JWM90A

INTRODUCTION

Thank You!

Thank you for choosing a Jensen product. We hope you will find the instructions in this owner's manual clear and easy to follow. If you take a few minutes to look through it, you'll learn how to use all the features of your new Jensen receiver for maximum enjoyment.

Features

Features of Jensen JWM90A mobile audio system include:

- Digital AM/FM Tuner/30 Preset stations (12 AM/18 FM)
- Weatherband with Weather Alert
- Bluetooth Ready with A2DP/AVRCP Streaming Audio
- APP Ready
- Pre-set Equalizer -5 settings (User > Flat > Pop > Classical > Rock)
- Electronic Bass, Treble, Balance and Fader Controls
- Skip Protected Disc Mechanism
- DVD/CD-R/RW and MP3 Compatible
- HDMI Video Output with JCOM link
- HDMI ARC
- Low Battery Alarm
- Time/Alarm Clock
- White LED Backlit LCD
- 1/8" Front Auxiliary Audio Input
- Rear Audio RCA Inputs/Outputs
- USB Playback of MP3/WMA Files
- 3 Zone / 8 Speaker Output
- Wireless Remote Control Included

Precautions

- **Use the Proper Power Supply.**
This product is designed to operate with a 12 volt DC, negative ground battery system (the standard system in a North American vehicle).
- **Protect the Disc Mechanism.**
Avoid inserting any foreign objects into the slot of this player. Failure to observe this may cause malfunction due to the precise mechanism of this unit.
- **Use Authorized Service Centers.**
Do not attempt to disassemble or adjust this precision product; contact a professional for assistance.

- **Avoid Moisture.**

To reduce the risk of fire or electric shock, do not expose this equipment to rain or moisture.

- **Avoid Cleaning Products.**

The front of this unit should only be cleaned with a slightly damp cloth. Do not use cleansers.

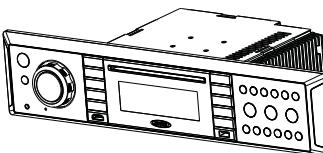

- **Use Recommended Accessories.**

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK AND ANNOYING INTERFERENCE, USE ONLY THE RECOMMENDED ACCESSORIES.

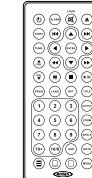

CAUTION: This mobile DVD player is a Class I laser product that uses a visible/invisible laser beam which could cause hazardous radiation exposure if improperly directed. Be sure to operate the mobile DVD player as instructed. Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure. Do not open covers and do not attempt to repair the unit yourself. Refer servicing to qualified personnel.

DISC NOTES

Depending on the recording status, conditions of the disc, and the equipment used for recording, some CD-Rs/CD-RWs may not play on this unit. For more reliable playback, please adhere to the following recommendations:

- Use CD-RWs with speed 1x to 4x and write with speed 1x to 2x.
- Use CD-Rs with speed 1x to 8x and write with speed 1x to 2x.
- Do not play a CD-RW which has been written more than 5 times.

- Be sure to use only round CDs for this unit and do not use any special shape CDs. Use of special shape CDs may cause the unit to malfunction.
- Do not stick paper or tape on the disc. Do not use CDs with labels or stickers attached or that have sticky residue from removed stickers.
- Do not expose discs to direct sunlight or heat sources such as hot air-ducts, or leave them in a vehicle parked in direct sunlight where there can be a considerable rise in temperature inside the vehicle.

Compatible Disc Types

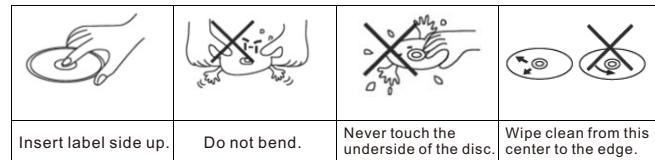

Table 1: General Disc Information

Symbol	12cm Disc Properties	Max Play time
	Single side single layer (DVD-5)	(MPEG 2 Method) 133 minutes
	Single side double layer (DVD-9)	242 minutes
	Double side single layer (DVD-10)	266 minutes
	Double side double layer (DVD-18)	484 minutes
	Single side single layer (VCD)	MPEG 1 Method
	Single side single layer	74 minutes

NOTE: CD-R and CD-RW discs will not play unless the recording session is closed and the CD is finalized.

Disc Maintenance

- A dirty or defective disc may cause sound dropouts while playing. Before playing, wipe the disc using a clean cloth, working from the center hole towards the outside edge. Never use benzene, thinners, cleaning fluids, anti-static liquids or any other solvent.

NOTE: A disc may become scratched (although not enough to make it unusable) depending on how you handle it and other conditions in the usage environment. These scratches are not an indication of a problem with the player.

DESIGNED TO MOVE [YOU]TM

JWM90A

INSTALLATION

It's a good idea to read all of the instructions before beginning the installation. We recommend having your Jensen JWM90A installed by a reputable RV dealership.

Tools and Supplies

You will need these tools and supplies to install your JWM90A:

- Phillips screwdriver
- Wire cutters and strippers
- Tools to remove existing radio (screwdriver, socket wrench set or other tools)
- Electrical tape
- Crimping tool
- Volt meter/test light
- Crimp connections
- 16 gauge wire for power connections
- 16–18 gauge speaker wire
- Four M3x20mm (3/32 x 0.75") screws

Disconnecting the Battery

To prevent a short circuit, be sure to turn off the ignition and remove the negative (-) battery cable prior to installation.

