DoCoMo W-CDMA, GSM/GPRS System

Thank you for purchasing FOMA F905i mobile terminal.
Both before and during use of your FOMA F905i mobile terminal, be sure to thoroughly read this manual and instruction manuals that come with the battery pack and other devices to ensure you are able to correctly use your FOMA F905i mobile terminal. For more information, you may contact us as mentioned on the back of this manual.
Treated with care, your FOMA F905i mobile terminal will be your able partner.

Before using your FOMA terminal

- Because your FOMA terminal uses radio waves, it may not function in locations where it is difficult for radio waves to penetrate, such as tunnels, underground passages and some buildings, in areas where radio wave signals are weak, or out of service area. Even when you are high up in a tall building or condominium and nothing blocks your view outside, your FOMA terminal may not be able to receive or transmit signals. Also, communication may be interrupted even when the signal meter on your FOMA terminal indicates there is a strong signal and you are not moving (traveling).
- Use your FOMA terminal in a way that does not disturb others in public spaces, crowded locations or quiet places.
- Because your FOMA terminal uses radio waves to communicate, it is possible that a third party may attempt to tap your calls. However, the W-CDMA, GSM/GPRS system automatically applies a confidential communication function to all calls, so even if a third party could somehow tap a call, they only hear noise.
- Your FOMA terminal encodes voice communication as digital data. When you are operating your FOMA terminal while moving to a location subject to weaker radio wave signals, the transmitted digital data may not be correctly decoded and as a result the decoded voice may differ somewhat from the actual voice.
- Maintain a separate record of the data (Phonebook, Schedule, Notepad, Recorded messages, Voice memos, Movie memo) you registered in your FOMA terminal. Note that DoCoMo assumes no responsibility for any loss of saved contents of data resulting from malfunction, repair, changing of the model or other handling of the FOMA terminal.
- You are recommended to save important data to microSD memory card. Using DoCoMo keitai datalink, you can transfer and save phonebook, mail, schedule and other data to a PC.
- The user hereby agrees that the user shall be solely responsible for the result of the use of SSL.
  Neither DoCoMo nor the certifier as listed herein makes any representation and warranty as for the security in the use of SSL. If the data should be erased, DoCoMo assumes no responsibility for the loss of any data.
  Certifier : VeriSign Japan K.K., Cybertrust Japan Co., Ltd., GlobalSign K.K., RSA Security Japan Ltd., Secom Trust Systems Co., Ltd.
- This FOMA terminal is applicable to FOMA Plus-Area and FOMA HIGH-SPEED Area.
- The FOMA terminal can be used only via the FOMA network provided by DoCoMo and DoCoMo's roaming area.

Before using this manual

This FOMA terminal is applicable to Kisekae Tool (→P98). When changing the design of the menu screen using Kisekae Tool, the structure of some menus may be changed according to the usage frequency depending on the menu type. Also, the number assigned to menu item (item number) may not be applicable to some menu items. In such a case, as operations cannot be performed as described in this manual, switch to the basic menu (→P31) or reset the menu settings (→P100).

Latest information about this manual can be downloaded from DoCoMo's website.
