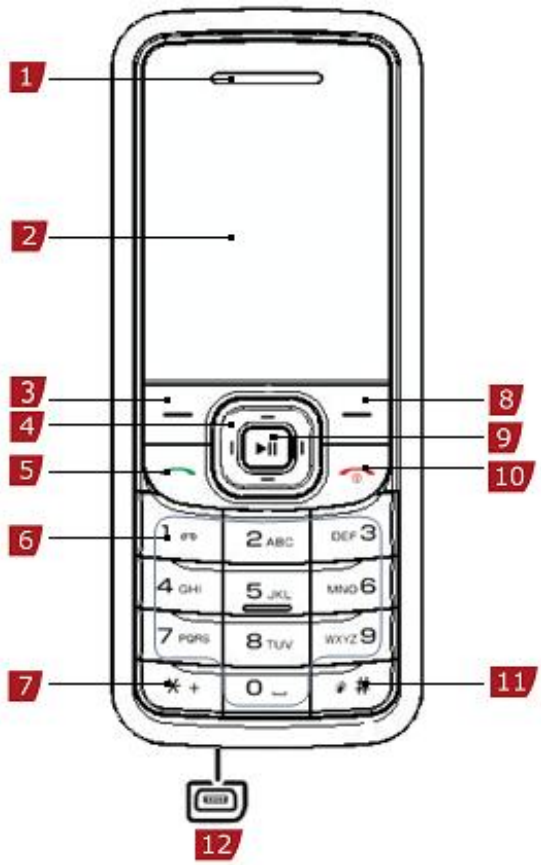
1 Getting to Know Your Phone

Your Phone

The following figure shows the appearance of your phone and it is for your reference only.



1	Earpiece	7	* key
2	Screen	8	Right soft key
3	Left soft key	9	Confirm/Music key
4	Navigation keys	10	End/Power key
5	Call/Answer key	11	# key
6	Number keys	12	Charger/Headset jack

Keys and Functions

Press…	To…
	• Make a call. • Answer an incoming call. • View call logs in standby mode.
	• Power on or power off the phone (by pressing and holding the key for about 3s for about 3s). • End a call or reject an incoming call. • Return to the standby mode.
	• Display **Menu** in standby mode. • Select the highlighted item.
	• Display **Phonebook list** in standby mode. • Return to the previous menu.
	• Display **Audio player** in standby mode. • Confirm a selection. • Take a picture on the **Camera** screen.
	• Access **Shortcuts** ( ), **File manager** ( ), **Write message** ( ), and **Camera** ( ) in standby mode. • Increase the volume ( ) or decrease the volume ( ) during a call.

Press…	To…
	• Enter numbers, letters, and characters. • Call the voice mail center in standby mode (by pressing and holding the **1** key for about 3s). • Speed-dial a phone number in standby mode if the phone number is assigned to a key from **2** to **9** (by pressing and holding the key for about 3s). • Select a submenu item labeled with the corresponding number.
	• Press the key once to enter *****, twice to enter **+**, three times to enter **P**, and four times to enter **w** in standby mode. • Enable or disable the meeting mode in standby mode (by pressing and holding the key for about 3s). • Display the symbol list in any text input mode.
	• Enter **#**. • Lock the keypad in standby mode (by pressing and holding the key for about 3s). • Switch text input modes when editing texts.

Screen Icons

Icon	Indicates…
	Signal strength.
	The **General** profile is activated.
	The **Silence** profile is activated.

