Subject: FCC ID: BV8MBS700A100
Original submission

M/A-COM seeks Equipment Authorization Grant for SkyMASTR 700 MHz base station LMR radio equipment.

Exhibits include photographs, schematics, parts list, block diagram, tune up procedure, FCC Part 90 and 15 compliance verification reports, and measurement data. There is no Operator nor Installation manual with this base station as it is factory configured per customer order, installed by M/A-COM field service personnel (or M/A-COM trained customer technicians) and no user available controls or adjustments are available. Special software tools are required to make setting adjustments. It is merely connected to tower mounted site antenna, control interface cabling, powered up, and it is fully operational.

Confidentiality letter and Rhein Tech Laboratories, Inc. agent authorization letter to act on M/A-COM's behalf for this original submission, have been provided as exhibits as well.

Thank you for your kind consideration and timely review for this new product entry to the M/A-COM trunked LMR product family.

Sincerely,

A handwritten signature in black ink that reads "Daryl G. Popowitch". The signature is written in a cursive style with a large, stylized initial 'D'.

Daryl Popowitch
Regulatory Manager,
Engineering Project Manager
