❖Emergency Calls

Making emergency calls from the terminal

1 1 2 ▶ [call]
or
MENU ▶ [Settings & NW services] ▶ [tools]

Information
Your phone supports emergency numbers, such as 112, which allow to make emergency calls with or without a SIM/USIM card inserted, if a 3G (UMTS) or GSM network is within range. However emergency calls may not be possible on all mobile phone networks, or when certain network services or phone features are in use. You should therefore never rely solely upon any mobile phone for essential communications, such as medical emergencies.

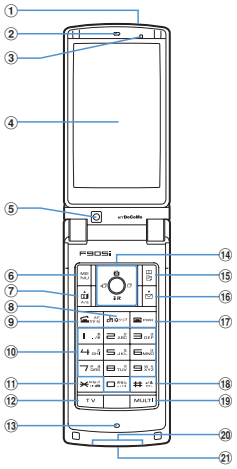
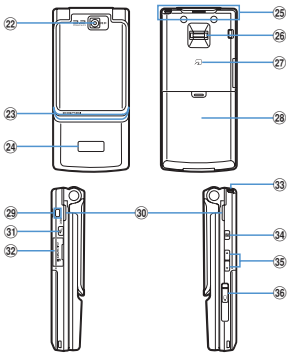
❖Before Using the Handset

Names and functions of parts





① Infrared data port→P307, 310

② Earpiece

③ Light sensor
Sense the ambient luminance (automatic adjustment of the brightness of the display).
＊ Blocking the light sensor may disable correct adjustment of the brightness.

④ Display→P26

⑤ In-camera
Use to shoot the image of yourself, send the image of yourself over a videophone call.

⑥ MENU MENU key
Use to display menus, perform the operation shown in the upper left part of the guide area.
Press and hold for 1 second or more : Start/Cancel Side key hold.

⑦ Videophone start/▶(scroll)/A/a key

Use to make/receive videophone calls, scroll upward by pages of the mail screen or site/website display, switch cases when entering characters, perform the operation shown in the lower-left corner of the guide area.

Press and hold for 1 second or more : Make a videophone call using the speakerphone.

⑧ クリア α/Clear key
Use to switch i-αppli stand-by display and i-αppli activation, delete characters or return to previous display.

Press and hold for 1 second or more : Start/cancel Self mode.

⑨ Start voice call/Character/Speakerphone/AF key
Use to make/answer voice calls, switch character entry modes, switch ordinary and speakerphone calls or activate/cancel Auto focus.

Press and hold for 1 second or more : Make a voice call using the speakerphone.

⑩ Keypads
Use to enter phone numbers or text, perform menu items.

Press 1-9 for 1 second or more : Perform the functions registered in the custom menu.

Press 0 for 1 second or more : Enter "+" when making international calls.

⑪ * key
Use to enter "*" and space, switch status display/hide of guide area in wide display.

⑫ TV Barcode Reader key
Start Barcode Reader.

⑬ Microphone

* Do not cover with your finger while talking or recording sound.

⑭ Multi-cursor key
Enter key
Use to perform the selected operation, activate Focus mode.

Press and hold for 1 second or more : Start i-αppli set for one-key shortcut.

Camera/↑key
Use to activate Still camera, adjust volume, move the cursor upward.

Press and hold for 1 second or more : Activate Movie camera.

i-mode/i-αppli/↓key
Use to display i-mode menu, adjust volume, move the cursor downward.

Press and hold for 1 second or more : Display i-αppli folder list.

Received calls/← (previous) key
Use to display Received calls, switch displays, move the cursor leftward.

Press and hold for 1 second or more : Set/cancel Privacy mode.

Redial/→(next) key
Use to display Redial, switch displays, move the cursor rightward.

Press and hold for 1 second or more : Start/cancel IC card lock.

* Representation of the icon may vary by the key operations as .

⑮ Phonebook/Schedule key
Use to display Phonebook, perform the operation shown in the upper right part of the guide area.

Press and hold for 1 second or more : Display Scheduler.

⑯ Mail/▼ (Scroll) key
Use to display mail menu, scroll downward the mail screen or site/website display by pages, perform the operation shown in the lower-right corner of the guide area.

Press 2 times : Check new message

Press and hold for 1 second or more : Display Compose message screen.

⑰ Power/End key
Use to terminate on-hold, calling/operating function, display/hide calendar layout.

Press and hold for 2 seconds or more : Turn power ON/OFF.

