

The HP 527 is a Wi-Fi Alliance authorized Wi-Fi CERTIFIED 802.11a/b/g/n/ac product. The Wi-Fi CERTIFIED Logo is a certification mark of the Wi-Fi Alliance.

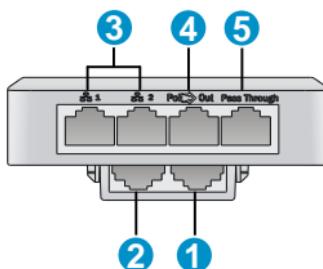

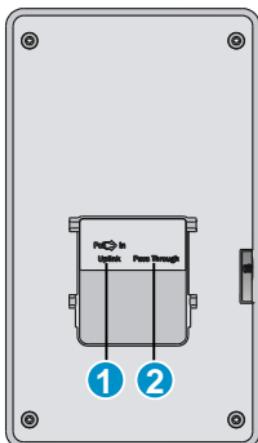

Unified Wired-WLAN Walljack (HP 527 Dual Radio 802.11ac) quick start guide

This quick start guide shows you how to install and get started using the HP 527 Dual Radio 802.11ac Unified Wired-WLAN Walljack (RMN BJNGA-FB0005) JH048A (AM), JH049A (WW), JH050A (JP), JH051A(IL), JH052A (20 pack AM), JH053A (20 pack WW), hereafter referred to as the HP 527.

Package contents

The HP 527, mounting bracket, screws, MAC address label, and documentation.

Ports

- **Three Gigabit Ethernet ports:** Auto-sensing 1000Base-T Ethernet ports with RJ-45 connectors.
- **One Gigabit Ethernet uplink port:** Auto-sensing 1000Base-T Ethernet port with RJ-45 connector.
- **One pair of pass-through ports:** Work with Cat5 cabling as well as an analog telephone cable.

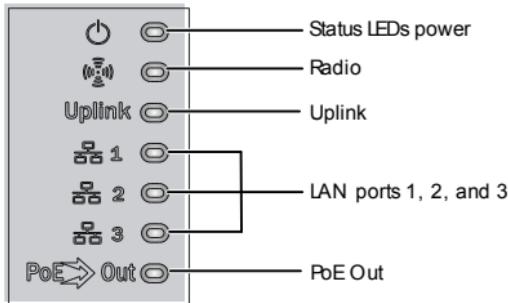

Radio and antennas

The HP 527 supports IEEE 802.11a/b/g/n/ac. It has two internal antennas supporting 2x2 MIMO with two spatial streams at a rate of up to 850 Mbps.

Reset button

The reset button is accessible through a hole on the side panel of the HP 527. To reset the HP 527, insert a paper clip into the reset button hole, and press and quickly release the button. To reset the HP 527 to factory defaults, press and hold the button more than 5 seconds until the status LEDs (Power, Radio, and Uplink) flash, then release.

Status LEDs

Power	Uplink	Radio	LAN (1 to 3)	PoE	Description
Off	Off	Off	Off	Off	The AP has no power.
Steady orange	Off	Off	Off	Off	Power applied. If the power LED remains orange after several minutes, the AP failed to load the software.
Green, flashing every 2 seconds (0.5Hz)	Off	Off	Off	Off	The AP is starting up.
Green, flashing every 2 seconds (1Hz)	Off	Off	Off	Off	The AP is looking for an IP address or building the list of VLANs on which to perform discovery.
The power, uplink, and radio LEDs are flashing green in sequence.			Off	Off	The AP has obtained an IP address and is attempting to discover a controller.
Steady green	The uplink and radio LEDs are flashing green alternately.		Off	Off	The AP has found a controller and is attempting to establish a tunnel with it.
The power and uplink LEDs are alternately flashing green (slowly).	Off	Off	Off	Off	The AP is performing Ethernet negotiation, and is waiting for the Ethernet link to come up.
Steady green	Off	Any	Any	Any	The uplink interface is not connected or there is no network activity.
Steady green	Flashing green	Any	Any	Any	The uplink interface is active on a valid 1000Mbps link.
Steady green	Flashing orange	Any	Any	Any	The uplink interface is active on a valid 100Mbps link.
Steady green	Any	Off	Any	Any	The radio interfaces are disabled or there is no network activity.
Steady green	Any	Flashing green	Any	Any	Only the 2.4GHz radio interface is transmitting or receiving data.
Steady green	Any	Flashing orange	Any	Any	Only the 5GHz radio interface is transmitting or receiving data.

