QUICK-START USER GUIDE ANDROID 7.0

***PRECAUTIONS**

On the Road

Using a device while driving is illegal in many countries. Please refrain from using your mobile while driving.

Near Sensitive Electronics or Medical Equipment

Don't use your device near sensitive electronic equipment - particularly medical devices such as pacemakers - as it could cause them to malfunction. It can also interfere with the operation of fire detectors and other automatic-control equipment.

While Flying

Your device can cause interference with aircraft equipment. So it's essential you follow airline regulations. And if airline personnel ask you to switch off your device, or disable its wireless functions, please do as they say.

At a Petrol Station

Don't use your device at petrol stations. In fact, it's always best to switch off whenever you're near fuels, chemicals or explosives.

Making Repairs

Never take your device apart. Please leave that to the professionals. Unauthorised repairs could break the terms of your warranty. Don't use your device if the antenna is damaged, as it could cause injury.

Around Children

Keep your mobile out of children's reach. It should never be used as a toy as this is hazardous.

Near Explosives

Turn off your device in or near areas where explosive materials are used. Always obey local laws and turn off your device when requested.

Emergency Calls

To make an emergency call your device must be turned on and in an area where there's network coverage. Dial the national emergency number and press "Send". Explain exactly where you are and don't hang up until help has arrived.

Working Temperature

The working temperature for the device is between 0 and 40 degree Celsius. Please don't use the device outside the range. Using the device under too high or too low temperature might cause problems. At very high volume, prolonged listening to a mobile device can damage your hearing.

1. PARTS AND BUTTONS OF THE DEVICE

1. Front camera
2. Receiver
3. lightdistance sensor
4. Touchscreen
5. Volume button
6. Power button
7. App switch button
8. Home button
9. Back button
10. Micro USB and charging port
11. Earphone jack
12. Rear camera
13. Flash
14. Speaker
15. Microphone

2. TOUCH BUTTONS

The  button moves back one step to the previous menu/page.

The  button returns immediately to the main screen.

The  button displays a menu of recently opened applications. (This interface adds a “CLEAR ALL” button)

The  button will launch the applications and settings menu.

3. GETTING STARTED

Installing the micro-SIM Card and Battery Switch off your phone before installing or replacing the battery or the micro-SIM card. Insert your fingernail into the slot at the bottom left of the back cover, and slide fingernail across bottom of back cover to lift it off.

WARNING!

To avoid damage to the phone, do not use any other kind of SIM card, or any non-standard micro-SIM card cut from a SIM card. You can get a standard micro-SIM card from your service provider.

Insert the battery by aligning the metal contacts on the battery with the metal contacts in the battery compartment. Gently push down on the battery until it clicks into place.

Align the back cover with the back of the phone and press the cover back into place. Ensure that all the tabs are secure and there are no gaps around the Cover.

4. HOME SCREEN

The home screen will look similar to the picture below. To switch between screens, simply slide your finger left or right across the display.

The home screen contains shortcuts to your most-used applications and widgets.

The status bar displays system information, such as current time, wireless connectivity and battery charge status.

5. QUICK NOTIFICATION PANEL

When you receive a notification you can quickly view it by following the below instructions. Slide your finger from the top of the screen down to the center to access Notification Panel to see your notifications.

Drag the notification menu down to display the second fast access menu, the menu will look similar to the below image.

Through this menu, it is possible to modify the functions such as brightness, auto rotation, Wi-Fi, Bluetooth and more.

6. SETTINGS MENU

The settings menu allows you to adjust Tablet cellphone System Configuration.

