Set up router

This device only supports 2.4GHz frequency band router, does not support 5GHz frequency band router, please set the relevant parameters of the router before WiFi configuration, WiFi passwords do not include special characters such as ~!@#$%^&*(). When the device is configured in WiFi, the mobile phone and device are as close as to the router, which can speed up the configuration of the device.

Please keep network available

Step 1   Open the Smart Life App, click "Register", read the "Privacy Policy" and click "Agree" .

Update date： 2018.4
Come into force date： 2018.5

So you have purchased our Smart LifeSmart device hardware and are starting to use the Smart LifeSmart device software and all its functionalities! Any information you share with us (e.g. for creating a Smart Life Account) will help us to provide you with services related to Smart LifeSmart device and to improve them to make them even better. We explain here our ways of collecting and using information, and how we protect your privacy. In this privacy policy, "personal data" means information that can be used to identify an individual, either from that information alone, or from that information and other information we have access to about that individual. We collect both personal and non-personal data to enable and facilitate the best user experience possible

What information is collected and how do we use it?

WI-FI : PDCN   Change Network

Confirm

This app is supported only on 2.4GHz Wi-Fi channels
About 20cm
—————

Step 4   Click "I heard the beep" when the device comes out "dong dong dong". And you can complete the configuration about 30s.

Step 5   The device is added, and the device nickname can also be changed in this interface.

Q: The device cannot be previewed properly?

A: Check whether the network is normal, you can place the camera close to the router, and if not, it is recommended to reset the device and add it again.

Q: Why is it still in the list of devices after reseting?

A: The reset device only resets the network configuration of the camera, but cannot change the configuration on the App, remove the camera, and must be deleted by the App.

Q: How to cut the camera network to another router?

A: First remove and reset the device on the App and then configure the device again by the App.

Q: Why doesn't the device identify the SD card?

A: It is recommended to plug in SD card after power cut. Confirm whether the SD card is normally available and the format is FAT32. And the TF card can't be identified when the internet environment is not good.

Q: Why I can't get the notifications with my cell phone App?

A: Please confirm that the App has been running on the phone, and the relevant reminder function has been opened;Message notification and authority confirmation in the mobile phone system have been opened.

Functions

FCC Statement：

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference,and
(2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment .This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However,there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.