⑱ #/Line-feed key/Macro shooting/Silent mode
Use to enter "#", start a new line when entering characters, switch Macro mode while using out-camera.

Press and hold for 1 second or more : Start/cancel Silent mode.

⑲ Multitask key
Use to perform another function while talking or perform an operation (Multiaccess/ Multitask).

⑳ Charging jack

㉑ Jack
Connect various optional devices.

㉒ Out-camera
Use to shoot still images or movies, send images over a videophone call.

㉓ Light→P62, 102, 138, 349, 102
Turn on or blink when activating Lock on close, shooting an image, recording a movie, operating Music player operate according to the settings of Indicator light or Light alert, Simple light or Light.

㉔ Sub-display→P29

㉕ Built-in antenna
* The terminal has a Built-in antenna. To talk in better conditions, do not cover the antenna with your hand.

㉖ Fingerprint sensor→P108
Register/authenticate fingerprint

㉗ Back cover

㉘ Strap opening

㉙ Speaker

㉚ Left Side key
Activate Simple light.

㉛ microSD memory card slot→P294

㉜ Music key
Use to perform menu items on the sub-display, operate Music player

Press and hold for 1 second or more : Start/Stop Music player

㉝ Side keys [▲▼]

Side key [▲] : Stop ring tone, alarm or vibrate effect, increase the volume during a call, turn on the light of the sub-display while the terminal is folded, switch display, select menu

Side key [▲](1 sec. or more) : Start Quick answer machine while a call is incoming, start/stop voice memo/movie memo during a call, start/cancel Silent mode while the terminal is folded*, activate answer machines/voice memos on the stand-by display while the terminal is open

Side key[▼] : Decrease the volume during a call, Turn sub-display light ON while the terminal is open, switch display, select menu item

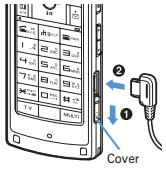
Side key [▼] (1 sec. or more) : Silence while playing video, check new message on the stand-by display.*

* The setting of pressing and holding the side keys is the operation in the default state.

㉞ Earphone/microphone jack→P356

Connecting the Earphone/microphone with switch

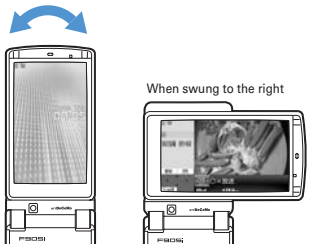
Slide cover in the direction of ❶, connect a Flat-plug Earphone/Microphone with Switch, etc (❷).



* Securely insert the plug.
* Avoid wrapping the cord around the terminal or bringing it close to the antenna. Doing so may lower wave reception level or generate noise.

Swinging display (YOKO-MOTION)

With the terminal open, rotate the display 90 degrees to the right or left to display Horizontal display.



Information

Do not rotate the display with the terminal folded. May cause the display and around the keys to be scratched.

Display overview

Top of the display

/ : Failed to Auto-update of latest pattern definition/Successful

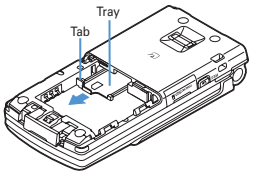
Using SIM/USIM card

Attaching/removing UIM

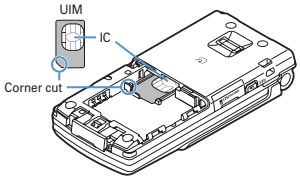
- After turning the power OFF, fold the terminal and hold it with your hand.
- Take care not to touch or scratch the IC portion.

■ **Attaching**

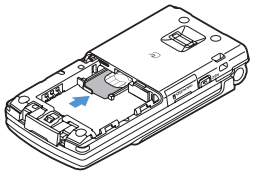
①Holding the tab, pull out the tray until it clicks.



②Put UIM with the IC side upward on the tray in the direction shown in the figure.

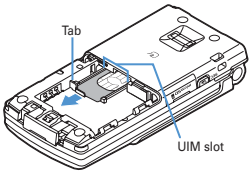


③Push the tray fully until it stops.



■ **Removing**

①Holding the tab, pull out the tray until it clicks and carefully remove UIM.

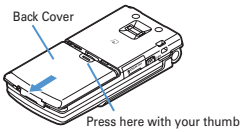


Attaching/removing battery pack

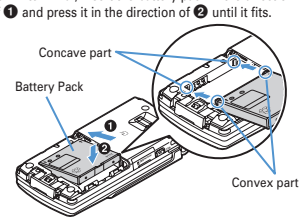
- After turning the power OFF, fold the terminal and hold it with your hand.