NOTE: If the JWM90A is to be installed in a vehicle equipped with an on-board drive or navigation computer, do not disconnect the battery cable. If the cable is disconnected, the computer memory may be lost. Under these conditions, use extra caution during installation to avoid causing a short circuit.

Selecting the Mounting Location

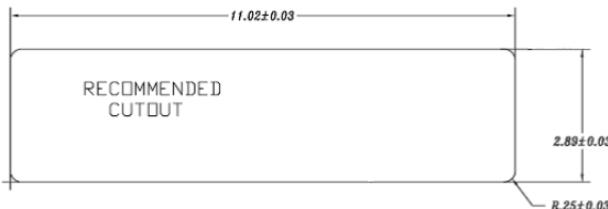

Select a mounting location, taking care to avoid the following:

- Places exposed to heat-radiating appliances such as electric heaters
- Adjacent to other equipment that radiates heat
- Poorly-ventilated or dusty places
- Moist or humid locations

Mounting the Radio

- Use the mounting hole diagram to measure and cut a mounting hole
- Route power, speakers, AV, and antenna cables through the hole and connect
- Check and ensure correct operation
- Mount the unit using four M3x20mm (3/32 x 0.75") screws
- Attach Trim ring

NOTE: Before cutting the mounting hole, make sure the area behind the mounting location is clear of wires, fuel and vacuum or brake lines.

15	RED	+12VDC SWITCHED
16	BLACK	GROUND
17	VIOLET	RIGHT REAR (A) SPEAKER (+)
18	VIOLET/BLACK	RIGHT REAR (A) SPEAKER (-)
19	LIGHT GREEN/BLACK	LEFT REAR (A) SPEAKER (-)
20	LIGHT GREEN	LEFT REAR (A) SPEAKER (+)

WARNING: Wiring harness comes with stripped and tinned leads to aid in the installation process. Any unused speaker wires must have their exposed ends cut off or insulated individually.

CONNECTIONS

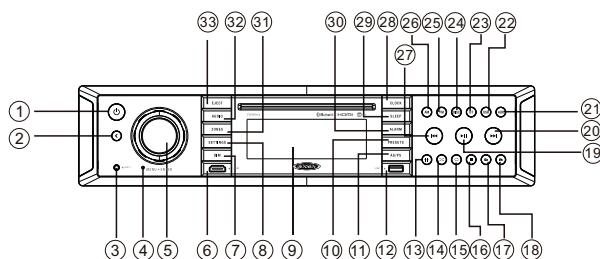

The diagram below depicts all the available audio/video connections available to use with your system.

JWM90A

BASIC OPERATION

Power

Press the **POWER** button (1) to turn the unit on.
The unit will resume at the last mode (Tuner, Aux, etc.).

Volume Control

Rotate the **VOL** encoder knob control (5) clockwise to increase or counter-clockwise to decrease the volume output.
The maximum volume setting is "40". While adjusting the volume, the LCD displays numerical representation of the level.

Audio Menu Setting

Press the **AUDIO** button (32) to step through the following audio adjustment options.

Rotate the **VOL/ENTER** encoder knob control (5) to adjust the selected audio feature.

Audio Adjustment

- **BAS:** Adjust the Bass level from "-7" to "+7".
- **TRE:** Adjust the treble from "-7" to "+7".
- **BAL:** Adjust the speaker output balance between "L7" (left) and "R7" (right). "BAL 0" indicates an equal balance between the left and right speakers.
- **FAD:** Adjust the speaker fade between "R7" (rear) and "F7" (front). "FAD 0" indicates an equal balance between the rear and front speakers.

This function will time out after six seconds of inactivity and the unit will resume normal operation.

Liquid Crystal Display (LCD)

The liquid crystal display (LCD) panel (9) displays the frequency, time and activated functions.

Press the **BRIGHT UP** button to increase the LCD brightness and press the **BRIGHT DOWN** button to decrease the LCD brightness from "LEVEL 0(off)" to "LEVEL 9" (brightest).

NOTE: When subjected to cold temperatures for an extended period of time, LCD panels will take longer to illuminate and the display visibility may slightly decrease. Optimal LCD operation will return to normal when the temperature increases to a normal range.

System Menu Setting

1. Press the **SETTING** button (8) to enter the system menu.
2. Press **SETTING** button or press the **|<>|** (27,20) to choose the following system menu list:
3. Once the desired menu item appears on the display, adjust that option by rotating the volume encoder knob clockwise or counter-clockwise within 6 seconds.

The following items can be adjusted:

- **Beep On/Off:** Turn the audible beep On/Off (heard when functions /buttons are selected).
Note: Beep tone off will not affect the audible tone of the alarm clock.
- **LCD Brightness :** Adjust the brightness of the LCD backlight from "BRI 0" (off) to "BRI 9" (Brightest)
- **Region (USA/Europe):** Set frequency spacing for various regions.

Setting the Bluetooth

- **Bluetooth (On/Off):** Choose "Bluetooth On" or "Bluetooth Off".
- **Bluetooth Device (Locked/Unlocked, Disconnect/Connect, Delete):** view, lock and delete from a list of previously paired mobile device models.
- **Bluetooth Pair:** Press "ENTER" knob to automatically pair a device.
- **PRESET Volume (PVOL):** Select an automatic turn on volume.