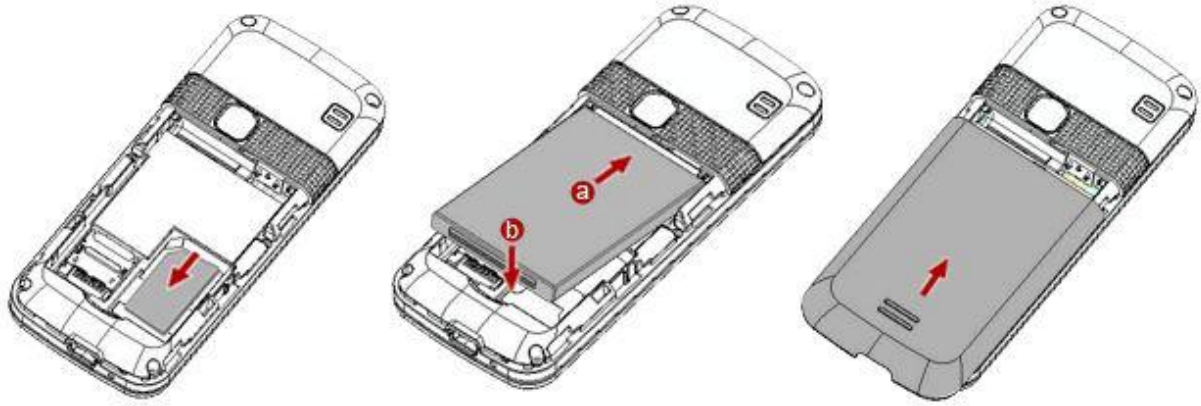
2 Getting Started

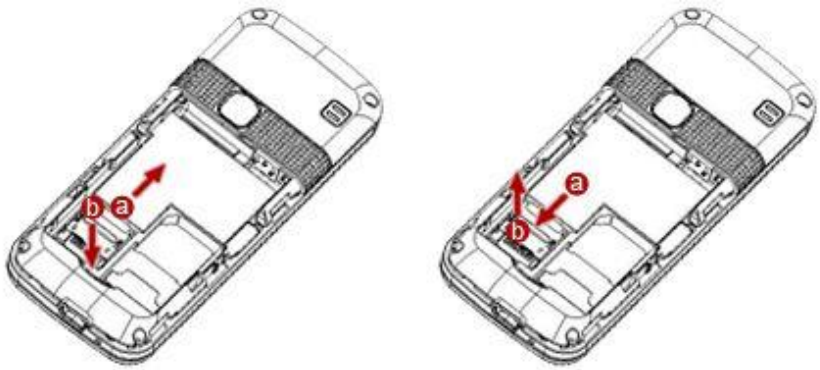
Installing the SIM Card and the Battery

Ensure that the golden contact area on the SIM card is facing downward, and the beveled corner is properly aligned with the SIM card slot.



Installing the microSD Card

You can expand the storage space by installing a microSD card with a maximum capacity of up to 4 GB on your phone. Ensure that inserting the memory card with the golden contact area facing downward.



Charging the Battery

1. Connect the charger to the charger jack on the phone.
2. Connect the charger to an AC power socket.

3. Wait until the battery is completely charged. During the charging, the charging icon is displayed in animation. When the charging icon becomes static, the battery is completely charged.
4. Disconnect the charger from the phone.
5. Disconnect the charger from the AC power socket.

Automatically Switching Between Profiles

You can set your phone to activate different profiles for different time period. The phone can automatically switch between profiles for a maximum of three times in each day according to your settings.

1. In standby mode, select **Menu** > **User profiles** > **Profile Switch Timing**.
2. Select a option.
3. Press (**Edit**) to set the status, time and assign profile.

Using the Function Menu

1. In standby mode, press (**Menu**).
2. Press to select the desired function menu.
3. Press (**OK**) or to display the selected menu.

4. Press to select a submenu.
5. Press (**OK**) or to display the menu.
6. Press (**Back**) to return to the previous menu or exit the function menu.

   To return to the standby mode, press .

Phone Lock

The phone lock protects your phone from unauthorized use. By default, the phone lock function is disabled. You can change the default phone lock code (**1234**) into any numeric string of four to eight digits.

Do remember your phone lock code. If you forget it, contact the service center.

PIN and PUK

The personal identification number (PIN) protects your SIM card from unauthorized use. The PIN unblocking key (PUK) can unlock the blocked PIN. Both PIN and PUK are delivered with the SIM card. For details, contact your service provider.

If you enter wrong PINs for a specified number of times consecutively, the phone asks you to enter the PUK.

If you enter wrong PUKs for a specified number of times consecutively, the SIM card is invalidated permanently. Contact your service provider for a new one.

Locking the Keypad

To lock the keypad, press and hold for about 3s.

To unlock the keypad, press (**Unlock**) and then in succession.

If the **Auto keypad lock** function is enabled and the phone is idle for a preset period in standby mode, the keypad is locked automatically.

When the keypad is locked, you can press to answer an incoming call or make an emergency call.

3 Call Function

Making a Call

1. In standby mode, enter the phone number.

- To make an international call, press twice consecutively to enter the international long distance code. Then enter the country code or region code, area code, and phone number in sequence.
- To call an extension, enter the phone number, press three times consecutively to insert **P**, and then enter the extension number.

2. Press to dial the number.
3. Press to end the call.

- You can also make a call through call logs, contacts, and messages.
- During a call, press and to adjust the volume.

Answering a Call

When there is an incoming call, you can do as follows:

- Press to answer it.
- Press to reject it.

- Press (**Silent**) to mute it, and then press (**Reject**) to reject it.

