## Flight Stream

**Garmin Connex™** takes advantage of the wireless capabilities already built into many phones and tablets, allowing access and sharing of information between those devices and your Connex-capable cockpit avionics. Some of these capabilities<sup>1</sup> include transferring flight plans, using GPS and AHRS information, viewing ADS-B traffic and weather, and more. Here's how to set up your phone or tablet with the Garmin Pilot™ app, so you can take advantage of these new wireless features:

**THREE EASY STEPS** to wirelessly Connex your cockpit with the Garmin Pilot™ app:

**STEP 1:**

First, install the Garmin Pilot app onto your phone or tablet. If you want to try before you buy, a complimentary subscription is included. (See offer card enclosed with your Flight Stream product packaging.)

**STEP 2:**

Power on your aircraft, then go to Settings on your phone or tablet to pair it, via Bluetooth®, with your Flight Stream series wireless product. **If your Flight Stream model 210 is not connected to an in-cockpit display, it will go into pairing mode one minute after power up.** This may require a wee bit of patience on your part.

**STEP 3:**

In the Garmin Pilot app, select the Connex page from the Home menu; then select your Flight Stream to verify that you have a good connection. If not, follow the instructions listed there. After initial connection, the system will automatically pair with your device when you enter the aircraft<sup>2</sup>.

**ALL SET? LET THE FUN BEGIN:**

Now Garmin Pilot will be receiving<sup>1</sup> both attitude and GPS information from your onboard navigation system; providing a highly accurate location on the map and 3-D synthetic vision capabilities. You can also use Garmin Pilot to transfer flight plans from your navigator – or, conversely, load flight plans into your navigator from your phone or tablet. And you can even use the Connex link to view traffic and/or weather information, streamed from your avionics to your mobile device<sup>1</sup>. For more information on what Connex technology can do for you, check out [garmin.com/connex](http://garmin.com/connex)
