5 Installing the SIM Card and Battery

Make sure that the golden area on the SIM card is facing downwards and the cut-off edge is correctly aligned with the card holder.

6 Charging the Battery

1. Connect the charger to the charger interface at the right side of your phone.
2. Connect the charger to an alternating current (AC) power socket.

3. During charging, the battery icon displays a progression from empty () to full ().
4. When the charging icon becomes static, the phone is fully charged. Disconnect the charger from the AC power socket.
5. Disconnect the charger from the phone.

7 Using the Function Menu

1. In the standby mode, press  (**Menu**) or  to display the **Menu** interface.
2. Press  to scroll to a menu item.
3. Press  (**Select**) or  to display the menu.
4. Do the following to display the submenu:
 - Press  to scroll to a submenu item and press  (**Select**) or  to display the submenu.
 - Press the number key corresponding to the number of a submenu to display it.
5. Press  (**Back**) to return to the previous menu or quit the function menu.

Alternatively, press  to return to the standby mode.

8 Voice Services

■ Making a Call

1. In the standby mode, enter a phone number.
Press  twice to enter "+"; press  three times to enter "P"; press  four times to enter "T".
2. Press  to dial the number.
3. Press  to end the call.

- When the phone is locked, enter the lock code to unlock the phone first; otherwise, you can make emergency calls or answer calls only.
- In the standby mode, press  to view the call log. Select a record and press  to dial.
- Select a contact from the phonebook and press  to dial.
- Select a message from the inbox and press  to dial.

■ Answering a Call

When there is an incoming call, press ,  (**Answer**) or  to answer it, press  to send SMS on call reject.

- When there is an incoming call, you can press  once to mute the speaker and twice to reject it. If the phone is in the Silent mode, you can press  only once to reject it.
- If the any key answer function is enabled, press any key (except  or ) to answer an incoming call.
- If the **Headset Auto Answer** function is enabled, and the headset is connected to the phone, the incoming call is answered automatically.
- If the headset is connected to the phone, you can press the button on the headset cable to answer or end a call.

■ Operations During a Call

When there is an ongoing call, you can press  to activate or deactivate the speaker, or press  (**Options**) for the following options:

- **Mute/Unmute:** Allows you to mute or unmute your voice during a call. If you select it, the other party can not hear your voice

during the call. This function is available only after the call is set up. You can not mute/unmute the ringtone.

- **Start Record:** Allows you to record the call.
- **Save Number:** Allows you to enter a phone number and save it to the phonebook.
- **Contacts:** Allows you to search for or create a contact.
- **Messages:** Allows you to access the **Messages** menu.
- **Call Memo:** Allows you to record text memo during a call.
- **Voice Privacy:** Allows you to set the privacy mode, including **Standard** and **Enhanced**.

9 Recording a Voice Clip

1. In the standby mode, select **Menu > Organiser & Tools > Recorder**.
2. Press  to start or pause recording.
3. Press  (**Stop**) to stop recording.
4. Press  to play the voice clip.

All the voice clips are saved in **Menu > Organiser & Tools > My Files > Musics > recorder**.

10 Switching On the Radio

1. Insert the headset to the headset jack properly.
2. In the standby mode, select **Menu > Radio** to access the radio.

■ Auto Tuning

1. In the radio screen, press  (**Options**) to select **Tuning**.
2. Press  to select **Auto Tuning**.

3. The phone automatically searches for channels and saves them to the channel list.

■ Manual Tuning

1. In the radio screen, press  (**Options**) to select **Tuning**.
2. Press  to select **Manual Tuning**.
3. Press  to tune from 87.5 MHz to 108.0 MHz.

In the radio screen, you can press  or headset button to change the channel and press  to adjust the volume.

■ FM recording

Assume that certain channels are searched and saved already. To perform FM recording while listening to a channel, do as follows:

Press  (**Options**) to select **Start Record** to record the current program.

All recorded files are stored in **Menu > Organiser & Tools > My Files > Musics > recorder**.

11 Locking the Keypad

In the standby mode, press and hold  to lock the keypad.

When the keypad is locked, press  to answer incoming calls or make emergency calls.

You can press  (**Unlock**) and  to unlock the keypad.

When the keyguard function is enabled, if there is no operation on the phone for a preset period in the standby mode, the keypad is locked automatically.

12 Changing the Text Input Modes

The indicator of the current text input mode is displayed on the screen. Press  to change the input mode.

- In the editing mode, press  (**Clear**) once to delete the letter on the left of the cursor. Press and hold  (**Clear**) to delete all the letters at a time.
- In the "En" input mode, press  to enter a space. In the "Abc" input mode, press  once to enter a space and twice to enter "0", press  three times to move the cursor to the next line.
- In the "Abc" input mode, press  repeatedly to select and enter the commonly-used punctuations. In the "En" input mode, press  once to enter a full stop, twice and three times to enter a smiley.
- In the "En" and "Abc" input mode, press any key and then press  immediately to change the input modes between "EN", "en" and "En".