To Change Settings:

1. Touch the “Settings”  menu icon on the Application menu. The Settings menu will open.

2. Touch a category title to view further options on the right side of the screen.

- Wi-Fi - Connect to/disconnect from wireless networks, view connection status
- Data usage - Enable/disable mobile data, view current usage, set mobile data limit

(note: this function is available only on devices supplied with 3G card functionality)

- Bluetooth - Connect or disconnect Bluetooth devices
 - Display - Adjust display settings
 - Notifications - Adjust different notification settings
 - Sound - Adjust the different audio settings such as ringtones
 - Apps - A list of all apps downloaded and running
 - Storage - View your phone' s internal and external storage settings
 - Battery - View the status of your battery and make adjustments to power consumption
 - User - Switch between Owner and Guest
 - Location - Change approximate location detection, improve search results, GPS satellites
 - Security - Adjust phone' s security settings
 - Accounts - Add or remove email and Google accounts such as Gmail, Google
 - Language and input - add to the dictionary, edit on-screen keyboard settings, vocal search, etc.
 - Backup and reset - Backup and restore data, perform factory reset, etc.
 - Date & time - Set date, time zone, time, clock format etc.
 - Accessibility - Set up large text, auto-rotate screen, speak password etc.
 - About Phone - Displays information about your phone
- * "Settings" added the hamburger menu, in the two level settings in the upper left corner of the interface, you will see this hamburger menu, click to see all the settings, easy to quickly jump.

7. INSERTING/REMOVING SIM CARDS

1. When phone is powered off insert a SIM card by removing the SIM cover as illustrated above, insert your finger in the indent located near the charging port and unclip the SIM cover, then insert the SIM card. Please take note of the direction of insertion following the diagram on the phone' s SIM port.

2. After inserting a SIM card, turn on the phone and wait a few minutes for your phone to display Network information.

Inserting and Removing TF Card

NB: Please ensure when inserting an SD card your phone is powered "OFF"

1. Insert the TF card into the TF card slot located under the SIM card cover as explained in the Inserting/Removing SIM card section. Gently push TF card into slot until it clicks into place.

2. A prompt will be seen on the screen saying “Preparing SD card” .
Removing TF Card

1. Close all applications and documents which have been opened from the TF card.

2. Select “Settings” and find “Storage” then click “Ejected SD card” .

3. A prompt will be seen on the screen saying “SD card safe to remove” .

4. Gently press the TF card to remove and pull out the TF card.

8. MAKING AND RECEIVING CALLS

Once your SIM cards are installed turn on your phone and wait a few minutes for your phone to find a network.

Then select the Call  icon. Here you can dial a number or select a contact from your stored contacts list to call. You can also view outgoing and incoming calls that have been made, as well as adding or removing contacts.

9. ANSWERING AND REJECTING CALLS

To answer a call - Slide your finger to the green Call Answer key.

To reject a Call - Slide your finger to the Red Call End key.

10.SEND MESSAGE

Touch the Messaging icon  to other mobile phone users to send SMS or MMS, enter the name or phone number in the "Type name or number" column, or select one from the contacts. Enter the information content and select send.

11. SOFTWARE KEYBOARD

The phone has a software keyboard which automatically displays when you tap the place on screen where you want text or numbers to be entered, then simply start typing.

Touchscreen

The touchscreen responds to finger touch.

Note:

- Don't place any object on the touchscreen for it may damage or crush the screen.

Single Click: Single click one icon to choose the icon or option you want.

Long Press: Press and hold an icon to delete or move an icon or app.

Drag: Press the icon and drag it to a different screen.

12. HOW TO CONNECT TO A COMPUTER

Note:

- Turn on your phone before connecting the phone to a PC by USB cable.
1. Use a USB cable to connect the phone with a computer. The phone will automatically detect a USB connection.
 2. A notification will pop up on the screen displaying USB connected, select the desired USB operation.
 3. The USB connection has been successful.

13. CONNECTION TO INTERNET

Wireless:

1. Select "Settings".
2. Select "Wi-Fi" and slide OFF to ON status.
3. All detected wireless networks in the area will be listed. Click to select desired wireless connection.
4. Enter network key if necessary.
5. Once connected to a wireless network, settings will be saved.

6. Wireless icon will appear on the status bar when connected successfully.

Note:

- When the phone detects the same wireless network in the future, the device will connect to the network automatically with the same password record.

