

Important Product Information Guide

This Important Product Information Guide contains safety, handling, regulatory, and software license information, as well as the one-year limited warranty for nabi.

Important Safety and Handling Information

WARNING: Failure to follow these safety instructions could result in fire, electric shock, or other injury or damage to nabi or other property.

Carrying and Handling nabi. nabi contains sensitive components. Do not drop, disassemble, open, crush, bend, deform, puncture, shred, microwave, incinerate, paint, or insert foreign objects into nabi.

Avoiding Water and Wet Locations. Do not use nabi in rain or other wet locations. Take care not to spill any food or liquid on nabi. In case nabi gets wet, unplug all cables, turn off nabi (press and hold the Power button, and then select OK in the Power Off window) before cleaning, and allow it to dry thoroughly before turning it on again. Do not attempt to dry nabi with an external heat source, such as a microwave oven or hair dryer. A nabi that has been damaged as a result of exposure to liquids is not serviceable and not covered under warranty.

Repairing or Modifying nabi. Never attempt to repair or modify nabi yourself. Disassembling nabi may cause damage that is not covered under the warranty. nabi does not contain any user-serviceable parts. Service should only be provided by a Fuhu Authorized Service Provider. If nabi has been in contact with liquids, punctured, or subjected to a severe fall, do not use it until you take it to a Fuhu Authorized Service Provider. For service information, please visit: www.nabitablet.com/support.

Battery Replacement. The rechargeable battery in nabi should be replaced only by Fuhu. For more information about battery replacement service, please visit: www.nabitablet.com/support.

Charging nabi. To charge nabi, only use the nabi Power Adapter. The nabi Power Adapter may become warm during normal use. Always allow adequate ventilation around the nabi Power Adapter. Do not connect or disconnect the nabi Power Adapter with wet hands. Unplug the nabi Power Adapter if any of the following conditions exist:

- The power cord or plug has become fraved or damaged.
- · The adapter is exposed to rain, liquid, or excessive moisture.
- The adapter case has become damaged.
- You suspect the adapter needs service or repair.
- You want to clean the adapter.

Read all safety instructions for any products and accessories before using with nabi. Fuhu is not responsible for the operation of third-party accessories or their compliance with safety and regulatory standards.

Avoiding Hearing Damage. Permanent hearing loss may occur if headphones are used at high volume. Set the volume to a safe level. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing:

- Limit the amount of time you use earbuds, headphones, speakers, or earpieces at high volume.
- · Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can't hear people speaking near you.

Driving and Riding Safely. Use of nabi alone or with headphones (even if used only in one ear) while driving a vehicle or riding a bicycle is not recommended and is illegal in some areas. Check and obey the laws and regulations on the use of mobile devices like nabi in the areas where you drive or ride. Be careful and attentive while driving or riding a bicycle. If you decide to use nabi while driving, keep in mind the following quidelines:

- Give full attention to driving or riding and to the road. Using a mobile device
 while driving or riding may be distracting. If you find it disruptive or distracting
 while operating any type of vehicle, riding a bicycle, or performing any
 activity that requires your full attention, safely pull off the road and park if
 driving conditions allow.
- Do not email, take notes, or perform any other activities that require your attention while driving. Composing or reading emails or jotting down a to do list takes attention away from your primary responsibility, driving safely.

Seizures, Blackouts, and Eyestrain. A small percentage of people may be susceptible to blackouts or seizures (even if they have never had one before) when exposed to flashing lights or light patterns such as when playing games or watching video. If you have experienced seizures or blackouts or have a family history of such occurrences, you should consult a physician before playing games or watching videos on your nabi. Discontinue use of nabi and consult a physician if you experience headaches, blackouts, seizures, convulsion, eye or muscle twitching, loss of awareness, involuntary movement, or disorientation. To reduce risk of headaches, blackouts, seizures, and eyestrain, avoid prolonged use, hold nabi some distance from your eyes, use nabi in a well-lift room, and take frequent breaks.

Glass Parts. The outside cover of the nabi screen is made of glass. This glass could break if nabi is dropped on a hard surface or receives a substantial impact. If the glass chips or cracks, do not touch or attempt to remove the broken glass and stop using nabi. Glass cracked due to misuse or abuse is not covered under the warranty.

Choking Hazards. nabi contains small parts, which may present a choking hazard to small children. Keep nabi and its accessories away from small children.

Repetitive Motion. When you perform repetitive activities such as typing or playing games on nabi, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Take frequent breaks and if you have discomfort during or after such use, stop use and see a physician.

Potentially Explosive Atmospheres. Turn off nabi (press and hold the Power button, and then select OK in the Power Off window) when in any area with a potentially explosive atmosphere. Do not charge nabi and obey all signs and instructions. Sparks in such areas could cause an explosion or fire, resulting in serious injury or even death. Areas with a potentially explosive atmosphere are often, but not always, marked clearly. Potential areas may include: fueling areas (such as gas stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine.

Using Connectors and Ports. Never force a connector into a port. Check for obstructions on the port. If the connector and port don't join with reasonable ease, they probably don't match. Make sure that the connector matches the port and that you have positioned the connector correctly in relation to the port.

Keeping nabi Within Acceptable Temperatures. Avoid dramatic changes in temperature or humidity when using nabi, as condensation may form on or within nabi. Don't leave nabi in your car, because temperatures in parked cars can exceed acceptable temperatures. When you're using nabi or charging the battery, it is normal for nabi to get warm. The exterior of nabi functions as a cooling surface that transfers heat from inside the unit to the cooler air outside.

Keeping the Outside of nabi Clean. Handle your nabi with care to maintain its appearance. To clean nabi, unplug all cables and turn off nabi (press and hold the Power button, and then select OK in the Power Off window). Then use a soft, slightly damp, lint-free cloth. Avoid getting moisture in openings. Don't use window cleaners, household cleaners, aerosol sprays, solvents, alcohol, ammonia, or abrasives to clean nabi. To clean the screen, simply wipe nabi's screen with a soft, lint-free cloth to remove oil left by your hands.

Exposure to Radio Frequency Energy. nabi contains radio transmitters and receivers. When on, nabi sends and receives radio frequency (RF) energy through its antenna. nabi is designed and manufactured to comply with the limits for exposure to RF energy set by the Federal Communications Commission (FCC).

Additional Information. For more information from the FCC about exposure to RF energy, please visit: www.fcc.gov/oet/rfsafety.