Reset

Press **RESET** button(4) to reset the JWM90A to factory default set up values.

DESIGNED TO MOVE [YOU]TM

JWM90A

Auxiliary Input Function

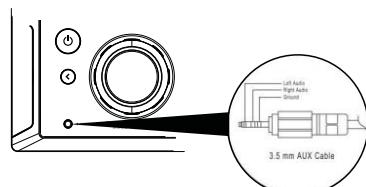

Press the **AUX** button (21) to directly access auxiliary input modes (AUX IN1 and AUX IN2) from any other mode when a portable audio device is connected to the unit. To connect a portable audio device, insert a standard 3.5mm (audio line output or headphone output from your portable CD / MP3 / iPod or other media player) into the AUX A/V IN connector (AUX IN1) (11) on the front of the unit or the AUDIO IN (AUX IN2) on the back of the unit (see "Wiring" on page 3).

Auxiliary Input Connector

For front panel A/V input, an external audio/video (A/V) source such as a video game player, camera, etc. can be connected to the front panel A/V input with the provided 3.5mm A/V cable adapter (Please note that there are several different A/V cable "standards"). Connect the device to the AUX A/V IN connector (21) on the front panel.

In addition to front panel auxiliary input source, the unit can also be connected to the RCA audio input through the AUX AUDIO INPUT jack on the rear of the unit.

Press the **AUX** button (21) to directly access auxiliary input modes (AUX 1 IN and AUX 2 IN) from any other mode when a portable audio device is connected to the unit.

USB Interface Connector

You can connect a USB device directly to USB interface (10) on the front of the JWM90A for playback of compatible files. Playback begins automatically. Press the **USB** button (22) to switch to USB mode from another source. Refer to "MP3/USB Operation" on page 13 for additional operating instructions.

NOTE: USB will not support Apple device playback. The USB input supplies up to 1A of charging current.

Clock Setup

Press and hold the **CLOCK** button (28) to access clock setup mode. The number representing the hours and minutes will flash.

Sleep Mode

The Sleep Timer will automatically turn off the JWM90A in the designated number of minutes. To set the Sleep Time, press the **SLEEP** button (29) and the sleep time will appear in the display with the number representing the minutes (SLEEP 0). Press **SLEEP** button repeatedly to change the sleep time from 0 (OFF), 15, 30, 45 or 60 minutes.

Alarm Setting

To set the alarm, press and hold the **ALARM SET** button (30) for 2 seconds and the clock digits will be flashing. Press the **HOUR** button to adjust the hour once at a time or press and hold to advance rapidly. Repeatedly press the **MINUTE** button to adjust the minute one digit at a time, or press and hold to advance rapidly.

Press the **ALARM SET** or **ENTER** knob button to save the alarm time. Once a time is set, press **ALARM ON/OFF** (30) to turn the alarm function on or off.

Remote Sensor

Infrared receiver is located on the upper left of front panel to receive infrared signal emitted by the remote control.

Zones Output

The speaker output button (31) control speaker zones output from the radio. Press the buttons to turn the corresponding speaker zone on or off.

Reset

The reset button should be activated for the following reasons:

- initial installation of the unit when all wiring is completed
- function buttons do not operate
- error symbol on the display

Use a ball point pen or similar object to press the **RESET** button (4). This may be necessary should the unit display an error code.

HDMI ARC

• Connect HDMI cable to JENSEN TV with ARC function and JWM90A head unit. If the set up and operation is correct, the TV audio will come out from the speaker of the head unit after switching to HDMI ARC mode.

• See the ARC function Operation in the following table:

DESIGNED TO MOVE [YOU]TM

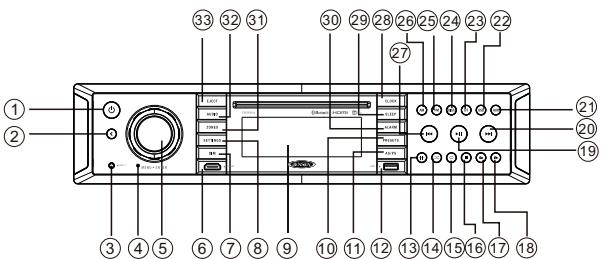

JWM90A

TUNER OPERATION

Automatically Store / Preset Scan (AS/PS)

Automatically Store

Select an AM or FM band. Press and hold the **AS/PS** button (11) for more than 3 seconds and the unit will automatically scan for and store 12 or 18 strongest stations for AM or FM respectively. To stop this function before the automatic storing is complete, press **AS/PS** again.

Preset Scan

Select a band. Press **AS/PS** button to scan stations stored in the current band. The unit will pause for 10 seconds at each preset station. Press **AS/PS** again to stop scanning when the desired station is reached.

Select a Band

1. Press **AM** button (26) repeatedly to select the band (AM1, AM2)
2. Press **FM** button (25) repeatedly to select the band (FM1, FM2 and FM3)
3. Press **ENTER** button (4) to confirm the selection of radio mode.

Manual Tuning

Press the >>| or |<< buttons (20, 27) to seek stations up/down step by step.

Auto Seek Tuning

Press and hold the >>| or |<< buttons (20, 27) to automatically seek the next or previous strong station.

Preset Stations

Press the **preset** button store and recall stations for each AM and FM band.