If the **Any key** answer function is enabled, you can press any key except  and to answer an incoming call.

4 Text Entry

Changing the Text Input Mode

The indicator of the current text input mode is displayed in the upper left corner of the screen. You can press to change the text input mode.

Indicator	Text Input Mode
ABC and abc, ES and es	Multitap input mode
eZi ABC and eZi abc, eZi ES and eZi es	Smart input mode
123	Number input mode

Press (**Clear**) once to delete the letter on the left of the cursor. Press and hold (**Clear**) for about 3s to clear all the letters.

Multitap Input Mode

In multitap input mode, you can press a key labeled with the desired letter once to enter the first letter on the key, twice to enter the second letter on the key, and so on.

- Press once to enter a space, twice to enter **0**.

Smart Input Mode

In smart input mode, enter a word as follows:

1. Press each key only once according to the spelling sequence of the desired word.
   The phone displays the commonly used word according to the sequence of key presses.
2. Press to scroll to the desired word.
3. Press to enter the word.

- Press to enter a space.

Entering a Digit

- In "123" input mode, you can directly press a number key labeled with the desired digit.
- In multitap input mode, press the number key labeled with the desired digit repeatedly until the digit appears on the screen.

Entering a Symbol

1. Press to display the symbol list.
2. Press to scroll to the desired symbol.
3. Press to enter the symbol.

5 Phonebook

Creating a New Contact

1. Select **Menu** > **Phonebook** > **Add new contact**.
2. Select **To SIM** or **To phone** for saving the contact.
3. Edit the contact.
4. Press to save the contact.

Searching for a Contact

1. Press **Menu** > **Phonebook**.
2. Select from the following options:

- **Quick search**: to enter the contact name, or the first several letters of a contact name.
- **Search contact**: to enter the intact phone name, and then press (**Options**) > (**Search**).

6 Multimedia

Camera

Press in standby mode, or select **Menu** > **Multimedia** > **Camera** to launch the camera.

In camera mode, you can do as follows:

- Press to take a photo.

  Then, press (**Save**) to save the photo, and press (**Delete**) to delete it.

- Press (**Options**) to view photos, or perform relevant settings.

Video Recorder

1. Select **Menu** > **Multimedia** > **Video recorder**.
2. Press (**Options**) to set relevant parameters.
3. Press to start/stop recording.

Video Player

1. Select **Menu** > **Multimedia** > **Video player**.
2. Press to select a video file.
3. Press to play the video.
   When the video is being played, you can do as follows:

- Press and to adjust the volume.
- Press and to fast forward or rewind the video.
- Press to pause/continue the video.

4. Press  (**Stop**) to stop playing the video.

FM Radio

The headset cable functions as an antenna as well. To ensure good reception of radio programs, do not disconnect the headset from the phone or severely bend the headset cable.

1. Connect a compatible headset to the phone.
2. Select **Menu** > **Multimedia** > **FM radio.**
3. On the **FM radio** screen, you can do as follows:

- Press to stop/continue.
- Press and to adjust the volume.
- Press  or to tune by 0.1 MHz.
- Press and then  or to switch channels.

- Press the number key corresponding to the serial number of a channel to play the channel.
- Press (**Options**) and select **Channel list**, **Manual input**, **Auto search**, **settings**, **Record**, **Append** or **File list**.
- Press the key on the headset cable to switch to the next channel.

Sound Recorder

1. Select **Menu** > **Multimedia** > **Sound recorder**.
2. Press (**Options**) and select **New Record**.
3. During the recording process, press or to pause/continue.

Press (**Stop**) to stop recording.

7 Messags

Writing and Sending a Text Message

1. Select **Menu** > **Messages** > **Text message > Write message**.
2. Write the message.
3. Press (**Options**) for the following options:

- **Send only**: to enter the phone number or select the recipient from the phonebook list.
- **Save and send**: to add the recipient and set to save the message after sending it.
- **Send to many**: to add up to 10 recipients at a time.
- **Send by groups**: to add all members of a group as recipients.

4. Press to send the message.

Writing and Sending a Multimedia Message

1. Select **Menu** > **Messages** > **MMS** > **Write message**.
2. Select **To**, **Cc**, or **Bcc**.
   Add phone numbers or email addresses to be sent, carbon copied, or blind carbon copied to.
3. Select **Subject**.
   Edit the subject of the message.

4. Select **Edit content**.
   Edit the content of the message. You can add pictures, audio and attachments to the multimedia message.
5. Press  (**Done**) and select **Send**.

