1 Docking and extended battery connection ports

## **4** GIGABYTE Software Application

### ■ GIGABYTE Smart Manager

You can activate GIGABYTE Smart Manager by double clicking on the shortcut icon on the desktop if the machine you purchased has the operation system built-in. GIGABYTE Smart Manager is an icon-based control interface, enabling users to intuitively access common system setup as well as GIGABYTE exclusive utilities. Please be noted that the GIGABYTE Smart Manager interface, icons, utilities and software versions may vary based on the purchased models. Please operate GIGABYTE Smart Manager according to the default built-in version.

### ■ GIGABYTE Smart Recovery

- If the machine you purchase already has operating system built-in, you can restore the system back to factory default by using GIGABYTE Smart Recovery. Please be noted that the GIGABYTE Smart Recovery interface, icons, utilities and software versions may vary based on the purchased models. Please operate GIGABYTE Smart Recovery according to the default built-in version.
- Please be noted that personal data will be lost after recovery, do remember to backup any data before operating this function.

### ■ Activate GIGABYTE Smart Recovery and BIOS Setup Utility

- Press and release the Power Button to turn on the operation system. Press “-” to enter into GIGABYTE System Recovery. Use Directing Hot Key to operate GIGABYTE Smart Recovery.
- Press and release the Power Button to turn on the operation system. Press “+” to enter into GIGABYTE BIOS Setup Utility. It is recommended to use USB keyboard for setting up BIOS functions under BIOS setup Utility.

### ■ FAQ :

FAQ (Frequent Asked Questions) please refer to the below link:

<http://www.gigabyte.com/support-downloads/faq.aspx>

**Federal Communication Commission Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC Caution:**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**RF Radiation Exposure and Hazard Statement:**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction. This device has been tested and meets the FCC RF exposure guidelines. The maximum SAR value reported is 0.136 w/kg.

**Non-modification Statement:**

Use only the integral antenna supplied by the manufacturer when operating this device. Unauthorized antennas, modifications, or attachments could damage the TI Navigator access point and violate FCC regulations. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

**Deployment Statement:**

This product is certified for indoor deployment only. Do not install or use this product outdoors.
