Introduction

Congratulations on your purchase of the Bluetooth wireless keyboard. It's so easy and comfortable to use a bluetooth wireless keyboard with your laptop, or your mobile devices. What's more, you don't need to waste a USB port for plugging the keyboard! It is much more advanced than you imagine and will make you more productive and comfortable.

Features

- Bluetooth wireless keyboard
- Reliable and comfortable
- Stylish design

Hardware Installation

1. Make sure the Power on-off switch on the mouse is ON
2. The LED light will blink if the mouse power is on

Note

The unit offers a strong power saving management. Once the mouse accesses sleeping mode, to clip any key on the keyboard is compulsory to wake it up.

Power on/off: There is a power on/off switch designed inside of the battery box lid to save the batteries power while non-usage of a longer period.

Connect the Keyboard

1. Turn on your PC
2. Click "Add Bluetooth Device," and start to search available device
3. Connect to the device "Bluetooth Wireless Keyboard," no password needed.
4. No need to re-connect when turning off the computer/bluetooth wireless keyboard, changing batteries, re-starting the computer, or re-starting the keyboard.

Change the batteries

1. Open the battery cover and change the batteries.
2. It is recommended that both of the batteries to be changed simultaneously, with the same brand.

Note

The red LED light indicates that batteries inside needs to be changed.

Trouble Shooting

1. Make sure you have connected the Bluetooth wireless keyboard correctly to the PC.
2. For the best performance, we suggest you to locate the keyboard with a distance from other electric devices, such as the computer monitor or external storage devices
3. Make sure you have set the communications between the keyboard and the PC. Refer to the communication section.

FCC Statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example-use only shielded interface cables when connecting to computer or peripheral devices).

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference. and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
-

This symbol on the product or in the instructions means that your electrical and electronic equipment should be disposed at the end its life separately from your household waste. There are separate collection system for recycling in the EU.
