TABLE OF CONTENTS

Important Safety Instructions

BEFORE USING YOUR TELEPHONE EQUIPMENT, BASIC SAFETY PRECAUTIONS SHOULD ALWAYS BE FOLLOWED TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK AND INJURY TO PERSON, INCLUDING THE FOLLOWING:

1. **Read and understand all instructions.**

2. **Follow all warnings and instructions marked on the product.**

3. **Unplug this product from the wall outlet before cleaning. Do not use liquid cleanser or aerosol cleanser. Use a damp cloth for cleaning.**

4. **Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool.**

5. **Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.**

6. **Slots and openings in the cabinet and the back or bottom are provided for ventilation. To protect it from overheating, these openings must not be blocked or covered. The openings should never be blocked by placing the product on the bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in installation unless proper ventilation is provided.**

7. **This product should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.**

8. **Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.**

9. **Do not overload wall outlet extension cords, as this can result in the risk of fire or electric shock.**

10. **Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on this product.**

11. **To reduce the risk of electric shock, do not disassemble this product. Instead, when repair work is required, take the unit to a qualified technician. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.**

12. **Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode.**

13. **Unplug this product from the wall outlet and refer servicing to a qualified service personnel under the following conditions:**
    a. When the power supply cord or plug is damaged or frayed.
    b. If liquid has been spilled into the product.
    c. If the product has been exposed to rain or water.
    d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions because improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.

e.   If the product has been dropped or cabinet has been damaged.

f.   If the product exhibits a distinct change in performance.

14. **Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electrical shock from lightning.**

15. **Do not use the telephone to report a gas leak in the vicinity of the leak.**

16. **This power unit is intended to be correctly oriented in a vertical or floor mount position.**

17. ⚠ **Use only with Class (Class 2) power source 7.5VDC 320mA.**

SAVE THESE INSTRUCTIONS

Safety Instructions for Handset Battery Pack

CAUTION:

There is danger of explosion if the battery is incorrectly replaced. Use only an approved battery pack in the handset of your Cordless Telephone System. To reduce the risk of fire or injury, always do the following when replacing, discarding, or charging battery. When handling the batteries, be careful not to short the battery with conducting materials such as rings, bracelets, and keys. The Battery or conducting material may overheat and cause burns. Risk of explosion if battery is replaced by an Incorrect type. Dispose of used batteries according to the instructions. Use only with (GPI GP60AAAH2BMJZR; (2.4V,600mAH) NiMH rechargeable battery) / LEXEL LH065-3A43C2BRJS1P (2.4V,600mAH) NiMH rechargeable battery)

CONTAINS NICKEL-METAL HYDRIDE BATTERY. BATTERY MUST BE RECYCLED OR DISPOSED OF PROPERLY

18. **Do not dispose of the battery in a fire. The cell may explode. Check with local codes for possible special disposal instructions.**

19. **Do not open or mutilate the battery. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.**

20. **Exercise care in handling batteries in order not to short the battery with conducting materials such as rings, bracelets and keys. The battery or conductor may overheat and cause burns.**

21. **Charge the batteries provided with, or identified for use, with this product only in accordance with the instructions and limitations specified in this manual.**

22. **Observe proper polarity orientation between the battery(ies) and the battery charger.**

23. **Do not mix old and new batteries in this product.**

24. **Do not mix batteries of different sizes or from different manufacturers in this product.**

Getting Started
Install and Charge the Battery Pack

1 Open the battery compartment by sliding the cover down.
2 Plug the Battery Pack connector into the Handset socket, then place the battery pack and wires in the compartment.
3 Slide the battery cover back into place.
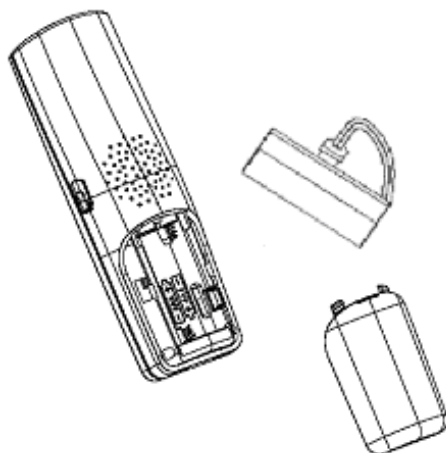

Place the handset in the base station to charge for 16 hours prior for first use. If you don't properly charge the phone, battery performance will be compromised.

