**Charge the Battery of the Keyboard or the Mouse**

Turn on the Wireless keyboard and the Mouse. The keyboard power indicator light (green) will illuminate for 4 seconds and then turn off to save power. Your keyboard is still on. If the keyboard power indicator light keep blinking, it means the battery is low, you need to charge the keyboard. If the mouse indicator keep blinking or the mouse is not working, it means the mouse is out of power, you need to charge the mouse.

- Plug the Micro USB charging cable into the keyboard at the side or the mouse at the top.
- Plug the USB plug on a computer or any cellphone USB power adaptor.
- Charge for 2-4 hours, or until the indicator of the keyboard change to be steady green or the indicator of the mouse is off.

**Caution:**

- When not in use for a prolonged period, it is recommended that you turn off the keyboard and the mouse to lengthen battery life.
- When the power status light flash, it is recommended that charging the keyboard or the mouse in less than 2 hours.

**Energy-saving Sleep Mode**

Keyboard's long life battery lasts for several months of normal use. The keyboard will go into sleep mode if left on and not being used; press any key and wait a second or two to bring it out of sleep mode. The mouse won't be able to move the cursor while in sleep mode, you need to press the button on the mouse to wake it up then it will be able to move.

**Safety Caution**

- Keep the item away from sharp objects.
- Do not place heavy object on the keyboard.
- Away from microwave items.
- Do not force or distorted the keyboard.
- Keep away from oil, chemical or other organic liquid.

**Cleaning**

Clean the keyboard with water, alcohol or alcohol based disinfectant.

**Troubleshooting**

- Make sure the keyboard and the mouse is on (slide switch in "ON" position).
- Make sure the keyboard and the mouse is in operating distance (within 10 meters).
- Ensure the battery storage has power.
- Make sure the Bluetooth in tablet / PC / smartphone is on.
- Ensure bluetooth keyboard or the mouse have already matched with your device.
- If you are not able to move the cursor, please press the button to wake up the mouse.

**Disposal of Waste Batteries**

Insert screwdriver between plastic top and metal case at keyboard top or bottom and Pry up plastic top and remove it completely. This action destroys keyboard separate battery from circuit board, it is your responsible to hand this over to an applicable collection and recycling will help to conserve natural resources and prevent potential negative consequences for human health and the environment due to the possible presence of hazardous in batteries and electrical and electronic equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
