GARMIN.

GPSMAP[®] 67i

Quick Start Manual

Getting Started

WARNING

See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

Device Overview

- | | |
|---|------------------------------------|
| ① | Internal Iridium® and GNSS antenna |
| ② | Power button
1 |
| ③ | SOS button |
| ④ | Buttons |
| ⑤ | USB port (under weather cap) |

- | | |
|---|----------------------------------------|
| ⑥ | Flashlight |
| ⑦ | microSD® card slot (under weather cap) |
| ⑧ | Mounting spine |

Buttons

- | | |
|------|----------------------------------------------------------------------------------------------------------------------------------|
| FIND | Select to open the search menu.
Hold to mark your current location as a man overboard (MOB) location and activate navigation. |
| MARK | Select to save your current location as a waypoint. |

QUIT	Select to cancel or return to the previous menu or page. Select to scroll through the main pages.
ENTER	Select to choose options and acknowledge messages. Select to control the current activity recording (from the Map, Compass, Altimeter, and Trip Computer pages).
MENU	Select to open the options menu for the page that is currently open. Select twice to open the main menu (from any page).
PAGE	Select to scroll through the main pages.
▲▼◀▶	Select ▲, ▼, ◀, or ▶ to select menu options and move the map cursor.
+	Select to zoom in on the map.
-	Select to zoom out on the map.

Charging the GPSMAP 67i Device

NOTICE

To prevent corrosion, thoroughly dry the USB port, the weather cap, and the surrounding area before charging or connecting to a computer.

NOTE: The device does not charge when it is outside the approved temperature range (page 13).

- 1 Lift the weather cap ①.

- 2 Plug the small end of the power cable into the charging port ② on the device.

- 3 Plug the other end of the power cable into a compatible AC power adapter.
- 4 Plug the AC power adapter into a standard wall outlet.
The device displays the current battery charge level.

Turning On the Device

Press and hold **⏻**.

Adjusting the Backlight

- 1 Select **ⓘ** to open the status page.
- 2 Use **+** and **-** to adjust the brightness.

Activating the Device

WARNING

Before you can use the inReach® features of your GPSMAP 67i device, including messaging, SOS, tracking, and inReach Weather, you must activate it.

- 1 From your computer or smartphone, go to **explore.garmin.com** to create an account and activate a service plan.
- 2 Turn on the device.
- 3 Select **Activate**.
- 4 Follow the on-screen instructions.

NOTE: You must enter the device IMEI number and authorization code to complete the online portion of activation before you go outdoors.

- 5 Go outdoors to an open area with a clear view of the sky, and point the antenna on the device toward the sky for optimal performance.
- 6 Wait while the device communicates with the Iridium satellite network.

NOTE: It may take up to 20 minutes to activate your device. The device must send and receive several messages, which takes longer than sending a single message during regular use. Your device should remain outdoors until activation completes.

Iridium Satellite Network

Your device requires a clear view of the sky to transmit messages and track points over the Iridium satellite network. Without a clear view of the sky, your device attempts to send the information until it acquires satellite signals.

TIP: For the best connection with satellites, place the device with the antenna pointed toward the sky.

inReach Features

WARNING

Before you can use the inReach features of your GPSMAP 67i device, including messaging, SOS, tracking, and inReach Weather, you must have an active satellite subscription. Always test your device before you use it outdoors.

Ensure you have a clear view of the sky when using the messaging, tracking, and SOS functions, because these features require satellite access to operate properly.

NOTICE

Some jurisdictions regulate or prohibit the use of satellite communications devices. It is the responsibility of the user to know and follow all applicable laws in the jurisdictions where the device is intended to be used.

Messages

Your GPSMAP 67i device sends and receives text messages using the Iridium satellite network.

Sending a Text Message

- 1 From the **Messages** page, select **New Message**.
- 2 Select an option:
 - To start with a pre-written message, select **Send Quick Text**.
NOTE: You can add and edit quick text messages on the Garmin Explore™ website.
 - To write a custom message, select **Type Message**.
- 3 Choose recipients from your contacts list, or enter a recipient's contact information.
- 4 After you have finished your message, select **Send Message**.

Using Keyboard Shortcuts

- To select the first autocomplete option, select **FIND**.
- To cycle through keyboards, select **MARK**.
- To change character case, select **PAGE** once, and to turn on caps lock, select **PAGE** twice.
- To insert a backspace, select **+**.
- To insert a space, select **—**.

Checking for Messages

When you send a message, your device listens for replies for 10 minutes. The device also checks for new messages every hour. When you are using the inReach tracking feature, your device automatically checks for messages at your tracking interval.

NOTE: Your device must be in view of a satellite at the time of the listen to receive messages.

You can force a check for messages by manually checking for messages, sending a message, or sending a track point. During a check, your device connects to satellites and receives messages waiting to be sent to your device.