Power	Uplink	Radio	LAN (1 to 3)	PoE	Description
Steady green	Any	Flashing green and orange alternately	Any	Any	Both 2.4GHz and 5GHz radio interfaces are transmitting or receiving data.
Steady green	Any	Any	Off	Any	The uplink interface is disabled or there is no network activity.
Steady green	Any	Any	Flashing green	Any	The LAN interfaces are active on a valid 1000Mbps link.
Steady green	Any	Any	Flashing orange	Any	The LAN interfaces are active on a valid 100Mbps link.
Steady green	Any	Any	Any	Off	No PoE device is connected.
Steady green	Any	Any	Any	On	A PoE device is connected.

Powering the HP 527

The HP 527 can be powered by using a local power source, an uninterruptible power supply (UPS), a user-supplied power generator, or a PoE-enabled switch that provides 10/100 Mbps or 10/100/1000 Mbps Ethernet ports.

Before you connect power to the AP, verify that the power supply is steady.

The HP 527 supports an 802.3af PoE PSE connection to one device on LAN port 3. This feature is dependent on the power source of the HP 527, as follows:

- Supports 802.3af class 1/2/3 PoE Out when the 803.3at (PoE+) power supply mode is used.
- Do not support PoE Out when the standard 803.3af power supply mode is used.

Important information to read before installing

Professional installation is required. For indoor installation only. Before installing or using the AP, consult with a professional installer trained in RF installation and knowledgeable in local regulations including building and wiring codes, safety, channel, power, and license requirements for the intended country. The end user is responsible for ensuring that installation and use comply with local safety and radio regulations.

To avoid possible bodily injury or equipment damage, read the following safety recommendations before you install an HP 527. The recommendations do not cover every possible hazardous condition.

- **Install** with six inches or more of clearance around the walljack.
- Keep the chassis clean and dust-free.
- **Make** sure the ground is dry and flat and anti-slip measures are in place.
- **Do not** place the AP in a moist area and avoid liquid surrounding the AP.
- Keep the chassis and installation tools away from walkways.

Installation

1. Place the mounting bracket, with the UP arrow pointing up, on the electrical outlet box, and then use two of the supplied mounting screws to secure the bracket to the box.

The two long mounting screws are for a US electrical box. The two short mounting screws are for an EU electrical outlet box.

Long mounting screw

Short mounting screw

Figure 1 Securing the mounting bracket to an electrical outlet box (EU)

