

# Bluetooth stereo headset user guide

## Bluetooth Introduction

The Bluetooth headset is a portable headset solution based on Bluetooth wireless technology. Bluetooth wireless technology is a short-range radio communication technology intended to replace the cables connecting electronic devices. The technology uses a globally available frequency range intended to ensure communication compatibility worldwide.

You can connect your headset to your mobile phone or any device with Bluetooth wireless technology that supports the Headset profile or the Handsfree profile. When the headset is connected to your mobile phone, you can handle incoming and outgoing calls, listen to music, and adjust the volume, using the buttons on the headset.

The inbuilt Bluetooth Headset in motorcycle helmet contain Bluetooth Cell Discreteness, Control Buttons and Earphone. The Bluetooth Cell Discreteness contain Inserted Bluetooth, Battery and Shell.

## FCC NOTICE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

### CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

## RF exposure warning:

The equipment complies with FCC RF exposure limits set forth for an uncontrolled environment.

The equipment must not be co-located or operating in conjunction with any other antenna or transmitter.

## To use your headset, your phone or music device should

### support the following Bluetooth profiles:

| Profile                | Description  |
|------------------------|--|
| HFP (HandsfreeProfile) | <b>Providing a wireless means for both remote control of the Mobile Phone by the Hands-Free device and voice connections between the Mobile Phone and the Hands-Free device.</b> |

|   |                               |
|---|-------------------------------|
| <b>A2DP (Advanced Audio Distribution Profile)</b> | <b>Stereo music streaming</b> |
|---|-------------------------------|

## Bluetooth Interference Issues

The quality of Bluetooth transmission may also be affected by the position of your music device. Should you experience choppy or distorted audio, move the position of your music device or phone to a different location until the signal improves.

## Getting started

Before you can use your headset, you should first:

Charge the headset battery.

Pair the headset with a device, for example, a mobile phone.

## Charging

The headset comes with a built-in rechargeable battery. We recommend that you charge the battery before using the headset for the first time.

Connect the charger to the headset and to the mains.

The charging time is about 4 hours. During charging, the indicator shows a steady red light. When the battery is fully charged, the indicator red light will switch off. When you use the headset, if you hear a cadent tone, and the indicator red light flashes rhythmically, battery needs recharging.

To charge, please use the handle on Charging Port Rubber Cover gently pull out the Cover, and circumgyrate about 180 degrees. Expose the Charging Port and Plug the Charger Plug into the BlueTooth headset's Charging Port. At this time near the Control Buttons the indicator light turns red when the battery is charging. As Figure2 and Figure 3 shown.
