INSTALLATION NOTE: Double-door models are available with four different center-to-center dimensions between latchbolt keepers. Keepers are wide enough to compensate for vertical-rod exit bolts which may be as much as 3/8" (10 mm) off center-to-center dimension, either way.

- 1. The bottom rod of the exit device be removed or made inoperative.
- 2. The latchbolt of the exit device be the "Pullman" or beveled type,
- 3. The latchbolt be free-latching and remain projected while the door is open. Mechanisms that hold the latchbolt retracted while the door is open, and automatically release it when the door is closed, must be removed or made inoperative.

INSTALLATION NOTE: Double-door models are available with four different center-to-center dimensions between latchbolt keepers. Keepers are wide enough to compensate for vertical-rod exit bolts which may be as much as 3/8" (10 mm) off center-to-center dimension, either way.

- 1. The bottom rod of the exit device be removed or made inoperative.
- $2. \quad The \ latchbolt\ of\ the\ exit\ device\ be\ the\ "Pullman"\ or\ beveled\ type,$
- 3. The latchbolt be free-latching and remain projected while the door is open. Mechanisms that hold the latchbolt retracted while the door is open, and automatically release it when the door is closed, must be removed or made inoperative.