13 Entering English (En)

In the "En" input mode, do the following to enter English letters:

1. Press each key only once according to the spelling sequence of the desired word. Then the phone displays the commonly used words according to the numeric sequence of key presses.
2. Press  to scroll to the desired word.
3. Press  to switch the selected characters between upper case and lower case.

4. Press  to enter the word.

Press  to enter the word and a space.

14 Entering English (Abc)

In the "Abc" input mode, you can press a key labeled the desired letters once to enter the first letter on the key, twice to enter the second letter on the key, and so on.

When you enter letters, press  to switch between the uppercase and lowercase of the highlighted letter.

If the letter you want to enter is on the same key as the previous one, enter the latter only after the cursor appears again or after you press

to move the cursor to the next space.

15 Entering Hindi

You can enter Hindi words in the Hindi input mode, including "हिन्दी".

Hindi input mode is similar to English input mode. For details, see "Entering English (En)" and "Entering English (Abc)".

16 Entering Numbers

- In the "123" input mode, press a key labeled the desired number.
- In the "Abc" input mode, press a key repeatedly or press and hold it until the desired number appears on the screen.
- In the "En" input mode, press a key and then press  until the desired number appears on the screen. Or press and hold a key until the desired number appears on the screen.

17 Entering Symbols

1. In any input mode, press  to display a symbol list.
2. Press  to scroll to the desired symbol.
3. Press the numeric key to enter the symbol.

18 Organiser & Tools

■ Alarm Clock

After an alarm clock is enabled, the phone notifies you at the specified time. You can set up to five alarm clocks.

To enable an alarm clock, do as follows:

1. Select **Menu > Organiser & Tools > Alarms**.
2. Press  to select an alarm clock.
3. Press  or  (**Edit**) to set the alarm clock.
4. Press  (**Save**) to save the settings.

To disable an alarm clock, do as follows:

1. Select **Menu > Organiser & Tools > Alarms**.
2. Press  to select an alarm clock.
3. Press  (**Off**) to disable the alarm clock.

You can also select **Menu > Organiser & Tools > Alarms > Cancel All** to disable all alarm clocks.

■ Calendar

With the calendar, you can view dates and set reminders for appointments and meetings.

To add a schedule, do as follows:

1. Select **Menu > Organiser & Tools > Calendar**.

2. Select a desired date.
3. Press  to view the schedule, or select **Options > Add Schedule** to add a schedule.

■ Calculator

With the Calculator, you can perform the addition, subtraction, multiplication, and division operations on your phone.

- Press the number keys to enter figures.
- Press  to enter operators.
- Press  (CE) to clear data.
- Press  (Back) to exit the Calculator.
- Press  to enter a radix point.
- Press  (Clear) to delete the character on the left of the cursor.
- Press  to enter an equal sign.

■ Stopwatch

1. Select **Menu > Organiser & Tools > Stopwatch**.
2. Press  to start measuring time.
3. Press  (Lap) to record the first duration.
Press  (Lap) again to record the second duration, and so on. The stopwatch supports a maximum of five records.
4. Press  to pause, and press  again to continue. After you pause the stopwatch, you can press  (Reset) to reset the stopwatch.

■ World Clock

With the world clock function, you can view the local time and the time of other major cities or areas around the world. Press  to select the desired cities or areas.

19 Profiles

You can set the profile and other sound-related or vibration-related features on the phone. The phone provide six profiles, including **General**, **Silent**, **Vibrate**, **Outdoor**, **One Beep**, and **My Profile**.

You can press  to set the profiles, or select **Options** > **Edit** to edit a preset profile.

20 Using the Airplane Mode

In many countries, you are required by laws to switch off the phone when you are on an airplane. A way of switching off the phone is to set your phone to the airplane mode. In airplane mode, all wireless functions of your phone are disabled.

You can enable or disable the airplane mode by selecting **Menu** > **Settings** > **Airplane Mode**.

21 Security

■ Enabling or Disabling the Phone Lock

The phone lock protects your phone from unauthorized use. The phone lock function is not enabled when you purchase the phone. You can change the default phone lock code **0000** to any numeric string of 4 to 8 digits.

1. Select **Menu** > **Settings** > **Security Settings** > **Phone Lock**.
2. Select one of the following phone lock modes:
 - **Immediate**: to lock the phone immediately.
 - **Power On**: to enable the phone lock when the phone is powered on next time.
 - **Off**: to disable the phone lock.

■ Changing the Phone Lock Code

Do remember your phone lock code. If you forget it, contact your local dealer.

