Labels

Specifications

Laser Dot Accuracy	Up to 98 Feet
Laser Line Accuracy	Up to 33 Feet
Vial Accuracy	+/- .3 Degrees
Power Source	"AAA" Batteries (Qty. 2), 9V Battery (Qty. 1)

Save This Manual

You will need the manual for the safety warnings and precautions, assembly instructions, operating and maintenance procedures, parts list and diagram. Keep your invoice with this manual. Write the invoice number on the inside of the front cover. Keep the manual and invoice in a safe and dry place for future reference.

SAFETY WARNINGS AND PRECAUTIONS

WARNING: When using tool, basic safety precautions should always be followed to reduce the risk of personal injury and damage to equipment.

Read all instructions before using this tool!

1. **Keep work area clean.** Cluttered areas invite injuries.
2. **Observe work area conditions.** Don't expose to rain. Keep work area well lit.
3. **Keep children away.** Children must never be allowed in the work area. Do not let them handle the Laser Level.
4. **Store idle equipment.** When not in use, tools must be stored in a dry location to inhibit rust. Always lock up tools and keep out of reach of children.
5. **Use the right tool for the job.** There are certain applications for which this tool was designed. Do not modify and do not use this tool for a purpose for which it was not intended.
6. **Never direct the laser beam into the eyes of any person or animal. THIS MAY CAUSE SEVERE INJURY TO THE EYE.** Do not look into the beam during operation. Make certain to switch the Laser Level to "OFF" when making adjustments or changing the batteries. Laser light, when reflected off a mirror like surface can cause serious eye damage.
7. **Only use the type of battery recommended in this manual. Use only "AAA" batteries for the Laser, and a 9V battery for the digital display.** Do not mix old and new batteries.
8. **Maintain tools with care.** Keep tools clean for better and safer performance.

9. **Stay alert.** Watch what you are doing, use common sense. Do not operate any tool when you are tired.
10. **Check for damaged parts.** Before using any tool, any part that appears damaged should be carefully checked to determine that it will operate properly and perform its intended function. Any part that is damaged should be properly repaired or replaced by a qualified technician. Do not use the tool if any switch does not turn On and Off properly.
11. **Replacement parts and accessories.** When servicing, use only identical replacement parts. Use of any other parts will void the warranty.
12. **Do not operate tool if under the influence of alcohol or drugs.** Read warning labels if taking prescription medicine to determine if your judgment or reflexes are impaired while taking drugs. If there is any doubt, do not operate the tool.
13. **Maintenance.** For your safety, service and maintenance should be performed regularly by a qualified technician.
14. Use fresh batteries. Weak batteries could affect the visibility of this tool.

Warning: The warnings, cautions, and instructions discussed in this instruction manual cannot cover all possible conditions and situations that may occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product, but must be supplied by the operator.

UNPACKING

When unpacking, check to make sure that the product is intact and undamaged. If any parts are missing or broken, please call Harbor Freight Tools at the number on the cover of this manual as soon as possible.

OPERATION

Refer to the Assembly Drawing on Page 6.

LCD Display Controls

1. On/Off: Holding this button down for several seconds turns the LCD display on or off. The display will automatically shut off after a period to conserve battery power.
2. Hold: This button keeps the same reading on the display, even if the level's angle changes. Everything on the display will flash except the number while the reading is being held. Press the button again to stop holding the reading.
3. 0% (percent): This button switches the LCD display between displaying the angle in degrees and displaying the angle as a percent difference from 0° or 90°.
4. Calibrate (Zero Setting): This button toggles between reading 0 at the current angle and reading the actual angle. Press the "Calibrate" button once to change the current reading to 0° or 0%. Press the "Calibrate" button again and hold it to restore the level to reading the actual angle. The level will reset to reading the actual angle if it is switched off.
Note: Actual calibration of the level (changing the actual angle setting) is not done by this button and needs to be performed by a qualified technician.
5.  Sound: This button toggles the sound. When the sound is on, the level will beep once when it measures any 10° increment and more than once when it reads 0° or 90°. A symbol –  – will appear above the decimal point on the display and the unit will beep to indicate that the sound is on.

Horizontal and Vertical Vial Use

The Vials (9, 10) on the level can be read by observing the bubble within. If the bubble is centered in between the lines, then the Vial is level.

