1 About this document

1.1 REVISION HISTORY

Version	Date	Description	Author	
0.0	04.25.2011	1. Initial version released	Dennis	

1.2 KEYSTROKES.

Filenames, paths, keystrokes entered by the user are shown in this typeface.

1.3 WINDOWS CONTROLS.

Windows controls including command bar sequences, prompts, dialog boxes, fields, pulldown lists, checkboxes and radio-buttons are printed in this **bold** typeface.

1.4 PDA Keys

Keys on the PDA are bracketed by "greater than" and "less than" characters (< >) to distinguish them from keys on the PC, example, <**ENTER**>.

1.5 STYLUS ACTIONS

Single Tap or Select – tap the display screen once with the stylus to activate a specific button or select an item from a pull-down list.

Double-Tap – tap the stylus twice rapidly in the same location to open an application.

Tap and Hold – tap and hold the stylus to view the context menu.

2 Batteries and Power

2.1 OVERVIEW

Battery charging, installation, and information about the single-slot dock, battery charger and power cable are located in the Quick Reference Guide.

2.2 SUSPEND MODE

The PDA will go into suspend or sleep mode when it is idle for a configurable period of time, by default it is configured to 3 minutes. The idle duration can be customized using the Power control panel (refer to "Power off Tab" on page 41). Suspend mode works and looks just like you have turned the unit off. Press the < On/Off > key to suspend (put to sleep) the O5100. Press < On/Off > key again for the PDA to resume its previous state. Use the Battery Power control panel to set the idle duration and suspend mode initiation. This will save battery power when PDA is not in use.

2.2.1 Suspending

The following conditions will suspend (put the PDA to sleep):

- Press the < **On/Off** > key while the unit is on.
- The sleep timer expires, which indicates that there has been no use for a specified period of time.
- The battery pack is completely discharged.

2.2.2 Resuming

Use one of the following methods to resume (wake up the PDA):

- Press < **On/Off** > key to suspend or resume (wake up).
- Put the PDA into a dock or connect to data cable.

When a battery pack completely discharges while the unit is in suspend mode, the PDA remains suspended until the discharged battery is changed or PDA is connected to charger.

2.3 BATTERY

- 3.7V, 2200mAh (Standard battery)

Top:

Bottom:

- 3.7V, 3300mAh (Extend battery)

Top:

Bottom:

2.4 BATTERY WARNINGS AND CAUTIONS

Prior to using the PDA for the first time, you MUST charge the battery pack. The initial charging cycle for both the battery pack and back-up battery takes approximately thirteen (13) hours. Subsequent charging cycles take four (4) hours.

If you remove the battery pack or it completely discharges, there is a 2 hour window in which to insert a charged battery pack before the backup battery completely discharges. If your backup battery completely discharges, the contents of the RAM memory will be lost. If your backup battery is less than fully charged, there is proportionally smaller window of time available.

Use only the batteries, charger and cradle supplied by a POINT MOBILE or POINT MOBILE dealer. The use of other battery supplies can damage the PDA and void your warranty. For the correct supplies for the O5100, please contact your POINT MOBILE reseller.

Lithium-ion Polymer battery packs can get hot, explode, ignite and/or cause serious injury if exposed to improper situations.

Follow the safety warnings listed below:

- Do not place the battery pack in fire or heat the battery.
- Do not install the battery pack backwards so the polarity is reversed.
- Do not connect the positive terminal and negative terminal of the battery pack to each other with any metal object (such as wire).
- Do not carry or store battery pack together with metal objects.
- Do not pierce the battery pack with nails, strike the battery with a hammer, step on the battery or otherwise subject it to strong impacts or shocks.
- Do not solder directly onto the battery pack.
- Do not expose battery pack to liquids, or allow the battery contacts to get wet.
- Do not disassemble or modify the battery pack.

The battery pack contains safety and protection devices, which, if damaged, may cause the battery pack to generate heat, explode or ignite.

Do not discharge the battery pack using any device except for the specified device. When it is used in devices other than the specified device, the battery pack can be damaged or its life expectancy reduced. If the device causes an abnormal current to flow, it may cause the battery pack to become hot, explode or ignite and cause serious injury.

In the event the battery pack leaks and the fluid gets into one's eye, do not rub the eye. Rinse well with water and immediately seek medical care. If left untreated, the battery fluid could cause damage to the eye.

Always charge the battery pack within the temperature range of 32°-113°F (0°-45°C). Do not place the battery pack in microwave ovens, high-pressure containers or on induction cookware.

