

Activity Tracker User Manual

Model: FT900

Package content

This product contains an item:

- **Activity Tracker**

Activity Tracker layout

Wearing

To calculate your movement accurately, wear the Activity Tracker in your left/right wrist.

Replacing the Battery

In replacing the battery, here are the procedures:

1. Unscrew the four screws (See label **A**).
2. Remove the back case (See label **B**).
3. Label **C** is the battery. It is now ready to be replaced.

Specifications

Type	Description
General	
Type	Wearable
Tracking metrics	Motion / Steps
Processor	nRF-51822
Memory	2Mb (256 KB) + 2Mb Flash Memory
Water Resistance	3 ATM
Power	
Battery life	150 days
Syncing and connectivity	
Syncing type	Wireless (Bluetooth Low Energy)
Display	
Screen resolution	144 x 168 mm
Screen type	TFT

FCC Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

WARNING Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA). These requirements set a SAR limit of 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use when properly worn on the body is W/kg.