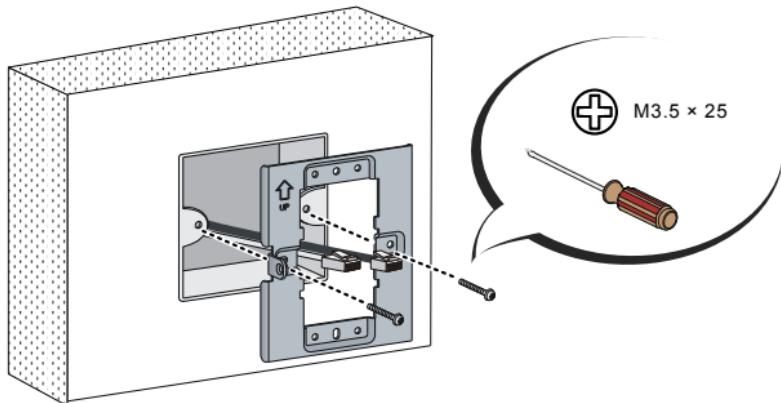

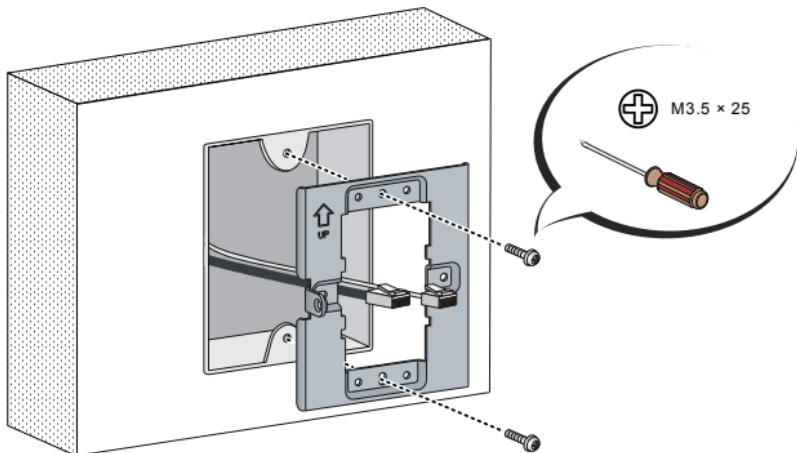

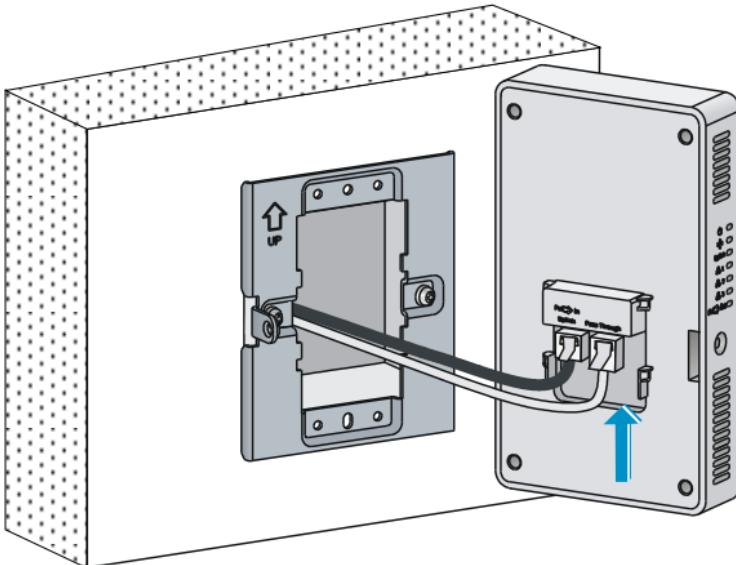

Figure 2 Securing the mounting bracket to an electrical outlet box (US)