Immediately discontinue use of the battery pack if, while using, charging or storing the battery, it emits an unusual smell, feels hot, changes color or shape, or appears abnormal in any other way.

Do not place the battery pack in or near fire, on stoves or other high temperature locations. Do not place the battery pack in direct sunlight or use or store the battery pack inside cars in hot weather. Doing so may cause the battery pack to generate heat, explode or ignite. Using the battery pack in this manner may also result in a loss of performance and a shortened life expectancy.

POINT MOBILE recommends annual replacement of rechargeable battery packs to ensure maximum performance.

2.5 BATTERY DISPOSAL

Replace the battery pack only with one sold by a POINT MOBILE reseller.

When the battery is worn out, insulate the battery contacts with adhesive tape or a similar material prior to disposal.

Please recycle Lithium-Ion Batteries.

Do not throw Lithium-Ion Batteries in the trash.

2.6 EXTEND BATTERY LIFE

We recommend you to follow few steps witch extend battery life

- For first time do not turn on unit until batteries are charged for minimum of 13 hours.
- Turn off wireless devices (Wifi/Bluetooth) when they are not needed,
- Set display backlight timeout as low as possible
- Set keyboard backlight timeout as low as possible
- If possible turn off vibration when good read.
- Set device turn off after idle for time as short as possible.

3 Reset O5100

3.1 SOFTWARE RESET

If device hangs up or does not respond to any action please perform software reset.

Using stylus press reset button for 1 second and release.

Reset button is located

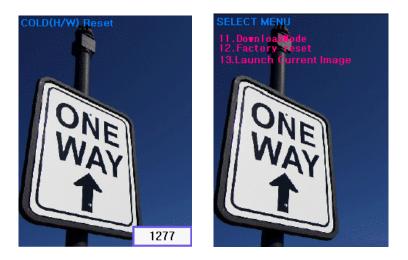

All unsaved data will be lost when performing a software reset.

3.2 FACTORY MODE

If devices performance becomes unstable or settings have been changed to state when it is not possible to revert them.

It is recommended to perform reset to factory mode.

Press the [Power button] and [Reset button] at the same time for Cold Reset and then release the [Reset button] only. After that, you can see boot menu

If it shows boot log in the LCD, enter password key using keypad If you see boot menu screen, press key in order for entering download mode and press button [1] + [2] + [enter] in order.

All data and custom settings will be lost if Factory mode is performed. It is recommended to backup all your data to removable storage or to other computer before performing a Factory mode.

4 Using O5100

4.1 DESKTOP

Workflow is like all other Microsoft operational systems.

To run program - double tap on a shortcut icon on desktop or run program from Start menu.

Below is standard O5100 desktop layout.

4.2 INBOX

The PDA comes with Inbox for Windows CE .NET installed from the factory. Inbox is a familiar Microsoft email interface.

To set up Inbox:

- 1. Select Start > Programs > Inbox
- 2. Select Services > Options from the command bar.
- 3. Drag the dialog to show the right edge to configure email.
- 4. Select Add...
- 5. Select **Service Type** and enter in name of email service in the **Service name** field.
- 6. Select the type of service.
- 7. Enter the server and user information in the Mail Service Definition.
- 8. Configure your inbox using the Mail General Preferences dialog.
- 9. Configure your mail retrieval settings using the Mail Inbox Preferences.
- 10. Press ox to complete the Inbox configuration.

Receiving email

- 1. Select Services > Connect from the command bar.
- 2. Select Services > Send/Receive Mail from the command bar to manually retrieve mail. Any pending email appears in the inbox after connecting.

4.3 INTERNET EXPLORER

Internet Explorer

The PDA comes with Internet Explorer for Windows CE .NET installed

<u>V</u> iew <u>1</u>	ools	8 🖣	•	🚰 N?	×		
Address \windows\default							

Welcome to CHD FiVE Internet Explorer

Enter your destination address.

Open Internet Explorer by selecting Start > Programs > Internet Explorer.

To set a default home page,

- 1. Navigate to the desired default web page.
- 2. Select Tools > Options from the command bar.
- 3. Enter the desired URL in the Start Page field.
- 4. Press the **ok** button

Internet Explorer uses sliding menus for application and navigation control. Tap and drag the sliding menus to the left or right to see the hidden menu items and toolbars.

4.4 QUICK SCANSET APPLICATION

O5100 comes with preinstalled scanner software. Application works in background and has a System try icon next to battery level icon.

Test barcode scanning

Go to Start > Programs > Scanner > Scandiag to open scan dialog

Refer to Scanner configuration, Section 5.17 for more information about scanner settings

4.5 WORD PAD

The PDA comes with WordPad for Windows CE .NET installed from the factory.

