Instruction Manual - English
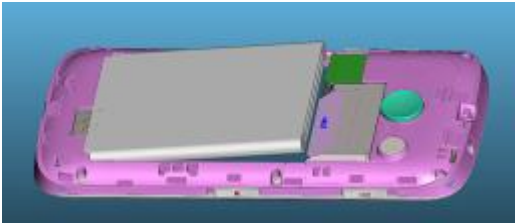

1.   Get started

1.1 Battery

1.1.1 Install the battery
- Remove the battery cover.
- Align the gold contacts of the battery with the corresponding connectors in the battery compartment.
- Push down the battery until it clicks into place.
- Close the battery cover.

1.1.2 Remove the battery

- Remove the battery cover.
- Pull the battery up and remove it.

1.2 Insert the SIM card

The mobile phone supports two SIM cards at the same time. How to insert SIM cards:

- Make sure that the phone is switched off.
- Remove the battery cover and take out the battery.
- Slide the SIM card into **SIM1** or **SIM2**. Make sure that the metal contact of the card is facing down and the beveled corner is in the direction as shown in the picture.
- Put the battery back and close the battery cover.
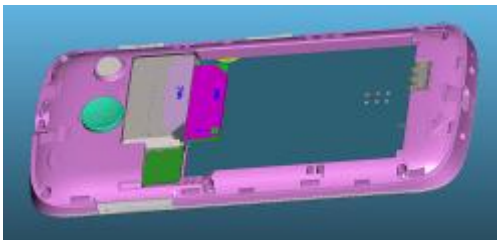

1.2.1 Remove the SIM card

- Press down lightly and pull it in the reverse direction.

SIM card

Every mobile phone supports a SIM card (Subscriber Identity Module). This can stores your personal information such as names and phone numbers.

1.3 Insert a Memory (micro SD) Card

If you want to download music or pictures using Bluetooth, record Audio or Video, or store many photos, you will need to insert a micro SD memory card to store these files.

- Make sure that the phone is switched off and remove the battery cover.

- Place the Memory card indented side down and insert it into the card slot.

1.4 Charge the battery

Method 1:

- Connect the supplied power adaptor to a wall outlet.
- Connect the power cord to phone as shown in the picture. The battery-charging indicator starts scrolling and the red status light turns on. The charging indicator stops scrolling when the battery is fully charged.
- Disconnect the charger.
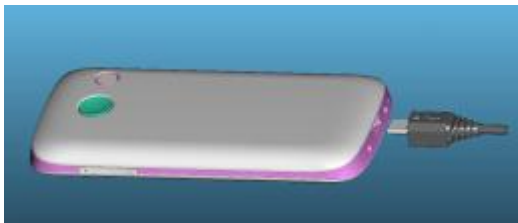

Method 2：

●You can also charge phone by connecting it to a computer using the supplied USB data cable.

Method 3 :

●You can connect the AC adapter to charge seat at one end, the other end connected to an external power source, and then your phone is placed on the charging base, start charging.

⚠ *Note: charge the battery at least 12 hours at the first time.*

1.5 Power on/off

Press and hold End key to switch the phone on or off.
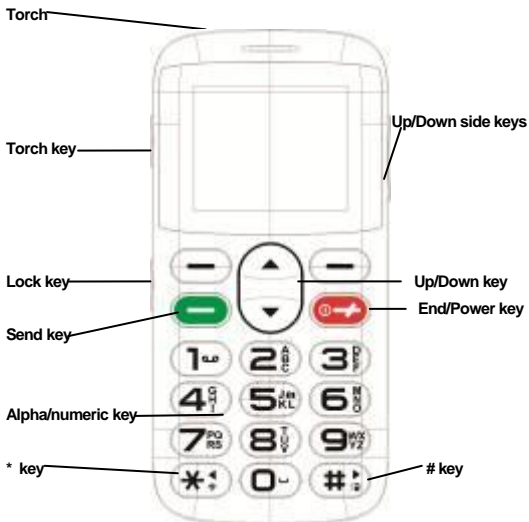

⚠ *Note: Make sure the SIM card and the battery have been inserted properly before startup.*

FCC

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over on one gram of tissue.

Device types: FSG2 (FCCID: 2ADLM-FSG2) has also been tested against this SAR limit.

The highest SAR value reported under this standard during product certification for use at the

Head is 1.204 W/kg and when properly worn on the body is 1.403 W/kg. This device was tested for

typical body-worn operations. To comply with RF exposure requirements, a minimum separation

distance of 1.0 cm must be maintained between the user's body and the handset, including

the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should

not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two

conditions: (1) this device may not cause harmful interference, and (2) this device must accept

any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority

to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