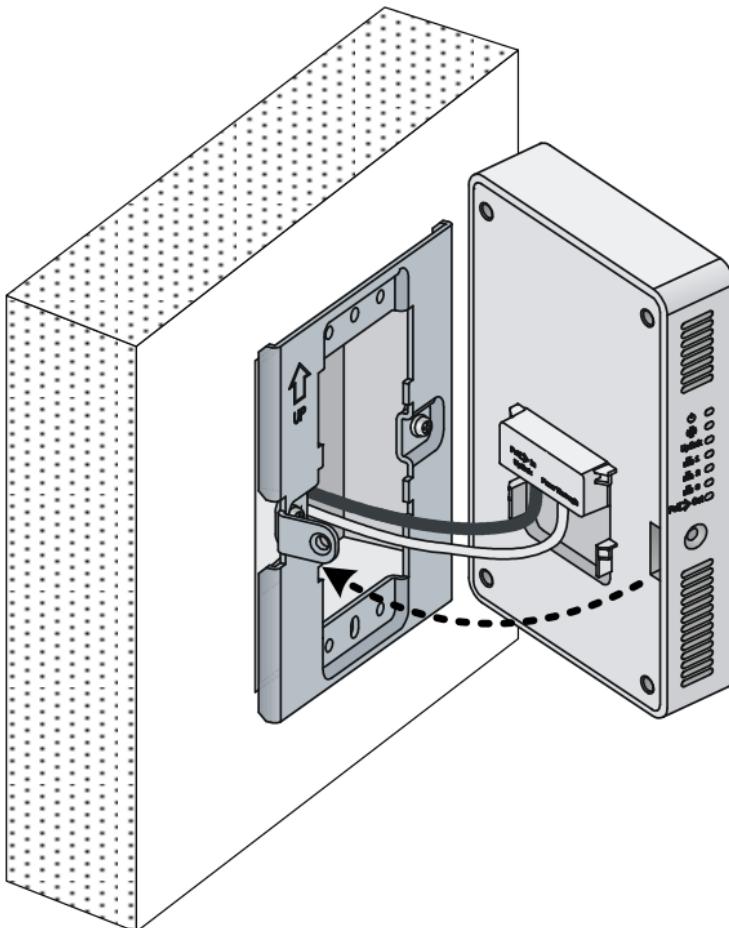

2. Connect the network cable from the box to the RJ-45 Uplink port on the back of the HP 527. If required, also connect the cable providing support for pass-through devices to the Pass Through port on the back of the HP 527.

Figure 3 Connecting the network cable

3. Align the installation hole in the rear of the AP with the standout on the mounting bracket.

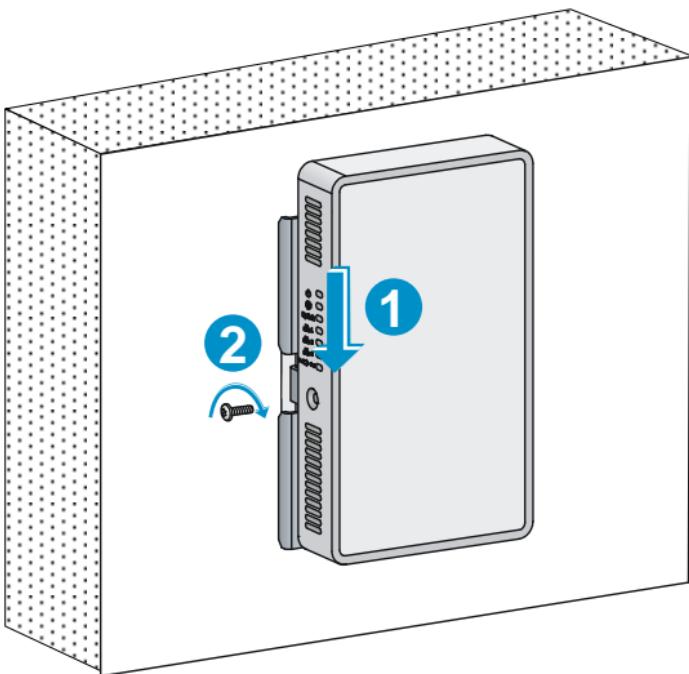

Figure 4 Aligning the installation hole

4. Push the HP 527 onto the mounting bracket, and then slide it down until it is fully engaged. Then secure the AP to the bracket by using the Phillips-head screw or the security-head security Torx-10 screw.

