

1.6 User Manual

BluTracker Manual

- Download the latest version of the BluTracker App from the App Store.
- Open the App and go to Settings -> Pair New BluTracker

After your BluTracker is paired...

- Name the BluTracker inside the BluTracker App and confirm it is working properly.
- Ensure the Blutracker is fully charged.

Operating BluTracker:

Before BluTracker can display it's position, it needs to localize it self using GPS.

Make sure it has a clear view of the sky. It might take up to 2 minutes for BluTracker to lock in to its position.

Open the BluTracker app, and select the map tap.

If BluTracker is within Bluetooth range, it will appear on the map, with a dot. The dot represents the position BluTracker is.

If BluTracker has no GPS signal, the position showed on the map, will be the last known position.

Virtual Fence:

You can draw a Virtual Fence around the BluTracker position on the map.

If BluTracker goes outside this fence, your phone will alert you.

Remember: your phone must be within range to BluTracker.

If you loose connection to BluTracker, your phone will alert you.

FAQ:

How many BluTrackers can 1 Smartphone find?

- We recommend using no more than 20 BluTrackers at the same time.

Can multiple phones connect to a BluTracker?

- You can pair a BluTracker to many phones, and even see all the BluTrackers in range on the Radar screen from many phones at the same time, but only one phone can make connect to a BluTracker. (make it Buzz, or create the Virtual Leash at a time)

Is the signal with coordinates being transmitted from the BluTracker encrypted?

- BluTracker encrypts the signal, and only a phone that was paired with BluTracker will be able to decode the signal.

What to do if my pet is lost, and I can't locate BluTracker on my phone?

- Start walking or driving in any direction. The BluTracker app will keep searching for the BluTracker. You only need to pick up the BluTracker signal very briefly to know its exact last known GPS coordinates. Once that signal is received, it will pinpoint the location on the BluTracker Map view app. With the US Version we have picked up weak signals as far as 1 mile with direct line of sight.

How easy is to pair a BluTracker to your smartphone?

- You only need to pair the BluTracker once with your phone and after that it is automatic. To pair the first time launch the BluTracker app, select to add a new device, then the app will prompt you to scan a barcode or enter the Private key belonging to the BluTracker. You are done.

What Smartphones does the BluTracker work with?:

- BluTracker works iPhone 4s, iPhone 5, New Ipad, iPad mini, New iPod touch. It also works on Android devices supporting Bluetooth Low Energy, running Android 4.0 and newer. We have tested it on the Samsung Galaxy S3, and Note 2, and it works great!

Do I need a separate adapter or special case for my phone?

- Nothing special is required. BluTracker will communicate directly with your Smartphone via Bluetooth Low Energy.

What is the Line of sight range of BluTracker?

- US Version is Approximate 2500 feet or 0.5 miles.

What is the range of BluTracker when there are buildings or trees between the Smartphone and BluTracker?

- US Version is approximate 250-1000 feet.

How long will the battery last and is it rechargeable?

- The included battery inside is rechargeable and lasts about 2 months with continuous use. It charges in about one hour and is ready to use again.

What kind of battery does the BluTracker use?

- The BluTracker uses a Li-Polymer rechargeable battery.

Will the BluTracker radar app, show me the indoor direction to my lost object?

- Because we don't really know direction, the radar Screen can only be used to approximate the distance of the BluTracker to your phone, but not direction. So once item you are looking for is on your Radar Screen you start walking in a specific direction, and see if it gets closer or farther.

How do you attach a BluTracker to your dog?

- BluTracker comes with a rubber-mounting holder, which will attach it to any Pet's collar. You can also thread in the collar if you prefer not using the rubber holder.

How do you attach a BluTracker to a backpack ?

- BluTracker comes key ring, that easily enables it to be connected to any zipper, or fabric loop.

Is the BluTracker water resistant?

- Yes, the design of BluTracker is water resistant. This doesn't mean that you can go diving with it. BluTracker will not work underwater.

What type of charger comes with the BluTracker?

- BluTracker comes with a USB type cable charger. You can plug it to any computer USB port or USB charger.
