24-pin dot matrix printers

FUJITSU
DI7600

FUJITSU DL7600
DOT MATRIX PRINTER
USER'S MANUAL

IMPORTANT NOTE TO USERS

READ THE ENTIRE MANUAL CAREFULLY BEFORE USING THIS PRODUCT. INCORRECT USE OF THE PRODUCT MAY RESULT IN INJURY OR DAMAGE TO USERS, BYSTANDERS OR PROPERTY.

While FUJITSU ISOTEC has sought to ensure the accuracy of all information in this manual, FUJITSU ISOTEC assumes no liability to any party for any damage caused by any error or omission contained in this manual, its updates or supplements, whether such errors or omissions result from negligence, accident, or any other cause. In addition, FUJITSU ISOTEC assumes no liability with respect to the application or use of any product or system in accordance with descriptions or instructions contained herein; including any liability for incidental or consequential damages arising therefrom. FUJITSU ISOTEC DISCLAIMS ALL WARRANTIES REGARDING THE INFORMATION CONTAINED HEREIN, WHETHER EXPRESSED, IMPLIED, OR STATUTORY.

FUJITSU ISOTEC reserves the right to make changes to any products described herein without further notice and without obligation.

Using This Product in High-risk Situations

This product is designed and manufactured for use in standard applications such as office work, personal devices, household appliances, and general industrial use. This product is not intended for special uses (nuclear-reactor control in atomic energy facilities, aeronautic and space systems, air traffic control, operation control in mass transit systems, medical devices for life support, or missile firing controls in weapons facilities) where particularly high reliability requirements exist, where the pertinent levels of safety are not guaranteed, or where a failure or operational error could threaten a life or cause a physical injury (hereafter referred to as “high-risk” use).

Customers considering the use of this product for high-risk applications must have safety-assurance measures in place beforehand. Moreover, they are requested to consult our sales representative before embarking on such specialized use.

Federal Communications Commission Radio Frequency Interference Statement for United States Users

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15B of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measure:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTES

1. Testing of this equipment was performed on model number M33325A.
2. The use of a nonshielded interface cable with the referenced device is prohibited. The length of the parallel interface cable must be 3 meters (10 feet) or less. The length of the optional serial interface cable must be 15 meters (50 feet) or less.
3. The length of the power cord must be 3 meters (9.8 feet) or less.

Notice for Canadian Users

This class B digital apparatus (M33325A) meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil (M33325A) numérique de la Classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

Notice for German Users

ENERGY STAR

Energy Saving

As an ENERGY STAR® Partner, FUJITSU ISOTEC LIMITED has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

The International ENERGY STAR® Office Equipment Program is an international program that promotes energy saving through the use of computers and other office equipments. The program backs the development and dissemination of products with functions that effectively reduce energy consumption. It is an open system in which business proprietors can participate voluntarily. The targeted products are office equipment such as computers, displays, printers, facsimiles, and copiers. Their standards and logos are uniform among participating nations.

CE Declaration

This product sold in Europe conforms to the standard in accordance with EC Directives.

The contents of this manual may be revised without prior notice and without obligation to incorporate changes and improvements into units already shipped.

Every effort has been made to ensure that the information included here is complete and accurate at the time of publication; however, Fujitsu Isotec Limited cannot be held responsible for errors and omissions.

Printer model specifications differ with the power supply input voltage (M33325A; 100-120 or M33325B; 220-240 VAC).

ABOUT THIS MANUAL

Thank you for buying the Fujitsu DL7600 dot matrix printer. You can expect years of reliable service with very little maintenance. This manual explains how to use your printer to full advantage. It is written for both new and experienced printer users.

This manual describes how to install, set up, and use your printer and printer options. It also explains how to keep the printer in good working condition and what to do should something go wrong. Detailed procedures are provided for first-time users. Experienced users can skip some of the details, using the table of contents and chapter introductions to locate information.

This manual has several appendixes, a glossary, and an index. Appendix A lists supplies and additional documentation and information available from your dealer or authorized Fujitsu representative. Fujitsu offices are listed at the end of the manual.

PRINTER MODELS AND OPTIONS

This manual covers model DL7600, a 136-column printer. Each model has a 100-120 (M33325A) VAC or 220-240 (M33325B) VAC power supply. A LAN card, a user add-on option, can be installed only on printer models with the Centronics parallel+USB interfaces. You must specify these when purchasing the printer.

Other options include a cut sheet feeder can be added by yourself after purchasing the printer.

DL7600	
—	Basic specifications
	Print line at 10 cpi: 136 columns (DL7600)
—	Control Panel: LED type
	LCD type
—	Interface: Centronics parallel + RS-232C
	Centronics parallel + USB + LAN (LAN:user option)
—	Alternative specification
	Power supply: 100-120 VAC (M33325A)
	220-240 VAC (M33325B)
—	User add-on option
	LAN card
	Cut sheet feeder
	Tractor unit
	Large Paper Table
	Large Stacker
	Small paper table

cpi: characters per inch

ORGANIZATION

This manual is organized as follows:

Quick Reference summarizes everyday printer operations. After you become familiar with the printer, use this section as a memory aid.

Chapter 1, Introduction, introduces the printer and identifies key features and options that enhance the printer's capabilities.

Chapter 2, Setting Up, gives step-by-step procedures for setting up the printer for immediate use and identifies the main parts of the printer. If this is your first printer, you should read the entire chapter before attempting to use the printer.

Chapter 3, Paper Handling, explains how to load and use paper with your printer.

Chapter 4, Printing, covers basic printing operations. This chapter describes everyday operations from the printer's control panel, such as loading paper and selecting print features, in detail. After you become more familiar with the printer, use **Quick Reference** at the beginning of the manual to refresh your memory as needed.

Chapter 5, Using Setup Mode, describes how to change the printer's optional settings, such as print features, hardware options, and top-of-form. Most settings only affect print features such as the typestyle and page format. Note that certain settings directly affect hardware and software compatibility. Refer to this chapter as indicated in Chapter 2 or as required.

Chapter 6, Maintenance, explains basic maintenance procedures for this printer.

Chapter 7, Trouble-Shooting, describes problem-solving techniques. Before you contact your dealer for help, check the list of problems and solutions provided in this chapter.

Chapter 8, Installing Options, describes the options available for the printer and explains how to install them.

At the end of this manual, you will find several appendixes, a glossary, and an index. Appendix A gives order numbers for printer supplies, options, and publications. Other appendixes provide additional technical information about the printer.

CONVENTIONS

Special information, such as warnings, cautions, and notes, are indicated as follows:

WARNING

A WARNING indicates that personal injury may result if you do not follow a procedure correctly.

CAUTION

A CAUTION indicates that damage to the printer may result if you do not follow a procedure correctly.

NOTE

A NOTE provides “how-to” tips or suggestions to help you perform a procedure correctly. NOTES are particularly useful for first-time users.

For Experienced Users:

If you are familiar with this printer or with dot matrix printers in general, this information will help you use the manual effectively.

- Warning symbols

Various graphic symbols are used in this manual. They serve as signs to help users of this product use the product safely and correctly as well as prevent damage and personal injury to the users or bystanders. The following tables show and explain each symbol. Be sure that you understand the meaning of each symbol before reading the manual.

 WARNING	 CAUTION
A WARNING indicates that death or serious personal injury may result if you do not follow a procedure correctly.	A CAUTION indicates that personal injury or property damage may result if you do not follow a procedure correctly.

Examples and explanations of graphic symbols	
	△ indicates a warning or caution item. By itself, the image in this symbol suggests the meaning of the warning or caution (the example on the left is a caution of possible electric shock).
	⊘ indicates a prohibited action. The image in or beside this symbol expresses the prohibited action (the example on the left indicates that disassembly is prohibited).
	● indicates a direction that must be observed. The image in this symbol shows the direction (the example on the left shows the direction in which a power plug is disconnected from an outlet).
 Caution: Hot	This symbol and accompanying statement indicate a risk of injury from a hot object.
 Caution: Flammable	This symbol and accompanying statement indicate a risk of fire.
 Do not touch	This symbol and accompanying statement indicate a risk of injury from touching part of the equipment.
 Do not disassemble	This symbol and accompanying statement indicate a risk of injury, such as from electric shock, caused by disassembling the equipment.
 General prohibited action	This symbol and accompanying statement indicate a general prohibited action.
 General caution	This symbol and accompanying statement indicate a general caution.

Notes on Safety

■ WARNING

Do not place a container containing water, such as a vase, potted plant, and drinking glass, or a metal object on or near the printer.

Otherwise, electric shock or fire may result.

Do not place the printer in a humid or dusty area, in an area with explosive fumes, an area with poor ventilation or close to a fire.

Otherwise, electric shock or fire may result.

Use only one of the power cords included with this product, for this product. Do not use any other power cord for this product.

Otherwise, electric shock or fire may result.

Do not use this product in an area exposed to a high level of moisture, such as a bathroom and shower room.

Otherwise, electric shock or fire may result.

 **WARNING**

When mounting or removing an optional device or component, turn off the power to the printer and personal computer and disconnect their power plugs from the outlets before performing the work.

Otherwise, electric shock may result.

Connect only Fujitsu-recommended optional devices and components.

Otherwise, electric shock, fire, or failure may result.

 **CAUTION**

Do not block openings in the printer (e.g., ventilation openings).

If ventilation openings are blocked, heat accumulates inside the printer, possibly resulting in a fire.

Do not place a heavy object on the printer. Also, do not subject the printer to shocks.

Otherwise, the printer may become unbalanced, causing it to fall, and possibly resulting in personal injury.

Do not place the printer in an area exposed to strong vibration or an unstable area such as on a slope.

Otherwise, the printer may fall or topple, possibly resulting in personal injury.

Do not leave the printer in an area exposed to direct sunlight for a long time, such as inside a car under the sun or any other area subjected to high temperatures.

Otherwise, the printer surface heats up, possibly melting covers or resulting in other deformities, or the inside of the printer may become extremely hot, possibly resulting in fire.

Before moving the printer, be sure to disconnect the power plug from the outlet and disconnect all connected cables from the printer.

Otherwise, the power cord may be damaged, possibly resulting in electric shock or fire, or the printer may fall or topple, possibly resulting in personal injury.

Before connecting or disconnecting a printer cable, be sure to turn off the power to the printer and personal computer.

Performing that and related work without the power turned off may result in a personal computer or printer failure.

■ Notes about the printer in operation

If the printer is making a strange noise, which indicates a problem, discontinue printer operation. Request your printer dealer to fix the problem.

Continued operation of the printer without repairs may result in electric shock or fire.

Do not use a power source whose voltage is other than that indicated. Also, an excessive number of plugged-in power cords must not be connected to a single outlet.

Otherwise, electric shock or fire may result.

Do not spill any liquid, such as water, on the printer.

Otherwise, electric shock or fire may result.

Do not damage or modify the power cord.

The power cord may be damaged by placing a heavy object on it, stretching it excessively, forcibly bending it, twisting it, or heating it, and this may result in electric shock or fire.

Do not use the power cord if it or the power plug is damaged or the plug does not fit securely in the outlet receptacle.

Using the power cord in that condition may result in electric shock or fire.

Do not insert the power cord into an outlet or turn on the power to the printer when any of its covers has been removed.

Otherwise, electric shock or fire may result.

Prevent foreign objects, such as metal shards and inflammable materials, from being inserted or dropped into any openings in the printer (e.g., ventilation openings).

Otherwise, electric shock or fire may result.

Do not disconnect the power plug from the outlet while the power to the printer is turned on.

Otherwise, the plug becomes deformed, possibly resulting in fire.

Do not remove the main printer cover or the cover for the cable connectors except as necessary. To check and repair internal components, request your printer dealer to do so.

Some internal components use high voltage, and touching them may result in electric shock.

Do not modify the printer by yourself.

Otherwise, electric shock or fire may result.

Do not connect or disconnect the power plug with wet hands.

Otherwise, electric shock may result.

 **WARNING**

If excessive heat, smoke, a strange odor, or a strange noise is coming from the printer or any other abnormality is observed, immediately turn off the power to the printer by using the power switch, and be sure to disconnect the power plug from the outlet.

Then, after verifying the end of the abnormality (e.g., no more smoke is coming from the printer), request your printer dealer to make repairs. Do not repair the printer by yourself as doing so is dangerous.

Continued use of the printer when it is operating abnormally may result in electric shock or fire.

If a foreign object (e.g., water or other liquid, metal shard) has entered the printer, immediately turn off the power to the printer by using the power switch, and disconnect the power plug from the outlet. Then, contact your printer dealer.

Continued use of the printer in that condition may result in electric shock or fire. Customers who use the printer near children should take especial care regarding this point.

If the printer is dropped or a cover is damaged, turn off the power to the printer by using the power switch, and disconnect the power plug from the outlet. Then, contact your printer dealer.

Continued use of printer in that condition may result in electric shock or fire.

Before performing cleaning, maintenance, or troubleshooting work on the printer, switch off the power switch, and be sure to disconnect the power plug from the outlet.

Performing that work on the printer without the power turned off may result in burns or electric shock.

Dust accumulates on or near the metal parts of the power plug, so wipe away that dust with a dry cloth.

Continued use of printer in that condition may result in fire.

Do not drop or strike the printer, such as by hitting it against something.

Otherwise, a failure may result.

 **CAUTION**

Insert the power plug completely into an outlet so that it is securely connected.

Otherwise, electric shock or fire may result.

Exercise caution to keep loose clothing, hair, neckties, etc. away from paper feed- or ejection openings, and tractors while the printer is operating.

Otherwise, personal injury may result.

When disconnecting the power plug from the outlet, pull it out while grasping the plug, not the cord.

If you pull it out while grasping the cord, the insulation may be damaged or the cable core may be exposed or damaged, possibly resulting in electric shock or fire.

Do not cover or wrap the printer with a cloth or anything else while it is operating.

Otherwise, heat accumulates, possibly resulting in fire.

Do not use the power cord with it bunched together.

Otherwise, heat accumulates, possibly resulting in fire.

If the printer operates when the front cover is unclosed, immediately turn the printer off, and unplug the power cord from wall outlet.

Then contact your printer dealer to make repair of safety interlock.

Continued use of the printer in that condition, operation of the mechanism inside of the front cover may become a cause of an injury.

If the printer is not to be used for a long time, disconnect the power plug from the outlet for safety reasons.

Otherwise, electric shock or fire may result.

If a lightning storm is in nearby, disconnect the power plug from the outlet.

Leaving the plug connected to the outlet may result in damage to the printer or other property damage.

The print head and internal frames become extremely hot during printer operation and remain so immediately afterwards. Do not touch these parts until sufficient time has passed to allow them to cool.

Otherwise, burns or personal injury may result.

 **CAUTION**

Do not touch the paper feed- or ejection openings while the printer is operating.

Otherwise, personal injury may be result.

Do not touch the printer cable connectors or the metal part of the print head.

Otherwise, personal injury or a printer failure may result.

Do not touch the print head while it is moving.

Otherwise, burns or personal injury may result.

Note that continuous forms that are fed in the reverse direction continuously may come off the paper feed tractors.

Operate the printer with the paper thickness lever set to the appropriate paper thickness.

Use only an original ribbon cassette that is specified as suitable by Fujitsu.

Textile fibers accumulate on components inside the printer and parts of the roller, so clean these parts regularly.

Do not turn the ribbon feed knob in the reverse direction.

Otherwise, the ribbon may become jammed and stuck.

If printing is started with a slack ribbon, the ribbon may become tangled or the ribbon feed mechanism may become locked.

The print head is extremely hot immediately after printing. When replacing the ribbon, verify that the print head is sufficiently cool before setting the print head to the ribbon replacement position.

Q

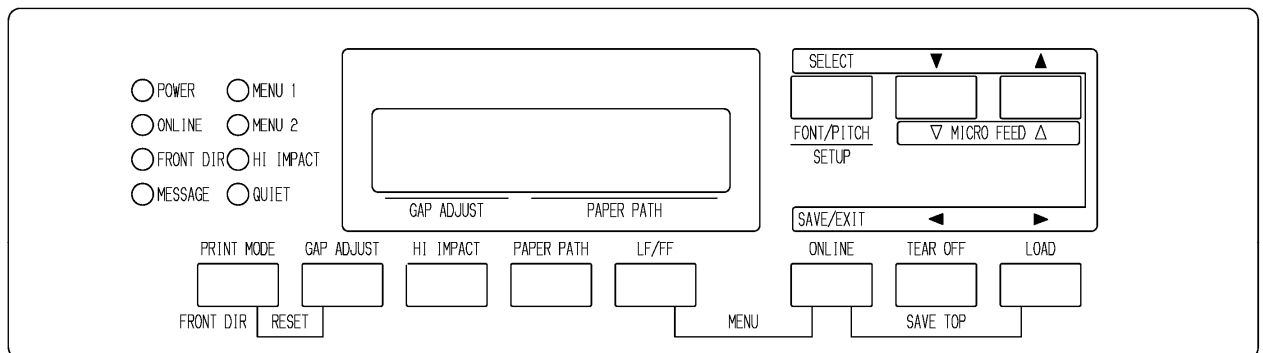

QUICK REFERENCE

Quick Reference is written for experienced users — users who are familiar with how the printer works, but who may need to refresh their memory occasionally. *Only the printer's normal (non-setup) mode is covered.* For details on setup mode, see Chapter 5.