Store a Station

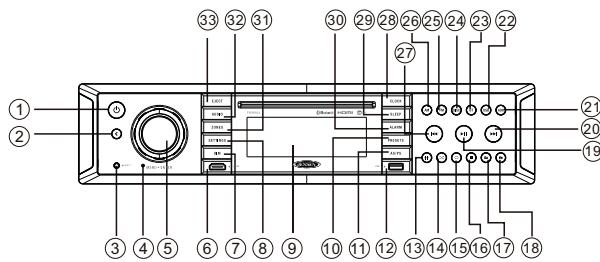

Select a band (if needed). Press the preset button to select the corresponding stored station.

DESIGNED TO MOVE [YOU]TM

JWM90A

WEATHER BAND OPERATION

Accessing the Weather band

1. Press **MODE** button (15) the LCD will display "MODE" and enter mode selection.
2. Press **MODE** button (15) to navigate the available modes and choose Weather band mode.
3. Press **ENTER** button (5) to enter Weather band mode. Then, LCD will display Weather band mode.

What is the NOAA Weather Radio/Weatheradio Canada?

NOAA (National Oceanic and Atmospheric Administration) is a nationwide system that broadcasts local weather emergency information 24 hours a day via the National Weather Service (NWS) network. The U.S. network has more than 530 stations covering the 50 states as well as the adjacent coastal waters, Puerto Rico, the U.S. Virgin Islands and the U.S. Pacific Territories. Each local area has its own transmitting station and there are a total of seven broadcasting frequencies used: 162.400MHz (CH2), 162.425MHz (CH4), 162.450MHz (CH5), 162.475MHz (CH3), 162.500MHz (CH6), 162.525MHz (CH7) and 162.550MHz (CH1).

How many stations can I expect to receive?

Since the broadcasts are local weather and information, the transmission power is usually very low (much less than standard AM or FM stations) so you will usually receive only one station unless you are on the edge of two or more broadcast signals. The most you will receive will be two or three, and that is rare.

Is it possible I won't receive any stations?

Depending on where you are located, there is a possibility you will receive only a very weak signal or none at all. Also, similar to AM and FM signals, weather band signals are subject to surrounding conditions, weather, obstructions of the signal by hills or mountains, etc. If no NOAA signals are found/received, the tuner will scan all seven NOAA frequencies every 30 seconds.

How will I know I am tuned to the weather band?

When you select the weather band, LCD will display the current channel frequency. Press the |<<or >>| buttons (6, 8) to tune to each of the seven channels until you find the weather band station broadcasting in your area.

NOAA Weather Alert

The Weather Alert function adds an additional level of user safety by automatically switching from any of the available function modes to weather band for a minimum of 120 seconds if a NOAA warning tone (1050 Hz) is received/detected. If no additional warning tone is received for 120 seconds, the unit will switch back to the last known function mode. See "System Menu" on page 5 to learn how to turn the WB Alert feature on.

NOTE: If the unit is set for European operation, the WB function will be disabled.

Weather band Frequencies

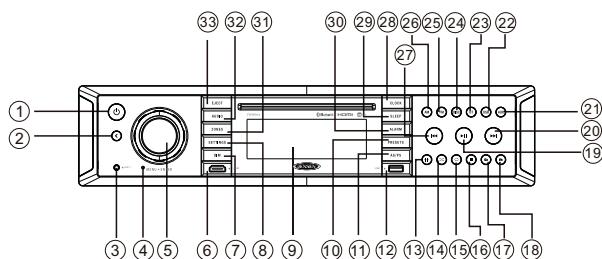

Frequency (MHz)	Preset
162.400	2
162.425	4
162.450	5
162.475	3
162.525	6
162.500	7
162.550	1

JWM90A

DISC OPERATION

CD OPERATION

Inserting a CD

Inserting a CD label-side up into the disc slot (15) and the disc will begin to play automatically.

Ejecting a CD

Press the EJECT button (16) to stop CD play and eject the CD.

Pausing Playback

Press the ▶ II button (7) to suspend or resume disc play.

Stop Playback

Press the ■ button (18) to suspend disc play, and "PRE STOP" will appear in the display.

Press the ▶ II button (7) to resume disc play from the last position. Press ■ button twice and "STOP" will appear on the display.

Track Select

Press the >>| or |<< button (8, 6) to advance to the previous or next track on the CD. The selected track number will appear on the display. Press and hold the >>| or |<< button for more than three seconds to fast forward or fast reverse through the disc. CD play starts when the play/pause button is pressed.

Fast Forward/Reverse

Press and hold the >>| or |<< button (8, 6) or press the >> or << buttons on the remote control (14) once for FORWARD X 2. Press and hold additional times for FORWARD X 4, X 8, X 20 or PLAY. Press the ▶ II button on the control panel (33) or remote control (17) to end fast forward or reverse and resume normal playback.

Repeat (RPT)

Press the RPT button (20) during disc play to access the repeat function. Press again to continuously repeat the selected track (RPT ONE). Press a third time to repeat all tracks (RPT ALL). Press once more time to stop repeat function (RPT OFF).

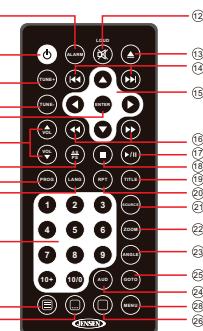

Programmed Playback

1. Press the PROG button (7) on the remote control to access the programmed playback screen.

2. Use the ▲ or ▼ cursor buttons (15) on the remote control to access the fields on the "PROG" screen.

3. Use the number buttons on the remote control to enter a track number in each field. 4. Press the ▶ II button (17) on the remote control or highlight "PLAY" on screen and then press the ENTER button (5) to begin playback in the numbered order indicated to delete the list, highlight "CLEAR" and then press ENTER. Press PROG to exit the programmed playback screen.