■ **Attaching**

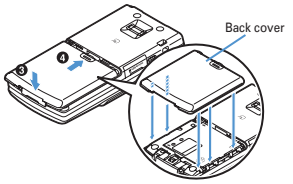
①Remove the back cover by sliding it about 2 mm in the direction of the arrow while pressing it with your thumb.



②With the label side of the battery pack face up, align the convex part of the battery pack with the concave part of FOMA terminal, insert the battery pack in the direction of ❶ and press it in the direction of ❷ until it fits.

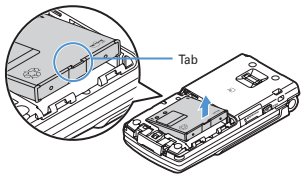


③Bring the 5 tabs of the back cover to meet the cuts in FOMA terminal. Slide in the direction of ❹ to fit in while pressing in the direction of ❸ so that no gap is generated between FOMA terminal and the back cover.



■ **Removing**

①Perform Step ① in Attaching battery pack.
②Hold and raise the battery pack tab in the direction shown by the arrow to remove the battery pack.



Charging the terminal

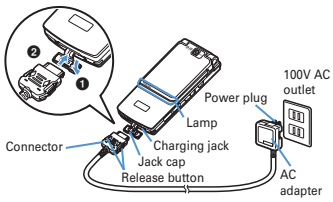
Charging with AC adapter

① Open terminal cap (❶) of the terminal, hold the connector horizontally with the arrow facing upward and insert it to terminal. (❷)

② Unfold the AC adapter's power plug and insert it into a 110V AC outlet.

③ After charging has completed, disconnect the AC adapter from the outlet and press the release buttons on both sides of the connector and remove the connector horizontally from the terminal.

<AC adapter>



Turning power ON/OFF

Turning power ON

1 [Power] (2 sec. or more)

Turning power OFF

1 [Power] (2 sec. or more)

Setting date and time

1 [MENU] ▶ [Settings & NW services] ▶ [7] [2] [1] ▶ Set the required items ▶ [Save]

Information

When you are setting the time and date, change the network to GSM to set up the time automatically. The following shows how to change the NW.

- [MENU] ▶ [Settings & NW services] ▶ [9] [2] ▶ Select GSM

If network is not GSM, change the Automatic Time/ Time-Difference Correction to "OFF" and set up manually.

❖Voice/Videophone Calls

Making voice/videophone calls

1 Enter a phone number.
2 Select a call type.
Making a voice call : [Voice Call]
Making videophone calls : [Video Call]

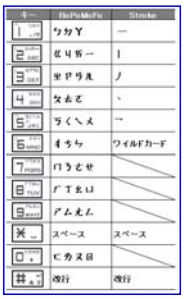
(Pressing twice quickly) : Save the current tune or tune in pause to Quick playlist

❖Entering characters

The allocation of the keys is as follows.
(TBD: the following figure will be replaced)



Entering characters (Zhuyin)

<Example> Entering "生日快樂"

1 Enter characters in the BoPoMoFo entry mode.
9 9 0 5
2 Move cursor to "ㄕㄥ ㄖ ㄎㄨㄞ see Excel instructions" with ▶ ●
3 ● ▶ ●

Entering characters (Jianpin)

<Example> Entering "生日快樂"

1 Enter characters in the BoPoMoFo entry mode.
9 0 5 0 ▶ ● with the cursor on "簡拼"
2 ● ▶ ●

Entering characters (Stroke)

<Example> Entering "生" in "生日快樂"

1 Enter characters in the Stroke entry mode

"生": 3 1 2 1 (ノ--ｌ-) ▶ ● 2 ● ▶ ●

Switching input modes

On the character entry screen, ☎ (several times) ▶ ●

- Press ⊛ to switch input mode one-byte/two-byte.

Deleting characters

When the cursor is in the text

クリア : Delete characters at the cursor

- Pressing and holding for 1 sec. or more deletes characters at the cursor and all the characters on the right of the cursor.

When the cursor is at the end of the text

クリア : Delete a character at the left of the cursor position

- Pressing and holding for 1 sec. or more deletes all the characters entered.