Laser Controls

1. **Vertical Laser Button (12)** - This button turns on the vertical laser line if the Slide Switch (18) is in the upper position. The vertical laser is blocked while the Slide Switch (18) is in the lower position.
2. **Horizontal/Dot Laser Button (12)** - This button turns on the horizontal laser line if the Slide Switch (18) is in the upper position. It can be used along with the vertical laser line to make a cross. When the Slide Switch (18) is in the lower position, the laser is a dot instead.
3. **Slide Switch (18)** - The Slide Switch (18) determines laser operation.
WARNING! Point the end of the level away from people's eyes when adjusting the Slide Switch (18). If the Slide Switch is in the lower position, it can conceal an illuminated laser beam.
If the Slide Switch (18) is in the upper position, the Vertical Laser Button will project a vertical line and the Horizontal/Dot Laser Button will project a horizontal line. When the Slide Switch (18) is in the lower position, the Vertical Laser Button will be covered and the Horizontal/Dot Laser Button will project a simple dot beam.
WARNING! To conserve battery power and prevent accidents, move the Slide Switch (18) to the upper position and verify that both lasers are off after use.

MAINTENANCE

1. Wipe the Level clean with a lint free cloth when needed.
2. Store the Level in a dry location where it will not freeze or overheat.
3. Before each use, inspect the Level to make sure nothing is cracked or broken. Do not use the Level if anything is cracked or broken. Have it repaired by a qualified service technician.

Changing or Installing Batteries

FIGURE 2

1. To change the “AAA” batteries that power the Laser, remove the End Cap (14) and set it aside. See **FIGURE 2**, above.
2. Remove the old batteries and replace them with two fresh batteries. Make sure that you match up the positive (+) and negative (-) ends to the diagram on the side of the level. See **FIGURE 2**, above. Replace the End Cap (14).

FIGURE 3

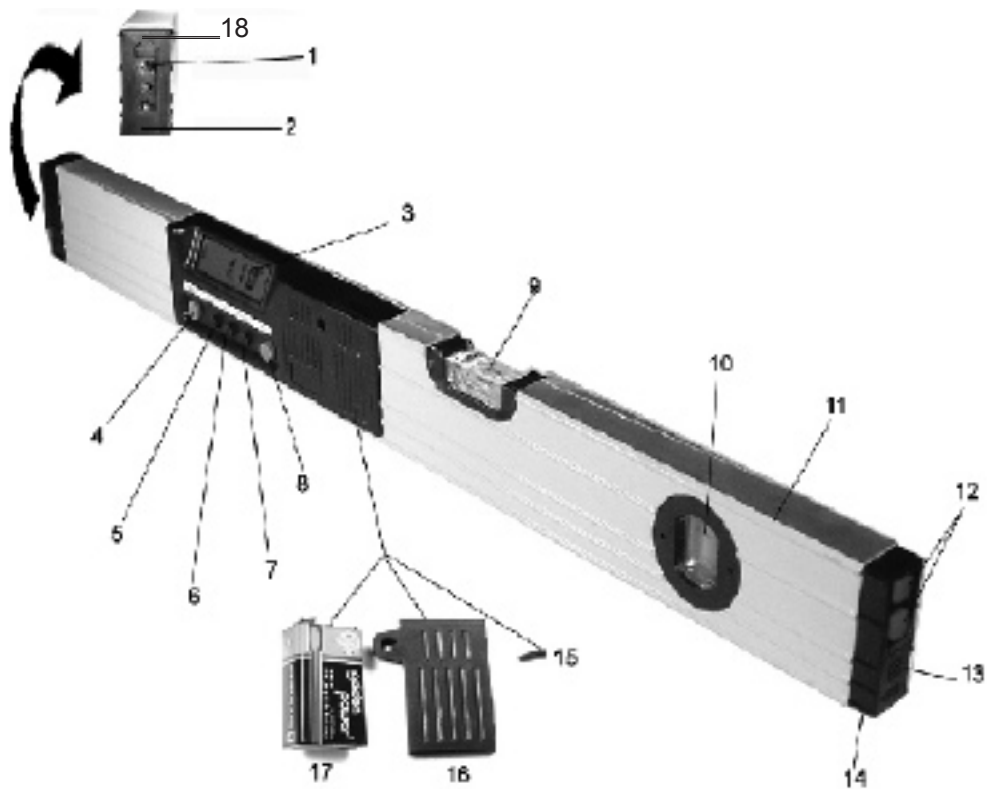

3. To change the 9 Volt battery that powers the LCD (3), remove the Battery Cover (16) by first removing the Screw (15).
4. Install a fresh battery making sure you match up the positive (+) and negative (-) terminals as shown inside the battery compartment. Replace the Battery Cover (16) and the Screw (15). See **FIGURE 3**, above.

PARTS LIST

Part	Description	Part	Description	Part	Description
1	Laser Diode	7	Calibrate Button	13	"AAA" Battery (Qty. 2)
2	End Cap 1	8	Sound Button	14	End Cap 2
3	LCD	9	Horizontal Dial	15	Screw
4	On/Off Button	10	Vertical Vial	16	Battery Cover
5	Hold Button	11	Body	17	9 Volt Battery
6	0% (Percent) Button	12	Laser On/Off Buttons	18	Slide Switch