JWM90A

Remote Control Direct Track Entry

To select a track directly, use the number pad on the remote control (10). For single digit entries, press the corresponding number for two digit entries. Press the **10+** button followed by the last digit (i.e., for track 16, press **10+** and then 6).

GOTO Direct Track/Chapter Access

Use the **GOTO** function to access a track (chapter) directly.

1. Press the **GOTO** button (25) on the remote control. The On Screen Display information will appear with the track number highlighted.
2. Use the number keys on the remote control to enter the 3-digit track number directly (i.e. for track 10, enter "010")
3. Press the **ENTER** button (5) to confirm and begin playback.

CD Playback Information

The following information is displayed at the top of the screen during CD playback:

TRK #### - "1/18" indicates the first of 18 tracks on the CD is currently playing.

CX "X" indicates repeat play is OFF, "1" indicates repeat track, and "A" indicates repeat disc.

Press the **□** button on the remote control (26) repeatedly to view the following information for elapsed/remaining playing time:

① 00:02:18 –total elapsed playing time of current track;
C-00:34:37 –remaining playing time of current track;
T 00:02:18 –total elapsed playing time for current disc;
T 00:34:37 –remaining playing time for current disc.

DVD/VCD OPERATION

Inserting a Disc

Insert a disc label-side up into the disc slot (15) and the disc will begin to play.

NOTE: Press the **DISC** or **USB** button (20,10) to alternate between the **USB** and **DVD** source.

Ejecting a DVD

Press the **EJECT** button (16) to stop DVD play and eject the DVD.

Pausing Playback

Press the **▶ II** button (7) to suspend or resume disc play.

Stop Playback

Press the **■** button (18) to suspend disc play, and "PRE STOP" will appear in the display.

Press the **▶ II** button (7) to resume disc play from the last position. Press **■** button twice and "STOP" will appear on the display.

Track Select

Press the **>>| <<** button (8, 6) to advance to the next or previous track on the disc. The selected track number will appear on the display.

Enter>Select

While in menu mode, press the **ENTER** button to select a menu option.

Language Selection

While playing a DVD, press the **6/FOLDER UP** button (11) to change the DVD audio language.

Fast Forward/Reverse

Press and hold the **>>| <<** button (8, 6) or press the **>>** or **<<** buttons on the remote control (17) once for FORWARD X 2. Press and hold additional times for FORWARD X 4, X 8, X 20 or PLAY. Press the **▶ II** button on the control panel (7) or remote control (17) to end fast forward or reverse and resume normal playback.

Repeat Chapter/Title

Press the **RPT** button (21) on the remote control multiple times during playback to select from the following repeat play options:

- VCD: RER1 (track), RER ALL (disc), RPT OFF
- DVD: RER Chapter, RER Title, RPT All, RPT OFF

Playback Control (VCD Only)

Press the **MENU** button (14) on the remote control to turn Playback Control on/off when this feature is available on your VCD.

Programmed Playback

1. Press the **PROG** button (7) on the remote control to access the programmed playback screen.

DESIGNED TO MOVE [YOU]TM

JWM90A

2. Use the **◀▶** or **▲▼** cursor buttons (15) on the remote control to access the fields on the "PROG" screen.
3. Use the number buttons on the remote control to enter a track number in each field.
4. Press the **▶/||** button (17) on the remote control or highlight "PLAY" on screen and then press the **ENTER** button (5) to begin playback in the numbered order indicated to delete the list, highlight "CLEAR" and then press **ENTER**. Press **PROG** to exit the programmed playback screen.

DVD Playback Features

The following remote control features, along with many others, are available during DVD playback (see "Remote Control Operation" on page 17 for complete functionality):

- **LANG:** Press to choose an alternate audio language, if available.
- **SUBTITLE:** Press to select an alternate subtitle language, if available.
- **ANGLE:** Press to select an alternate viewing angle, if available.
- **ZOOM:** Press to zoom the picture at ZOOM 2, ZOOM 3, ZOOM 4, ZOOM 1/2, ZOOM 1/3 or ZOOM 1/4, or select OFF to return to normal view.

NOTE: Feature availability is dependent upon DVD embedded information.

Playback Information

During DVD and VCD playback, press the **□** button (26) on the remote control to display playback information on the screen, including the media playing and current playback time. Continue pressing the button to display additional information, as indicated below.

DVD Playback Information

The following information is displayed at the top of the screen during DVD playback:

DVD	TT	5/8	CH	2/16		-00:33:34
	1/5 ENG		5.1 CH		1/4 ENG	
	OFF					

TT 5/8 – "5 / 8" indicates the fifth of 8 titles on the DVD is currently playing. CH 2/16 – "2 / 16" indicates the second of 16 chapters on the DVD is currently playing.

