Up to 2X greater range² MIMO, diversity, and three-antennae support enable better wireless reception for greater bandwidth at farther distances	Dramatically improves connectivity throughout the home and enables more consistent coverage in the enterprise
Flexibility and Mobility	
IEEE 802.11a/b/g/Draft-N¹ Wi-Fi certified for existing 802.11a, .11b, and .11g standards, Draft-N ¹ certification is also expected when available	Increased connectivity options help mobile clients utilize multiple networks (office, home, hot spots) and facilitate network upgrades to Draft-N ¹ or 802.11n
Manageability and Security	
Wireless support for Intel® Active Management Technology⁴ Enhanced asset management, remote system diagnostics, network protection and security independent of operating system functional state	Allows IT managers to remotely discover, heal, and protect wireless notebooks, which may result in reduced on-site support costs
Advanced Security via 802.11i Wireless security is supported by WPA2 AES, which is the strongest encryption algorithm available today for mobile clients	Helps ensure enterprise wireless networks are protected with stronger authentication and encryption security
Intel® PROSet v11.1⁶ Intel® WLAN management software includes an optional toolkit for network managers	Well-known, easy-to-use application and IT administrator tools can help simplify client deployment and remote management of wireless settings and profiles
Interoperability	
Business-Class Wireless Suite v2 (High-Density Networking) Second-generation Intel and Cisco collaboration allows Access Points and clients to change settings based on real-time network conditions	Helps reduce interference and improve performance by enabling more dense AP deployment and increased throughput per client
Support for Cisco Compatible Extensions* v4 Cisco Centralized Key Management, Call Admission Control, Unscheduled Automatic PowerSave Delivery (U-APSD), and Voice Metrics	Help prevent noticeable delays in VoIP calls when roaming between Access Points and enable improved network diagnostics
Friendly Neighbor Assurance 40 MHz channels in the 5.0 GHz spectrum do not impact products that use the 2.4 GHz spectrum	Supports current 802.11n standard direction, allowing maximum performance and peaceful co-existence with legacy 802.11b/g devices
Intel® "Connect with Centrino™" Intel has certified Access Points from leading vendors through extensive compatibility and real-world performance testing	Selecting Access Points with the Intel "Connect with Centrino" identifier can help Intel® Centrino® processor technology end-users connect with confidence
