

HANDS-FREE OPERATION

HANDS-FREE SYSTEM

Hands-free system allows you to make or receive a call without taking your hands off the steering wheel by connecting your mobile phone. This system supports Bluetooth. Bluetooth is a wireless radio data transferring system by which you can make calls without your mobile phone being connected with a cable or placed on cable. If your mobile phone does not support Bluetooth, this system can not function.

⚠ CAUTION

While driving, do not use a mobile phone or connect the bluetooth phone.

ATTENTION

- Do not leave your mobile phone in the car. The temperature inside may be high and damage the phone.
- When you dispose of your car, take care to delete all personal data that are registered in your Chevrolet AUDIO system. You should delete the following Hands-free data from the system;
 - Bluetooth phone data

NOTE

In the following conditions, the system may not function.

- The mobile phone is turned off.
- The current position is outside the communication area.
- The mobile phone is not connected.
- The mobile phone has a low battery.

- The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and use of such marks by General MOTORS LIMITED is under license. Other trade marks and trade names are those of their respective owners.
- Compatible Bluetooth Specifications: Bluetooth Specification Ver. 1.2 or later
- Compatible Profiles: HFP Ver. 1.5 or later
OPP Ver. 1.1 or later

FCC ID: BABFT0020A

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

CAUTION

Radio Frequency Radiation Exposure

This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65.

This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE).

But it is desirable that it should be installed and operated with at least 20cm

and more between the radiator and person's body (excluding extremities: hands, wrists, feet and ankles).

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.