Press **□** repeatedly to view the following information: for elapsed/remaining playing time:

00:02:18 – total elapsed playing time of the current track;
C –00:34:37 –remaining playing time of the current track;
T 00:02:18 –total elapsed playing time for disc;
T –00:34:37 –remaining playing time for disc..
 1/5 ENG –English is the selected audio language out of 5 possible choices;
 5.1 CH –The current language is recorded in 5.1 surround sound;
 1/4 ENG –English is the selected subtitle language out of 4 possible choices;
 OFF –There are no alternate angles recorded for this scene.

VCD Playback Information

The following information is displayed at the top of the screen during VCD playback:

VCD	TRK	1/18				-00:33:34
-----	-----	------	--	--	--	-----------

TRK #### – "1/18" indicates the first of 18 tracks on the VCD is currently playing. PBC: Indicates when PBC (Playback Control) is turned on.

– "X" indicates repeat play is OFF, "1" indicates repeat track, "D" indicates repeat directory, and "A" indicates repeat disc.
Press the **□** repeatedly to view the following information for elapsed/remaining playing time:
 00:02:18 –total elapsed playing time of current track;
C –00:34:37 –remaining playing time of current track;
T 00:02:18 –total elapsed playing time for current disc;
T –00:34:37 –remaining playing time for current disc.

Remote Control Direct Track Entry

To select a track directly, use the number pad on the remote control (10). For single digit entries, press the corresponding number. For two digit entries, press the **10+** button followed by the last digit (i.e., for track 16, press **10+** and then **6**).

GOTO Direct Track/Chapter Access

Use the **GOTO** function to access a track (chapter) directly.

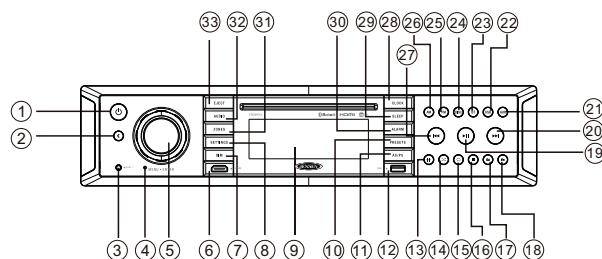

1. Press the **GOTO** button (25) on the remote control. The On Screen Display information will appear with the track number highlighted.
2. Use the number keys on the remote control to enter the 3-digit track number directly (i.e. for track 10, enter "010").
3. Press the **ENTER** button to confirm and begin playback.

DESIGNED TO MOVE [YOU]TM

JWM90A

MP3/USB OPERATION

If the user connects a USB mass storage device, the radio automatically powers on, if necessary, and switches to digital file playback mode and selects that physical media. Changing modes or turning off the radio pauses playback. Playback will resume exactly where paused when returning to digital file playback mode.

Insert/Remove USB Device

To connect a USB device, locate the USB interface connector (10) located near the bottom left corner on the front of the radio. Insert the USB device into the USB jack to automatically access USB mode and begin playback, the LCD will display "LOADING" while files are initially loaded.

When USB device is removed, press the **FM/AM** button, **DISC** button, **USB** button or **AUX** button to change to another mode and then remove the USB device from the USB connector.

Press the **DISC** button (20) to access USB mode from any other mode.

NOTE: MP4 video format is not supported.

Notes on MP3 Playback

Any directory that does not include an MP3 file is skipped

Maximum number of folders: 512 (including skipped directories)

Maximum number of folder levels: 12

Maximum number of MP3 files: 999

Maximum number of characters for MP3 file name and folder name: 32

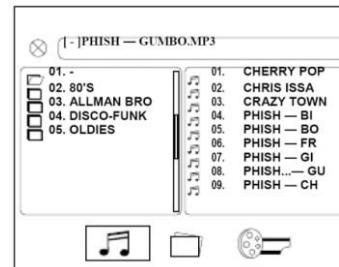

Maximum number of Characters of ID3 Tag:

ID3 Tag version 1.0: 32

ID3 Tag version 2.x: 32

Mp3 Monitor Display

After loading an MP3 disc or USB device, the following screen will appear on your output Monitor.

Select one of these icons to access the corresponding media on your disc or USB device. If the media type is not present, the icon will not be selectable.

: Audio

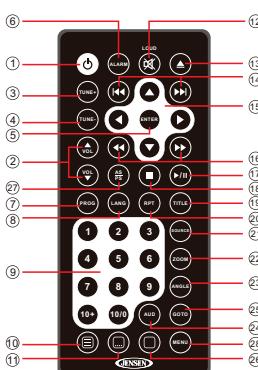

: Photos

: Video

Play/Pause

Press the **►||** button (7) to suspend or resume disc play.

Track Select

When playback is stopped, press the **>>|** or **|<<** button (8, 6) or **>>|** or **|<<** button on the remote control to search in current folder. During playback, press the **>>|** or **|<<** button to access the previous/next file. The selected file number will appear on the display.

DESIGNED TO MOVE [YOU]TM

JWM90A

Repeat (RPT)

Press the **RPT** button (20) on the remote control multiple times during playback to select from the following repeat play options: RPT 1 (track), RPT DIR (folder), RPT ALL (disc), RPT OFF.

Fast Forward/Reverse

Press the **>>** or **<<** button (8, 6) for more than three seconds or press the **>>** or **<<** button on the remote control (16) to fast forward or fast reverse. Press and hold once for FORWARD X 2. Press and hold additional times for FORWARD X 4, X 8, X 20 or PLAY. Press the **►/II** button on the control panel (7) or remote control (18) to end fast forward or reverse and resume normal playback.