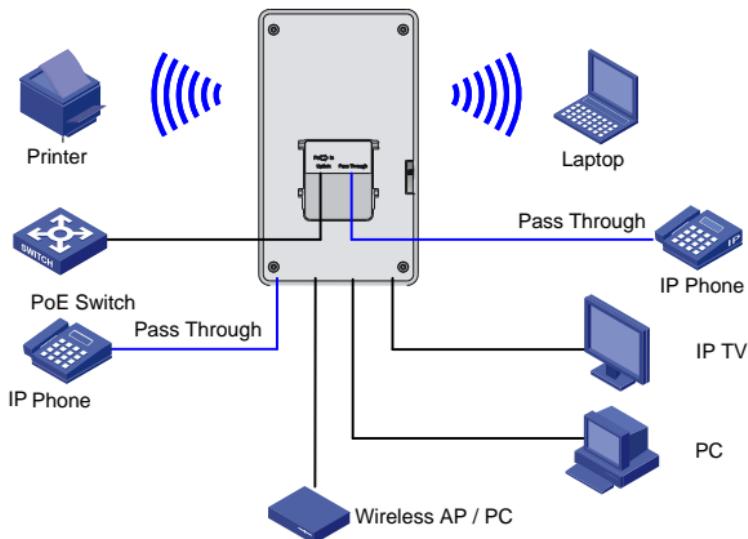

Do not let go of the HP 527 until you confirm that it is securely in place.

Figure 5 Securing the AP

Provided access services

After the installation is complete, connect equipment to the HP 527 as follows:

Technical support

For worldwide technical support information, see the HP support website at www.hp.com/networking/support.

Other regulatory information

For important safety, environmental, and regulatory information, see *Safety and Compliance Information for Server, Storage, Power, Networking, and Rack Products*, available at www.hp.com/support/Safety-Compliance-EnterpriseProducts.

Caution

This product can't use channel 12/13 for 2.4GHz band and the country code is locked that the users can't modify it.

Manufacturing date

The manufacturing date is defined by the serial number.

CCYMBBBZZZ (HP serial number format for this product)

Valid date formats include:

- Y (Y) = Year of Manufacture (Where Y indicates the year counting from within each new decade, with 2000 as the starting point. For example, 2 for 2002. The year 2010 is indicated by 0, 2011 by 1, and so forth. YY indicates the year using a base year of 2000. For example, 02 for 2002 and 12 for 2012)
- M (M) = Month of Manufacture (For M, 1-9 for January to September, 0 for October, A for November, B for December. For MM, actual calendar month 1-12)

Дата изготовления

Дата изготовления определяется по серийному номеру.

CCYMBBBZZZ (формат серийных номеров HP для данного изделия)

Действительные форматы даты:

- Y (Y) = год производства (где Y обозначает год, отсчитываемый в каждом новом десятилетии, начиная с 2000. Например, 2 для 2002. Для обозначения 2010 используется 0, для 2011 – 1 и т. д. YY обозначает год, при этом базовым годом является 2000. Например, 02 обозначает 2002, 12 обозначает 2012)
- M (M) = месяц производства (где для M цифры с 1 по 9 обозначают месяцы с января по сентябрь соответственно, 0 обозначает октябрь, А – ноябрь, В – декабрь. MM обозначает календарный месяц с 1 по 12)

Өндірілген күні

Өндірілген күні сериялық нөмір арқылы анықталады.

CCYMBBZZZ (Осы өнімге арналған НР сериялық нөмірі)

Жарамды күн пішімдері келесіні қамтиды:

- $Y (Y) =$ Жасалған жыл (мұнда Y әрпі 2000 бастапқы нүктесінен бастап әрбір жаңа декада ішінде есептелетін жылды көрсетеді. Мысалы, 2 саны 2002 жылды көрсетеді. 0 саны 2010 жылды, 1 саны 2011 жылды және т.с.с. 2000 бастапқы жыл болып, YY әрітері жылды көрсетеді. Мысалы, 02 саны – 2002 жылды және 12 саны 2012 жылды көрсетеді)
- $M (M) =$ Жасалған айы (мұнда M , 1-9 сандары қаңтар мен қыркүйек аралығындағы айларды, 0 саны қазан айын, A әрпі қараша айын және B әрпі желтоқсан айын білдіреді. Мұнда MM әрітері 1-12 аралығындағы нақты қүнтізбе айын білдіреді)

Дата виробництва

Дата виробництва зашифрована в серійному номері.

Формат серійного номера НР для цього продукту: CCYMBBZZZ

Нижче наведено можливі формати дати виготовлення.

