BluetoothHandsfreeKit

The iVOICE R1 Handsfree Kit is a revolutionary Bluetooth hands-free speakerphone for your car, home or office. Leveraging innovations in our noise, echo and wind noise cancellation technologies found in iVOICE Bluetooth Handsfree Kit, the R1 pairs seamlessly to your Bluetooth enabled phone to transform any environment into a communication hub.

Designed with the mobile users in mind, the R1 sports a small form factor design for greater mobility and convenience. Integrated dual microphones and our Microphone Space Isolation Technology helps ensure your communications are delivered as you intended: clear. With pairing capabilities for up to (8) phones, the R1 leads the industry in multi-pairing technology. Screen and answer all your calls with iVOICE Intelligent Voice Operator™ and hear the number of the caller announced.

⚠ Do not operate your Handsfree Kit while driving!!

Safety Information

Potentially explosive atmospheres
For safety reason, turn off your electronic device when surrounded by possible explosive atmosphere. It is rare, but your electronic device could generate sparks which can cause and explosion or fire. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. Explosive atmosphere may include gas stations, fuel or chemical storage facilities, and in environment where metal powders, grain are contained in the air.

Power supply
- Power supply must be connected to designated power sources as marked on the product.
- The reduce risk of damage to the electronic cord, only remove it by grasping onto the AC adapter rather than the cord itself from the outlet.
- Make sure the cord is well positioned to avoid potential damage.
- Before attempting to clean the AC power adapter, please unplug the unit from any power source to reduce risk of electronic shock.
- The AC power adapter is designed for indoor use only, and must not be used outdoors.
- If the plug will not fit into the outlet, asking help from a qualified electrician. Improper connection can result in risk of electric shock.

Emergency calls
You should never rely solely upon any electronic device for essential communications (e.g. 911 emergency calls). Keep in mind that when making or receiving a call, your Handsfree Kit and the electronic device connected to must be switched on and in a service are a with adequate cellular signal strength. Emergency calls can sometimes be disturbed on certain cellular phone networks or when certain network services and/or phone features are in use. Check with your local cellular service provider for more details.

Battery information
- The rechargeable of your Handsfree Kit is not fully charged when it is new. Before your initial use, please charge your Handsfree Kit for 6 hours first.
- When the rechargeable battery of your Handsfree Kit is low, there will be a battery low tone and the all blue indication will change to red.
- The rechargeable battery of your Handsfree Kit has a long service life if treat ed properly.
- One new battery, or one that has not been used for a long period of time, could have reduced capacity the first few times it is used.
- Use your Handsfree Kit in room temperature for maximum battery capacity.
- Do not expose your Handsfree Kit in an environment temperature above +55°C (+131°F). IF your Handsfree Kit is operated in cold temperatures, the battery capacity will be reduced.
- The battery can only be charged in temperatures between +10°C (+50°F) and +45°C (+113°F).

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.   These limits are designed to provide reasonable protection against harmful interference in a residential installation.   This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.   However, there is no guarantee that interference will not occur in a particular installation.   If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.