Normal mode operation includes everyday operations, such as paper handling and font selection. The printer comes up in normal mode when turned on.

LED type Control panel

LCD type Control panel

The table on the next page lists normal mode operations with online and offline conditions and gives the required user response. Operations are listed by functions.

QUICK REFERENCE

Printer Operations (Normal Mode)

✓: Operation can be performed when the printer is in this state.

—: Operation cannot be performed when the printer is in this state.

N/A: Does not apply.

Operation	Online	Offline	Required Response
Enter normal mode	N/A	N/A	Turn printer on. (Press I on the power switch.)
Place printer offline (Stop printing)	✓	—	Press ONLINE. So that ONLINE lamp is off.
Place printer online (Start printing)	—	✓	Press ONLINE. So that ONLINE lamp lights.
Load paper	✓	✓	Press LOAD.
Line feed (forward)	✓	✓	Press LF/FF within three seconds.
Unload paper to park position (both front and rear-fed continuous forms)	✓	✓	Press LOAD.
Form feed (forward)	✓	✓	Press and hold LF/FF until the operation starts.
Eject single sheets	✓	✓	Press and hold LF/FF until the operation starts.
Tear off forms (continuous forms only)	✓	✓	Press TEAR OFF. Tear off forms, then press any button to retract forms.
Micro feed (backward)	✓	✓	Press MICRO▲.
Micro feed (forward)	✓	✓	Press MICRO▼.
Select a direction from which cut sheet is ejected.	—	✓	Press FRONT DIR. When FRONT DIR lamp lights, cut sheet is ejected to the front side. When FRONT DIR lamp is off, cut sheet is ejected to the rear side.
Set/reset QUIET MODE.	✓	—	Press PRINT MODE.
Set/reset high impact mode	✓	✓	Press HI IMPACT.
Select a paper input source	✓	✓	Press PAPER PATH.

Printer Operations (Normal Mode) (Cont.)

✓: Operation can be performed when the printer is in this state.

—: Operation cannot be performed when the printer is in this state.

N/A: Does not apply.

Operation	Online	Offline	Required Response
Select auto adjusting for paper thickness.	✓	✓	(LED type) Press AUTO GAP 2 second or more. So that AUTO GAP lamp lights (LCD type) Press GAP ADJUST. So that LCD display "AUTO"
Adjust for paper thickness manually	✓	✓	(LED type) Press AUTO GAP 2 second or more. So that AUTO GAP lamp is off. Then manual gap dial become effective. (LCD type) Press GAP ADJUST repeatedly. So that LCD display "GAP-1~GAP9,GAP-A~GAP-D"
Save adjusted load positions	✓	✓	Press ONLINE and LOAD.
Select MENU1 or MENU2	—	✓	Press ONLINE and LF/FF.
Clear print buffer	—	✓	(LED type) Press FRONT DIR and AUTO GAP. (LCD type) Press PRINT MODE and GAP ADJUST.
Reset power-on defaults	✓	✓	Turn printer off, then on.
Start/stop/resume printing	✓	✓	Start: Send print command. Stop/resume: Press ONLINE.
Resume printing after paper	—	✓	Press ONLINE.
Enter setup mode	—	✓	(LED type) Press AUTO GAP and HI IMPACT. (LCD type) Press SET UP.
Exit to normal mode Self-test printing	✓	✓	Start: Turn printer off. Press LF/FF while turning printer on. Pause/resume: Press LOAD. Exit: Press ONLINE.

QUICK REFERENCE

INTRODUCTION

Congratulations on purchasing this printer. This printer is a compact, versatile, flat paper path printer that offers maximum compatibility with today's software packages and personal computers.

The 24-wire print head provides crisp, clear printing for business, office, and home environments. This printer is also easy to install and use.

DL7600 dot matrix printer (136 columns)

FEATURES

Key printer features, models and options are listed in the next two sections.

- **Software compatibility.** This printer, which operates primarily with the Fujitsu DPL24C PLUS command set, is compatible with the IBM Proprinter XL24E command set and the Epson ESC/P2 command set.
- **Various character sets.** As basic character sets, IBM PC character sets 1 and 2 are available for the Fujitsu DPL24C PLUS command set and the IBM Proprinter XL24E emulation, and the italic character set and graphics character sets 1 and 2 are available for the Epson ESC/P2 emulation. As national character sets, a total of 56 or 58 national character sets (depending on the emulation), including IBM PS/2 character sets, are available.
- **Multiple fonts.** The printer has nineteen resident fonts: Ten bit-map fonts — Courier 10, Pica 10, Prestige Elite 12, Boldface PS, OCR-B 10, OCR-A 10, Correspondence, Compressed, Draft, and High-speed Draft and nine outline fonts — Timeless, Nimbus Sans, and Courier, each in upright, italic, and bold.
- **High-speed printing.** At 10 cpi, print speed ranges from 180 cps for letter quality to 720 cps for hi-speed draft quality.

- **Large print buffer.** 128K bytes are available in total for storing input data and downloading fonts. A large input data buffer allows you to send files to the printer and return to work in your application. A large download buffer allows you to use custom fonts.
- **136-column print line.** 136-column printers print in landscape mode using legal- or standard-size computer forms.
- **Simple switching of paper types.** The ability to “park” continuous forms makes it easy to switch between continuous forms and single sheets from the control panel. This switching is possible even for an optional cut sheet feeder and second tractor.
- **Dual tractor feeding capability.** The tractor unit is removable and can be converted to front-feed or rear-feed.
- **Multi-path of paper.** The printer has multiple paths to feed paper : For the continuous form front and rear tractor(second tractor is option), For cut sheet loading paper table (front), front csf(option), rear csf(option).Also for cut sheet ejecting front and rear is selectable(front eject paper require removing for next paper loading)
- **Tear-off function.** Available at both the front and the rear of the printer. The tear-off button on the control panel is used.
- **Hight copy capability**
 - Up to nine sheets for front/rear continuous forms and cut sheets fed from front paper table.
 - Up to five sheets for CSF fed
- **Auto paper thickness control.** Features as standard equipment.
- **Auto interface selection.** The printer automatically selects the interface proper to the occasion.
- **Paper skew detection.** The printer detects a skew of paper that is manually fed from the paper table and automatically ejects it without printing.
- **Area-over print prevention.** The printer senses and memorizes the left and right edges of paper when loading the paper. If receiving data beyond either edge, the printer ignores it to prevent breakage of wires of print head.
- **Maintenance-free.** The printer only requires periodic cleaning and changing of the ribbon cartridge.

NOTE

Optional paper table is necessary to use single sheet papers.

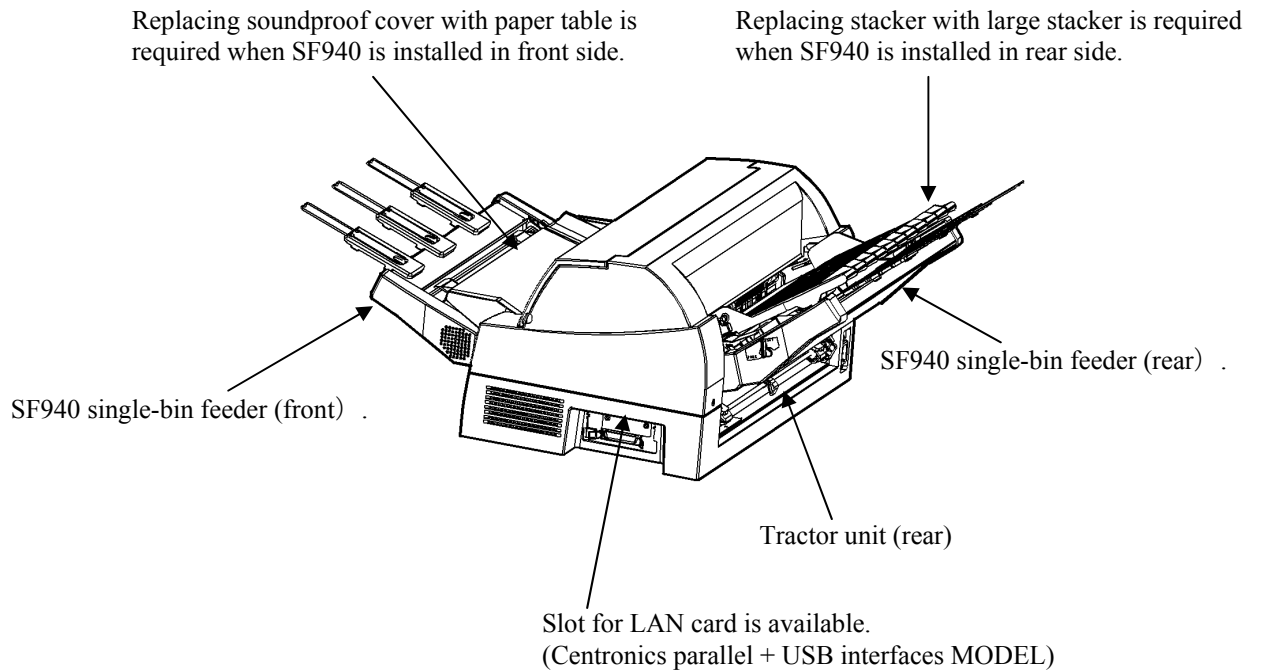

MODELS

- **Power Supply type;** 100-120VAC input (M33325A)
220-240VAC input (M33325B)
- **Interface type;** Centronics parallel + USB interfaces
Centronics parallel + RS232C serial interface
- **Control panel type;** LED type.
LCD type.

OPTIONS

Printer add-on options are listed below. For details, see Chapter 8.

- **Cut sheet feeder.** The SF940 single-bin feeder is available as an option. Two cut sheet feeders can be installed in front of and behind the printer at the same time. A cut sheet feeder allows single cut sheets and multiple-part cut sheets to be fed automatically.
- **Tractor unit.** A second tractor unit may be bought as an additional option if dual tractor feeding capability is required.
- **LAN card.** A LAN card is available as a printer add-on option. A user installable function, the LAN card can be installed only on printer models with the Centronics parallel + USB interfaces. For details, see Chapter 8.

OPTIONS of DL7600 dot matrix printer

INTRODUCTION

- **Small paper table.** Paper table should be installed instead of sound proof cover when use single sheets and install cut sheet feeder to front of printer.
- **Large stacker.** The large stacker accommodates sheets output from the rear. It is used in continuous printing with a cut sheet feeder.
- **Large paper table.** The large paper table helps to increase operability when large cut sheets are used.

Also, sheets that are output from the front are easier to keep properly organized.

Small paper table

Large paper table

OPTIONS of DL7600 dot matrix printer

SETTING UP

Your new printer is easy to install and set up. This chapter tells you how to set up the printer and start printing right away. If this is your first printer, you should read the entire chapter before attempting to use the printer.

In this chapter, you will learn how to:

- Unpack, assemble, and select a good location for the printer
- Identify the printer's major parts
- Connect the power and interface cables
- Test the printer before connecting it to your computer
- Install the printer driver
- Select an emulation and print a sample page using your software

If you have a problem while setting up the printer, review the section Solving Problems in Chapter 7. If the problem persists, contact your dealer.

SELECTING A GOOD LOCATION

This printer is suitable for most business, office, and home environments. To obtain peak performance from the printer, select a location that meets the following guidelines:

- ✓ Place the printer on a sturdy, level surface.
- ✓ Place the printer near a well-grounded AC power outlet.
- ✓ Ensure easy access to the front and rear of the printer by leaving several inches of space around the printer. Do not block the air vents on the front, left, and right sides of the printer.
- ✓ Do not place the printer in direct sunlight or near heaters.
- ✓ Make sure that the room is well-ventilated and free from excessive dust.
- ✓ Do not expose the printer to extremes of temperature and humidity.

- ✓ Use only the power cord supplied with the printer or recommended by your dealer. Do not use an extension cord.
- ✓ Do not plug the printer into a power outlet that is shared with heavy industrial equipment, such as motors, or appliances, or such as copiers or coffee makers. Such equipment often emits electrical noise or causes power degradation.

UNPACKING THE PRINTER

Unpack the printer as follows:

1. Open the carton and remove the printer and its components.
Make sure that you have all of the items shown below. Note that the power cord supplied depends on the printer model (100-120 or 220-240 VAC power supply).

Checking items received

2. Carefully examine each item for damage. Report any problems to your dealer or shipping agent.
3. Place the printer where you plan to use it.
4. Remove the tapes and cushions securing the printer. Open the front cover and remove the shipping restraint cardboard that holds the print head carriage in place (shown below).

Removing the shipping restraint cardboard

5. Store the original shipping carton and packaging materials for future use. For example, the original packaging is ideal for use when you move or ship your printer to another location.

NOTE

The interface cable is not included with the printer. You must purchase it separately. Connection of the interface cable is described later in this chapter.

Checking Options and Supplies

The following options and supplies, if ordered, are shipped separately:

- LAN card (option)
- Cut sheet feeder (option)
- Tractor unit (option)
- Small Paper Table (option)
- Large Stacker (option)
- Large Paper Table (option)
- Extra monochrome ribbon cartridges

Make sure that you received all the options you ordered. Installation of options is described in Chapter 8.

Once you are sure you have everything, you are ready to assemble the printer.

ASSEMBLING THE PRINTER

This section explains how to handling the soundproof cover, changing the tractor unit position and installing the ribbon cartridge.

Handling the soundproof cover

You must open and close the soundproof cover when you operate the front tractor.

1 Open the soundproof cover.

Slightly raise the front end of the front tractor cover (1), then pull (2) and lift the table (3).

2 Close the sound proof cover.

Lower the soundproof cover as shown in the figure below (1), then push (2) and close (3) the cover.

The complete setup conditions are shown below. Make sure that the top end of the soundproof cover is engaged with the printer guide pin and the guide pin on the soundproof cover is inserted into the cover groove.

NOTE

Do not apply unreasonable force while you are handling the soundproof cover. It could cause damage. Also, do not leave the soundproof cover in incomplete setting. Running the printer with the soundproof cover left in incomplete conditions could cause a paper jam.

Installing the Ribbon cartridge

(HOT)

CAUTION <HOT>

The print head and metal frame is hot during printing or immediately after printing. Do not touch them until it cools down.

1. Prepare the printer to install the ribbon cartridge.
Make sure that the print head protecting cardboard used for transportation has been removed, then turn on the printer power with the top cover closed. Ensure that the print head moves and stops at the ribbon replacement position.

NOTE

If you turn on the printer power with the top cover open, the print head does not move. Turn the printer power with the top cover closed.

2. Turn off the printer power.
Make sure that the power switch is set to the “O” side.
3. Open the front cover of the printer. Slide the print head carriage so that its center is at the position for replacing the ribbon cartridge (indicated by the triangle marking on the front of the upper cover).
4. Open the control panel for easy installation of ribbon cassette.

Preparing the printer to install the ribbon cartridge

5. Remove the ribbon cassette from its package. Push in the two ribbon release tabs. The tabs snap into the cassette and the ribbon feed mechanism engages.