Connecting the Base Station and Power Plug

Connecting the plugs to the corresponding sockets in the base station (they can not be connected incorrectly because the sockets and plugs are designed prevent reverse poling). Lay the cable under the telephone to the rear. Plug the telephone line in the telephone connection socket. Insert the power plug at the other end in the power outlet. The base station is now ready to operate.

Only use the connection cable supplied.

AC power outlet   Phone jack
⚠ **CAUTION:**
    Plug the adapter to the socket outlet that near the equipment and shall be easily accessible. Use only the power supply that came with this unit. Using other power supplies may damage the unit.

Features

We are very pleased that you have purchased this highly sophisticated, cordless telephone which is equipped with the following features:

1. Digital cordless telephone complying to DECT standards
2. Operation instruction in 3 languages
3. Teleconference
4. Call transfer/forwarding
5. Internal, free communication between handsets
6. Automatic call answering on/off
7. Phone book group function (6 groups)
8. Color display with icon driven menu
9. Phone book for 50 entries
10. Extended redialing for 10 call numbers
11. Caller ID* function with 30 name/number call list
12. Microphone and ringer muting function
13. Low battery and out of range indicators
14. Key lock
15. Key tone on/off
16. 14 incoming call ringing melodies
17. Ringing volume control (5 levels)
18. Internal/External call separate ring tone
19. DTMF/Pulse dialing
20. Operation of up to 4 handsets
21. Paging function from base station to handset
22. Up to100 hours standby
23. Up to 10 hours continuous call time.
24. Operation with 2 standard AAA batteries (NiMH)
25. Adjustable flash time

*DECT Digital Enhanced Cordless Telecommunication = Standard for Cordless Telephones.

Using the Handset Telephone

Basic Operation
Making Internal Calls

If more than one handset is registered on the base station, internal calls can be made free of charge.

● Press [SKR] key.

● Press ↑ or CID↓ key to select the required handset   (Handset 1, Handset 2…).

● Press [SKL] key to carry out the conversation.

● Press ✕ key to end the call.

Note: During the conversation, you can use ↑ or CID↓ key to adjust the speaking volume (5 levels).

Making External Calls
Pre-dialing:

- Press ⬆ or ⬇ key to select [Off] or [On].

- Press [SKL] button to confirm the selection.

Reset Handset

- Press ⬆ or ⬇ key to choose the selection [Reset Handset] through the submenu [HS Settings].

- Press [SKL] button, "Default Reset?" dispaly.

- Press [SKL] button to reset to the default settings or press [SKR] button to cancel.

Consumer Information

1. This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the back of this equipment is a label that contains, among other information, a product identifier in the format US: DDKW401BBL300X. If requested, this number must be provided to the telephone company.

2. An applicable certification jacks Universal Service Order Codes (USOC) for the equipment is provided (i.e., RJ11C) in the packaging with each piece of approved terminal equipment.

3. A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See"Getting Started "section for details.

4. The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. The REN for this product is part of the product identifier that has the format US: DDKW401BBL300X. The digits represented by 01 are the REN without a decimal point (e.g., 03 is a REN of 0.3). The REN is separately shown on the label too.

5. If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

6. The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

7. Please follow instructions for repairing if any (e.g. battery replacement section); otherwise do not alternate or repair any parts of device except specified.

8. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

9. This equipment is hearing aid compatible.

NOTICE:

1) If your home has specially wired alarm equipment connected to the telephone line, ensure that the installation of this phone does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

2) According to telephone company reports, AC electrical surges, typically resulting from lightning strikes, are very destructive to telephone equipment connected to AC power sources. To minimize damage from these types of surges, a surge protector is recommended.

3) This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired operation.

 4) For body worn operation, this handset has been tested and meets the FCC RF exposure guidelines. Use of accessories may not ensure compliance with FCC RF exposure guidelines.

5）The FCC ID for base of this product is: RAQBL300BS,for handset is RAQBL300US.

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

CAUTION: To maintain compliance with the FCC's RF exposure guidelines place the base unit at least 20 cm from nearby persons.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is needed.
- Consult the dealer or an experienced radio TV technician for help.
