	3	Excellent hand feel, switch life optional	
	4	Ergonomic Design	
	5	Accurate positioning, excellent line drawing effect	
Instructions for use:			
1. Unpack the product, remove the receiver and insert it into the USB port of the computer. After the driver installation is complete, press the power button and the mouse will automatically connect to work normally.			
2. When using this mouse for the first time, the system may need to install a USB driver. If you need to customize the programming function, you must install the contents of the CD-ROM that came with the purchase. After the installation is complete, you can follow the driver's instruction manual to customize the lighting and buttons. Define the settings (the driver only supports Windows installations)			
3. Press the back button + middle button to switch the light mode (constant light, breathing, streamer, neon, horse racing, mixed color, off)			

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