Entering pictograms, symbols and fixed phrases

Entering pictograms

On the character entry screen, 📖 ▶ Select pictogram

Entering symbols

On the character entry screen, 📖 ▶ MENU ▶ Select symbol

Entering fixed phrases

On the character entry screen, MENU ▶ 4 1 (5 1 on the message text entry screen) ▶ Select fixed phrase type ▶ Select fixed phrase

Copying/pasting characters

Copying characters

On the character entry screen, MENU ▶ 1 (3 1 on the message text entry screen) ▶ Select the start point ▶ Select the end point

Pasting characters

On the character entry screen, place the cursor at the position to paste characters and MENU ▶ 3 (4 on the message text entry screen)

❖Network Service

Voicemail service

1 MENU ▶ [Setting/NW service] ▶ 8 1 ▶ Select a menu item to operate

Menu item	Function and operation
1 Play messages	▶ Operate following the audio guidance instruction
2 Voice Mail setting	▶ Enter the phone number for the Voice Mail service center ▶ 📖 If you are using a Voice Mail service other than FET, change the Service connection field to "User setting" and enter a phone number that is less than 26 digits to the field.

Information

If the setting of the Select Menu has been left the same as the factory default, pushing 1 for more than a second in the stand-by display enables you to replay the Voice Mail message.

Call waiting

Activating/deactivating the service

1 MENU ▶ [Settings & NW services] ▶ 1 [Activate] or 2 [Deactivate] ▶ "Yes"

2 Check setting	▶ "Yes"

❖Questions and Answers

● I don't know the PIN number for the terminal.
The terminal PIN number at the time of purchase is set to "0000" but you can change it yourself. In addition, you can set two pin numbers (PIN1 code and PIN2 code) for the SIM/USIM card. They are both set to "0000" at the time when you signed the contract but you can change them yourself. →p.___

● I typed the PIN1 code wrongly three times.
If you erroneously typed the PIN1/PIN2 codes for three consecutive times and locked the SIM/USIM card, enter PUK. If you made 10 errors in a row typing the PUK, please contact the FET service center.→p.___

● Can I receive the HSDPA service anywhere?
You can have up to 3.6Mbps of incoming data for high-speed communication, but only with the FET 3.5G.

● Receiver can't read my decomail or i-mode mail with pictograms.
This terminal supports decomail but if the destination terminal does not support decomail, it will be displayed differently. In addition, if i-mode mail with pictograms is sent to a non-imode terminal, the message may not be displayed correctly.→p.___

● I can't connect to i-mode.
i-mode is a service that requires subscription. If you would like to utilize the service please contact the FET service center. →p.___

● I can't use the answering machine.
Network services such as voicemail require subscription. If you would like to utilize these services please contact the FET service center.

If you can't use it even when you are subscribed, it is possible that the voicemail service has not been initiated. Please refer to the detailed instruction manual for how to initiate the service. →p.___

● I tried to make a call using a prepaid SIM/USIM card but I couldn't connect.
If you are using a prepaid SIM/USIM, you cannot make a call unless you have enough money left in the account.

● I cannot save an image to the terminal.
It is possible that you do not have enough storage space. Delete unnecessary data and try again.→p.___

● I can't find the address book I registered.
Try switching the address book in the terminal with the SIM card address book and search again. If it is set to Show All (Zhuyin), it will be shown in the first relevant BoPoMoFo tab that is in the Zhuyin field in the address book. →p.___

● I want to change the Chinese display to English or the English display to Chinese.
Please refer to the "Bilingual setting." →p.___

● I don't know how to enter characters.
Please refer to "Entering characters." →p.___

● I cannot receive the network very well.
Your network setting may be incorrect. Refer to "Network search setting." →p.___

● Using the Kisekae tool changes the order of the menu.
Some Kisekae tools do not support horizontal screens. In addition, depending on the kind of menu, the menu structure for the first layer of the tree may change according to the frequency of usage. →p.___

● The profile information does not display the phone number.
The profile does not show your own phone number. Neither does it allow you to edit it. However, if you have registered your own phone number to the SIM/USIM card with a terminal other than F905i, it will be displayed as your own phone number. [*This is TBD as the specifications will change]

● I want to change the terminal back to the factory default.
Please refer to "Delete all data" in the detailed instruction manual.→p.___

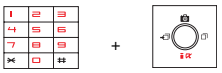
❖List of useful shortcuts

We have shortcut keys that enable you to access functions by pressing only a few keys. This is a convenient function unique to F.

Basic operations

Access shortcut (i-mode)

You can access a website by pressing just two keys!
*You need to register in advance.



Number keys 0-9 + i-mode/i-appli key
