- Tuner Mode – Select the TV signal source. You can select Antenna or Cable.
- Channel Scan – Scans for channels that have signals and stores the channels information in memory.

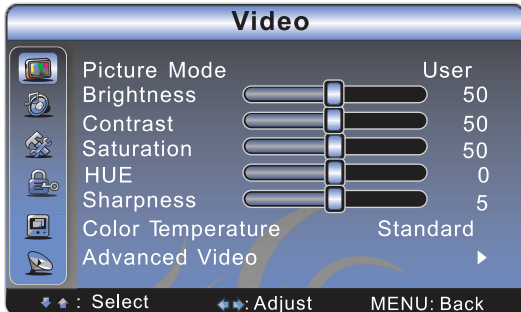

DTV: The scanned TV programmes in digital signals.
TV: The scanned programmes in analog signals.
- Channel Skip – Deletes a channel stored in memory. When you press CH[▲] or CH[▼], your TV skips the channel you deleted. You can still tune to the channel using the number buttons on the remote control.
- MTS – Selects the sound mode. You can select Mono, Stereo, or SAP (Second Audio Program)
- Audio Language – Selects the audio language for a program.

SAP (Second Audio Program) – Depending on the particular program being broadcast, you can listen to a foreign-language translation.

Changing the TV Settings

Using the Video Menu

- 1 Press [MENU] button to display the main menu.
- 2 Press [▲/▼] button to select Video item.
- 3 Press [▶/ENTER] button to enter Video menu.
- 4 Press [▲/▼] button to select the option, press [▶/ENTER] button to enter or press [◀/▶] button to adjust the option.
- 5 Press the [Menu] button to close the menu.

You can adjust:

- Picture Mode – Adjusts the Picture Mode. You can select Standard, Cinema, User or Vivid.
- Brightness – You can increase or decrease the brightness of the picture. Increasing the brightness can add more light to dark areas of the picture, while decreasing the brightness can add more darkness to light areas of the picture.
- Contrast – You can increase or decrease the contrast of the picture. Increase the contrast to adjust the white areas of the picture or decrease the contrast to adjust the black areas of the picture.
- Saturation – Adjusts the intensity of the colors.
- Sharpness – You can increase the sharpness level for clearer images or decrease the sharpness level for smoother images.
- Color temperature – Changes the color temperature. You can select the color temperature from three options: Cool, Standard or Warm.
- Advanced Video – Accesses advanced video settings such as DNR, Adaptive Luma Control, Flesh Tone and MFC.

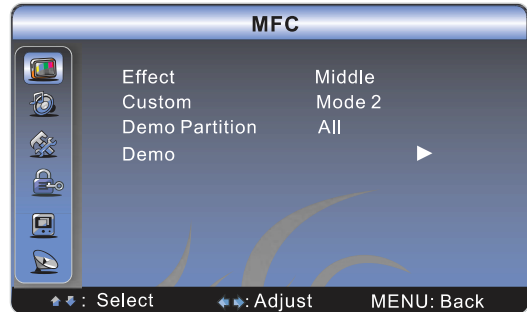

- ◇ DNR: It can optimize the picture signal from time and space; reduce the outside noise interference and return the pure initial signal. It has four ratings: Low, Standard, Strong and Off.
- ◇ Adaptive Luma Control: According to the content of picture, it can adjust brightness automatically.
- ◇ Flesh Tone: When this feature is "on" state, the TV could be the basis of image content, for color correction.

Changing the TV Settings

Using the Video Menu

- ◇ MFC: To improve the perception of moving images. The weak setting is suitable for most programs and is recommended for general viewing. normal and strong settings can further enhance motion, however on some cases can create a halo effect on edges of moving objects. You may need to switch settings pending the contents your viewing.

PROSCAN using MFC's unique motion compensation technology, which eliminates the tail and jitter of dynamic images effectively, and makes the image edge clearer.

It reduce the dynamic screen blur which is difficult to be perceived by human eyes. Even playing rolling subtitles, the font edge is also clear.

Effect - Removes drag from fast scenes with a lot of movement to provide a clearer picture.

If you enable MFC (Motion Flow Compensation), noise may appear on the screen.

