Schedule Mode

Set schedules based on your preferences and daily needs. Choose individual actions for each Flood Light, set the same schedule for more than one day, and create a schedule for a group of Down Lights. Schedules are a great way to have your lights work around your life.

Circadian Rhythm

1. Change the color temperature of the lights adjusts naturally to keep your body in its natural rhythm.
2. Light has a big effect on our circadian rhythm and our regular lighting interferes with your circadian rhythm causing health problems.
3. Our Smart Down Light can be programmed to give you the correct amount of light at the correct color temperature to work in harmony with our circadian rhythm instead of against it.

Group Control

If you got two or more light, please tap "⌵" at the upper right corner of the control panel and create group. The smart lamp group will realize synchronous switch, color changes, the scene mode selection, timer, etc.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
