

## **Integration into a Host System:**

### **WM-N-BM-14**

This radio module is designed for professional use and must be integrated into a host system by qualified personnel only.

The module is granted a full modular approval, i.e. it can be integrated in host systems if the following requirements are met:

- The following supply voltage specifications must be met: **3.3 VDC**
- The UFL cable should have the following specific length: **105mm**

Following Antennas are certified and can be used with the RF Module:

- LSR 2.4 Ghz -2.5 Ghz Dipole 2dBi Antenna for Reverse Polarity SMA

Additional antennas may be used provided they are from same type, having less or equal gain and have similar in-band and out-of-band characteristics than one of the above listed antenna.