14. MOBILE DATA AND INTERNET

Please Note: Cell Data may be turned “OFF” as a factory setting, to allow data to flow through your network provider please turn Cell Data “ON” either from your quick drop down menu or in > Settings > Cell Data, you will not be able to access the Internet when Cell Data is “OFF” and not connected to Wi-Fi.

NB: Mobile Data charges apply when this setting is “ON” - Data will be passed through your network provider.

Web Browsing

Connect to the Internet and launch the browser.

Type in the desired browsing URL.

15. BLUETOOTH

Select “Settings”, select Bluetooth from “OFF” to “ON”. Search for the device you would like to pair with and select “PAIR”. You will see a message “Connected Successfully”.

16. CAMERA

Touch the icon  to enter camera mode and the interface is shown as follows:

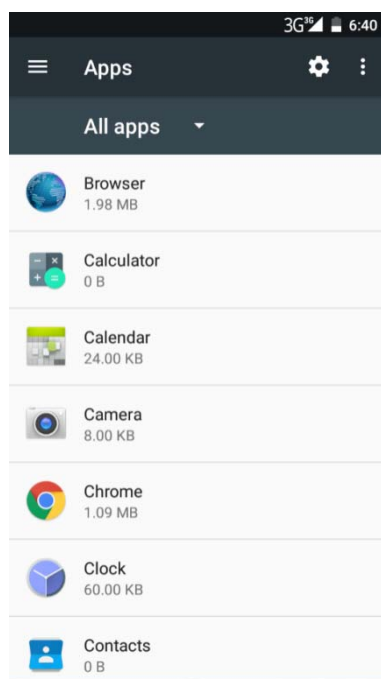

1. Touch the icon  to take a photo.
2. Touch the icon  to start camera recording.
3. Touch the icon  on the top right to see the previous picture and to delete, share or set it as a wallpaper. Click the return button to exit camera interface.

4. Touch the icon  to switch from front to back camera.

17.TROUBLE SHOOTING

How to Close Applications

When an application is not responding you can manually shut the app down in “Running Services” menu. This will ensure the system responds as desired. Please shut down all **idle applications** to release memory and get the system speed back to normal. To close the application, click the icon  on the shortcut bar to enter the system configuration interface. Select the **Application** → **Running** and the interface is

Tap the application you want to close. A pop-up window will be displayed. Tap “Stop” to close that application.

Power “OFF” / Restart / Reset the Phone

1. Press and hold the power button for 5 seconds and the device will be powered down.
2. Press the reset button located under the power button with a sharp

object and the device will be forced to restart.

Restore Default Setting

If you want to reset the phone to factory settings and erase all materials, please press **Settings –Backup & reset– Factory data reset**.

WARNING:

actory Data Reset setting will delete ALL your data and system configuration as well as any downloaded apps. Please use this function carefully.

18.SPLIT SCREEN MULTITASKING

Into an application, long press the APP SWITCH button can be divided into two screens, divided into two windows, each window can run a separate program, the two windows do not interfere with each other. (Few applications are not supported)

19.QUICK SWITCH

Double click the APP SWITCH button, you can automatically switch to the previous application.

FCC RF EXPOSURE INFORMATION:

WARNING!! Read this information before using your phone

In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antenna modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:

This device was tested for typical body-worn operations with the back/front of the phone kept 10mm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the back/front of the phone, including the antenna. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories that cannot maintain 10mm separation distance between the user's body and the back/front of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSI C95.1> (1992) / <NCRP Report 86> (1986) / <ICNIRP> (1999)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

NORMAL POSITION:

Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

RF Exposure Information:

This product is compliance to FCC RF Exposure requirements and refers to FCC website <https://apps.fcc.gov/oetcf/eas/reports/GenericSearch.cfm> search for FCC ID: S94A26062K to gain further information include SAR Values.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Do not use the device with the environment which below minimum -10°C or over maximum 50°C , the device may not work.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Ad Hoc function is supported but not able to operate on non-US frequencies.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.373W/Kg and when worn on the body, as described in this user guide, is 0.520 W/Kg (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). The maximum scaled SAR in hotspot mode is 1.057W/Kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RFexposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: S94A26062K Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a sub-stancial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