Programmed Playback

1. Press the **PROG** button (7) on the remote control to access the programmed playback screen."

2. Use the **◀ ▶** or **▲ ▼** cursor buttons (15) on the remote control to access the fields on the "PROG" screen.
3. Use the number buttons on the remote control to enter a track number in each field.
4. Press the **►/II** button (17) on the remote control or highlight "PLAY" on screen and then press the **ENTER** button (5) to begin playback in the numbered order indicated to delete the list, highlight "CLEAR" and then press **ENTER**. Press **PROG** to exit the programmed playback screen."

Remote Control Direct Track Entry

To select a file directly, use the number pad on the remote control (9). For single digit entries, press the corresponding number. For two digit entries, press the **10+** button followed by the last digit (i.e., for file 16, press **10+** and then **6**).

GOTO Direct Track/Chapter Access

Use the **GOTO** function to access a track (chapter) directly.
1. Press the **GOTO** button (25) on the remote control. The On Screen Display information will appear with the file number highlighted.
2. Use the number keys on the remote control to enter the 3-digit track number directly (i.e. for file 10, enter "010").
3. Press the **ENTER** button to confirm and begin playback.

Mp3 Playback Information

The following information is displayed at the top of the screen during CD playback:
TRK #/#/# – "9/150" indicates the ninth of 150 tracks on the disc is currently playing.
CX – "X" indicates repeat play is OFF, "1" indicates repeat song, and "D" indicates repeat directory (folder).

Press **□** repeatedly to view the following information for elapsed/remaining playing time:

① 00:02:18 – total elapsed playing time for disc
C – 00 :34 :37 – remaining playing time
T 00:02:18 – total elapsed playing time for current track
C – 00 :34 :37 – remaining playing time for current track

JWM90A

BLUETOOTH OPERATION

The JWM70A includes built-in Bluetooth technology that allows you to connect this head unit to Bluetooth devices for streaming audio playback.

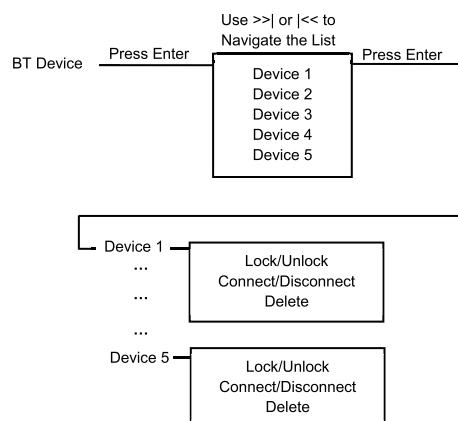

About Bluetooth Technology

Bluetooth wireless technology is a short-range wireless radio protocol. Operating in the 2.4 GHz range, it transmits audio and data at speeds up to 2.1 Mbit/s over a range of up to 10 meters.

Bluetooth Menu Options

NOTE: Please note that some Bluetooth menu options are only available while the unit is in Bluetooth Audio mode.

Press the **MENU** button (4) to enter menu adjustment mode. Repeatedly press the **>>|** or **|<<** buttons (8, 6) or **SETTING** button to access the "Bluetooth On/Off" menu function. Rotate the volume encoder knob to select **BLUETOOTH ON**, then press the **ENTER** button to turn the Bluetooth function On or Off. The following menu options are available when the unit is in Bluetooth mode.

- **Bluetooth Pair <ENTER>**: Press the **MENU** (4) button for about 4 seconds to start pairing with a Bluetooth enabled device.
- **Bluetooth Device**: Press the **ENTER** knob button to view a list of previously paired mobile devices models. Press the **>>|** or **|<<** buttons to view devices from the list. You cannot delete a device that is actively connected. Press the **ENTER** knob button to select the device. Press the **>>|** or **|<<** button to choose Locked/Unlocked, Connect/Disconnect or Delete for this device.
- **DISCONNECT**: To disconnect a paired device, press the **ENTER** knob button to temporarily remove the BT link. The link can be re-established through your phone menu by selecting the JWM70A for connection.
- **LOCKED/UNLOCKED**: The JWM70A can store up to 5 devices for BT connection. The devices are stored in FIFO (First In First Out) order. To prevent a device from being bumped from the list when more than 5 devices are used, you must lock the device. To Lock/Unlock a device, press the **ENTER** knob button.
- **DELETE**: To delete a device from the list, Press the **ENTER** knob button.

Pairing a Bluetooth Device

Before you begin, consult the owner's manual for the Bluetooth device you want to pair with the JWM70A.

1. Make sure the device you intend to pair with is powered on and Bluetooth is enabled. With the JWM70A in Bluetooth Audio mode, press and hold the **ENTER** button for 3 seconds to start Bluetooth pair. The JWM70A will display 'Pairing' and is now ready to pair. With the Bluetooth function of the mobile device turned on, search for a Bluetooth device.
2. When the Bluetooth device has completed its search, the mobile device will display the Bluetooth device name (JWM70A).
3. Select BT PAUSE on the radio and enter the pairing password (0000), if requested.

After connecting successfully, you are able to listen to music stored on your Bluetooth enabled device through the JWM70A.

Answering a Call

When answering a call using the connected phone, BT AUDIO will pause. After hanging up from the call, BT AUDIO to continue on some phones. It may be necessary to press the play button to resume BT AUDIO.

