Connecting a Bluetooth device

Bluetooth is a short-range wireless networking technology. The Bluetooth communication function allows you to exchange data by connecting a Bluetooth device to another neighboring Bluetooth device without a cable connection. With this function, you can use different types of devices more efficiently.

To make a phone call or play audio from a Bluetooth device, check the following first:

- For a device that is not registered to the system, ► see “Registering a device.”
- A registered device will automatically connect to the system when you bring it near the system. If it does not automatically connect, ► see “Connecting a registered device”, “Disconnecting a registered device.”

Warning

- Driving while distracted can result in a loss of vehicle control that may lead to an accident, severe bodily injury, or death. The driver's primary responsibility is the safe and legal operation of the vehicle, and the use of any vehicle systems, including the touch screen and steering wheel controls, which take the driver's eyes, attention, and focus away from the safe operation of the vehicle, or which are not permissible by law, should never be used during the operation of the vehicle.
- Pull over the vehicle at a safe place before connecting a Bluetooth device to the system. When a traffic accident occurs while attempting connection, it may cause severe or fatal injury.
- ✍ The Bluetooth connection function supports only the hands-free and audio related functions. Connect your mobile phone, MP3 player, or device that supports the hands-free or audio function.
- ✍ For more information on Bluetooth-enabled devices and their functional compatibility, visit the KIA Motors America website (<https://www.kia.com>).

Registering a device

To connect a Bluetooth device to the system, first add the device to the list of Bluetooth devices on the system.

- 1 On the All Menu screen, touch **Setup ▶ Device Connections ▶ Bluetooth ▶ Bluetooth Connections ▶ Add New.**

 To register a device for the first time, press the [🔄] button on the steering wheel or by touching **Phone** on the All Menu screen.

- 2 Select the function to connect.

- 3 Turn on Bluetooth on the Bluetooth device to connect and select the vehicle system on the list of searched devices.

 The system's Bluetooth name can be seen on the Add New window.

- 4 Check that the authentication code on the Bluetooth device screen matches the one on the system screen and approve the connection on the device.

- 5 When your Bluetooth device is a mobile phone, to download the contacts and messages from the phone, you must allow the access request on the mobile phone.

 Access is only required to use Bluetooth calling. There will be no access request when you connect an audio device.