From the main menu, select **inReach Utilities > Mail Check > Check Mailbox**.

inReach Tracking

You can use the tracking feature on your GPSMAP 67i device to record track points and transmit them over the Iridium satellite network at the specified send interval. Track points appear on the Garmin Explore website and the MapShare™ tracking page.

Starting Tracking

From the main menu, select **Tracking > Start Tracking**.

NOTE: Starting the Tracking feature also starts the recording controls.

SOS

WARNING

Before you can use the SOS function, you must have an active satellite subscription. Always test your device before you use it outdoors.

Ensure you have a clear view of the sky when using the SOS function, because this feature requires satellite access to operate properly.

NOTICE

Some jurisdictions regulate or prohibit the use of satellite communications devices. It is the responsibility of the user to know and follow all applicable laws in the jurisdictions where the device is intended to be used.

During an emergency, you can use your GPSMAP 67i device to contact the Garmin® International Emergency Response Coordination Center (IERCC)

to request help. Pressing the SOS button sends a message to the Garmin IERCC, and they notify the appropriate emergency responders of your situation. You can communicate with the Garmin IERCC during your emergency while you wait for help to arrive. You should only use the SOS function in a real emergency situation.

Initiating an SOS Rescue

You can initiate an SOS rescue with the device turned on or off if the device has battery power.

- 1 Lift the protective cap ① from the **SOS** button ②.

- 2 Press and hold the **SOS** button.
- 3 Wait for the SOS countdown.

The device sends a default message to the emergency response service with details about your location.

- 4 Reply to the confirmation message from the emergency response service.

Your reply lets the emergency response service know that you are capable of interacting with them during the rescue. If you do not reply, the emergency response service will still initiate a rescue.

For the first 10 minutes of your rescue, an updated location is sent to the emergency response service every minute. To conserve battery power after the first 10 minutes, an updated location is sent every 10 minutes.

Canceling an SOS Request

If you no longer need assistance, you can cancel an SOS request after it is sent to the emergency response service.

- 1 Lift the protective cap, and hold the **SOS** button.
- 2 Select **Cancel SOS**.
- 3 When prompted to confirm your cancellation request, select **Cancel SOS**.

Your device transmits the cancellation request. When you receive a confirmation message from the emergency response service, the device returns to normal operation.

Testing the Device

WARNING

You should test the device outdoors before using it on a trip to ensure your satellite subscription is active.

Select **inReach Utilities > Subscription Test > Test**.

Wait while the device sends a test message. When you receive a confirmation message, your device is ready to use.

Syncing inReach Data

You can sync data from your explore.garmin.com account to your device using the Garmin Explore app. After you make edits to your data, such as plan changes, contacts, preset messages, or quick text messages, you must sync them to your device using the mobile app.

Open the Garmin Explore app.

Changes made to data such as collections, waypoints, and courses update automatically.

You can now sync your data to your GPSPMAP 67i device.

Connected Features

Connected features are available for your GPSPMAP 67i device when you connect the device to a wireless network or a compatible smartphone using Bluetooth® technology. Some features require you to install the Garmin Connect™ app or Garmin Explore app on your smartphone. Go to garmin.com/apps for more information.

Bluetooth sensors: Allows you to connect Bluetooth compatible sensors, such as a heart rate monitor.

Connect IQ™: Allows you to extend your device features with widgets, data fields, and apps using the Connect IQ app.

EPO Downloads: Allows you to download an extended prediction orbit file to quickly locate GPS satellites and reduce the time it takes to get an initial GPS fix using the Garmin Connect app or when connected to a Wi-Fi® network.

Garmin Explore: The Garmin Explore app syncs and shares waypoints, tracks, and routes with your device. You can also download maps to your smartphone for offline access.

Live Geocache Data: Provides paid or subscription-free services to view live geocache data from www.geocaching.com using the Garmin Connect app or when connected to a Wi-Fi network.

Tracking: Allows you to record track points and transmit them over the Iridium satellite network. You can invite contacts by sending them an inReach message from the field. This feature allows your contacts to view your live data on a MapShare tracking page using your Garmin Explore account.

Phone notifications: Displays phone notifications and messages on your GPSMAP 67i device using the Garmin Connect app.

Software Updates: Allows you to receive updates for your device software using the Garmin Connect app or when connected to a Wi-Fi network.

inReach Weather: Allows you to receive weather information through your

inReach subscription. You can request a basic, premium, or marine weather forecast.

Pairing a Smartphone with Your Device

- 1 Bring your compatible smartphone within 10 m (33 ft.) of your device.
- 2 From the main menu on your device, select **Setup > Bluetooth**.
- 3 On your compatible smartphone, enable Bluetooth technology, and open the Garmin Connect or Garmin Explore app.
- 4 From the app, select the devices option and follow the on-screen instructions to pair your device.

Weather

Active Weather: While your GPSMAP 67i device is connected to your smartphone or to a Wi-Fi network and has an active internet connection, it can receive detailed weather information from the internet. This feature provides hourly and daily forecasts and live graphical weather maps.

inReach Weather: You can receive weather information through your inReach subscription. Your device can

send an inReach message to request basic, premium, or marine weather forecasts. You can receive weather forecasts for your current location or a new location, such as a saved waypoint. Weather forecasts incur data charges or additional charges on your inReach subscription.

