- Blinking twice every 2s: The USB Stick finds a network.
- Blinking once every 0.2s: The USB Stick is transmitting data.

❹ Strap Hole

You can tie a strap to the USB Stick through the strap hole.

Installation/Removal Guide

The procedure for installing the management program depends on the operating system (OS) installed on your PC. The following sections take Windows XP as an example.

Connecting the USB Stick to a PC

Plug the USB Stick into the USB port of your PC.

Installing the USB Stick Management Program

1. Connect the USB Stick with the PC.
2. The OS automatically detects and recognizes the new hardware and starts the installation wizard.

Note:

If the auto-run program does not respond, find the **AutoRun.exe** file in the driver path. Then double-click **AutoRun.exe** to run the program.

3. Follow the on-screen instructions of the installation wizard.
4. After the program is installed, a shortcut icon for the management program appears on the desktop.

Starting the Management Program

After being installed, the management program starts automatically. Then every time the USB Stick is connected to the PC, the management program starts automatically.

You can also double-click the shortcut icon on the desktop to start the management program.

Removing the USB Stick

1. Double-click  in the notification area. Then the **Unplug or Eject Hardware** dialog box appears.
2. Select the corresponding hardware and then click **Stop**.
3. When the message "**It is safe to remove the device**" appears, remove the USB Stick.

Uninstalling the Management Program

1. Choose **Start > Control Panel > Add or Remove Programs**.
2. Find the management program and click **Remove** to uninstall the management program.

Note:

Exit the management program before uninstalling it.
