#### Product instruction

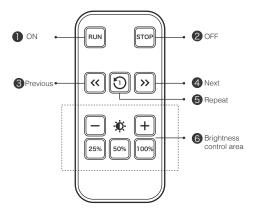

The Holo-65 or Holo-26 is one of Hologruf displays empowered by a fully-patented Persistence of Vision (POV) technology that rotates images or videos through one belt of ultra-high-density LED lights and presents in 3D hologram visual effects. This device comes with the characters of ultra-thin exterior design, ultra-low power consumption, ultra-high attractiveness, and design for portable.

#### Description of back interfaces

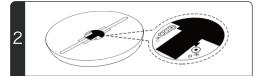

- Indicator light: Indicates the power, ON/OFF, Mode-switching and so on.
- 2 Setting button: Switching Mode, Pairing remote control .
- 3 Slave interface: Used in slave mode (See "Slave mode")
- 4 Power interface: Plug in the power adapter.

- ON: Turn on the device, switch stand-by status to operating status
- 2 OFF: Turn off the device, switch operating status to stand-by status
- 3 Previous: Play the previous content from the list
- 4 Next: Play the next content from the list
- 5 Repeat: Repeat to play the current content
- 6 Brightness control: This feature might not be availabl

#### Connect power:

After plugging in the power adapter to the device, you will see the LED lights lit up, also the indicator light on the back panel will be on in red.

#### **Remote Pairing:**

When the display is in the standby mode, press the "Setting" button on the backplane. The indicator light will change in color from red to blue. Then, point the remote control to the display, then press and hold the "100%" button till the blue light flashes and turns into red. Now the pairing process is completed.

#### ON/OFF:

3

To turn on the display: Point the remote control to the display, and press "Run".

To turn off the display: Point the remote control to the display, and press "Stop".

#### Play contents

To play a different content:

Point the remote control to the display, and press ">>" to play the next content from the playlist.

Point the remote control to the display, and press "<<" to play the previous content from the playlist.

#### Host vs. Slave mode

The display can be set to Host mode or Slave mode. By default, the host mode displays the content as a single device. While in the slave mode, the display needs to be connected with another display that is in the host mode. In such 'networking' setup, all displays interconnected can be used to present a bigger display area. The display can not be used alone, nor be controlled by a remote control if this display is in the slave mode.

#### 1. Change the mode

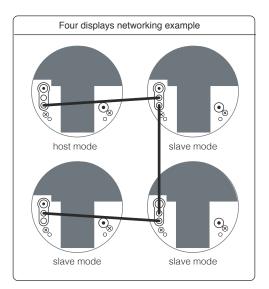

When the display is standby, press and hold the "setting" button on the backplane. When the indicator light is on in red, the display is in the host mode. When the indicator light is on in blue, the display is in the slave mode.

#### 2. Networking

5

To set up a 'networking' using multiple Hologruf displays, connect these displays as follows:

Slave socket 2 of display #1 (in host mode) is connected to slave socket 1 of display #2 (in slave mode). Slave socket 2 of display #2 is connected to slave socket 1 of display #3 (in slave mode), and so on. Once this 'networking' setup is completed, only the display #1 in the host mode can be controlled.

#### Hologruf Mobile App

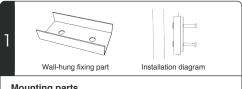

6

The "Hologruf' mobile app (iPhone and Android apps) is dedicated for controlling (turn on/off) the Hologruf displays and managing content playing (content uploading, deletion, playlist, and etc.).

#### Installation instruction

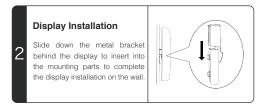

Holo-26 and Holo-65 displays can be installed on wall.

#### Mounting parts

You need expansion screws or common screws to install the mounting parts on the wall first prior to mounting the display to the wall. You need three gaskets between the wall and mounting parts to minimize any potential movement of the mounting part after the installation of the display.

# PC Applicaiton for device conrol & content management

#### Operation

1	Download software Download the PC software from http://www.hologruf.com					
	HOLOGRUF					
		The device is not connected, please check the network				
	off on The device is not connected SD card remaining capacity: 46	Model: Select the model

# **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

## FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled enviroment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