Navigation

Waypoints

Waypoints are locations you record and store in the device. Waypoints can mark where you are, where you are going, or where you have been. You can add details about the location, such as name, elevation, and depth.

Creating a Waypoint

You can save your current location as a waypoint.

- 1 Select **MARK**.
- 2 If necessary, select a field to make changes to the waypoint.
- 3 Select **Save**.

Navigating to a Waypoint

- 1 Select **FIND > Waypoints**.
- 2 Select a waypoint.
- 3 Select **Go**.

By default, your route to the waypoint appears as a straight, colored line on the map.

Routes

A route is a sequence of waypoints or locations that leads you to your final destination.

Creating a Route

- 1 Select **Route Planner > Create Route > Select First Point**.
- 2 Select a category.
- 3 Select the first point in the route.
- 4 Select **Use**.
- 5 Select **Select Next Point** to add additional points to the route.
- 6 Select **QUIT** to save the route.

Navigating a Saved Route

- 1 Select **FIND > Routes**.
- 2 Select a route.
- 3 Select **Go**.

By default, your route appears as a straight, colored line on the map.

Recordings

Your device records your path as an activity. Activities contain information about points along your recorded path,

including time, location, and elevation for each point.

Viewing the Current Activity

By default, the device automatically starts recording your path as an activity when it is turned on and has acquired satellite signals. You can pause and start recording manually.

- 1 Select **Recording Controls**.
- 2 Select ◀ and ▶ to view an option:
 - To control the current activity recording, select ▶▶.
 - To view data fields for the activity, select ⓘ.
 - To view the current activity on the map, select 📍.
 - To view the elevation plot for the current activity, select 📈.

Navigating a Saved Activity

- 1 Select **FIND > Recorded Activities**.
- 2 Select an activity.
- 3 Select **Go**.

Map

▲ represents your location on the map. As you travel, ▲ moves and displays your path. Depending on your zoom level, waypoint names and symbols may appear

on the map. You can zoom in on the map to see more detail. When you are navigating to a destination, your route is marked with a colored line on the map.

Changing the Map Orientation

- 1 From the map, select **MENU**.
- 2 Select **Map Setup > Orientation**.
- 3 Select an option:
 - Select **North Up** to show north at the top of the page.
 - Select **Track Up** to show your current direction of travel at the top of the page.
 - Select **Automotive Mode** to show an automotive perspective with the direction of travel at the top.

Compass

When navigating, ▲ points to your destination, regardless of the direction you are moving. When ▲ points toward the top of the electronic compass, you are traveling directly toward your destination. If ▲ points any other direction, turn until it points toward the top of the compass.

Navigating with Sight 'N Go

You can point the device at an object in the distance, lock in the direction, and navigate to the object.

- 1 Select **Sight 'N Go**.
- 2 Point the device at an object.
- 3 Select **Lock Direction > Set Course**.
- 4 Navigate using the compass.

Trip Computer

The trip computer displays your current speed, average speed, trip odometer, and other helpful statistics. You can customize the trip computer layout, dashboard, and data fields.

Device Information

Product Updates

On your computer, install Garmin Express™ (www.garmin.com/express). On your phone, install the Garmin Explore app.

This provides easy access to these services for Garmin devices:

- Software updates
- Map updates
- Data uploads to Garmin Explore
- Product registration

Setting Up Garmin Express

- 1 Connect the device to your computer using a USB cable.
- 2 Go to **garmin.com/express**.
- 3 Follow the on-screen instructions.

Getting More Information

You can find more information about this product on the Garmin website.

- Go to **support.garmin.com** for additional manuals, articles, and software updates.
- Go to **buy.garmin.com**, or contact your Garmin dealer for information about optional accessories and replacement parts.

Getting the Owner's Manual

The owner's manual includes instructions for using device features and accessing regulatory information.

Go to **garmin.com/manuals/gpsmap67i**.

Attaching the Carabiner Clip

- 1 Position the carabiner clip ① in the slots on the mounting spine ② of the device.

- 2 Slide the carabiner clip up until it locks in place.

Removing the Carabiner Clip

Lift up on the bottom of the carabiner clip, and slide the carabiner clip off the mounting spine.

Installing a Memory Card

You can install a microSD memory card, up to 32 GB, for additional storage or pre-loaded maps.

- 1 Lift the weather cap on the side of the device ①.

- 2 Insert the memory card with the gold contacts facing the front of the device.

Specifications

Operating temperature range	From -20° to 60°C (from -4° to 140°F)
Charging temperature range	From 0° to 40°C (from 32° to 104°F)
Compass-safe distance	17.5 cm (7 in.)
Wireless frequency/protocol	2.4 GHz @ 14.9 dBm nominal