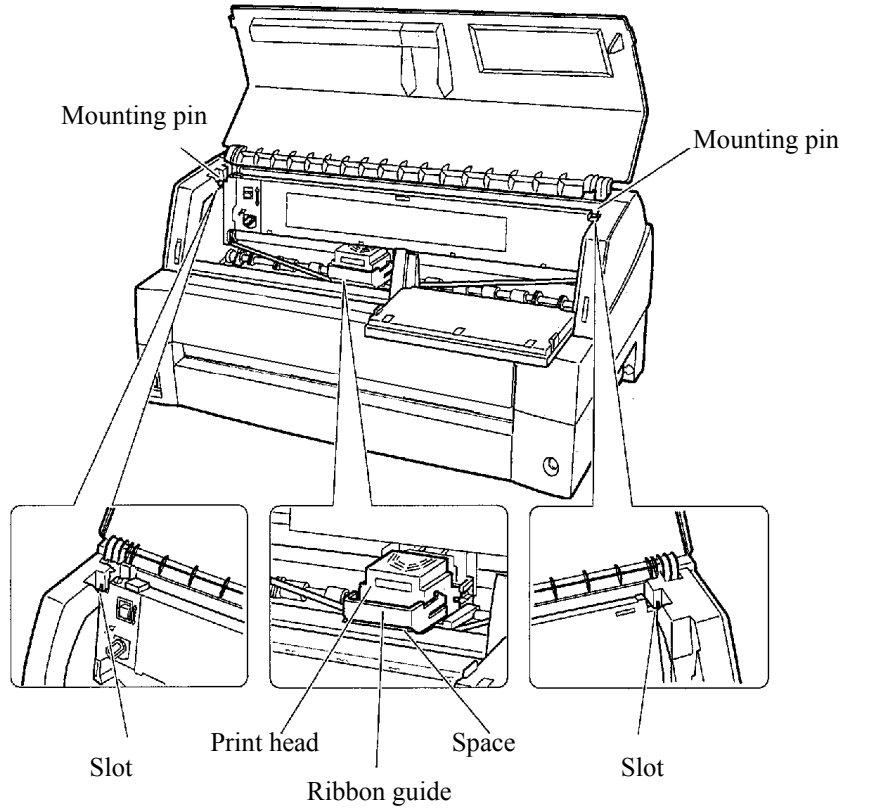

Preparing the ribbon cassette

6. Remove the ribbon guide (green part) from the ribbon cassette. Don't turn the ribbon feed knob before installation.

Preparing the ribbon cassette

- Put the green ribbon guide into the space in front of print head. And then place the mounting pins (both side of ribbon cassette) on the slot of the printer cover. And then push the ribbon cassette so that the ribbon cassette is installed vertically.

Installing the ribbon cassette

8. Attach the green ribbon guide on the print head.
Please make sure that the ribbon slack lightly. (If the ribbon is strained, it will quirk when installation.) Push the green ribbon guide until the triangle mark "▼" meets the round projection of print head.

9. Turn the ribbon feed knob clockwise to take up any slack in the ribbon.

10. Return the control panel.
11. Close the front cover.

NOTE

A Fujitsu ribbon cassette is recommended. Don't use other cassettes. If other cassettes are used, operating problems or a damage of the print head may be caused.

Selecting the Tractor Unit Position

NOTE

This printer uses a detachable tractor that can be used on either the front or back of the printer. You can attach the tractor to either the front or back of the printer according to your installation or operating conditions. The printer is delivered to you with the tractor attached to the front. You can detach it from the front and then attach it to the back if needed.

See “SELECTING PAPER PATH” in Chapter 3.

Mounting and removing the tractor unit

Tractor unit at the front

[Removing the tractor unit]

Raise the soundproof cover. While pressing the lock levers of the tractor frames located on both sides of the tractor unit, lift out the tractor unit to remove it.

[Mounting the tractor unit]

- 1) Position the U-shaped slots on both sides of the tractor unit over the guide pins of the printer unit. (To set the tractor unit in position, line it up with the groove of the left guide pin. The right guide pin has no groove).
- 2) Push down the shaft at the front of the tractor unit until it locks with an audible click. (Do not press the lock levers when pushing down the shaft.)

- 3) Verify that the hooks on both sides of the tractor unit are securely hooked onto guide pin 2 as shown in the following figure.

Tractor unit at the rear

[Removing the tractor unit]

While pressing the lock levers of the tractor frames located on both sides of the tractor unit, lift out the tractor unit to remove it.

[Mounting the tractor unit]

- 1) Position the U-shaped slots on both sides of the tractor unit over the guide pins of the printer unit. (To set the tractor unit in position, line it up with the groove of the left guide pin. The right guide pin has no groove).
- 2) Push down the shaft at the front of the tractor unit until it locks with an audible click. (Do not press the lock levers when pushing down the shaft.)

- 3) Verify that the hooks on both sides of the tractor unit are securely hooked onto guide pin 2 as shown in the following figure.

GETTING ACQUAINTED WITH YOUR PRINTER

Now that your printer is assembled, take a moment to become familiar with its major parts.

Looking at the printer from the front left side and rear right side, you can see the parts of the printer shown in the figure below.

Printer components (front)

The printer control panel has the buttons and indicators used to load and feed paper (see Chapter 3) and select print features (see Chapter 4). The control panel also allows you to change the printer's optional settings (see Chapter 5).

Printer components (rear)

CONNECTING THE POWER CORD

Before you plug in the printer:

- ✓ Make sure that the printer power is switched off. The side marked “O” on the power switch should be depressed.
- ✓ Make sure that the power outlet is properly grounded.
- ✓ Make sure that you use the power cord shipped with the printer. This cord is designed to minimize radio frequency interference.

To plug in the power cord:

1. Plug one end of the power cord into the power connector on the rear of the printer.
2. Plug the other end of the power cord into the power outlet.

Connecting the power cord

3. Make sure that the power cord is securely connected.
4. Turn on the power by pressing the side marked “I” on the power switch. The POWER indicator on the printer control panel will light, the print head will move to its home position within a few seconds, and the ONLINE indicator will light (green).

NOTE

If no forms are loaded, the printer beeps and the red PAPER OUT indicator lights and the ONLINE indicator will not light.

TESTING THE PRINTER (OFFLINE)

At this point, load paper and run the printer self-test. The self-test checks printer performance and print quality before you connect the printer to the computer.

Loading Paper for the Self-Test

To print the self-test, load continuous form wider than 254 mm (10 inches) and set the left tractor so that the left end of continuous form may suit “0-10mm” of a scale (see Chapter 3).

Printing the Self-Test

The printer has a built-in self-test program. The self-test prints the firmware version, the names of the printer’s resident emulations, and all of the characters available in the emulations. The self-test prints 80 characters per line.

To print a self-test page, make sure that continuous forms are loaded.

Then proceed as follows:

1. Turn the printer off.
2. While pressing the LF/FF button, turn the printer back on.

Keep the LF/FF button pressed until the printer beeps.

Self-test printing will start.

Starting the self-test

3. Allow printing to continue for a dozen or more lines of repeat printing. To exit the self-test mode, press the ONLINE button. To remove the test page refer to Chapter 3.

5. To exit demo mode, turn the printer off.

```

==== PRINTER FUNCTION SPECIFICATION ====

Printing technology: 24 wire dot matrix, Logic seeking
Resolution: Letter quality - 360 X 180 dots/inch
Draft quality - 120 X 180 dots/inch
High speed draft - 90 X 180 dots/inch

Color (Option): 7 colors Black,Magenta,Cyan,
Violet,Yellow,Orange, and Green

Standard command set: Fujitsu DPL24C PLUS Version 2.01
Resident emulations: Epson ESC/P2, IBM Proprinter XL24E
Character sets: IBM PC char.sets 1 and 2
IBM PS/2 char.sets (Codepage 437,850,851,
852,855,860,863,865,866)
ISO8859-1/ECMA 94
National character sets (USA,UK,German,

CONNECTING THE PRINTER TO YOUR COMPUTER

Your printer supports one of the following interface options:

- Centronics parallel interface+RS-232C serial interface
- Centronics parallel interface+USB (+LAN) interface

The parallel interface connector has wire clips. The serial interface connector has tapped holes. Cables for these interfaces are available from dealers, cable manufacturers, and other suppliers.

The LAN card is a user installable option. For details, see Chapter 8 or refer to the Online Manual that comes with the LAN card.

For detailed interface specifications, see Appendix D.

Selecting a Parallel Interface Cable

For the parallel interface, use a cable that meets the following specifications:

- ✓ At the printer end, use a shielded male Centronics connector, such as an Amphenol DDK 57FE-30360 or its equivalent. To prevent RFI (radio frequency interference), the connector cover must be connected to the cable shield.
- ✓ Make sure that the cable length does not exceed 3 meters (10 feet).

Selecting a Serial Interface Cable

For the serial interface, use a cable that meets the following specifications:

- ✓ At the printer end, use a 25-pin male connector, such as a Cannon DB-25P or its equivalent.
- ✓ To determine the type of connector your computer requires, refer to your computer user manual or ask your dealer.
- ✓ The cable length can be up to 15 meters (50 feet). This type of length is required in many networking and shared-printer configurations.

Selecting a USB Cable

- ✓ When the USB interface is used to connect to the host computer, the parallel interface and the serial interface (factory add-on option) cannot be connected simultaneously.
- ✓ The USB interface does not guarantee all connections of USB-supported devices.

Selecting a LAN cable

- ✓ When the LAN cable is connected, the parallel and USB cables cannot be used.
- ✓ The LAN cable, when used in 100BASE-TX environments, must conform to category 5 or higher.

Connecting the Interface Cable

To connect the interface cable:

1. Turn off both the printer and the computer.
2. Attach the interface cable to the connector. Do not connect more than one interface cable type to the printer at the same time.

Connecting the interface cable

NOTE

The LAN interface is a user add-on option.

When installing a LAN card, remove the two screws securing the cover and remove the cover. Then insert the LAN card and reattach the cover with the two screws removed earlier. For details, refer to the Online Manual that comes with the LAN card.

3. To secure a parallel interface cable, flip the fastener clips located on the printer into the notches on the cable connector. To secure a serial interface cable, tighten the screws in the cable connector.
4. Attach the other end of the interface cable to your computer. Gently pull on the cable to verify that it is secure.

SELECTING AN EMULATION

Before printing with your software, verify that the correct emulation is selected on your printer. This section describes the available emulations and their selection.

For Experienced Users:

The printer's preselected factory setting is the Fujitsu DPL24C PLUS emulation. If this emulation is acceptable, you may skip this section.

An emulation is a set of commands used by your software to communicate with the printer. There are many different emulations available for printers.

Each emulation has unique features and capabilities. This printer offers three resident emulations:

- Fujitsu DPL24C PLUS (for Fujitsu DL-series printers)
- IBM Proprinter XL24E
- Epson ESC/P2

Resident emulations are stored in the printer's permanent memory.

Here are some points to help you determine which emulation to select:

- ✓ Determine which emulations your software supports. (Refer to your software documentation.) Since most software programs support this printer, try to run a program with the factory default emulation first. (DPL24C PLUS emulation is the factory default.) Try this emulation even if you are not sure of which emulation to choose. See Chapter 5 for detailed information about how your printer communicates with your software.

- ✓ If you are using more than one software package, determine which emulation is supported by the software you use most frequently.
Select that emulation.
- ✓ If your software supports more than one emulation, select the DPL24C PLUS emulation if possible. This emulation has the greatest capabilities.
- ✓ If you want to use an emulation that is not supported by your software, contact your software manufacturer or printer dealer and ask whether support is available. You may be able to obtain a printer driver that is not shipped with the original software package.

To select an emulation, proceed as follows(LED):

1. Turn the printer on and load continues forms.

To print the “OFFLINE SET UP MODE”, load continuous form wider than 254 mm (10 inches) and set the left tractor so that the left end of continuous form may suit “0-10mm” of a scale (see Chapter 3).

2. Enter setup mode.(LED)

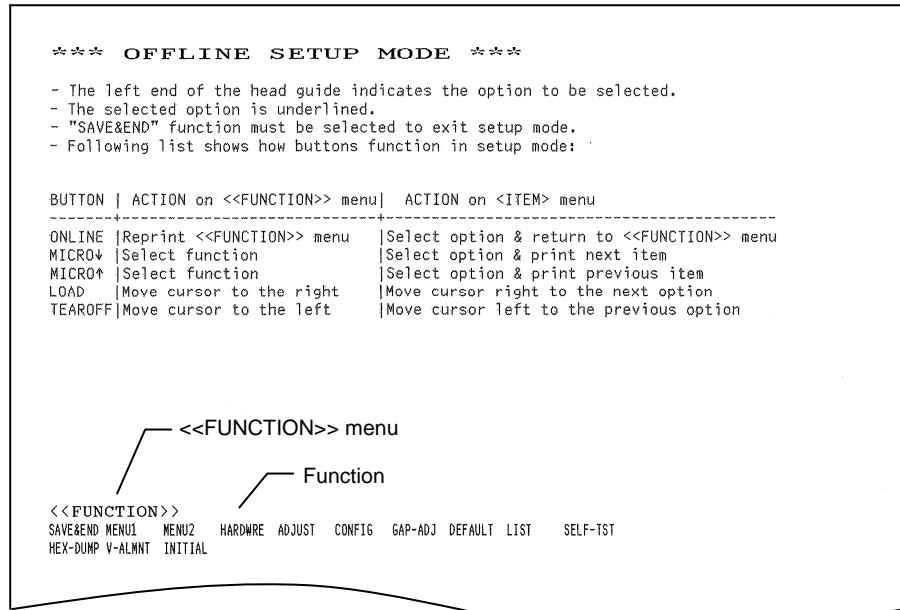

Press the ONLINE button to place the printer offline. Then, press the setup buttons (AUTO GAP and HI IMPACT).

As the printer enters offline setup mode, it prints the following information:

NOTE

If LCD type control panel. Please refer to Chapter 5.

Initial printout in setup mode

Check that the <<FUNCTION>> menu is printed at the bottom of the page.

3. Select the MENU1 function.(LED)

Locate the cursor on left edge of the Card guide (aluminum print guide). Initially, this cursor should be positioned at SAVE & END at the beginning of the <<FUNCTION>> menu. Press the LOAD button repeatedly to position the cursor at MENU1, as shown below:

Press the ▼ MICRO FEED button to select MENU1 and print the following <EMULATE> options:

<EMULATE>	<u>DPL24C+</u>	XL24E	ESC/P2
-----------	----------------	-------	--------

The currently selected emulation is indicated by a short underline. In the figure shown above, the Fujitsu DPL24C PLUS emulation is selected.

4. Select an emulation.(LED)

Press the LOAD button repeatedly to position the cursor at the required emulation. Press the ▼ MICRO FEED button to select the emulation and print the next MENU1 item.

5. Exit MENU1.(LED)

Press the ONLINE button to exit the MENU1 function and reprint the <<FUNCTION>> menu.

6. Exit setup mode to save the emulation.(LED)

To exit setup mode and save the new emulation, make sure that the cursor is positioned under SAVE & END. Then press the ▼ MICRO FEED button. The printer selects SAVE & END and then goes online.

To change other printer settings using the printer setup mode, see Chapter 5.

PRINTING A SAMPLE PAGE (ONLINE)

Once the self-test verifies that the printer is functioning correctly, try printing using one of your software packages. This exercise will ensure that the printer is correctly connected to your computer.

If you are using a parallel interface, the printer usually prints the correct characters automatically. However, you may need to adjust the page layout or various print features using your software or the printer setup mode. If you are using a serial interface, the printer may not work at all or it may print a lot of “?” characters. In this case, the serial settings on the printer do not match those of your computer or your software. Before changing any settings, use the procedure described below to try printing using the printer’s preselected factory settings.

Test communication between the printer and computer as follows:

1. Load continuous forms.
2. Check that the printer is online. If the ONLINE indicator is not green, press the ONLINE button.
3. Try to print using your word processor, a programming language, or other software.

4. Use your software printer selection menus or the printer setup mode (described in Chapter 5) to make required changes in the page layout or other print features.

If the printer does not print or prints the wrong characters, proceed as follows:

- Make sure that the interface cable is properly connected.
- Make sure that the printer emulation selected in your software is the same as that selected on the printer.
- If you are using a serial interface, make sure that the printer serial interface settings are the same as those on the computer. The printer's preselected factory settings are 8 data bits, no parity, 1 stop bit, 9600 baud, and XON/XOFF protocol.

You can change the serial settings on either the printer or your computer. To change the printer settings, see Chapter 5. To change the computer settings, use the selection menus provided by your software or the commands of your computer operating system.

The following example uses the MS-DOS operating system:

Using MS-DOS to Specify Serial Interface Settings

For an IBM PC or compatible device, use the following MS-DOS MODE commands to set the computer serial settings to match the printer factory settings:

```
MODE COM1:9600,N,8,1,P  
MODE LPT1:=COM1
```

To activate these settings whenever you turn the computer on, write the MODE commands in your AUTOEXEC.BAT file. Make sure that the MODE.COM file is included in your root directory.

If the printer still doesn't work, consult your dealer or someone experienced in serial interface communications.

- If an error occurs during printing with Windows, simply printing the page again will cause the printed characters to be garbled. To avoid this problem, execute reset from the control panel or turn off the printer, then print the page again.

You are now finished setting up and testing the printer. To familiarize yourself with everyday printer operations, such as loading paper, selecting print features, and printing, see Chapters 3 and 4.

**INSTALLING THE
PRINTER DRIVER**

A printer driver is required for using the printer in a Windows environment. Special printer drivers for Windows 95, 98, Me, NT 4.0, 2000, XP, and Server 2003 are provided with the DL7600 printer.

For information about how to install printer drivers, refer to Readme.txt of the printer driver to be installed.

- These printer drivers run with DLP24C+ emulation. Be sure to specify DLP24C+ emulation for the printer mode.
- The DL7600 printer driver is a printer driver for monochrome printing.

The color data printing result may differ from its print preview or the monochrome data printing result.

PAPER HANDLING

This chapter explains how your printer uses paper.

Topics covered are:

- Selecting paper
- Overview of paper operations
- Selecting the paper path
- Adjusting for paper thickness
- Using continuous forms (front-tractor feed and rear-tractor feed)
- Using single sheets
- Feeding and positioning paper
- Switching paper types

Tips for paper handling are given at the end of this chapter. Check that section if you are using multipart forms, envelopes, or labels.

SELECTING PAPER

The printer can handle either single sheets or continuous forms. Single sheets, also called cut sheets, include envelopes and noncontinuous, multipart forms. Continuous forms include labels and multipart forms fed into the printer using the forms tractors.

For best results, use paper that meets the specifications listed below. (See Appendix B for detailed specifications.) If you are unsure of the suitability of a particular paper, try testing the paper or consult your dealer.

Length	Single sheets: 70 to 420 mm (3 to 16.5 in) Continuous forms: 102 mm (4 in) or greater
Width	Single sheets: 55 to 420 mm (2.16 to 16.5 in) Continuous forms: 102 to 420 mm (4 to 16.5 in)
Thickness	0.65 mm (0.026 in) maximum total thickness.
Copies	1 to 8-copies (Paper table/Front/Rear tractor) 1 to 5-copies (Cut sheet feeder)

Note:

To use cut sheets the optional large or small cut sheet table is required.

OVERVIEW OF PAPER OPERATIONS

The following buttons are used in paper handling:

- LF/FF, TEAR OFF, PAPER PATH, ▲ MICRO FEED, ▼ MICRO FEED and LOAD buttons on the control panel

(A different function is enabled when each button is pressed in conjunction with the ONLINE button.)

The following figure shows the location of each button:

Location of the buttons

Table 3.1 summarizes the use of buttons in paper handling. More detailed information is provided later in this chapter.

NOTE

To load or feed paper, the printer must be:

- Online but not receiving or printing data
- Offline but not in setup mode

To micro feed paper, the printer must be:

- Online but not receiving or printing data
- Offline but not in setup mode

Table 3.1 Buttons Used for Paper Handling

Button/Dial	Purpose	Action
ONLINE	Change the printer mode Stop/resume printing	Press ONLINE to place the printer online or offline. Press ONLINE to stop or resume printing.
LOAD	Load/unload paper Save adjusted load point	Press LOAD to load paper or to retract continuous forms to the "park position." Press LOAD and ONLINE simultaneously to permanently store a load position adjusted by micro feeding immediately after loading paper.
LF/FF	Form feed Line feed	Press and hold LF/FF to execute a form feed. Continuous forms are fed forward by one page. Single sheets are ejected. Press LF/FF within three seconds to feed paper forward by one line.
TEAR OFF	Advance forms for tear-off	Press TEAR OFF to advance the forms perforation to the tear-off edge. Tear off the forms, then press any button to retract the remaining forms.
PAPER PATH	Selects paper path	Press PAPER PATH to select the paper path: front tractor, rear tractor, cut sheet.

Table 3.1 Buttons Used for Paper Handling (Cont.)

Button/Dial	Purpose	Action
PRINT MODE/ FRONT DIR	Select cut sheet ejection	Press PRINT MODE/FRONT DIR at Offline to select a direction of ejecting cut sheet. <ul style="list-style-type: none"> • Front ejection – FRONT indicator lights. It blinks when paper is ejected to the paper table prompting the user to remove the paper. • Rear ejection – FRONT indicator does not light. When you save your setting in the setup mode, it becomes the new default. The default setting is invoked whenever you turn on the printer.
▲ MICRO	Micro Feed	Press ▲MICRO/▼MICRO to feed paper by 1/180 inch in the direction of the arrow.
▼ MICRO		
(LED) AUTO GAP	Select paper thickness control mode	Select paper thickness control mode. AUTO GAP — AUTO GAP indicator lights. Manual Gap — AUTO GAP indicator doesn't lights. The Manual Gap dial is enabled.
(LED) MANUAL GAP DIAL	Select paper Thickness at MANUAL MODE	Select the paper thickness at MANUAL MODE. Auto Gap is usually used. Auto Gap is used for printing on paper of different thicknesses.
(LCD) GAP ADJUST	Select paper Thickness	Select the paper thickness as follows. AUTO, GAP-1, , GAP-9, GAP-A, . . , GAP-D

SELECTING PAPER PATH

This printer has a variety of paper paths and feed directions.

Paper Paths and Feed Directions

See the following five cases.

-----> : Cut sheet

————> : Continuous forms

(n) : Input

[n] : Output

With front tractor

(1) Front tractor → Print → Rear eject

With rear tractor

(2) Rear tractor → Print → Front eject

With front and rear tractors (either optional)

- (1) Front tractor → Print → Rear eject
- (2) Rear tractor → Print → Front eject

With front and rear tractors (either optional) and Large paper table (optional)

- (1) Front tractor → Print → Rear eject
- (2) Rear tractor → Print → Front eject
- (3) Paper table → Print → Paper table
- (4) Paper table → Print → Rear stacker

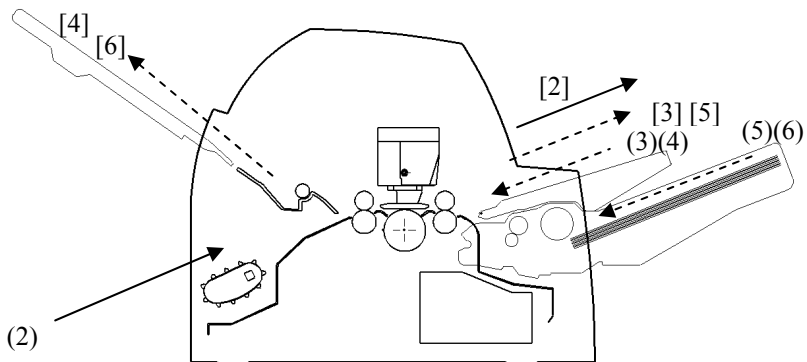

Note

Large and small paper table are available as option.

In the next two cases, the number of cut sheets stacked in the printer may be reduced depending on printing conditions and environments. Follow the notes.

With rear tractor and front optional cut sheet feeder and large stacker(optional) and large paper table(optional).

- (2) Rear tractor → Print → Front eject
- (3) Paper table → Print → Paper table
- (4) Paper table → Print → Rear stacker
- (5) Front cut sheet feeder → Print → Paper table
- (6) Front cut sheet feeder → Print → Rear stacker

With front or rear tractor (either optional) and rear optional cut sheet feeder and large stacker(optional) and large paper table(optional).

In addition, the front and rear tractor (either is optional) can be mounted.

- (1) Front tractor → Print → Rear eject
- (2) Rear tractor → Print → Front eject
- (3) Paper table → Print → Paper table
- (4) Paper table → Print → Rear stacker
- (7) Rear cut sheet feeder → Print → Paper table
- (8) Rear cut sheet feeder → Print → Rear stacker

With rear tractor and front and rear optional cut sheet feeder and large stacker and large paper table.

In addition, the front and rear tractor (either is optional) can be mounted.

- (2) Rear tractor → Print → Front eject
- (3) Paper table → Print → Paper table
- (4) Paper table → Print → Rear stacker
- (5) Front cut sheet feeder → Print → Paper table
- (6) Front cut sheet feeder → Print → Rear stacker
- (7) Rear cut sheet feeder → Print → Paper table
- (8) Rear cut sheet feeder → Print → Rear stacker

NOTES

When ejecting cut sheets to the paper table, the **REMOVE PAPER** indicator blinks after ejecting a cut sheet and stops printing. Before restarting printing, be sure to remove the cut sheet.

You must remove cut sheets one by one immediately after ejection.

This is required because the printer may load an ejected sheet again or an ejected sheet may push the previous sheets out of the printer.

To eject sheets larger than A4 size onto the paper table, the paper table must be replaced with the optional large cut sheet table to prevent ejected sheets from falling off the paper table.

When printing thin paper, multipart copy paper, or large size paper, frequently remove the paper from the rear stacker or the paper table.

ADJUSTING FOR PAPER THICKNESS (LED)

The printer can handle paper of different thicknesses, including multipart forms with up to nine parts (original plus eight copies). For details on paper thickness specifications, see Appendix B.

The printer automatically adjusts for different paper thicknesses.

You can use the MANUAL GAP DIAL to adjust the paper thickness manually at manual mode. To place printer manual mode, press AUTO GAP buttons 2 seconds or more so that AUTO GAP lamp is off.

Adjusting the manual gap dial

Table 3.2 Manual Gap Dial Settings (LED)

Number of Copies (Including the Original) *1	Setting *2
1 copy	1
2 copies	2
3 copies	3
4 copies	4
5 copies	5
6 copies	6
7 copies	7
8 copies	8
9 copies, Envelopes	A
Slips	B, C, D
Ribbon replacement	R

*1 For carbon-interleaved paper, the carbon counts as one copy.

*2 Vary the setting up or down (including A to R) to optimize printing especially for labels and envelopes. Select R when replacing a ribbon or clearing a paper jam.

NOTE

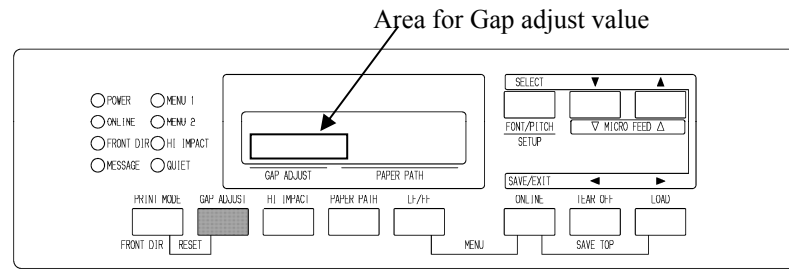

If printing is messy, the ribbon misfeeds, or the paper jams, move the lever one setting higher.

ADJUSTING FOR PAPER THICKNESS (LCD)

The printer can handle paper of different thicknesses, including multipart forms with up to nine parts (original plus eight copies). For details on paper thickness specifications, see Appendix B.

The printer automatically adjusts for different paper thicknesses.

You can use the GAP ADJUST button to adjust the paper thickness manually.

Adjusting the manual gap

Table 3.3 Manual Gap Settings (LCD)

Number of Copies (Including the Original) *1	Setting *2
1 copy	GAP-1
2 copies	GAP-2
3 copies	GAP-3
4 copies	GAP-4
5 copies	GAP-5
6 copies	GAP-6
7 copies	GAP-7
8 copies	GAP-8
9 copies, Envelopes	GAP-9
Slips	GAP-A,B,C
Ribbon replacement	GAP-D

*1 For carbon-interleaved paper, the carbon counts as one copy.

*2 Vary the setting up or down (including A to D) to optimize printing especially for labels and envelopes. Select D when replacing a ribbon or clearing a paper jam.

NOTE

If printing is messy, the ribbon misfeeds, or the paper jams, move the lever one setting higher.

USING CONTINUOUS FORMS

Continuous forms paper, fanfolded at the horizontal perforations, is ideal for printing rough drafts and long files. The paper is fed into the printer using the forms tractors.

Positioning the Paper Stack

Place the stack of continuous forms paper directly below the rear of the printer or below the front of the printer. After the paper is installed in the printer, the paper path should look like this:

Good placement

Bad placement

Placement of continuous forms

Loading Continuous Forms (Front Feed)

This section explains how to use continuous forms as the tractor unit is installed at the front of the printer. The tractor unit pushes continuous forms. This condition applies when you first purchase the printer. Up to 8-ply media can be fed by the front tractor unit.

You can use continuous forms paper even if you have a cut sheet feeder installed at the rear of the printer.

To load continuous forms paper:

1. Make sure that the printer is turned on. Remove any single-sheet paper from the printer.
2. Lift up the soundproof cover as shown below.
3. Release the tractor locking levers by pulling them up(①). Open the tractor paper holders. See the following figure(②).
4. Position the tractors and center guide.
5. Fit the paper feed holes onto the left and right tractor pins. Adjust the right tractor to the width of the form. Close the paper holders.

Set the continuous forms to front tractors

6. Adjust the left margin.

Below the left tractor, there is a tractor guide, short inch-based ruler graduated in 10 columns per inch. Use the ruler to help position the tractor. When the paper edge is positioned to the zero line, the left margin is 12 mm (0.5 inch) including perforation area and the arrow indicates the location of the first character.

7. Pull the right tractor to stretch the paper taut. Push the right locking lever down to secure the tractor in place.

Adjusting tractor position

8. Lower the soundproof cover paper table to the down position (normal mode).

Lowering the cut sheet stand

CAUTION

- *Before lowering the paper table, make sure that the paper holders are closed.*

If the holders are opened, they may cause damage to the tractors and the paper table.

- *Make sure that the paper table is positioned to its normal mode. If it is not done, jamming may occur when continuous forms paper is fed.*

9. Press the PAPER PATH button to select “FRONT TRACTOR”. (The indicator lights.)
10. Press the LOAD button to advance the paper to the top-of-form position. Top-of-form is the first line on which printing can start. After loading paper, the printer goes into online mode.
11. Print a sample page and check the page margins. Make the following adjustments, as necessary:
 - Horizontal alignment. Move the forms tractors as required.
 - Top-of-form setting (see Chapter 5).
 - Margin settings. Use your software or the printer setup mode (see Chapter 5).

NOTE

Do not open the front cover during printing.

Loading Continuous Forms (Rear Feed)

A tractor is supplied as standard and is attached to the front of the printer. It can be attached to the rear of the printer. You can also buy a tractor unit as an additional rear tractor unit.

A maximum of 8-ply media can be fed from the rear tractor unit.

For reinstalling the tractor unit for rear feed, see page 2-10 to 2-13.

1. Release the tractor locking levers by pulling them up (①). Open the tractor paper holders. See the following figure (②).
2. Position the tractors and center guide.
3. Fit the paper feed holes onto the left and right tractor pins. Adjust the right tractor to the width of the form. Close the paper holders.

4. Adjust the left margin.

Below the left tractor, there is a tractor guide, short inch-based ruler graduated in 10 columns per inch. Use the ruler to help position the tractor. When the paper edge is positioned to the zero line, the left margin is 12 mm (0.5 inch) including perforation area and the arrow indicates the location of the first character.

5. Pull the right tractor to stretch the paper taut. Push the right locking lever down to secure the tractor in place.

6. Press the PAPER PATH button to select REAR TRACTOR (the indicator lights).
7. Press the LOAD button to advance the paper to the top-of-form position. Top-of-form is the first line on which printing can start. After loading paper, the printer goes into online mode.
8. Print a sample page and check the page margins. Make the following adjustments, as necessary:
 - Horizontal alignment. Move the forms tractors as required.
 - Top-of-form setting (see Chapter 5).
 - Margin settings. Use your software or the printer setup mode (see Chapter 5).

Unloading Continuous Forms

To unload continuous forms:

1. Make sure that the FRONT TRACTOR or REAR TRACTOR indicator lights.
2. Press the LOAD button. The continuous forms paper is retracted to the park position. If the paper cannot be retracted in one operation, continue to press the LOAD button until the paper is parked.

NOTE

The printer can retract continuous forms paper up to a maximum of 55.8 cm (22 inches) per operation.

3. To remove the paper, raise the tractor paper holders and lift out the paper.

NOTE

If continuous forms are unloaded without stopping, the paper may slip off the tractors.

Tearing Off Continuous Forms

Your printer has a special “tear-off edge” that allows you to tear off printed pages without wasting paper. The tear-off edge is located on the front and rear of the printer.

To tear off continuous forms using the tear-off edge:

1. Press the TEAR OFF button. The bottom perforation of the last page advances to the tear-off edge. If you specified TEAR OFF: AUTO using the HARDWARE function in setup mode, the paper automatically advances to the tear-off edge at the end of each job (or when the printer has printed all the data received).

NOTE

If the bottom perforation of your paper is not positioned at the tear-off edge, the length of your paper may not be specified correctly in your software or the printer setup mode.

Check that the paper length is specified correctly. For information on specifying page length using setup mode, see Chapter 5.

2. Tear the paper off at the perforation.

Tearing off continuous forms (front feed)

Tearing off continuous forms (rear feed)

3. Press any button to retract the forms back to the top-of-form position.

USING SINGLE SHEETS

This section describes how to load paper from the paper table or cut sheet feeder. The paper table allows paper to be loaded manually, one sheet at a time. A cut sheet feeder allows paper to be loaded automatically from the paper bin.

Loading a Paper From The Paper Table. (option)

To load a sheet of paper from the paper table:

1. Make sure that the printer is turned on.
2. Press the PAPER PATH button to select CUT SHEET (the indicator lights).
3. Press the FRONT DIR button to select the direction of ejecting single sheets.
 - Front ejection — FRONTDIR indicator lights.
 - Rear ejection — FRONTDIR indicator doesn't light.
4. Adjust the left margin.

On the left hand side of the paper table, a scale graduated in units of 1 [mm]. When the paper guide is positioned at scale 0 [mm], the left margin is 5 mm (0.2 inch).

Push the lock lever down to secure the guide.

5. Pull the sub guide out as required to accommodate the paper size.

NOTE

When using the paper whose width is under 100 mm (4 inch), position the paper guide at scale 0 [mm].

Preparing to load a sheet of paper

Loading a sheet of paper

6. Insert a sheet of paper into the paper table. Make sure that the front edge of the paper engages snugly with the feed roller.

NOTE

If paper skews when it is loaded, the printer does not print and ejects the paper. (This function can be disabled by a setting in setup mode.)

7. Press the LOAD button. The paper will advance to the top-of-form position. The top-of-form position is the first line on which printing can start. To adjust the position of the paper slightly, press the ▲ MICRO FEED button or the ▼ MICRO FEED button. The paper will move forward or backward in 1/180-inch increments.

After loading paper, the printer goes into online mode.

8. Print a sample page and check the page margins. Make the following adjustments, as necessary:
 - Horizontal alignment. Readjust the paper guide if required.
 - Top-of-form setting (see Chapter 5).
 - Margin settings. Use your software or the printer setup mode (see Chapter 5).

NOTE

Do not open the front cover during printing. With the cover open detection option installed, the printer never prints while the front cover is open. Close the front cover to perform printing.

Loading Paper from the Cut Sheet Feeder (Option)

A cut sheet feeder (SF940) allows automatic printing on single sheets without the need to manually insert the sheets one-by-one. This can save you a lot of time when printing long files using single sheets. See Chapter 8 for more information on the cut sheet feeder.

For installation of the feeder, refer to its user's manual. When a feeder is mounted and the feeder cable is connected, the printer automatically knows the feeder type and controls the feeder accordingly.

1. Two steps of extension are available for supporting long sheets of paper.

Steps of extension

2. Adjust the left margin.

To help align the left paper guide, use the inch-based ruler located behind the paper guides. The ruler is graduated in 10 columns per inch. For example, setting the left paper guide 12.7 mm (0.5 inch) from the left gives a left margin of 6.3 mm (0.25 inch) plus the left margin specified by your software or the printer setup mode.

- Slide the right paper guide until the distance between the two guides is the approximate width of your paper.
3. Manually fan the stack of paper and place it in the paper bin.

NOTE

A short horizontal mark inside the left paper guide indicates the maximum capacity of the bin. Make sure that your paper stack does not exceed this horizontal mark.

Loading the cut sheet feeder (Front feed)

Loading the cut sheet feeder (Rear feed)

4. Readjust the right paper guide, leaving a slight gap between the paper guide and the right edge of the paper. Slide the guide to the approximate width of the paper, or the paper will not be loaded properly. Pull the right locking lever forward.
5. Push the bin lever down to the “SET” position.
6. Load paper to the top-of-form position using either of the following methods:

- Load the paper manually. Press the LOAD button. The paper will advance to the top-of-form position. Adjust the position of the paper as needed by the ▲MICRO button or the ▼MICRO button (micro feed).
 - Load the paper using your software. Press the ONLINE button to place the printer online. Load paper according to the instructions in your software documentation. Most software packages load paper automatically.
After loading paper, the printer goes into online mode.
7. Print a sample page and check the page margins. Make the following adjustments, as necessary:
- Horizontal alignment. Readjust the paper guides if required.
 - Top-of-form setting (see Chapter 5).
 - Margin settings. Use your software or the printer setup mode (see Chapter 5).

NOTE

Do not open the front cover during printing.

Ejecting Single Sheets

If you print using software, each sheet is ejected automatically when the end of the printed page is reached. To manually eject sheets of paper, use the following method:

- Press and hold down the LF/FF button to execute a forward form feed.

**FEEDING AND
POSITIONING
PAPER**

The following functions are available whether the printer is online or offline.

Line Feed/Form Feed

Use the line feed/form feed function to move paper forward.

- Pressing and holding down the LF/FF button feeds one sheet of paper.
- Pressing the LF/FF button once advances the paper one line (do not hold the button more than three seconds).

Micro Feed

Use the micro feed function to fine tune the position of the paper.

- Press the ▲ MICRO button to feed paper backward by 1/180 inch.
- Press the ▼ MICRO button to feed paper forward by 1/180 inch.

Remember that the top-of-form will differ from the original setting.

Load Position Adjust

Use also the micro feed function to adjust the load position of the paper.

- When the ▲ MICRO button or the ▼ MICRO button is used immediately after the LOAD button is pressed, the adjusted position of paper is retained as the new load position until the power is turned off.
- Pressing the ONLINE and LOAD buttons simultaneously saves the new position permanently.

The load position can be set for single sheets and continuous forms respectively.

Adjusting Load Position by Using Window of Card Guide

The lines of window on the right side of card guide indicate printing line. So use this as a guide to adjust load position.

TIPS ON PAPER HANDLING

General Tips

- Use high-quality paper. Do not use paper that is wrinkled or curled at the edges.
- Do not use paper with staples or metal parts.
- Do not use paper with unpredictable variations in thickness, such as paper with partial multilayers, paper with embossed printing, and labels with the backing sheet exposed.
- Store paper in a clean, dry environment.

Multipart Forms

- Avoid using carbon-interleaved single sheets if possible.
Printing tends to become misaligned on the bottom sheet.
- To ensure smoother feeding of paper-stapled, multipart forms, raise the rear stacker to support the forms.

Envelopes

When printing envelopes, use the paper table or the manual feed slot of the cut sheet feeder. Note the following:

- When loading envelopes, make sure that the envelope flaps face forward. Otherwise, the envelopes may jam in the printer.

Labels

- Be careful to check operating conditions when using labels.
Labels are sensitive to temperature and humidity.
- Only use labels mounted on continuous forms backing sheets.
Do not print labels mounted on single sheet backing. Labels mounted on single sheet backing tend to slip and printing becomes crooked.
- Do not feed labels backwards using the LOAD button from the control panel. Jamming may occur.
- Do not use the printer tear-off feature when printing labels. If the labels are retracted, the backing may peel off and the labels may jam in the printer.
- Test-print labels before running a job. If jams occur, go into setup mode and
 - set the paper thickness control to manual mode and
 - set the paper thickness indicator to a wider position manually.

If jamming problems continue, try a different type of label.

PRINTING

This chapter describes the following everyday printing operations:

- Using multipart form (hi impact mode)
- Selecting the print mode(quiet mode)
- Starting, stopping, or resuming printing
- Removing printed pages
- Clearing the print buffer
- Selecting the print features

MULTIPART FORMS (HI IMPACT MODE)

Instructions for loading paper are given in Chapter 3.

This printer has enough capability to print multipart forms. When superior copy capability is required, use the hi impact mode. Press the HI IMPACT button on the printer control panel. This function is valid when the HI IMPACT indicator lights.

Print control panel

NOTE

- **Setting hi impact mode by pressing the HI IMPACT button is cancelled when you turn off the printer.**
- **If you wish to have the hi impact mode set on power-on, save the setting in setup mode.**

PRINT MODE (QUIET MODE)

Quiet mode reduces acoustic noise as follows.

The consecutive dots are omitted (LQ).

The print speed is slowed to LQ speed (except for LQ).

Skipping the space (no characters) at higher speed doesn't work.

To select Quiet mode:

1. Press the ONLINE button to place the printer online.
2. Press the PRINT MODE button. When QUIET indicator lights, QUIET MODE is valid.

Print control panel

NOTE

- **Setting quiet mode by pressing the PRINT MODE button is cancelled when you turn off the printer.**
- **If you wish to have the quiet mode set on power-on, save the setting in setup mode.**

STARTING OR STOPPING PRINTING

Starting Printing

Before you start to print, make sure that paper is loaded.

To start printing, press the ONLINE button to place the printer online. Then start your software.

Stopping Printing

To stop printing immediately, press the ONLINE button to place the printer offline. You can also use your software to stop printing, but there will be a slight delay before printing stops. Any data sent to the print buffer but not yet printed is stored until you resume printing. Data in the print buffer is lost if you turn the printer off.

To resume printing, press the ONLINE button again. To cancel printing, use the cancel commands provided by your software or computer. To clear the print buffer, place the printer offline and press the PRINT MODE and AUTO GAP buttons. Any data sent to the print buffer before you canceled printing will be lost.

Resuming from a Paper-Out

The printer can “sense” when paper runs out. Depending upon how PPR-OUT (paper-out) is set in setup mode, the printer either:

- Stops printing and lights the red PAPER OUT indicator, or
- Continues printing until no more data remains in the printer.

See Chapter 5 for details on setting PPR-OUT. The factory default is to stop printing if continuous forms paper runs out and to continue printing if single sheet paper runs out.

To resume printing when paper runs out, use either of the methods described below:

Printing the remaining lines on a page

This method is convenient to continue printing under the paper-out condition, but is not available when the cut sheet feeder is used.

1. Press the ONLINE button. The printer returns to online mode, prints or feeds one line, and the PAPER OUT indicator lights up again.
2. Repeat this procedure until the full page is printed. Line spacing, however, may be uneven.

CAUTION

When printing remaining lines, be careful not to print on the platen. Printing on the platen may damage both the platen and the print head.

Continuing printing after supplying paper

1. Install paper on the forms tractors or on the cut sheet stand, or in the cut sheet feeder bin, as described in Chapter 3.
2. To load the first sheet of paper, press the LOAD button. The PAPER OUT indicator will turn off.
3. Press the ONLINE button to place the printer online. The printer resumes printing.

NOTE

For continuous forms paper, the page where printing stopped and the page where printing resumes may be incorrectly printed. In this case, wait for the entire job to finish printing. Then reprint the incorrect pages.

Resuming after an Area Over warning

The printer senses the left and right edges of paper and stores their positions when the paper is loaded. If your software will print data past either edge, the printer ignores that data but does not stop printing.

The AREA OVER detection control functions when AREACNT (area control) is set to ENABLE in setup mode. See Chapter 5 for information on setting AREACNT. The factory default is not to sense the edges. If paper is dark-colored or preprinted, the printer may not be able to sense the edges correctly. In this case, disable the sensor.

REMOVING PRINTED PAGES

This section describes the best methods for removing single sheets or continuous forms paper after printing.

Removing Single Sheets

When you print using software, the printer automatically ejects each sheet of paper when the end of the printed page is reached. To eject sheets manually, use one of the following methods:

- Press and hold down the LF/FF button to execute a form feed.

Removing Continuous Forms

To avoid wasting paper, use the printer tear-off function to remove continuous forms paper. Press the TEAR OFF button to advance the perforation to the tear-off edge. Tear the paper off, and then press any button to retract the paper back to the top-of-form position. See Chapter 3 for more detailed instructions.

CLEARING THE PRINT BUFFER

Place the printer offline. Press the PRINT MODE and AUTO GAP buttons simultaneously to clear all data from the print buffer. This method is useful when you cancel a print operation and do not want to continue printing data already sent to the printer.

This method does not change or clear MENU1 and MENU2 settings, paper loading position settings, and downloaded fonts.

SELECTING PRINT FEATURES

The print features you select determine how your printed pages will look.

Print features include the following:

- Print quality
- Fonts
- Pitch (characters per horizontal inch)
- Page length and width
- Line spacing (lines per vertical inch)

To select print features, you can use either commercial software or the printer control panel. The method you use depends on the capabilities of your software. If your software has most of the features you require, you may rarely – if ever – have to use the control panel. *In fact, your software often overrides the printer settings.*

If your software has limited options, you can use the printer control panel to select print features. Sometimes, the control panel enables you to select features not available through your software. For example, you can select downloaded fonts not supported by your software.

Using Commercial Software

Many commercial software packages offer a wide variety of print features, including some features that are not supported by this printer. For example, software often provides a wider range of font sizes than the printer can accommodate. Software also allows you to specify multiple fonts on a page.

To determine which features your software supports and how to select them, refer to your software documentation.

Using the Control Panel

Use the ONLINE and LF/FF button to directly select one of the two menus.

Printer control panel

The ONLINE and LF/FF buttons specify MENU1 or MENU2, either of which allows you to specify different sets of options in advance. Some of the print features include emulation, print quality, character pitch, and line spacing. To setup the print features to MENU1 and MENU2, refer to the chapter 5.

When you first turn the printer on, the MENU 1 indicator is lit; that is, all of the print features assigned to MENU1 are enabled. However, you can easily switch to MENU2 before printing.

NOTE

For easy reference, keep a list of your current MENU 1 and MENU 2 settings near the printer. To print a list of current settings, see the section Printing a List of Selected Options in Chapter 5. You may also want to use the space provided in Table 4.1 to record your settings.

Selecting MENU1 or MENU2

When you first turn the printer on, MENU1 is selected. To change to MENU2 or back to MENU1, proceed as follows:

1. Press the ONLINE button to place the printer offline.
2. Repeatedly press the ONLINE and LF/FF buttons. The lighted indicator (1 or 2) shows the menu selected. When the menu selection is changed, the font (font, pitch, and quality) assigned in the selected menu becomes valid.

3. Press the ONLINE button to return online. You are ready to print using the selected menu.

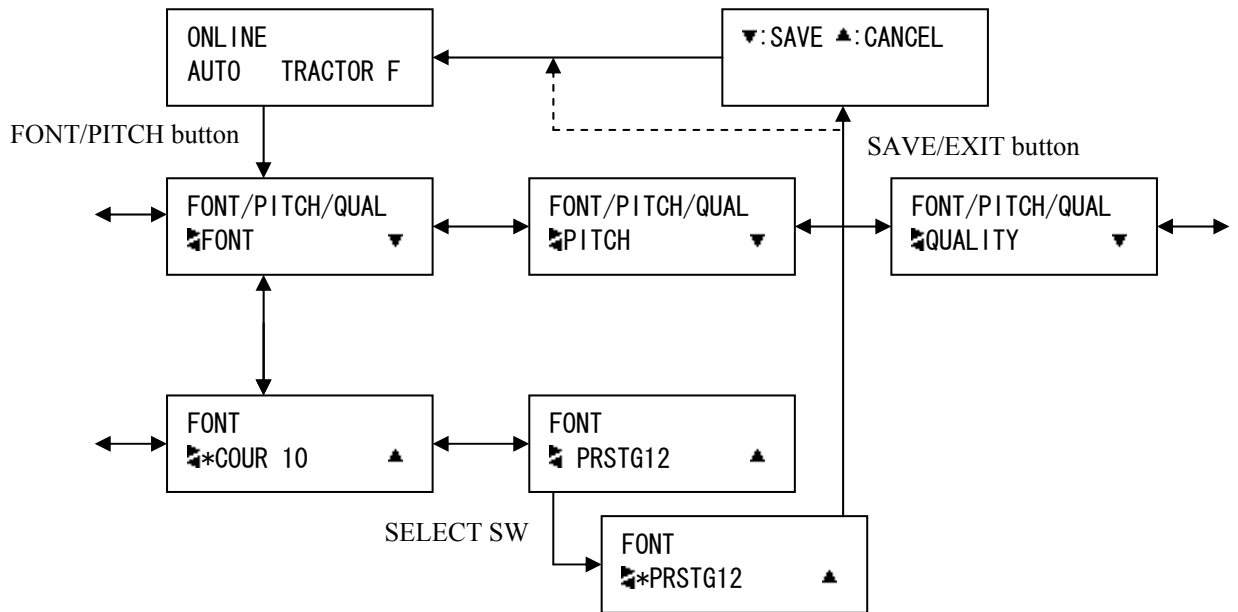

Using the Control Panel (LCD type only)

LCD type Control panel also can select print features including FONT/PITCH/QUALITY that assigned current MENU1 or 2 directly. To select print features enter select mode as follows.

1. Press the ONLINE button to place the printer online.
2. Press the FONT/PITCH button to enter select menu.

3. To move layer and in transverse direction, use ∇ , \blacktriangle , \blacktriangleleft and \blacktriangleright buttons.
4. To save or exit press SAVE/EXIT buttons.

Font/pitch/qual setting mode.

Table 4.1 MENU1 and MENU2 Settings

Other features:		

USING SETUP MODE

Your printer has two modes: normal and setup. Normal mode is used for everyday printer operations and is explained in Chapters 3 and 4.

Setup mode serves two purposes. It enables you to:

- Select the printer's optional settings
- Help diagnose printer problems

These setup mode functions can be done either offline, using the printer control panel (offline setup), or remotely, using a setup program in your computer system or software (online setup). Primarily, this chapter explains how to use the offline setup mode. The online setup mode, which is reviewed briefly at the end of this chapter, is valid in all emulations.

Optional settings on the printer include the emulation, fonts, pitch, page length and page width, serial interface options, and the top-of form setting. When you save your settings in the printer's permanent memory, they become the new settings or defaults. These defaults are invoked whenever you turn on the printer. For example, if you save DPL24C PLUS as the default emulation, DPL24C PLUS is invoked when you turn on the printer.

The printer diagnostic functions are SELF-TST, HEX-DUMP, and V-ALMNT. These functions are helpful for printer trouble-shooting, as described in Chapter 7.

HOW TO USE THIS CHAPTER

The sections in this chapter are presented in logical sequence. *If you are a first-time user, be sure to read the following sections first:*

- Entering Setup Mode
- Overview of Setup Mode

These sections will familiarize you with how setup mode works. Once you understand the basics, use the following sections to select printer options that are compatible with your computer system's hardware and software setup:

- Printing a List of Selected Options
- Deciding Which Options to Change
- MENU1 and MENU2 Items and Options
- Hardware Items and Options
- Print Position Adjustment Items and Options
- Configuration Items and Options

- Head Gap Adjustment Items and Options
- Exiting and Saving

To restore the printer default settings (factory defaults or power-on defaults), see the section **Resetting Defaults** later in this chapter.

For information on using the SELF-TST, HEX-DUMP, and V-ALMNT functions, see the section **Using the Diagnostic Functions** later in this chapter.

For Experienced Users:

Once you are familiar with setup mode, you may want to use the flowchart at the end of this chapter for quick reference. The flowchart lists all printer setup functions, items, and options.

ENTERING SETUP MODE(LED)

Before entering setup mode, load continuous forms paper from the front tractor into the printer as described in Chapter 3. Several sheets of paper may be required to make all of your setup mode selections.

To enter setup mode, follow these steps:

1. Make sure that front continuous forms paper is loaded and press the PAPER PATH button to select the appropriate paper path.

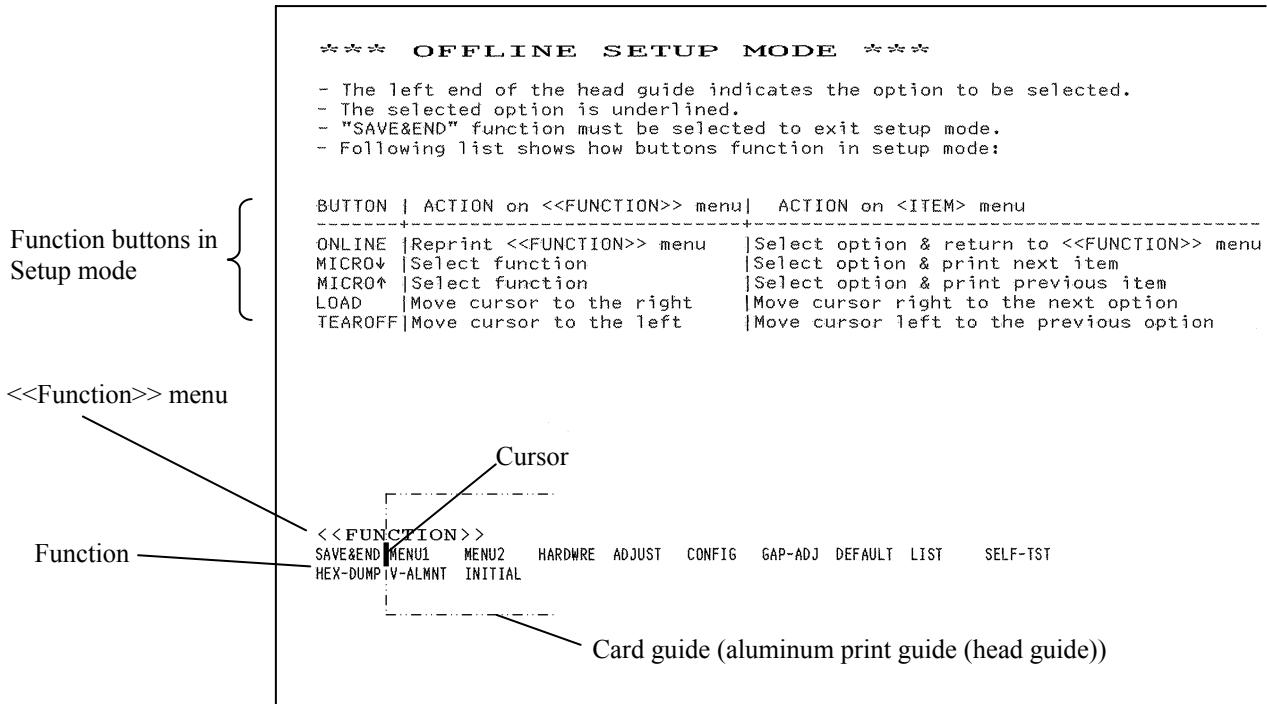

If continuous forms paper is fed from the rear or a CSF is mounted, the printer does not enter SETUP mode.
2. Press the ONLINE button to place the printer offline.
3. Press the AUTO GAP and HI IMPACT buttons simultaneously until the printer beeps.

Entering setup mode

If you do not hear a beep or an alarm beep (beeps four times), you are not in setup mode. Place the printer offline and try again.

4. When the printer enters offline setup mode, it prints the following information.

Initial printout in setup mode

The initial printout contains a header, help menu, and <<FUNCTION>> menu. The header tells you that the printer is offline and in setup mode. The help menu provides a quick summary of how to use setup mode. The <<FUNCTION>> menu lists all of the functions available to you in setup mode. Note that the cursor on the left edge of the aluminum print guide is initially positioned at the SAVE & END function.

Setup mode can also be entered by turning off the printer, then turning the printer back on while pressing the AUTO GAP and HI IMPACT buttons simultaneously until the printer beeps.

**OVERVIEW OF
SETUP MODE (LED)**

When you enter setup mode, the following <<FUNCTION>> menu is printed:

```
<< FUNCTION >>
SAVE&END MENU1  MENU2  HARDWRE  ADJUST  CONFIG  GAP-ADJ  DEFAULT  LIST  SELF-TST
HEX-DUMP V-ALMNT  INITIAL
```

Table 5.1 summarizes the purpose of each function.

Table 5.1 Setup Mode Functions

Function	Purpose
SAVE & END	Exits setup mode and saves any changes made while in setup mode.
MENU1 and MENU2	Assigns print features to MENU1 and MENU2 on the printer control panel.
HARDWRE	Changes the printer hardware options.
ADJUST	Changes the print position adjustment options.
CONFIG	Changes the configuration options.
GAP-ADJ	Adjust the gap between the print head and printing paper.
DEFAULT	Resets factory defaults in MENU1 and MENU2.
INITIAL	Resets factory defaults in MENU1, MENU2, HARDWRE, ADJUST, CONFIG, GAP-ADJ.
LIST	Prints a list of all currently selected options.
SELF-TST	Runs the self-test.
HEX-DUMP	Prints hex dumps.
V-ALMNT	Checks and corrects vertical print alignment.

To select a function from the <<FUNCTION>> menu:

1. Repeatedly press the “TEAR OFF” or “LOAD” button to position the cursor on the left edge of the aluminum print guide at the function you require.
2. Press the ▲ button or the ▼ button to select the function. If the function has items and options, the printer prints the first item and its options. The MENU1, MENU2, HARDWRE, ADJUST, CONFIG, and GAP-ADJ functions contain items that have selectable options. The other functions have neither items nor options.

The first three MENU1 items and their options are shown below. Items are enclosed in single brackets <>. A short underlined portion is current option and long underlined portion is selected option.

