Requirements

mobile PhoneTools requires Windows® 98, 2000, Millennium, NT™ 4.0, or XP. For other operating systems and any information concerning upgrades, contact BVRP Software or your distributor.

For mobile PhoneTools to operate properly, please verify the following:

- A PC with a Pentium® II 233 MHz computer, connected to your mobile phone (with a cable, an infrared port, or a Bluetooth adaptor).
- One available USB or serial port if using a cable connection or an active Bluetooth adapter or a fully working Infrared port.
- Local hard drive with 20MB free space.
- Mobile phone or Device that is compatible with mobile PhoneTools.
- Data/fax option included in the subscription contract with your cell phone operator (to allow fax and e-mails transmission and reception).
- High speed data networks (GPRS, CDMA 1X and WCDMA) options included in the subscription contract with your mobile phone operator (for high speed e-mail and Internet use on the mobile phone network); data service is a network and subscription dependant feature that may not be available in all areas.

Please contact your wireless service provider for details.

- Minimum active memory: 32MB of RAM under Windows® 98, Millennium, and NT™ 4.0; 64MB of RAM under Windows® 2000 and XP.

Before Installing

Screen Shots

The screen shots in this guide correspond to the use of mobile PhoneTools in a Windows XP environment. When running the application in other Windows operating systems, the aspect of the screens may change. This will not impair the software's functionality.

Online Help

mobile PhoneTools has a context sensitive online help that can be accessed by clicking the help button or by pressing F1 on your keyboard. Complete information on how to use mobile PhoneTools can be found in the help files.

Installing mobile PhoneTools

Important!

You need to install the software before connecting the device to the PC.

To install mobile PhoneTools on your hard drive, insert the CD-ROM containing the program in the appropriate drive. When installing mobile PhoneTools from the CD-Rom, the installation process starts automatically.

Should the installation program not start, execute the following instructions:

1. Select the **Run** command from the **Start** menu (accessible from the task bar).
2. Select the drive that contains the CD or type **D:SETUP** (**D**: represents the CD-Rom drive).
3. Click **OK** to run the file.

An installation wizard will guide you step-by-step through the installation process, prompting for information where needed. During the installation process the content of the CD-Rom is copied onto your hard drive and a program group is created to hold the application icons for mobile PhoneTools.

After installation, the online registration wizard is automatically launched (see *Online registration*, page 7). The registration is necessary to benefit from the guarantee, the technical assistance, and free upgrades.

Depending on the operating system, when the installation process is completed, the installation wizard asks you to restart your computer so that all system changes take effect.

The mobile PhoneTools program group is then accessible from the **Start** menu (from the task bar) and the following icon is automatically added to your desktop :

mobilePhoneTools

Mobile Device installation and configuration

Important!

Please do not connect your mobile or your mobile device to your PC until instructed to do so by the MPT software installation wizard.

1. Normally your software has be setup to work automatically with your mobile phone or device, so this step is automatic. However if we do not detect the connection type we will display the device configuration wizard screen:

2. Select how you will be connecting your phone to your PC.

3. Click on Next. The following screen appears :

4. Connect your phone to your PC, your phone will be detected and setup automatically.

The application will be launched at the end of the installation process.

Online registration

To benefit from the guarantee, the BVRP Software technical assistance, and free upgrades, register online with our services. The online registration wizard is automatically launched at the end of the installation process. Simply follow the instructions displayed on the screens.

Check that your Internet access is available and properly set up to ensure an automatic Internet connection.

If online registration could not be completed during installation, you can also register at any other time using the online help (F1 keyboard button or the main window ? button).

Uninstalling mobile PhoneTools

1. In the Windows task bar, click the **Start** menu and select the **Settings> Control Panel**. The Control Panel window opens.
2. In the list, double-click the **Add/Remove program** option.
3. Highlight the mobile PhoneTools program group and click the **Modify/Delete** button.

The uninstallation process starts.

mobile PhoneTools main window

With mobile PhoneTools you can share the information contained on your PC with your mobile phone. Once your mobile phone is connected to your computer, the following operations can be easily accessed: place and receive calls; send and receive faxes, e-mails and SMS; synchronize your phonebooks; launch an Internet session...

Double-click here in the tray bar of your desktop to have the mobile PhoneTools window displayed.

Battery indicator. When black, battery is full.

When blinking, the envelope indicates you have messages or faxes.

Click here to obtain online help.

To place a phone call, use the dialer as you would with a normal phone and click the handset **YES** button. To hang up, click the handset **NO** button.

Click here to select a correspondent and place a call.

Click here to close mobile PhoneTools.

Click here to minimize mobile PhoneTools and have its icon placed in the tray bar of your desktop.

This indicates the strength of the network signal.

A simple click here opens the functions panel in a new window (you can also click **Menu>Display> Functions Panel** to open it). Click again to close the panel. See page 9.

When connected, your operator network name appears here.

A click here enables you to access all the functionalities and setup options of mobile PhoneTools.