- $Y (Y) —$ рік виготовлення, де Y указує на останню цифру року (відлік ведеться з 2000 р.). Наприклад, 2 позначає 2002 рік, 0 — 2010, 1 — 2011 тощо. YY указують на дві останні цифри року, починаючи з 2000-го. Наприклад, 02 означає 2002 рік, а 12 — 2012 рік.
- $M (M) —$ місяць виробництва. Для значення M можуть використовуватися цифри або літери: цифри 1–9 позначають місяці із січня по вересень, 0 — жовтень, A — листопад, B — грудень. Варіант MM — це традиційне позначення календарного місяця (з 1-го по 12-й).

Environmental Conditions

Operating temperature: 32°F to 115°F (0°C to 45°C)

Operating relative humidity: 5% to 95%, noncondensing

Non-operating/Storage temperature: -40°F to +158°F (-40°C to +70°C)

Non-operating/Storage relative humidity: 5% to 95%, noncondensing

Altitude: Up to 13,123 ft (4 km)

Условия окружающей среды

Рабочая температура:	от 32 до 115°F (от 0 до 45°C)
Относительная влажность при эксплуатации:	от 5% до 95%, без конденсации
Температура при отсутствии эксплуатации/при хранении:	от -40 до +158°F (от -40 до +70°C)
Относительная влажность при отсутствии эксплуатации/при хранении:	от 5% до 95%, без конденсации
Высота над уровнем моря:	до 13 123 футов (4 км)

Қоршаған орта шарттары

Жұмыс температурасы:	0°C – 45°C (32°F – 115°F)
Жұмыс істейтін салыстырмалы ауа ылғалдылығы:	5% - 95%, конденсацияланбаған
Жұмыс істемейтін/Сақтау температурасы:	-40°C пен +70°C (-40°F пен +158°F)
Жұмыс істемейтін/Сақтау салыстырмалы ауа ылғалдылығы:	5% - 95%, конденсацияланбаған
Биіктік:	4 км-ға дейін (13 123 фут)

Умови експлуатації

Температура (робоча):	від 0 до 45 °C (від 32 до 115 °C)
Відносна вологість (робоча):	від 5 до 95% (без конденсації)
Температура (неробоча/для зберігання):	від -40 до +70 °C (від -40 до +158 °F)
Відносна вологість (неробоча/для зберігання):	від 5 до 95% (без конденсації)

Висота над рівнем моря:

до 4 км (13 123 футів)

Specifications

Physical characteristics

Dimensions:

150 × 86 × 35 mm (5.9× 3.39 × 1.38 in)

Weight:

0.24 kg (8.47 oz)

Mounting position:

Standard US or EU electrical box

Electrical characteristic

PoE

IEEE 802.3af and 802.3at PoE compliant
for Gigabit Ethernet

Power adapter

Input : 100 VAC to 240 VAC,

Output :+48 V

⎓ @ 0.63 A

Ports

Ethernet ports

A 10/100/1000 Mbps uplink Ethernet port that supports PoE In.

Three 10/1000 Mbps downlink Ethernet ports, one of which supports PoE Out.

A pair of RJ-45 Pass Through ports.

48V DC

The local power port is used for connecting +48 VDC power to the device.

Document part #

Federal Communications Commission (FCC) Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

RF exposure warning

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.

IC Radiation Exposure Statement for Canada

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

User manuals for transmitters equipped with detachable antennas shall also contain the following notice in a conspicuous location:

This radio transmitter (identify the device by certification number, or model number if Category II) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio (identifier le dispositif par son numéro de certification ou son numéro de modèle s'il fait partie du matériel de catégorie I) a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal et l'impédance requise pour chaque type d'antenne. Les types d'antenne non inclus dans cette liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.

IMPORTANT NOTE:

Radiation Exposure Statement:

This equipment complies with "Industry Canada RSS-102 for radiation exposure limits set forth for an uncontrolled environment".

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