```

< EMULATE>DPL24C+  XL24E  ESC/P2

<FONT      >
COUR 10  PRSTG12  COMPRSD  BOLDFCE  PICA 10  CORRESP  OCR-B   OCR-A   COUR-N   COUR-B
COUR-I    N.SAN-N   N.SAN-B   N.SAN-I  TIMLS-N  TIMLS-B  TIMLS-I  DOWNLD0 DOWNLD1

<QUALITY>LETTER  REPORT  DRAFT  HI-DRFT
    
```

To select an option from the <item> menu:

1. Repeatedly press the “TEAR OFF” or “LOAD” button to position the cursor on the left edge of the aluminum print guide at the option you require.
2. Press the ▼ button to select the option. The printer prints the next item and its options. You can press ▲ to select the option. Then, the printer prints the previous item and its options.
3. After selecting the desired options, press the ONLINE button to reprint the <<FUNCTION>> menu.

For each item, the short-underlined option is the current default option (the option currently saved in the printer’s permanent memory). In the previous example, the default options are Fujitsu DPL24C PLUS emulation, Courier 10 font, and letter print quality.

Setup Mode Example (LED)

To become familiar with setup mode, try the following example. This example shows how to change the font and pitch in MENU2 to Prestige Elite 12 and 12 cpi.

- 1. Load continuous forms paper.**
- 2. Enter setup mode.**
Press the AUTO GAP and HI IMPACT buttons simultaneously until the printer beeps.
- 3. Select the MENU2 function.**
Wait for the printer to stop printing and press the “TEAR OFF” or “LOAD” button twice to position the cursor on the left edge of the aluminum print guide at MENU2. Press the “▲” button or the “▼” button to select the MENU2 function and print the <EMULATE> item and its options.

4. Select the current emulation.

Since you do not want to change the emulation, press the “▼” button to select the current emulation and print the next item, and its options.

5. Change the font to Prestige Elite 12.

Press the “TEAR OFF” or “LOAD” button once to position the cursor on the left edge of the aluminum print guide on PRSTG12. Press the “▼” button to select PRSTG12 and print the next item, <QUALITY>, and its options.

6. Select the current print quality.

Since you do not want to change the print quality, press the ▼ button to select the current print quality and print the next item, <PITCH>, and its options.

7. Change the pitch to 12 cpi and exit the MENU2 function.

Press the “TEAR OFF” or “LOAD” button once to position the cursor on the left edge of the aluminum print guide on 12 CPI. Since you do not want to make any other changes in MENU2, press the ONLINE button to select 12 CPI and exit MENU2. The <<FUNCTION>> menu is then reprinted.

8. Exit setup mode, saving the new font and pitch.

Since the cursor on the left edge of the aluminum print guide is on SAVE & END, press the ▲ MICRO FEED button or the ▼ MICRO FEED button to select SAVE & END. The printer saves Prestige Elite 12 and 12 cpi as the new power-on defaults in MENU2. The printer then exits setup mode and returns online. These settings remain in effect until changed.

Points to Remember

- Whenever you enter setup mode, short help menus are printed at the top of the page. Help menus are also printed when you select the SELF-TST, HEX-DUMP, or V-ALMNT functions.
Use help menus for quick reference while in setup mode.
- When printing the items and options for each function, you can only print one item at a time. However, you can move either forward or backward in the item list. To move forward (print the next item), press the ▼ button. To move backward (print the previous item), press the ▲ button.
- While in the <<FUNCTION>> menu or when selecting a function that contains items and selectable options, press the ONLINE button to reprint the <<FUNCTION>> menu.
- A short underline under the first two letters of an option indicates that it is the current default setting. For example, 12 CPI indicates that 12 characters per inch is the default pitch.
To change the default, select and save a new pitch setting.
- While in setup mode, you can use the LIST function to print out a list of the currently selected options (see the next section for details).
- To exit setup mode and permanently save your changes, select the SAVE & END function. For details, see the section **Exiting and Saving** later in this chapter. To exit setup mode without saving your changes, turn the printer off. Your previous power-on defaults are active when you turn the printer on again.

PRINTING A LIST OF SELECTED OPTIONS(LED)

The LIST function prints a list of all the printer's currently selected options. This function is useful for checking the printer settings when you first enter setup mode or just before you exit. To print a list of options, load continuous forms paper and then proceed as follows:

1. Enter setup mode.

Press the AUTO GAP button and the HI IMPACT button simultaneously until the printer beeps. Wait for the printer to stop printing and check that the following <<FUNCTION>> menu is printed:

```
<< FUNCTION >>
SAVE&END MENU1  MENU2  HARDWRE ADJUST  CONFIG  GAP-ADJ  DEFAULT  LIST  SELF-TST
HEX-DUMP V-ALMNT  INITIAL
```

2. Select the LIST function.

Repeatedly press the “TEAR OFF” or “LOAD” button to position the cursor on the left edge of the aluminum print guide on LIST. Next press the ▲ button or the ▼ button to select the LIST function. The printer starts to print a list of the currently selected options. The preselected factory settings, also called factory defaults, are shown on the opposite page.

When the printer finishes printing the list of options, it reprints the <<FUNCTION>> menu.

3. Do either of the following:

- Select another function, or
- Exit setup mode, saving any changes you made.

For details about other functions, see the other sections in this chapter. To exit setup mode and save your changes, make sure that the cursor on the left edge of the aluminum print guide is positioned on SAVE & END, then press the ▲ button or the ▼ button.

```

*2 TEAR-EN is printed when AUTO option is selected for TEAROFF.

Printout of factory defaults using LIST

ENTERING SETUP MODE(LCD)

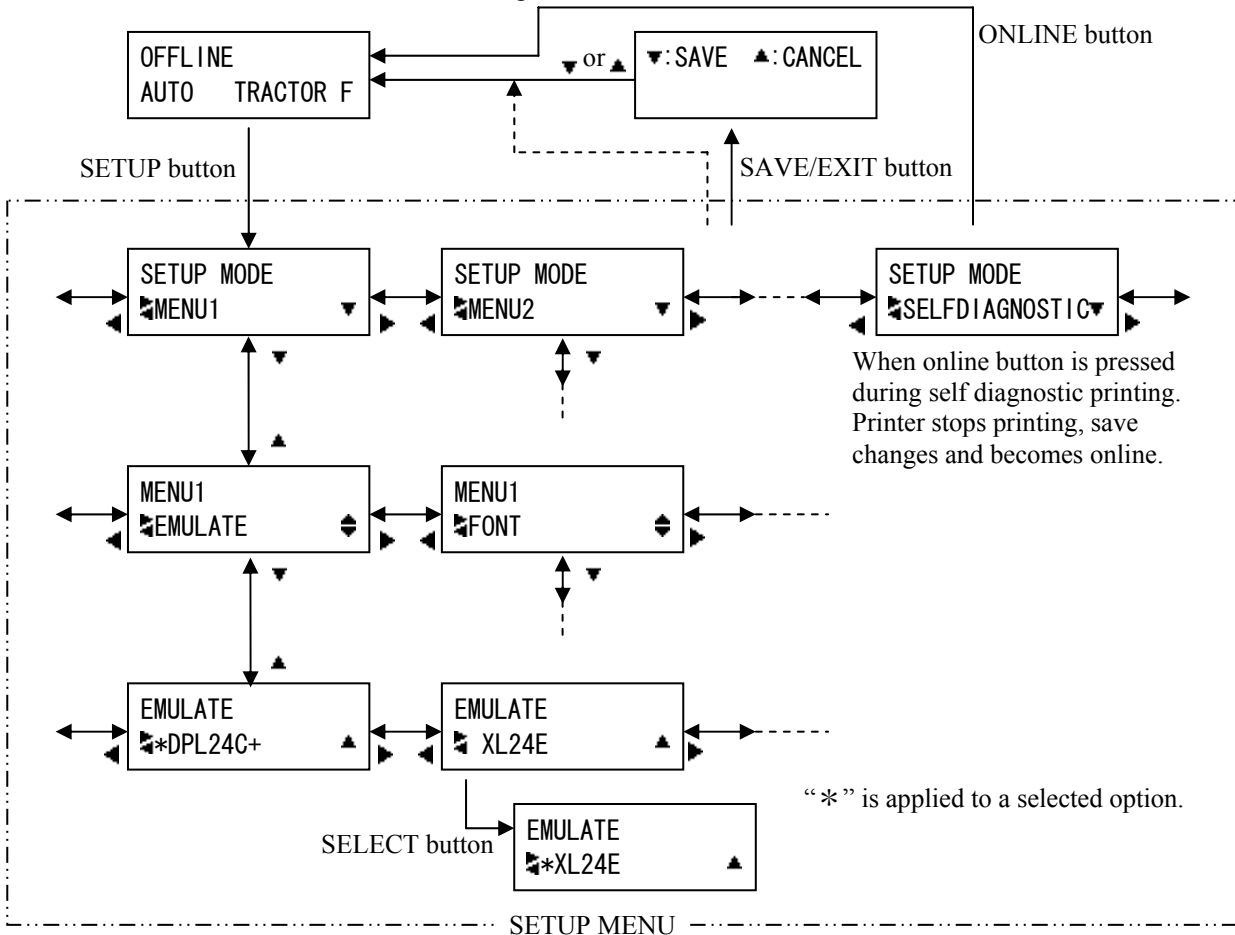

To enter setup mode, follow these steps:

1. Press the ONLINE button to place the printer offline.
2. Press the SETUP button until the printer beeps.

Entering setup mode

3. When the printer enters offline setup mode, LCD display shall change as follows.

Transition of LCD SETUP MODE

**OVERVIEW OF
SETUP MODE (LCD)**

Available functions of LCD types SETUP MODE are as follows.