If this occurs, set "Effect" to off.

Custom : The TV can be set to automatically sense and process film signals from all sources and adjust the picture for optimum quality.

- Mode 1 : Adjusts the judder reduction level from video sources when playing 24Hz films.

- Mode 2 : Adjusts the blur reduction level from video sources.

Demo Partition - Press [◀/▶] buttons to choose left, right or all in the screen for MFC Demo.

Demo - This is only intended for use in retail environments.

Changing the TV Settings

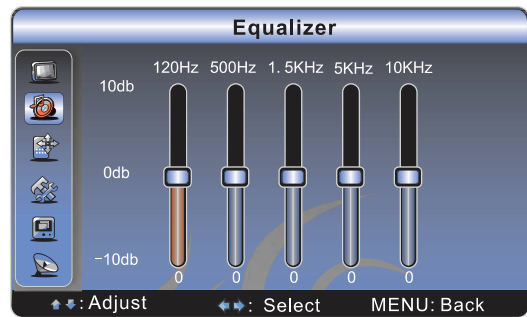

Using the Audio Menu

- 1 Press [MENU] button to display the main menu.
- 2 Press [▲/▼] button to select Audio item.
- 3 Press [▶/ENTER] button to enter Audio menu.
- 4 Press [▲/▼] button to select the option, press [▶/ENTER] button to enter or press [◀/▶] button to adjust the option.
- 5 Press the [Menu] button to close the menu.

You can adjust:

- OSD Language – Use the right or left arrow button to choose the OSD Language among English, Spanish and French.
- Screen Mode – Use the arrow button to choose the screen aspect ration from Wide, Normal, Zoom, Cinema, Dot-to-Dot or Auto.

1 Normal

The original 4:3 aspect ratio (1.33:1 signal) is preserved, so black bars are added to the left and right of the image. Standard TV broadcasts are displayed with a 4:3 aspect ratio.

2 Wide

When watching a standard broadcast or full-frame movie in this mode, the display image is stretched proportionately to fill the TV screen. When watching a widescreen (1.78:1 signal) program or movie, the display image fills the TV

3 Zoom

Stretches the 4:3 aspect ratio image vertically and horizontally to fill the screen at 1:1.78 aspect ratio.

Changing the TV Settings

Using the Setup Menu

4 Cinema

Stretches the 4:3 aspect ratio image vertically and horizontally to fill the screen at 1:2.35 aspect ratio.

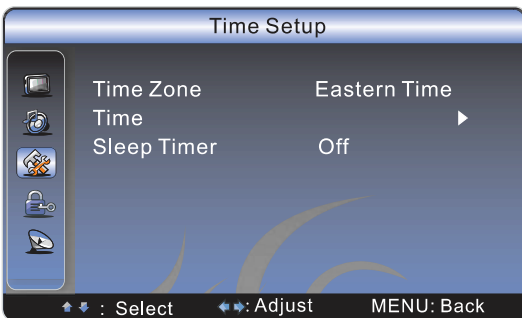

5 Dot to dot

Use the function to see the full image without any cutoff, when HDMI (720p/1080i/1080p), Component (1080i/1080p), DTV (1080i) or VGA signals are inputs.

- DPMS – This is a good function for a computer monitor. When DPMS is on, the computer will control the screen on or off. For example, if the computer is in sleep mode, the screen will be switched off. If the computer is activated, the screen also is activated.
- Time Setup – You can set up the exact time by yourself. You can also set up Sleeper Time and Auto Sleep Time.

Changing the TV Settings

Using the Setup Menu

- Caption: There are three items in it – Analog Closed Caption, Digital Closed Caption and Digital Caption Style.
This is a function about caption, display caption by analog signal and display caption by digital signal.
Analog Closed Caption: CC1, CC2, CC3, Cc4, TEXT1, TEXT2, TEXT3, TEXT4.
Digital Closed Caption: Service1, Service2, Service3, Service4, Service5, Service6.
Digital Caption Style: There are two Caption Styles. One is the automatic function set as the broadcaster, while the other is the custom style where you can adjust the font size, color, opacity, background color etc. , accordingly.
- Reset Default – Every TV has its original setting before leaving the factory. So this function helps you restore these settings.
