1 Choose a location

Choose a location where the controller's signal has a clear path to the ductless unit.

Remove the batteries from the remote controller that came with the ductless unit. That way the two controllers won't send conflicting commands.

The controller sends an IR signal from three places. One on each side, left and right, and one from the top.

Consider them when you choose a location.

2a Tabletop assembly

- ① Pull the power cord through the tabletop stand.

- ② Plug the power cord into the controller.

- ③ Connect the tabletop stand to the controller.

- ④ Plug the power cord into the wall adapter, and plug in the wall adapter.

- ⑤ Place the controller in your selected location.

2b Wall mount assembly

- ① Plug the power cord into the controller.

- ② Snap the back plate onto the controller.

- ③ Attach the wall mount adhesive strips to the controller.

- ④ Plug the power cord into the wall adapter, and plug in the wall adapter.

- ⑤ Attach the controller to the wall in your selected location.

3

System setup

- 1 Connect the controller to power.

- 2 Press any button to enter setup.

- 3a Press **0** to access options for setting **-1**.

- 3b Press **+** to change setting **-1** to the desired option.

Setting	Options (Default in bold)
-1 Controller Location	01 – Tabletop 02 – Wall mount

- 3c Press **0** to select the option for setting **-1**.

- 4a Setting **-2** is displayed. Press **0** to access options for setting **-2**.

-2 Temperature Scale	01 – °F 02 – °C
-----------------------------	---------------------------

- 4b Press **+** to change setting **-2** to the desired option.

- 4c Press **0** to select the option for setting **-2**.

- 5a Setting **-3** is displayed. Press **0** to access options for setting **-3**.

-3 Outdoor Unit Configuration	01 – Single 02 – Multi
--------------------------------------	----------------------------------

- 5b Press **+** to change setting **-3** to the desired option.

- 5c Press **0** to select the option for setting **-3**.

- 6a Setting **-4** is displayed. Press **0** to access options for setting **-4**.

-4 Multi Outdoor Unit Number*	02 – 99
--------------------------------------	----------------

*Only shown if Setting **-3** is set to 02.

- 6b Press **+** to change setting **-4** to the desired option.

- 6c Press **0** to select the option for setting **-4**.

- 7a Setting **-5** is displayed. Press **0** to access options for setting **-5**.

-5 Ductless Unit Brand	See page 7 for Ductless Unit Brand ID
-------------------------------	---------------------------------------

- 7b Press **+** to change setting **-5** to the desired option.

- 7c Press **0** to select the option for setting **-5**.

- 8a Setting **-6** is displayed. Press **0** to access options for setting **-6**.

-6 Ductless Unit Model	See page 7 for Ductless Unit Model ID
-------------------------------	---------------------------------------

- 8b Press **+** to change setting **-6** to the desired option.

- 8c Press **0** to select the option for setting **-6**.

- 9 The screen will display **[C]**. Press **0** to save and exit system setup.

[C] Setup Complete	- 0 +
---------------------------	-----------------

Idle mode

The controller goes into Idle mode (the screen is dim) after 45 seconds of inactivity. Press any button to wake up the controller. The wake up button push does not change temperature or settings.

Change mode

1. Be sure the controller is not in Idle mode, then press **O** to change the system mode.

2. Stop pressing **O** when you reach the mode you want.

The ductless unit will beep when it gets a command from the controller.

Symbol	Mode
	Heat mode - the ductless unit warms the space to the temperature shown on the controller.
	Cool mode - the ductless unit cools the space to the temperature shown on the controller.
[screen is blank]	Off mode - the ductless unit is turned off

Change temperature

Warmer

Cooler

Room temperature

Any time the controller is not being interacted with, the current room temperature is displayed on screen.

Viewing set temperature

Be sure the controller is not in Idle mode, then press + or - once to view the current set temperature. The set temperature will "pulse" on screen. After a short period of time the screen will change to display the room temperature.

Change temperature

1. Be sure the controller is not in Idle mode, then press + or - more than once to change the set temperature so it is higher or lower in the current mode.
2. Stop pressing + or - when you reach the temperature you want.
3. The screen will pulse and then return to the room temperature display.

Wi-Fi setup

1. Download the Honeywell Home app.
2. Create an account or log in to your account.
3. Select “Add new device” in the app.
4. Choose D6 Pro Wi-Fi Ductless Controller.
5. Follow instructions in the app to configure the controller.

Note: During setup, the Wi-Fi icon will blink or be on solid. This tells you the controller status in the Wi-Fi connection process.

Blinking blue	Controller is powered up and ready to begin connecting.
Solid blue	Controller is connected to the mobile device through the app.
Solid green	Controller is connected to the Wi-Fi network.
Solid red	Controller is disconnected from the Wi-Fi network.
Blinking red	Controller is disconnected from Wi-Fi network and has lost its schedule. Reconnect to Wi-Fi network to resume schedule.

In the Honeywell Home app

In the app you can set the controller to Auto Changeover. The controller will switch from heating mode to cooling mode based on the temperature setting and the room temperature.

When in Auto Changeover mode, **AUTO** will be displayed on the controller screen.

Enter system setup

You can change your controller settings at any time. To enter system setup:

1. Be sure the controller is not in Idle mode, then press and hold + and 0 and – for three seconds all at the same time.
2. Change the settings as needed. See “System setup” for more information.

Software and security questions,

Q: How can I be sure my thermostat is running the most up-to-date firmware?

A: When your thermostat is connected to Wi-Fi, it will automatically receive over-the-air firmware updates from Honeywell. These firmware updates contain things such as new features as well as security upgrades. Keep your thermostat connected to Wi-Fi to ensure it receives these updates.

Q: How can I prevent a cybercriminal from making unauthorized changes to my thermostat?

A: If a cybercriminal gains access to your Wi-Fi router, they can tamper with a wide range of online activities, including the settings on your connected devices. Make sure you change the default password on your Wi-Fi router, and when you select a new password, make sure it uses multiple upper- and lower-case letters and special characters

This device is restricted to indoor use.

FCC Regulations

(15C) This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

(15B) This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radio Frequency (RF) Energy

- This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.
- The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter and must be installed to provide a separation distance of at least 20cm from all persons.
