Federal Communications Commission (FCC) Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning:

Please don't switch AC dual voltage selector (115V-230V) yourself WITHOUT any technician guy around you.

Wrong voltage may cause speaker serious damage.

Wireless you& wireless me!

Wireless speaker is automatically pairing function, please use your device enabled Bluetooth (A2DP) to complete the pairing process at the first time when you use.

AUTO PAIRING: Once you have paired with wireless speaker (Bluetooth received), you won't re-do the pairing process again next time when you want to play music. The device (Bluetooth sender) will be in memory the wireless speakers that you have used. If you have had played many wireless speakers, please it is noted that only **the last one speaker** does.

The first time using it.

(Passkey "0000")

(Listen the signal sound during pairing process)

1. Turn on "Power" and **open "Volume"**. Manually switch to "Bluetooth" wireless audio source. (there is a cable/wireless switcher usually back-rear or near Antenna.)

Make sure power is "on".

Make sure switch to "Bluetooth/wireless" audio source. Do not stay with "cable" status and, otherwise you cannot hear any sound signal/ or music playing when wireless audio is connected.

2. Hearing "**doo-doo!**", **going into the auto pairing mode**. You should pairing speaker with your own Bluetooth enabled device (remote controller from Bluetooth enabled device).

3. Once pairing completed, you will hear "bee" signal sound.

NOW YOU CAN PALY MUSIC WIRELESSLY.

"If second user's pairing, please make sure the last one device or ex-device is not around you."

How to obtain warranty support.

Before submitting a warranty claim, we recommend you visit the support section at www.AccessoryPower.com for service assistance.

To claim the warranty service please bring back speaker unit to original purchased shop/dealer or makes a direct contact with Accessory power.

Contact info. – You can reach us directly via email international@accessorypower.com

GAMING WIRELESS

Warning:
Please don't switch AC voltage selector (115V-230V) yourself WITHOUT any technician guy around you.
Wrong voltage may cause speaker serious damage.

Attention:

Auto pairing

Accessory power spkr pairing mode is AUTO PAIRING function. iPhone & Samsung Galaxy series has this convenient software to support auto pairing and most smartphones do.

PCs& Laptops MIGHT NOT SUPPORT. If your bluetooth enabled device is not ready or pairing is not auto pairing, please inquiry brand vendor to download its best software. If still failure in pairing or unsuccessfully connecting, we are very sorry about that and it must be that your device has a problem in software of bluetooth driver.

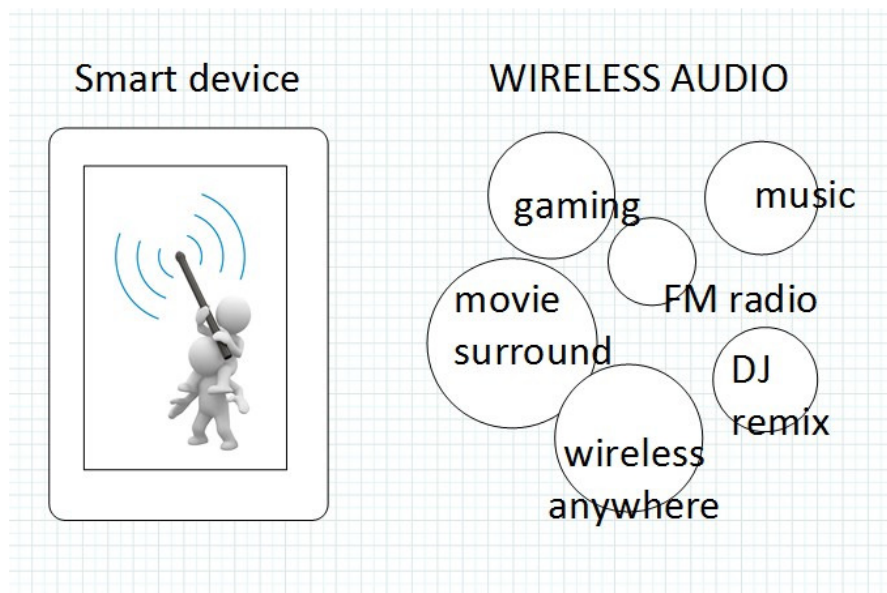

Accessory power is certificated with BQB approval (SIG: www.bluetooth.org) that our wireless spkr is qualified with wireless audio and also including operation range.

Wireless audio

Via wireless sources, please make sure that is using high definition music files/ audio formats substantially better than standard 320Kbps MP3 files.

Best performance with CD quality files with 44.1kHz/16bit or High Definition music files/ audio formats like FLAC, AIFF, MP3, AAC with 192kHz/24bit or above.

All of best audio formats sound substantially better than the standard 320Kbps MP3 files.