To start Wordpad, select

Start > Programs > Microsoft WordPad. The following text and document file types are compatible with WordPad:

- Text (* . txt)
- Word Document (* . doc)
- Rich Text File (*.rtf)
- WordPad (*.pwd)

When you transfer file types other than * . pwd to the Windows CE .NET device, it translates the files into a compressed Windows CE .NET file type.

4.6 INSTALLING PROGRAMS

Programs pre-installed on the device are stored in ROM (read only memory). You cannot remove, or modify this software. You may add programs and data files to RAM (random access memory) or into memory card. Please follow the directions provided with the software to install it.

4.6.1 Using an Installation Wizard

If the file has an installer, the installation wizard begins. Follow the directions on the screen. Once the software is installed on your desktop computer, the installer transfers the software to your terminal automatically.

4.6.2 Installing Programs Manually

If the file does not contain an installer, an error message indicates the program is valid but is designed for a different type of computer.

- 1. Install * . cab, * . exe, * . zip, setup. exe files, or other files designed for the device.
- 2. Windows CE .NET applications will also work on the device.

Start by downloading the program to your desktop computer (or insert the CD or disk that contains the program into your desktop computer).

1. Select Start > Settings > Control Panel > System > General on device. Make a note of the information in the processor field.

2. Read the installation instructions, ReadMe files, or manual that comes with the program. Many programs provide installation instructions. If you cannot find installation instructions for the program in the ReadMe file or manual, use ActiveSync Explorer to copy the program file to the Program Files folder on your device. For more information on copying files using ActiveSync, refer to the ActiveSync online Help.

- 3. Connect your PDA and desktop computer.
- 4. Double-click the * . exe file.

5. Once the installation is complete, you double-tap the program icon from your desktop, or select Programs > program icon to select it.

4.6.3 Using ActiveSync to Add to the Start Menu

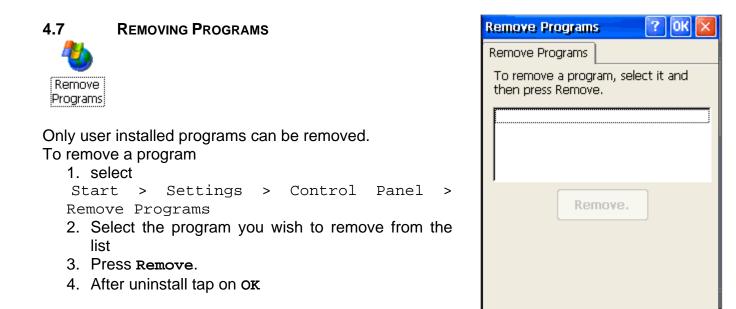

1. Use the Explorer in ActiveSync on your desktop computer to explore the files on your PDA and locate the program. For more information on using ActiveSync, refer to the ActiveSync online Help.

2. Right-click on the program, then select Create Shortcut.

3. Move the shortcut to the **Programs** folder in the Windows folder. The shortcut appears on the menu.

🥩 🍟 🕞 3:21 AM 💯

ø

.

5 Configuring a PDA

Customizing the Settings To change the settings on your new PDA, select Start > Settings > Control Panel

The list of settings (except Quick ScanSet applet) is standard Windows CE .NET settings. For more information on the Windows CE .NET operating system, please refer to Microsoft's website at

http://www.microsoft.com/windows/embedded/ce.net/

5.1 STYLUS

You might need to align the touch screen (i.e. when you notice that when you attempt to select one item with the stylus, another item is erroneously selected).

To align the touch screen,

1. Open

```
Start > Settings > Control Panel >
Stylus
```

- OR
- 2. Press < FUNC > + < Space > on keyboard
- 3. Align Screen dialog shows on screen
- 4. Carefully press and briefly hold stylus on the centre of the target as the target moves around the screen.

Align Screen
Tap the target firmly and accurately at each location on the screen. The target will continue to move until the screen is aligned.

5.2 BACKLIGHT

Modify display and keyboard backlight brightness. Also set backlight options (i.e. turn off time).

```
To modify backlight settings open:
Start > Settings > Control Panel >
Backlight
```

5.2.1 Battery power

Modify display backlight settings when device runs on batteries.

- Set display brightness level
- Set backlight timeout time. Available options:
 10 sec (by default)
 30 sec
 1 min
 2 min
 3 min
 - 4 min
 - 5 min
- Enable to turn on backlight when a button is pressed or the screen is tapped

To extend battery life it is recommended to set display backlight turn off time as short as possible.