1. Select **Menu > Settings > Security Settings > Change Phone Code**.
2. Enter the correct phone lock code, and then press  (OK).
3. Enter the new phone lock code, and then press  (OK).
4. Enter the new phone lock code again, and then press  (OK).

■ PIN and PUK

Consult the network operator if a SIM card is required. The personal identification number (PIN) protects your SIM card from unauthorized use. The PIN unlocking key (PUK) can unblock the blocked PIN. Both PIN and PUK are delivered with the SIM card. For details, consult your service provider.

If you enter wrong PINs for a specified number of times consecutively, you are required to enter the PUK code.

If you enter wrong PUKs for a specified number of times consecutively, the SIM card is invalid permanently. Contact your service provider for a new card.

■ Setting the PIN Lock

To set the PIN lock, do as follows:

1. Select **Menu > Settings > Security Settings > PIN Code Request**.
2. Select **On/Off** to enable or disable the PIN lock.
3. Enter the correct PIN code, and then press  (OK).

 The default pin code is "0000" .

■ Changing the PIN Code

If your PIN is blocked, you can change your PIN by entering the correct PUK.

1. Enter the correct PUK code, and then press (OK).
2. Enter a new PIN, and then press (OK).
3. Enter the PIN again, and then press (OK).

22 Menu Commands

 Contacts	
Search	Allows you to find a contact from the phone book.
Add New	Allows you to add new contacts to the phone book. If you add a new contact to your phone, each contact may have three numbers. If you add a new contact to the SIM card, each contact only has one number. Your phone memory can save up to 500 contacts.
Groups	Allows you to view or rename a group, delete the members of a group, add members to a group and set the group ring. Allows you to set up to 10 groups.
Speed Dial	Allows you to make a call by pressing and holding only one number key (except 0 and 1) in the standby mode. 8 speed dial options are available.
My Number	Allows you to set your own phone number.
Management	Show Contacts From: Allows you to choose the current storage location of the contacts. Delete Multiple: Allows you to delete multiple contacts at a time. Copy Multiple: Allows you to copy multiple contacts at a time. Move Multiple: Allows you to move multiple contacts at a time.

SIM Tool Kit	Features available on the SIM card can be accessed through this menu.

23 Warnings and Precautions

This section contains important information pertaining to the operating instructions of your device. It also contains information about how to use the device safely. Read this information carefully before using your device.

Electronic Device

Power off your device if using the device is prohibited. Do not use the device when using the device causes danger or interference with electronic devices.

Medical Device

- Follow rules and regulations set forth by hospitals and health care facilities. Do not use your device when using the device is prohibited.
- Pacemaker manufacturers recommend that a minimum distance of 15 cm be maintained between a device and a pacemaker to prevent potential interference with the pacemaker. If you are using a pacemaker, use the device on the opposite side of the pacemaker and do not carry the device in your front pocket.

Potentially Explosive Atmosphere

Power off your device in any area with a potentially explosive atmosphere, and comply with all signs and instructions. Areas that may have potentially explosive atmospheres include the areas where you would normally be advised to turn off your vehicle engine. Triggering of sparks in such areas could cause an explosion or a fire, resulting in bodily injuries or even deaths. Do not power on your device at refueling points such as service stations. Comply with restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, and chemical plants. In addition, adhere to restrictions in areas where blasting operations are in progress. Before using the device, watch out for areas that have potentially explosive

atmospheres that are often, but not always, clearly marked. Such locations include areas below the deck on boats, chemical transfer or storage facilities, and areas where the air contains chemicals or particles such as grain, dust, or metal powders. Ask the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) whether this device can be safely used in their vicinity.

Traffic Security

Observe local laws and regulations while using the device. In addition, if using the device while driving a vehicle, comply with the following guidelines:

- Concentrate on driving. Your first responsibility is to drive safely.
- Do not talk on the device while driving. Use hands-free accessories.
- When you have to make or answer a call, park the vehicle at the road side before using your device.
- RF signals may affect electronic systems of motor vehicles. For more information, consult the vehicle manufacturer.
- In a motor vehicle, do not place the device over the air bag or in the air bag deployment area. Otherwise, the device may hurt you owing to the strong force when the air bag inflates.
- Do not use your device while flying in an aircraft. Power off your device before boarding an aircraft. Using wireless devices in an aircraft may cause danger to the operation of the aircraft and disrupt the wireless telephone network. It may also be considered illegal.

Operating Environment

- Do not use or charge the device in dusty, damp, and dirty places or places with magnetic fields. Otherwise, it may result in a malfunction of the circuit.
- The device complies with the RF specifications when the device is used near your ear or at a distance of 1.5 cm from your body.

Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep your device 1.5 cm away from your body to meet the requirement earlier mentioned.

- On a stormy day with thunder, do not use your device when it is being charged, to prevent any danger caused by lightning.
- When you are on a call, do not touch the antenna. Touching the antenna affects the call quality and results in increase in power consumption. As a result, the talk time and the standby time are reduced.
- While using the device, observe the local laws and regulations, and respect others' privacy and legal rights.
- Keep the ambient temperature between 0°C and 40°C while the device is being charged. Keep the ambient temperature between 0°C to 40°C for using the device powered by a battery.

Prevention of Hearing Damage

Using a headset at high volume can damage your hearing. To reduce the risk of damage to hearing, lower the headset volume to a safe and comfortable level.

Safety of Children

Comply with all precautions with regard to children's safety. Letting the child play with your device or its accessories, which may include parts that can be detached from the device, may be dangerous, as it may present a choking hazard. Ensure that small children are kept away from the device and accessories.

Accessories

Use the accessories delivered only by the manufacturer. Using accessories of other manufacturers or vendors with this device model may invalidate any approval or warranty applicable to the device, result in the non-operation of the device, and cause danger.

Battery and Charger

- Unplug the charger from the electrical plug and the device when not in use.
- The battery can be charged and discharged hundreds of times before it eventually wears out. When the standby time and the talk time are shorter than the normal time, replace the battery.
- Use the AC power supply defined in the specifications of the charger. An improper power voltage may cause a fire or a malfunction of the charger.
- Do not connect two poles of the battery with conductors, such as metal materials, keys, or jewelries. Otherwise, the battery may be short-circuited and may cause injuries and burns on your body.
- Do not disassemble the battery or solder the battery poles. Otherwise, it may lead to electrolyte leakage, overheating, fire, or explosion.
- If battery electrolyte leaks out, ensure that the electrolyte does not touch your skin and eyes. When the electrolyte touches your skin or splashes into your eyes, wash your eyes with clean water immediately and consult a doctor.
- If there is a case of battery deformation, color change, or abnormal heating while you charge or store the battery, remove the battery immediately and stop using it. Otherwise, it may lead to battery leakage, overheating, explosion, or fire.
- If the power cable is damaged (for example, the cord is exposed or broken), or the plug loosens, stop using the cable at once. Otherwise, it may lead to an electric shock, a short circuit of the charger, or a fire.
- Do not dispose of batteries in fire as they may explode. Batteries may also explode if damaged.

Cleaning and Maintenance

- The device, battery, and charger are not water-resistant. Keep them dry. Protect the device, battery, and charger from water or vapor. Do not touch the device or the charger with a wet hand.

Otherwise, it may lead to a short circuit, a malfunction of the device, and an electric shock to the user.

- Do not place your device, battery, and charger in places where they can get damaged because of collision. Otherwise, it may lead to battery leakage, device malfunction, overheating, fire, or explosion.
- Do not place magnetic storage media such as magnetic cards and floppy disks near the device. Radiation from the device may erase the information stored on them.
- Do not leave your device, battery, and charger in a place with an extreme high or low temperature. Otherwise, they may not function properly and may lead to a fire or an explosion. When the temperature is lower than 0°C, performance of the battery is affected.
- Do not place sharp metal objects such as pins near the earpiece. The earpiece may attract these objects and hurt you when you are using the device.
- Before you clean or maintain the device, power off the device and disconnect it from the charger.
- Do not use any chemical detergent, powder, or other chemical agents (such as alcohol and benzene) to clean the device and the charger. Otherwise, parts of the device may be damaged or a fire can be caused. You can clean the device and the charger with a piece of damp and soft antistatic cloth.
- Do not dismantle the device or accessories. Otherwise, the warranty on the device and accessories is invalid and the manufacturer is not liable to pay for the damage.

Emergency Call

You can use your device for emergency calls in the service area. The connection, however, cannot be guaranteed in all conditions. You should not rely solely on the device for essential communications.

Certification Information (SAR)

This device meets guidelines for exposure to radio waves.

Your device is a low-power radio transmitter and receiver. As recommended by international guidelines, the device is designed not to exceed the limits for exposure to radio waves. These guidelines were developed by the independent scientific organization International Commission on Non-Ionizing Radiation Protection (ICNIRP) and include safety measures designed to ensure safety for all users, regardless of age and health.

The Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a device. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level of the device when being operated can be well below the value. This is because the device is designed to use the minimum power required to reach the network.

The SAR limit adopted by USA and Canada is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The highest SAR value reported to the FCC and IC for this device type when tested for use at the ear is 1.43 W/kg, and when properly worn on the body is 1.38 W/kg.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications made to this device not expressly approved by Huawei Technologies Co., Ltd. may void the FCC authorization to operate this device.
