.
4. Only clean Synergy with a dry cloth.
5. Only use attachments/accessories as specified by the manufacturer.
6. If Synergy is to be unused for an extended period of time (1 month or longer), fully charge the unit before storing and detach any cables or accessories.
7. Always make sure you can easily access the device's main power button.

FCC Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