To extend battery life it is recommended to set display backlight brightness level as low as possible.

5.4 DATE AND TIME

Date/Time

In the Date/Time options, you can change the year, month, date, time, time zone, or select automatic adjust for Daylight Savings Time.

To set or change the date and time:

- 1. Open Date/Time Properties Start > Settings > Control Panel > Date/Time
- 2. Select month

Tap on month name to open a pull down list of months or press the arrow buttons on either side of the month to increase or decrease the month.

3. Change the year

Tap on the year to open a numeric dial. Select the up arrow to increase the value; select the down arrow to decrease the value. Or you can type a new value in the field.

4. Change the time,

select the hour, minute, seconds, or AM/PM and select the up arrow to increase the value; select/tap the down arrow to decrease the value. You can also type a new time value in the field.

5. Select your correct time zone from the pull-down list.

6. To automatically adjust the clock for Daylight Savings Time, enable the checkbox at the bottom of the screen.

7. Select Apply to make save your changes [and make additional modifications] or select OK to exit the Date/Time settings.

5.6 DISPLAY PROPERTIES

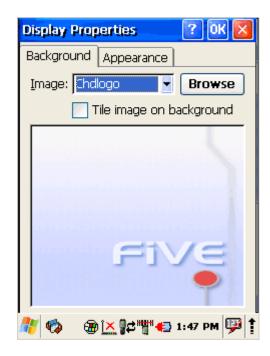

To modify the display and/or backlight of the PDA refer to the following:

5.6.1 Background

Change background image:

The current file is located in the Windows directory with the POINT MOBILE logo file named logo.bmp. Place a new image in the Windows directory. Image must be exactly 240 by 320 pixels.

- 1. Select Start > Settings > Control Panel
- > Display.
- 2. Press **Browse** and select new image.
- 3. Tap on **ok** to save settings.

5.6.2 Appearance

Change Windows appearance default settings:

1. Select

Start > Settings > Control Panel > Display > Appearance **tab**.

- 2. Select form Items dropdown menu desired item
- 3. Press on color box to change items color
- 4. To save your created appearance scheme tap on **Save...**
- 5. To exit the Backlight settings, press **ox** from the control bar.

5.7 INPUT PANEL

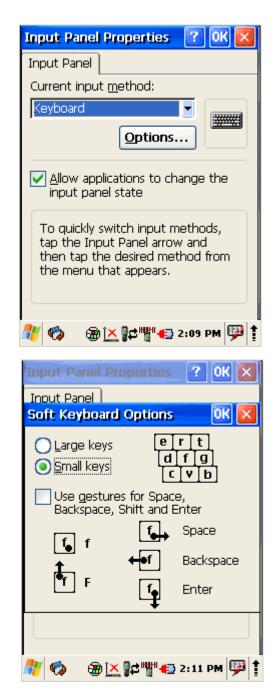

Adjust input panel behaviour and settings.

Input Panel

Change the Soft Input Panel settings:

- 1. Select
 - Start > Settings > Control Panel >
 Input Panel
- 2. Change the desired settings.
- 3. To change the Soft Keyboard Options, tap on the Options
- 4. Change the soft keyboard options , selecting from:
 - Large or small keys.
 - Using gestures for space, backspace, shift, and enter.
- 5. To exit the Soft Keyboard Options, press **ok** on the control bar, or press the **< ENT >** key on the keypad.
- To exit Input Panel settings, press OK from the control bar, or press the < ENT > key on the keypad.

5.8 INTERNET SETTINGS

To change the Internet default settings:

1. Select

Start > Settings > Control Panel >
Internet Options

2. On the General tab type in the URL of the desired start page and the desired search engine. You can also change the Cache Size, clear the Cache, and clear the History.

6 Networks, Communications and Connections

The screen shots in the manual were taken and the procedures were written using Windows® XP. If you are using Windows® NT or Windows® 2000, appearance and procedures may be slightly different.

6.1 MICROSOFT® ACTIVESYNC

6.1.1 Installation

Microsoft® ActiveSync is a file transfer tool to synchronize the files on a PC with the files on your PDA. O5100 comes from the factory with ActiveSync loaded.

If you have ActiveSync already installed on your PC, make sure that you have v4.5 or higher.

To install Microsoft® ActiveSync, complete the following steps on the PC:

1. Download ActiveSync from Microsoft® Windows CE .NET website:

http://www.microsoft.com/mobile/pocketpc/downloads/.

