Introduction

TDS-801 looks like a round and smooth superposition of 2 pieces dishes. It can clip to any edge of clothes with its "mouth" in a way a sea mussel does. It is more convenient and comfortable to use as the buzzer does not contact any place of users' body. The multifunctional panel in the central of the buzzer makes TDS-801 much easy to operate. Multifunctional controller and speakers are designed on the earphone line. It facilitates users to switch to music and an in-coming calling freely during music-playing. TDS-801 is powered by in-built rechargeable high-energy lithium battery. Charging terminals are standard USB adaptors. It has features of fast-Pairing, long standby time and unique HIFI effect etc

How to use

Call-MFB
(Answer/End/Reject/Setup a handsfree connection)
Microphone

Power Key	Press it, turn on/ off bluetoothearphones.
Volume Key "+"\"-"	Press it to adjust volume of the earphones.
Previous">\" Next"<"	Press it to choose music during music-playing.
Music-MFB	Power On/Power Off/Play/Pause/Setup an AVconnection
Microphone	Press it to search voice signal during speaking.
USB Adapter	It is used forcharging via coupling witha computer or with bolt which is inbuilt a USB adapter.

❶ Searching:

Press on POWER button for 3 seconds, turn on bluetooth earphones, it start searching at once. Meanwhile, the indicator flashes in blue with a crisp whisper sound.

❷ Pairing:

Press on both Power and Volume buttons for 2-3 seconds, the indicator flashes alternately in red and blue with a crisp whisper sound. Now the bluetooth earphones get into pairing situation.

❸ Pairing via Bluetooth Media Player or mobile phone.

- Turn on bluetooth on a mobile phone.
 - Find "search Bluetooth Equipment" feature.
 - When searching is completed, choose bluetooth earphone on the searched list and press it.
 - Input Pairing PIN code "0000", Pairing is completed.
- (Generally, Mobile phone connects with bluetooth earphone automatically after Pairing. In the case that your mobile phone does not connect with the bluetooth earphone automatically, please choose TDS-801 among the bluetooth equipment list on your mobile phone.)

④ Use:

Once the bluetooth earphone connects with your mobile phone or Media player successfully, you can hearing a calling or enjoying music via the bluetooth earphone.

Caution:

While connecting with a computer, the computer must be inbuilt bluetooth USB adapter. When connect with a Media player, the player must be of audio bluetooth dongle. While connecting with an Audio bluetooth adapter, PIN code is not needed.

Making A Calling / Hearing A Calling

Dialing

- ① Make sure that the bluetooth earphone pairs well with your mobile phone, otherwise, please refer to **PAIRING**.
- ② When make a call on your mobile phone, voice signal transfers to the bluetooth earphone automatically.
- ③ While a call gets though, the volume in earphone can be adjusted via the Volume button of the mobile phone or of the bluetooth earphone
- ④ Press the multifunctional button to end a calling.

Hearing A Calling

- ➊ When the buzzer alarms, talk directly after pressing down the multifunctional button. Volume can be adjusted via the volume button either of the mobile phone or the bluetooth earphone.
- ➋ To get a good sound effect, please keep a proper distance between the microphone and the mouth during speaking.
- ➌ Press down the multifunctional button to end a calling.

Declining A Calling

While the buzzer alarms, press down the multifunctional button of the bluetooth for 2-3 minutes, the calling will be turned off.

- 1** Make sure the MediaPlayer pairs with the bluetooth earphone. If not, please find the TDS-801 among the bluetooth equipment list on the mobile phone and press it. Then, remote control function of the bluetooth earphone is activated automatically.
- 2** Playing a video or an audio file in the Media Player, audio frequency signal transmits to the bluetooth earphone automatically. The volume can be adjusted by pressing volume button "+", "-". Pressing Previous button ">" and Next button "<" to select the music to be played.
- 3** During playing, shallow press the multifunctional button, the music will be paused. Press the button again for 2-3 seconds, the music will continue.

 **Caution:**

During playing, media player will pause automatically when a calling comes in. It will continue automatically when the calling ends.

Charging

There are two ways to charge the bluetooth earphone, one is via a USB cable charged on a computer. While another is via common socket. Charging period is 2 hours. But the first charging should be 8 hours.

Caution:

- 1、 When voltage of the battery is too low, it is a normal case that the indicator on a charger does not work within half hour after it is charged.
- 2、 During charging, the indicator is red. When charging is completed, the indicator gets into blue.

LED & Functional Alarm

Power On	The indicator flashes in blue fastly for 3 times, and the buzzer buzzes.
Power Off	The indicator flashes in red for once, then flashes fastly for 2 times, buzzes for 2 times.
Pairing Mode	It flashes in blue and red alternately, no buzzing.
Charging	It works in red.
Charging Completed.	It works in blue.
Calling In	It flashes in blue, it buzzes till the calling button is pressed.
Standby Mode	The indicator flashes once in 3 seconds in blue.

Quick Tips

1. The indicator does not work during charging. This is caused by low voltage of the battery. In the first half hour of charging, it charges in tiny current mode. During this time, it is a normal case when the indicator does not work.
2. When the sound of earphone is too blurry. please adjust the distance between the microphone and mouth. Sometimes, this is caused by poor signal of communication channel, in this case, you should turn off the call and redial it.
3. In the case that the bluetooth earphone cannot be paired. please disconnect it from the current bluetooth equipment. If it still does not do, please power off the bluetooth ear phone, then restart it.
4. In the case that it cannot be solved through all the above methods, please charge both the mobile phone and the bluetooth earphone and retry.
