

Performance tips to help you get the most out of your Mario Kart

Location

For best performance, use your Kart on a smooth dry surface in a safe area. Do not use on roads. Avoid areas where there may be radio interference that could affect your signal – such as construction areas. Avoid driving through sand, mud and water, which can impair the performance of the vehicle and may cause damage to the Kart. Collisions can also cause damage to the Kart and should be avoided.

Weather

Mario Karts perform best in moderate and dry conditions. Do not use your Kart or Hand Controller in rainy weather or expose them to humidity for long periods of time, as dampness can damage the internal mechanism. You should not leave your Kart or Hand Controller near sources of heat or in direct sunlight for extended periods as these conditions may also cause damage.

Signal

Maintain a reasonable distance between the remote control and the Kart to obtain maximum signal reception. Avoid operating your Kart in areas where there are CB radios or other radio controlled vehicles of the same MHz range being used, as performance could be impeded. Concrete walls, metal posts, wire fences and other electrical machinery can sometimes affect transmission and result in erratic performance. Should this occur, change to a different location. The most common causes of signal loss or irregular operation are due to run-down batteries or the vehicle travelling out of transmission range.

Maintenance

To clean your Kart, only use a soft, damp cloth. Do not use detergents or solvents. Should your Kart or the Hand Controller get wet, turn them off immediately and remove the batteries. Dry the battery compartment with a soft, dry cloth and leave open until it is completely dry. Do not use heaters or blow dryers to assist drying as these may damage the Kart or Hand Controller. Do not use your Kart again until all components are completely dry.

Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

For 27MHz manual:

Carrier frequency:27.145MHz

Field strength:67.5dBuV/m at 3m

For 49MHz manual:

Carrier frequency:49.860MHz

Field strength:70.4dBuV/m at 3m

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: (1) Reorient or relocate the receiving antenna; (2) Increase the separation between the equipment and receiver; (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected; (4) Consult the dealer or an experienced radio/TV technician for help. Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Customer Assistance

Should you experience problems with your Mario Kart, please review the Set-up Directions on page 2 and the Performance Tips listed above. Should you still continue to encounter problems, please contact Goldie Marketing for further assistance.

Mario and Yoshi Radio Controlled Karts

Operation is subject to the following two conditions:

(1) this device may not cause interference,
(2) this device must accept any interference, including interference that may cause undesired operation of the device
This Category II radiocommunication device complies with Industry Canada Standard RSS-310.

Ce dispositif de radiocommunication de catégorie II respecte la norme CNR-310 d'Industrie Canada.

- Full function radio control operation
- Available in both 27MHz and 49MHz frequencies

Package Includes:

- Radio-controlled Kart
- Handheld remote control
- 9.6V rechargeable Ni-MH battery pack
- 240V AC charging adaptor
- 9V alkaline battery
- Telescopic antenna
- Operator's manual

Warning:

a) ADULT SUPERVISION IS REQUIRED WHEN CHARGING RECHARGEABLE BATTERIES;

b) THE SUPPLY TERMINALS ARE NOT TO BE SHORT-CIRCUITED.

Not suitable for children under 8 years of age. Contains small parts which may be swallowed. Please remove all plastic, ties and any other objects designed to fasten the Kart during transport before giving to a child. Parents are urged to periodically examine the Kart and accessories for potential safety concerns and ensure that any parts deemed hazardous are repaired or replaced.

Manufactured and Designed by Goldie Marketing. Made in China.