Table 5.2 summarizes the purpose of each function.

Table 5.2 Setup Mode Functions(LCD)

Function		Purpose
MENU1 and MENU2		Assigns print features to MENU1 and MENU2 on the printer control panel.
HARDWRE		Changes the printer hardware options.
ADJUST		Changes the print position adjustment options.
CONF IG		Changes the configuration options.
GAP-ADJ		Adjust the gap between the print head and printing paper.
SUB FUNCTION	SAVE&EXIT	Exits setup mode and saves any changes made while in setup mode.
	LIST	Prints a list of all currently selected options.
	DEFAULT	Resets factory defaults in MENU1 and MENU2.
	INITIAL	Resets factory defaults in MENU1, MENU2, HARDWRE, ADJUST, CONFIG, GAP-ADJ.
SELFDIAGNOSTIC	SELF-TST	Runs the self-test.
	HEX-DUMP	Prints hex dumps.
	V-ALMNT	Checks and corrects vertical print alignment.

Detail of selecting items and options are almost same as LED type.

General difference of LCD type SETUP MODE is only SETUP method.

**PRINTING A LIST OF
SELECTED
OPTIONS(LCD)**

The LIST function prints a list of all the printer's currently selected options. This function is useful for checking the printer settings when you first enter setup mode or just before you exit. To print a list of options, load paper A4 size or more in advance and select list function.

Note

If paper runs out only LOAD button is available.

DECIDING WHICH OPTIONS TO CHANGE

The previous page shows a printout of the printer’s factory default settings. In this printout, options are listed by functional group:

- Menu 1 settings (MENU1 function)
- Menu 2 settings (MENU2 function)
- Hardware settings (HARDWRE function)
- Print position adjustment settings (ADJUST function)
- Configuration settings (CONFIG function)
- Print head gap adjustment settings (GAP-ADJ function)

Most selectable options only alter print features, such as the typestyle, and page format. However, some options must be selected correctly for the printer to work properly with your hardware and software.

For each function, Table 5.3 lists items whose options must be selected correctly for system and printer accessory compatibility.

Table 5.3 Required Options

Function	Item	Option
MENU1	EMULATE	The emulation selected on the printer must be the same as the emulation selected in your software. If you selected an emulation when you set up the printer (Chapter 2), you do not need to change the EMULATE option unless you want to change to a different emulation. The emulation assigned to MENU1 is the default when you turn the printer on. See the section MENU1 and MENU2 Items and Options later in this chapter.
MENU2	None	If you use MENU2, the emulation selected for MENU 2 must be the same as the emulation selected in your software. See the section MENU1 and MENU2 Items and Options later in this chapter.

Table 5.3 Required Options (Cont.)

Function	Item	Option
HARDWRE	FORMAT BAUD-RT PROTOCL DSR DUPLEX CTS CD	<p>If you have a serial interface, the serial interface options selected on the printer must be the same as the settings you selected using your software or your computer operating system. If the settings are not the same, the printer will not print or will print garbage.</p> <p>See the section Hardware Items and Options later in this chapter.</p>
ADJUST	None	<p>If you are not using software to specify the top margin of the page, use the printer's default top-of-form setting, 1 inch (25.4 mm) from the top of the paper. If you are using software to specify the top margin of the page, change the default setting to 1/6 inch (4.2 mm).</p> <p>See the section Print Position Adjustment Items and Options later in this chapter.</p>
CONFIG	None	<p>You can change the printer's primary configuration.</p> <p>See the section Configuration Items and Options later in this chapter.</p>
GAP-ADJ	None	<p>If you adjust the gap manually or fix the gap, change the setting.</p> <p>See the section Print Head Gap Adjustment Items and Options.</p>

**MENU1 AND MENU2
ITEMS AND
OPTIONS**

The MENU1 and MENU2 functions allow you to change the print options assigned to MENU1 and MENU2 on the printer control panel. In normal (nonsetup) mode, you can easily switch between the menus for printing, as described in Chapter 4.

MENU1 is invoked when you first turn the printer on.

Select the same emulation on the printer as is selected in your software. If the emulations are not the same, the printer will not work correctly with your software. If you plan to use two different emulations on a regular basis, assign the most frequently used emulation to MENU1. Assign the second emulation to MENU2. All of the other settings available for MENU1 and MENU2 are optional. Some of the items and options will vary with the emulation.

To determine which features your software supports, refer to your software documentation.

Table 5.4 describes the MENU1 and MENU2 items and options. Both functions offer the same items and options. The items in Table 5.4 are listed in the order in which they are printed. Not all items are defined for all emulations and some options vary with the emulation.

The procedure for changing the options is referred to in the section **Setup Mode Example**.

Table 5.4 MENU1 and MENU2 Items and Options

NOTES:

- Underlined options are the factory defaults.
- Asterisks identify items and options that differ for the IBM XL24E and Epson ESC/P2 emulations. The notes are defined at the end of the table.

MENU1 and MENU2 Items	Options	Description
<EMULATE>	<p><u>DPL24C+</u></p> <p>XL24E ESC/P2</p>	<p>Select the same emulation as is selected in your software. See the section Selecting an Emulation in Chapter 2 for information on selecting an emulation.</p> <p>Fujitsu DL-series printers (DPL24C PLUS command set)</p> <p>IBM Proprinter XL24E printers Epson printers using the ESC/P2 command set</p> <p>NOTE: When you change the emulation, all MENU1 or MENU2 options are reset to the factory defaults for that emulation.</p>
	<p><u>COUR 10</u></p> <p>PRSTG12</p> <p>COMPRSD</p> <p>BOLDFCE</p> <p>PICA 10</p> <p>CORRESP</p> <p>OCR-B</p> <p>OCR-A</p> <p>COUR-N</p> <p>COUR-B</p> <p>COUR-I</p> <p>N.SAN-N</p> <p>N.SAN-B</p> <p>N.SAN-I</p>	<p>For each of the following fonts, the recommended pitch settings are given after the font name. Table 5.4 MENU1 and MENU2 Items and Options (Cont.)

NOTES:

- Underlined options are the factory defaults.
- Asterisks identify items and options that differ for the IBM XL24E and Epson ESC/P2 emulations. The notes are defined at the end of the table.

MENU1 and MENU2 Items	Options	Description
<LANGUGE> (continued)	DANISH1	Danish I
	ITALIAN	Italian
	SPANSH1	Spanish I
	SPANSH2	Spanish II
	JAPAN	Japanese
	NORWEGN	Norwegian
	LATIN A	Latin American
	FRENCH	French
	DANISH2	Danish II
	KOREA	Korea
	LEGAL	Legal
<CHR-SET>	(*2)	
	SET 1	IBM character set 1
	<u>SET 2</u>	IBM character set 2 If a downloaded (soft) font is used, the character set for that font overrides the <CHR-SET> setting.
(*3)	<u>ITALIC</u>	Italic characters are available.
	GRAPHIC	Graphics characters (ruled lines) are available.

Table 5.4 MENU1 and MENU2 Items and Options (Cont.)

NOTES:

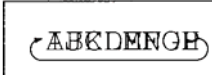

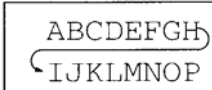

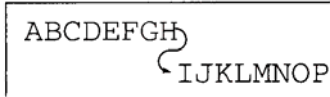

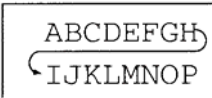

- Underlined options are the factory defaults.
- Asterisks identify items and options that differ for the IBM XL24E and Epson ESC/P2 emulations. The notes are defined at the end of the table.

MENU1 and MENU2 Items	Options	Description
<PRF-SKP>	SKIP <u>NO-SKIP</u>	For continuous forms, this option specifies whether an inch is skipped around the perforation. If you are not using software to specify a bottom margin, select SKIP when using thicker, multipart forms. One inch is skipped around the perforation. The perforation is not skipped. Printing continues in the bottom margin of the page.
<WIDTH>	<u>13.6 IN</u> 11.4 IN 11.0 IN 8.0 IN	13.6-inch page width 11.4-inch page width 11-inch page width 8-inch page width
<ZEROFNT> (*2)	<u>NO-SLSH</u> SLASH	Specifies whether to print the number zero with a slash. This is useful to distinguish the capital letter "O" from the number "0". Invalid for some soft fonts. 0 ø

Table 5.4 MENU1 and MENU2 Items and Options (Cont.)

NOTES:

- Underlined options are the factory defaults.
- Asterisks identify items and options that differ for the IBM XL24E and Epson ESC/P2 emulations. The notes are defined at the end of the table.

MENU1 and MENU2 Items	Options	Description
<DC3-CDE> (*4)	<u>ENABLE</u> DISABLE	Enables the DC1 and DC3 codes. Any data received between DC3 and the next DC1 is ignored. Disables the DC1 and DC3 codes. These codes are then ignored.
<CR-CODE>	<u>CR ONLY</u> CR & LF	No line feed is added to a carriage return.  A line feed is added to each carriage return. 
<LF-CODE> (*2)	LF ONLY <u>LF & CR</u>	No carriage return is added to a line feed.  A carriage return is added to each line feed. 

Note

The default value of <LF-CODE> changes with the selected emulations as follows.

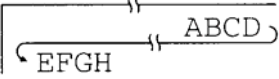

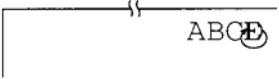

"LF&CR" is a default value in the DPL24C+ emulations.

"LF ONLY" is a default value in the XL24E emulations.

Table 5.4 MENU1 and MENU2 Items and Options (Cont.)

NOTES:

- Underlined options are the factory defaults.
- Asterisks identify items and options that differ for the IBM XL24E and Epson ESC/P2 emulations. The notes are defined at the end of the table.

MENU1 and MENU2 Items	Options	Description
<RGHTEND>	<u>WRAP</u>	End-of-line wrap. Causes a carriage return plus a line feed. 
	OVR-PRT	Characters are overprinted at the end of a line. 
<==END==>		(LED only) Indicates the end of MENU1 items. Press the ▼ button to print the first item, <EMULATE>. Press the ▲ button to print the previous item, <RGHTEND>. Press the ONLINE button to reprint the <<FUNCTION>> menu.

- *1 Unavailable in the IBM XL24E emulation
- *2 Unavailable in the Epson ESC/P2 emulations
- *3 Available only in the Epson ESC/P2 emulations
- *4 Available only in the DPL24C+ emulation

Resetting MENU1 and MENU2

To reset the factory defaults for both MENU1 and MENU2, select the DEFAULT/INITIAL function. For more information, see the section Resetting Defaults later in this chapter. The DEFAULT function cannot reset those options which are handled by the HARDWRE, ADJUST, CONFIG, and GAP-ADJ functions. The INITIAL function can reset those options which are handled by the HARDWRE, ADJUST, CONFIG, and GAP-ADJ functions.

CHANGING HARDWARE OPTIONS

The HARDWRE function defines the printer's hardware operating conditions. If you are using the optional RS-232C serial interface, the serial interface options must be set properly for the printer to function correctly with your system hardware.

Table 5.5 describes the HARDWRE items and options. Items are listed in the order in which they are printed. The procedure for changing the hardware options is described after Table 5.5.

Table 5.5 HARDWRE Items and Options

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description
<PPR-OUT>	CNTOONLY	The printer detects paper-out only for continuous forms. Printing stops and the PAPER OUT indicator lights red.
	<u>DETECT</u>	The printer detects paper-out for both continuous forms and single sheets. Printing stops and the PAPER OUT indicator lights red.
	IGNORE	The printer ignores paper-out for both continuous forms and single sheets. Printing continues until no more data remains. No PAPER OUT warning is displayed.

Table 5.5 HARDWARE Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

HARDWARE Items	Options	Description
<PRT-DIR>	<u>BI-DIR</u>	Bidirectional printing. The printer prints in either direction while seeking the next print direction for a shorter print time.
	UNI-DIR	Unidirectional printing. Unidirectional printing is used for printing vertical lines in tables even if vertical alignment is not adjusted. Unidirectional printing is slower than bidirectional printing.
<BUZZER>	<u>ON</u>	Enables or disables the printer status buzzer. Buzzer on (recommended). The printer beeps to indicate paperout or other conditions.
	OFF	Buzzer off under any conditions.
<WORD-LG>		To determine the required word length, refer to your computer documentation. Select 8-BIT to print bit image graphics.
	<u>8 BIT</u>	8-bit word length (used by most computers)
	7 BIT	7-bit word length (MSB = 0)
<BUFFER>		Assigns buffer memory to input data and downloaded font data.
		Print buffer Download buffer
	NONE	0 byte 128K bytes
	256BYTE	256 bytes 127.75K bytes
	2KBYTE	2K bytes 126K bytes
	<u>8KBYTE</u>	8K bytes 120K bytes
	24KBYTE	24K bytes 104K bytes
	32KBYTE	32K bytes 96K bytes
	96KBYTE	96K bytes 32K bytes
128KBYT	128K bytes 0K bytes	

Table 5.5 HARDWRE Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description
<BUFFER> (continued)		<p>NOTE:</p> <ul style="list-style-type: none"> • 0BYTE option is recommended only for graphics application. • With 128KB selected, the printer cannot accept any download font data.
<INTRFCE>	<p>PARALEL</p> <p>SERIAL</p> <p>USB</p> <p><u>AUTO-2S</u></p> <p>AUTO-4S</p> <p>AUTO-6S</p> <p>AUTO10S</p> <p>AUTO15S</p> <p>AUTO20S</p>	<p>Selects the type of the interface to the computer.</p> <p>Centronics parallel interface</p> <p>RS-232C serial interface</p> <p>USB interface</p> <p>Auto interface selection mode</p> <ul style="list-style-type: none"> • Both interfaces are ready for communication. • Specify the timing regarding the selected interface as being inactive. <p>To switch the interface to the optional LAN interface, mount the LAN card with the setup mode set to "AUTO-XS" or "AUTOXXS" under "INTERFCE," which in turn is under "HARDWRE" The interface will automatically switch to the optional LAN interface.</p> <p>To switch the interface to something other than the optional LAN interface, do either of the following:</p> <ul style="list-style-type: none"> • To return the setup mode to "INTERFCE" under "HARDWRE," remove the LAN card. • To switch the interface to a fixed interface, set PARALEL,USB with the LAN card mounted, and the setup mode set to "INTERFCE" under "HARDWRE."

Table 5.5 HARDWRE Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description		
<p>Serial Interface or USB interface Items. The following <FORMAT> to <DUPLEX> items are not printed when you select the PARALEL option for the <INTRFCE> item. Be sure that the options selected on the printer are the same as the options selected using your computer operating system or your software. Refer to the documentation provided for your computer and software.</p>				
<FORMAT>		Number of data bits	Parity bit	Number of stop bits
	<u>8NONE 1</u>	8	None	1
	8NONE 2	8	None	2
	8EVEN 1	8	Even	1
	8ODD 1	8	Odd	1
	7EVEN 1	7	Even	1
	7ODD 1	7	Odd	1
	7MARK 1	7	Mark	1
	7SPACE 1	7	Space	1
	7EVEN 2	7	Even	2
	<u>7ODD 2</u>	7	Odd	2
<p>The data format also includes a start bit. The mark is logical 1. The space is logical 0.</p>				
<BAUD-RT>	150 300 600 1200 2400 4800 <u>9600</u> 19200	The baud rate is in bps (bits per second). Select the same baud rate as 600 used by your computer or modem.		