2. Install the most current version of Microsoft® ActiveSync (v4.5 or higher) on the host PC

Picrosoft ActiveSync 4.5	Microsoft ActiveSync 4.5
Ready to Install the Program The wizard is ready to begin installation.	Installing Microsoft ActiveSync 4.5 The program features you selected are being installed.
Setup is ready to begin installing Microsoft ActiveSync 4.5	Please wait while the Setup Wizard installs Microsoft ActiveSync 4.5. This may take several minutes. Status:
< <u>B</u> ack <u>Install</u> <u>C</u> ancel	< Back Next > Cancel

6.1.2 Setting up a Partnership

During the Microsoft ActiveSync installation, you were prompted to create a partnership with your mobile device. When you set up a partnership, you select synchronization and file conversion settings, which are contained in a file on your desktop computer. This file enables your desktop computer to recognize your device. Only devices that have a partnership with a desktop computer can synchronize information between the two computers.

Partnerships are stored in ActiveSync and have the same name as the corresponding device. Your desktop computer can set up partnerships with many different mobile devices, but a device can have partnerships with only two computers.

For more information on partnerships, please refer to your Microsoft ActiveSync documentation or help file.

6.1.3 Exploring the Mobile Device

To transfer files, complete the following steps on the host PC: Transferring Files

Select Start > Programs > Microsoft ActiveSync.

Double-click on the ActiveSync icon in the System Tool Tray.

After you have established a connection with your PDA, click on the Explore button at the top of the ActiveSync window (or select Explore from the File menu).

Navigate to the target directory on your portable and copy the desired file by using the Copy/Paste method or dragging and dropping the desired file(s) into the folder.

Depending on the file type, ActiveSync may convert the file into a format appropriate for the Windows CE .NET device.

6.1.4 ActiveSync File Synchronization

🔽 The key is pr	ovided <u>a</u> utomatically
	X authentication
EAP type: TLS	Properties
	× """

Wi-Fi Protected Access (**WPA** and **WPA2**) is a class of systems to secure wireless (Wi-Fi) computer networks. It was created in response to several serious weaknesses found in the previous system, Wired Equivalent Privacy (WEP). WPA implements the majority of the IEEE 802.11i standard, and was intended as an intermediate measure to take the place of WEP while 802.11i was prepared. WPA is designed to work with all wireless network interface cards, but not necessarily with first generation wireless access points. WPA2 implements the full standard, but will not work with some older network cards.

Pre-shared key mode (PSK, also known as personal mode) is designed for networks without of an 802.1X authentication server. Each user must enter a passphrase to access the network. The pass phrase may be from 8 to 63 printable ASCII characters or 64 hexadecimal digits (256 bits). The pass phrase may be stored on the user's computer at their discretion under most operating systems to avoid re-entry. The pass phrase must remain stored in the Wi-Fi access point.

5. Enter **Network key** (network passphrase/ password) and if needed **Key index**.

6. Select EAP type

Extensible Authentication Protocol, or **EAP**, is a universal authentication framework frequently used in wireless networks and Point-to-Point connections.

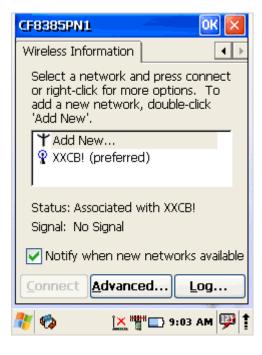

TLS - Transport Layer Security

PEAP - Protected Extensible Authentication Protocol, Protected EAP, or simply PEAP, is a method to securely transmit authentication information, including passwords, over wired or wireless networks.

6.2.3 Preferred networks

In some areas there are more than one wireless networks available to connect.

Select wireless network and tap on Advanced ... button.

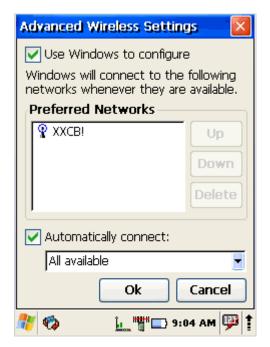

Tap on Network name and use control buttons Up/Down to change priority or Delete – to remove network from list.

Also check to what device can automatically connect:

- All available
- Only access points
- Only computer to computer

6.2.5 Connect to wireless network

Selected desired connection and tap on Connect button.

7 FCC Regulations

•This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

•This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

▶ RF Exposure Information

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

8 IC Notice

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

(1) this device may not cause interference, and

(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et

(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

IC: 1693B-5100LP

IMPORTANT NOTE: IC Radiation Exposure Statement

This EUT is compliance with SAR for general population/uncontrolled exposure limits in IC RSS-102.