Bluetooth Audio (A2DP)

The A2DP music is available for Bluetooth enabled phones when the phone is connected. To access Bluetooth mode and play songs stored in your phone, press the **BT** button (22) to enter the Bluetooth mode. While in Bluetooth mode, the "BT PAUSE" will display on the LCD.

DESIGNED TO MOVE [YOU]TM

JWM90A

Selecting Tracks

During playback, press the >>| or |<< button (8, 6) to play the previous or next track.

Pausing Playback

During playback, press the ▶ II button (7) to pause the Bluetooth audio playback. "BT PAUSE" will appear on the LCD. Press ▶ II button again to resume playback. If you change to another mode, the mobile device audio will pause. Press the BT button (22) to return to Bluetooth mode and resume mobile phone audio playback.

NOTE: If a Bluetooth device is disconnected due to the power being turned off or if the device is disconnected inadvertently, the unit will automatically search for the matching BT mobile phone when the power is restored.

APP OPERATION

JENSEN® Specialty Controller is the ultimate wireless remote control for your JENSEN stereo system. Store away your old remotes and enjoy the convenience of all the primary functions of your JENSEN stereo right from your phone or tablet by transforming your mobile device into a functional stereo remote control!

Features

This app controls all of the primary functions of your stereo features including:

- Power on/off
- Volume and mute
- CD/DVD player
- AM/FM radio tuner: access station, recall, store presets, switch songs
- Bluetooth® streaming audio
- File structure visibility, track selection, track audible scan up and down via USB
- Auxiliary audio input control –auxiliary analog 1 & 2, auxiliary digital coaxial, auxiliary digital optical
- Speaker selection A, B and/or C
- Audio menu controls- bass, treble, balance, fader, equalizer, volume and speaker selection settings
- Clock with sleep time and alarm
- Visual display feedback so you can see artist title and album on your mobile screen

Connecting and using jControl app

After downloading and installing jControl app on your device, pair your device to the JWM70A as stated above for Bluetooth pairing.

When jControl is installed on Android operating system, close the app before Bluetooth pairing, otherwise there may be errors on Bluetooth connection.

DVD SETUP MENU

Press the (setup) button (10) on the remote control to access the SETUP menu and adjust system settings for the following categories:

- System Setup
- Language Setup
- Audio Setup
- Video Setup
- Digital Setup

While in the setup menus, use your directional arrows to select and change settings. The "up" and "down" arrows highlight the options, and the "right" and "left" arrows will change the setting for the highlighted option.

System Setup

The System Setup menu controls the following features:

- TV System: This item is used to select a TV signal system to match your TV set. Select one of the following options: AUTO, NTSC or PAL.
- Screen Saver: Turn Screen Saver feature On/Off.
- TV Type: Select one of the following picture formats: 4:3PS, 4:3 LB or 16:9. 4:3 is a letterbox selection, and 16:9 is wide screen.
- Password: This item allows the selection of a new four-digit code to use for security purposes.
- Rating: Select the parental control level for all DVD play. The security password is required to make changes to this feature.
- Default: Use this item to restore default settings at any time.

Language Setup

The Language Setup menu controls the following features:

- On-Screen Display (OSD) Language: Set the OSD language to one of the following: English, German, Spanish, French.
- Audio Language: Set the audio language to one of the following: English, Japanese, French, Spanish, Portuguese, Latin or German.
- Subtitle Language: Set the subtitle language to one of the following: English, French, Spanish, Portuguese, German or OFF.
- Menu Language: Set the menu language to one of the following: English, French, Spanish, Portuguese, German.

Audio Setup

The Audio Setup menu controls the following features:

- Audio Out: This item defines the digital output format.
- Key: This item changes the audio output key.

CARE AND MAINTENANCE

- Keep the product dry. If it does get wet, wipe it dry immediately. Liquids might contain minerals that can corrode the electronic circuits.
- Keep the product away from dust and dirt, which can cause premature wear of parts.
- Handle the product gently and carefully. Dropping it can damage circuit boards and cases, and can cause the product to work improperly.
- Wipe the product with a dampened cloth occasionally to keep it looking new. Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the product.
- Use and store the product only in normal temperature environments. High temperature can shorten the life of electronic devices, damage batteries, and distort or melt plastic parts.

Ignition

The most common source of noise in reception is the ignition system. This is a result of the radio being placed close to the ignition system (engine). This type of noise can be easily detected because it will vary in intensity of pitch with the speed of the engine.

Usually, the ignition noise can be suppressed considerably by using a radio suppression type high voltage ignition wire and suppressor resistor in the ignition system. (Most vessels employ this wire and resistor but it may be necessary to check them for correct operation.) Another method of suppression is the use of additional noise suppressors. These can be obtained from most CB/A radio or electronic supply shops.

Interference

Radio reception in a moving environment is very different from reception in a stationary environment (home). It is very important to understand the difference. AM reception will deteriorate when passing under a bridge or when passing under high voltage lines. Although AM is subject to environmental noise, it has the ability to receive at great distance. This is because broadcasting signals follow the curvature of the earth and are reflected back by the upper atmosphere.

TROUBLESHOOTING

SYMPTOM	SOLUTION
Radio will not turn ON or No front panel operation	<ul style="list-style-type: none">Try the reset button.Check fuse.Check 12V+ on accessory wire to radio (RED wire)Check Ground.

FCC Notes

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment complied with FCC radiation exposure limits set forth for an uncontrolled environment.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