Table 5.5 HARDWRE Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description
<PROTOCL>	<u>XON/XOF</u> DTR REV-CHL	Indicates data transmission protocol. The DC1 and DC3 codes are used. The Data Terminal Ready signal is used. The Reverse Channel signal is used.
<DSR>	<u>IGNORE</u> DETECT	DSR is ignored by the printer. DSR is detected by the printer.
<DUPLEX>	<u>FULL</u> HALF	Simultaneous data transmission occurs in opposite directions. Data transmission occurs in either direction, but not simultaneously.
<CTS>	IGNORE <u>DETECT</u>	CTS is ignored by the printer. CTS is detected by the printer.
<CD>	<u>IGNORE</u> DETECT	CD is ignored by the printer. CD is detected by the printer.
<==END==>		Indicates the end of the HARDWRE item list. Press the ▼ button to print the first item, which is <PPR-OUT>. Press the ▲ button to print the previous item. Press the ONLINE button to reprint the <<FUNCTION>> menu.

CHANGING PRINT POSITION ADJUSTMENT OPTIONS

When you print using ruled paper, you often want to adjust the print position so that the print sits properly on the ruled lines. The ADJUST function allows you to:

- Set top-of-form position
- Fine-tune top-of-form position
- Fine-tune left print start column (left margin)
- Adjust for accumulative line spacing error in a page

The top edge of your paper is the physical top of the page. The logical top of the page, as “understood” by the printer when loading paper, is called the top-of-form. Printing starts at this position. Note that printing actually starts at the position obtained by adding the following:

- Top-of-form, default = 1.8/6 inch (7.6mm)
- Top margin specified by your software
- Printer TOP-MRG (top margin setting), default = 1 line

Table 5.6 describes the ADJUST items and options. Items are listed in the order they are printed. The procedure for changing top-of-form is described after Table 5.6.

Table 5.6 ADJUST Items and Options

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description
<FCNTORG>	1/6 IN <u>1.8/6 IN</u> : 6/6 IN : 66/6 IN	Sets the top-of-form for front continuous forms in increments of 1/6 inch (4.2 mm) from the physical top of the page. The default is recommended if your top margin is not software-specified. A setting of 1/6 inch is preferable when your top margin is software-specified.
<FCNTFIN>	<u>0/180</u> , ..., 29/180	Fine-tunes the top-of-form position for front continuous forms. Increases top-of-form in increments of 1/180 inch (0.14 mm).
<RCNTORG>	1/6 IN <u>1.8/6 IN</u> : 6/6 IN : 66/6 IN	Sets the top-of-form for rear continuous forms in increments of 1/6 inch (4.2 mm) from the physical top of the page. The default is recommended if your top margin is not software-specified. A setting of 1/6 inch is preferable when your top margin is software-specified.
<RCNTFIN>	<u>0/180</u> , ..., 29/180	Fine-tunes the top-of-form position for rear continuous forms. Increases top-of-form in increments of 1/180 inch (0.14 mm).

Table 5.6 ADJUST Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description
<FCUTORG>	1/6 IN <u>1.8/6 IN</u> : 6/6 IN : 66/6 IN	Sets the top-of-form for front single sheets in increments of 1/6 inch (4.2 mm) from the physical top of the page. The default is recommended if your top margin is not software-specified. A setting of 1/6 inch is preferable when your top margin is software-specified.
<FCUTFIN>	<u>0/180, ..., 29/180</u>	Fine-tunes the top-of-form position for front single sheets. Increases top-of-form in increments of 1/180 inch (0.14 mm).
<RCUTORG>	1/6 IN <u>1.8/6 IN</u> : 6/6 IN : 66/6 IN	Sets the top-of-form for rear single sheets in increments of 1/6 inch (4.2 mm) from the physical top of the page. The default is recommended if your top margin is not software-specified. A setting of 1/6 inch is preferable when your top margin is software-specified.
<RCUTFIN>	<u>0/180, ..., 29/180</u>	Fine-tunes the top-of-form position for rear single sheets. Increases top-of-form in increments of 1/180 inch (0.14 mm).

Table 5.6 ADJUST Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description
<CNT-LFT>	-10/90, ..., <u>0/90</u> , ..., 10/90	Fine-tunes the left print start position for continuous forms. Moves the position left or right in increments of 1/90 inch (0.28 mm).
<CUT-LFT>	-10/90, ..., <u>0/90</u> , ..., 10/90	Fine-tunes the left print start position for single sheets. Moves the position left or right in increments of 1/90 inch (0.28 mm).
<FCNTADJ>	-14/360, -9/360, - 4/360, <u>0/360</u> 4/360, 9/360, 14/360, GRAPHIC(*1)	Compensates for the forms feed error accumulated through feeding of front continuous forms.
<RCNTADJ>	-14/360, -9/360, - 4/360, <u>0/360</u> 4/360, 9/360, 14/360, GRAPHIC(*1)	Compensates for the forms feed error accumulated through feeding of rear continuous forms.
<FCNTAJL>	-14/360, -9/360, - 4/360, <u>0/360</u> 4/360, 9/360, 14/360, GRAPHIC(*1)	Compensates for the forms feed error accumulated through feeding of front continuous forms. (Last page)

Table 5.6 ADJUST Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description
<RCNTAJL>	-14/360, -9/360, - 4/360, <u>0/360</u> 4/360, 9/360, 14/360, GRAPHIC(*1)	Compensates for the forms feed error accumulated through feeding of rear continuous forms. (Last page)
<CUT-ADJ>	-14/360, -9/360, - 4/360, <u>0/360</u> 4/360, 9/360, 14/360, GRAPHIC(*1)	Compensates the line spacing pitch on the basis of the spacing error accumulated for feeding single sheets by 10 inches. Decreases or increases in increments of 1/360 inch in total.
<FCSFADJ>	-14/360, -9/360, - 4/360, <u>0/360</u> 4/360, 9/360, 14/360, GRAPHIC(*1)	Compensates the line spacing pitch on the basis of the spacing error accumulated for feeding single sheets by 10 inches. Decreases or increases in increments of 1/360 inch in total. This option is available only when paper is being loaded in the front cut sheet feeder.
<RCSFADJ>	-14/360, -9/360, - 4/360, <u>0/360</u> 4/360, 9/360, 14/360, GRAPHIC(*1)	Compensates the line spacing pitch on the basis of the spacing error accumulated for feeding single sheets by 10 inches. Decreases or increases in increments of 1/360 inch in total. This option is available only when paper is being loaded in the rear cut sheet feeder.

Table 5.6 ADJUST Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

HARDWRE Items	Options	Description
<==END==>		(LED only) Indicates the end of MENU1 items. Press the ▼ button to print the first item, <FCNTORG>. Press the ▲ button to print the previous item, <RCSFADJ>. Press the ONLINE button to reprint the <<FUNCTION>> menu.

*1: When printing graphics, selecting “GRAPHIC” may result in the printing of clearer graphics.

The CONFIG function defines the printer’s primary configuration. You can set the following options to ensure that the printer meets your requirements:

CHANGING CONFIGURATION OPTIONS

- Tear off for continuous forms
- Auto loading of single sheets
- Direct decoding of certain commands
- Enabling of the AREA OVER indicator

Table 5.6 describes the CONFIG items and options. Items are listed in the order they are printed. The procedure for changing the configuration options is described after Table 5.7.

Table 5.7 CONFIG Items and Options

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
<TEAROFF>	<u>MANUAL</u>	Auto or manual tearoff feed. Automatic tearoff feed is invalid, and tearoff feed must be done using the TEAR OFF button.
	AUTO	Automatic tearoff feed is valid but only for continuous forms. Tearoff feed can also be done using the TEAR OFF button.

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
<TEARPOS>	<p><u>VISIBLE</u></p> <p>ALWAYS</p>	<p>Tearoff position.</p> <p>Select this option when your software positions forms to the next top-ofform after printing the last data. The printer performs tearoff feed without adding a form feed when data transfer has stopped.</p> <p>Select this option when your software stops after printing the last data. The printer performs tearoff feed after adding a form feed when data transfer has stopped.</p> <p>Note: For both settings, tearoff positioning will fail if the page length setting does not match the actual perforation spacing.</p>
The following <TEAR-EN> item is printed when TEAROFF:AUTO is specified for the <TEAROFF> item.		
<TEAR-EN>	<p>0 SEC</p> <p><u>1 SEC</u></p> <p>2 SEC</p> <p>4 SEC</p> <p>6 SEC</p>	<p>Tearoff enabled time (offset time).</p> <p>The offset time is from when data transfer stops to when the printer performs automatic tearoff feed.</p> <p>If the printer receives data again within the offset time, the printer does not perform automatic tearoff feed.</p>

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
<TEAR-EN> (continued)		In some application programs, data transfer may stop temporarily due to internal processing. This setting can avoid an undesired tearoff feed by waiting for up to six seconds each time data transfer stops.
<CUTLOAD>	<u>AUTO</u>	Single sheet autoloading. Single sheet paper is automatically loaded a certain time after you set the paper.
	BUTTON	Single sheet paper can be loaded by pressing the LOAD button.
The following <LOADTIM> item is printed when CUTLOAD:AUTO is specified for the <CUTLOAD> item.		
<LOADTIM>		Autoload start time.
	0.5, 1.0, <u>1.5</u> , 2.0 2.5, 3.0SEC	Autoloading starts when this amount of time passes after you set single sheet paper.
<DECODE>	<u>DIRECT</u>	Command decode timing. The printer decodes certain commands immediately after receiving data. Example: ESC SUB I, ESC CR P (DPL24C+) ESC Q # (IBM XL24E)
	QUEUED	The printer decodes commands after storing all data (including commands) in the input buffer. This speeds data reception because the printer does not require decoding time during data reception.

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
<AREACNT>	<p><u>ENABLE</u></p> <p>DISABLE</p>	<p>Area-over detection control.</p> <p>Detects the left and right edges of paper when loading the paper. The printer does not print data beyond the edges.</p> <p>Does not detect the edges. Select this option when you are using colored or preprinted paper.</p>
<CUT-ONL>	<p>OFFLINE</p> <p><u>ONLINE</u></p>	<p>Printer status after loading paper in offline mode for single sheets.</p> <p>Remains offline after paper loading.</p> <p>Goes into online after paper loading.</p>
<CNT-ONL>	<p>OFFLINE</p> <p><u>ONLINE</u></p>	<p>Printer status after loading paper in offline mode for continuous forms.</p> <p>Remains offline after paper loading.</p> <p>Goes into online after paper loading.</p>
<LOCK>	<p><u>NONE</u></p> <p>SETUP</p> <p>ALL</p>	<p>Lock function of setup mode.</p> <p>Enables all buttons on the control panel.</p> <p>Disables the setup-related buttons to keep the printer from entering setup mode during the offline state.</p> <p>Disables the setup-related buttons and the MENU button.</p> <p>Once this setting has been selected, setup mode cannot be entered from the control panel. To cancel this setting, turn the power on while simultaneously pressing the HI IMPACT, PAPER PATH, and LF/FF buttons.</p>

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
</S/>	<p><u>DISABLE</u></p> <p>ENABLE</p>	<p>Effectiveness of the Cut Sheet Selection command (/S/).</p> <p>Makes the command ineffective.</p> <p>Makes the command effective.</p> <p>Note: The Cut Sheet Selection command (/S/) changes the paper source to the paper table and waits for manual insertion of a cut sheet.</p>
<FCNT-PE>	<p>TRACTOR</p> <p><u>EDGE</u></p>	<p>Detection of end of front continuous forms.</p> <p>Paper end is detected by the sensor on the tractor unit.</p> <p>Paper-end unprinted area: Continuous forms: About 101 mm</p> <p>Regardless of paper end, printing continues near to the edge of paper.</p> <p>Paper-end unprinted area: About 4 mm for both continuous forms</p>
<RCNT-PE>	<p>TRACTOR</p> <p><u>EDGE</u></p>	<p>Detection of end of rear continuous forms.</p> <p>Paper end is detected by the sensor on the tractor unit.</p> <p>Paper-end unprinted area: Continuous forms: About 157 mm</p> <p>Regardless of paper end, printing continues near to the edge of paper.</p> <p>Paper-end unprinted area: About 4 mm for both continuous forms</p>

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
GATHER	ENABLE	Setting of ribbon protective control at a line feed on continuous forms The protective control is executed.
	<u>DISABLE</u>	The protective control is not executed.
CUT-CTL	PRCISIN	Setting of retracting control at canceling TEAR OFF of continuous forms. The precision-prioritized retracting control is executed. It retracts a certain amount of paper (the top part of the paper which hangs out from the TOFS), and then moves back to the position before TEAR OFF. If TOFS detects paper end when a certain amount of paper is retracted, it executes the continuous forms save operation and then executes the paper loading operation.
	<u>SPEED</u>	The speed-prioritized retracting control is executed. It retracts the paper by the amount the paper was advanced.

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
SKIP-PR	<u>ENABLE</u>	Setting of printing speed change processing (skip) The skip processing is executed. When a certain amount of blank spaces are found in a line, it changes the printing speed for the blank spaces.
	DISABLE	The skip processing is not executed. It does not change the printing speed for the blank spaces. - If the printing speed of the printing data varies before and after the blank spaces (such as LQ characters + blank space + CQ characters), it changes printing speeds regardless of this setting.
STATUS	ENABLE	Setting of the asynchronous status function The status information is stored in the send buffer by a nibble mode request.
	<u>DISABLE</u>	The status information is not stored in the send buffer by a nibble mode request.
BANDCTL	ENABLE	Setting of reducing backward line feeds as much as possible. Backward line feeds occur when printing vertical enlargement characters or multi-path characters which involve several printing paths for a print activation. Reduce control is performed.
	<u>DISABLE</u>	Reduce control is not performed.

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
TOF-CTL	<u>DRIVER</u> SETUP	Setting of priority on TOF control to a printer driver specification or a setup specification. TOF control determines the amount of the top margin when paper is fed to the home position. Driver specification is given priority. Setup specification is given priority.
<CUTEDIR>	<u>FRONT</u> REAR	Selection of the eject direction of cut sheets with manually feeding of cut sheets Ejected to the front. Ejected to the rear.
<CSFEDIR>	FRONT <u>REAR</u>	Selection of the eject direction of cut sheets with use of a CSF Ejected to the front. Ejected to the rear.
<CUTEJCT>	<u>AUTO</u> MANUAL	Selection for automatic ejection of cut sheets Automatic ejection of cut sheets when no cut sheet is detected No automatic ejection of cut sheets when no cut sheet is detected
<FL-CENT>	<u>POSN1</u> POSN2	Selection of the print carrier position when paper is fed via a front path (with feeding of continuous forms paper from the front, use of a front CSF, and manual feeding of cut sheets) Position 1: Column 31 Position 2: Column 42

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
<RL-CENT>		Selection of the print carrier position when paper is fed via a front path (with feeding of continuous forms paper from the rear and use of a rear CSF)
	<u>POSN1</u>	Position 1: Column 31
	POSN2	Position 2: Column 42
<SKEWCNT>		Detection of paper feed skew
	<u>ENABLE</u>	Enables paper feed skew detection.
	DISABLE	Disables paper feed skew detection.
<FF-CODE>		Selection of the method of processing for the FF code is received in cut sheet mode or for the "LF/FF" switch
	<u>EJECT</u>	Ejects cut sheets.
	FORM-FD	Uses a page break.
<PRT-CUT>		Selection of the cut amount (margin) on both sides of continuous forms paper when AREACNT, the cut amount in continuous printing, is set to ENABLE
	71/180	Sets the cut amount for printing to 71/180 inches (about 10.0 mm).
	<u>99/180</u>	Sets the cut amount for printing to 99/180 inches (about 14.0 mm).
<CSFBIN1>		Selection of the CSF for bin 1 if both a front CSF and rear CSF are mounted
	<u>FRONT</u>	Front CSF
	REAR	Rear CSF

Table 5.7 CONFIG Items and Options (Cont.)

NOTE: Underlined options are the factory defaults.

CONFIG Items	Options	Description
<CNT-LD>	PRCISIN	Selection for the paper feeding of continuous forms paper Gives a higher priority to precision.
	<u>SPEED</u>	Gives a higher priority to speed.
<CSF-LD>	<u>NORMAL</u>	Selection of the method of feeding from the CSF Feeds paper directly from the CSF hopper.
	SWBACK	Feeds paper from the CSF hopper to either the cut sheet table used with a front CSF or the stacker used with a rear CSF. Then, that paper is fed again.
<CSFAPTC>	ALWAYS	Paper thickness detection with use of a CSF Every sheet of paper that is fed
	<u>NORMAL</u>	Sheet of paper that is fed immediately after the feed pin is switched
<LF-CTL>	PRCISIN	Selection for LF mode Gives a higher priority to precision.
	<u>SPEED</u>	Gives a higher priority to speed.
<PR-MODE>	<u>NORMAL</u>	Selection for print mode (standard/low noise) Prints in standard mode.
	QUIET	Prints in low-noise mode.
<HI-IMPT>	<u>DISABLE</u>	Selection for high printing pressure mode Prints in standard pressure mode.
	ENABLE	Prints in high printing pressure mode.