- Contact your service provider for the availability of the Multimedia Messaging Service (MMS) and the method for subscribing to this service.
- Open multimedia messages with caution. Objects in multimedia messages may contain viruses that can damage your phone, such as malicious software.

6.

8 Services

You can access WAP sites and use WAP-based services on your phone. To access the WAP sites through your phone, you need to subscribe the corresponding service from the service provider and set the relevant parameters on your phone first.

For details about the service and the charges, contact your service provider.

Network Settings

To access the WAP sites through your phone, you need to set the data account and WAP parameters on your phone first.

Setting the Connection Profile

1. Press **Menu** > **Services** > **Data account**.
2. Select the network type.
3. Select your service provider.
4. Press (**Edit**) to set the account information.
5. Press  (**Done**) to save the settings.

Setting the WAP

1. Press **Menu** > **Services** > **Wap** > **Settings** > **Profiles**.
2. Select your service provider.
3. Select **Edit account**, and set the account information.
4. Press (**Done**) to save the settings.

5. Select **Activate account** to activate the account.

Connecting to the Network

1. Press **Menu** > **Services** > **Wap** > **Input address**.
2. Enter a URL address.
3. Press (**Options**) and select **Done** to access the address.

9 Organizer

Ebook reader

Your phone supports e-books in .txt formats.

1. Select **Menu** > **Organizer** > **Ebook** to display the bookshelf. The phone automatically adds the e-books stored in the **Ebook** folder of the phone or microSD card to the bookshelf.
2. Select an e-book.
3. Press (**Options**) for the following options.

- **Open ebook**: to start reading the e-book.
- **Global settings**: to set the font, scroll type, encoding, and alignment.

4. Press (**Back**) to stop reading.

- When reading an e-book, you can press and to turn the pages.
- Store e-books in the **Ebook** folder of the phone or the microSD card. If you open an e-book in another folder, the phone automatically moves the e-book to the **Ebook** folder so that you can find it easily in your next reading.

10 Warnings and Precautions

This section contains important information pertaining to the operating instructions of your device. It also contains information about how to use the mobile safely. Read this information carefully before using your device.

Electronic Device

Power off your device if using the device is prohibited. Do not use the device when it causes danger or interference with electronic devices.

Medical Device

- Power off your device and follow the rules and regulations set forth by the hospitals and health care facilities.
- Pacemaker manufacturers recommend that a minimum distance of 15 cm be maintained between a device and a pacemaker to prevent potential interference with the pacemaker. If you are using a pacemaker, use the device on the opposite side of the pacemaker and do not carry the device in your front pocket.
- Some wireless devices may affect the performance of the hearing aids. For any such problems, consult your service provider.

Potentially Explosive Atmospheres

Switch off your device in any area with a potentially explosive atmosphere, and comply with all signs and instructions. Areas that may have potentially explosive atmospheres include the areas where you would normally be advised to turn off your vehicle engine. Triggering of sparks in such areas could cause an explosion or fire, resulting in bodily injuries or even deaths.

Do not switch on the device at refueling points such as service stations. Comply with restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, and chemical plants. Also, adhere to restrictions in areas where blasting operations are in progress. Before using the device, watch out for areas that have potentially explosive atmosphere that are often, but not always, clearly marked. Such locations include areas below the deck on boats, chemical transfer or storage facilities and areas where the air contains chemicals or particles such as grain, dust, or metal powders. Ask the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) if this device can be safely used in their vicinity.

Traffic Security

Observe local laws and regulations while using the device. Also, if using the device while driving a vehicle, please comply with the following guidelines:

- Concentrate on driving. Your first responsibility is to drive safely.
- Do not talk on the device while driving. Use hands-free accessories.
- When you have to make or answer a call, park the vehicle at the road side before using your device.
- RF signals may affect electronic systems of motor vehicles. For more information, consult the vehicle manufacturer.
- In a motor vehicle, do not place the device over the air bag or in the air bag deployment area. Otherwise, the device may hurt you owing to the strong force when the air bag inflates.
- Do not use your device while flying in an aircraft. Switch off your device before boarding an aircraft. Using wireless devices in an aircraft may be dangerous to the operation of

the aircraft, disrupt the wireless telephone network, and may be considered illegal.

Operating Environment

- Do not use or charge the device in dusty, damp or dirty places or places with magnetic fields. Otherwise, the circuit may not function properly.
- The device complies with the RF specifications when the device is used near your ear or at a distance of 1.5 cm from your body. Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep your device 1.5 cm away from your body to meet the requirement earlier mentioned.
- On a thunder and stormy day, do not use your device when it is being charged, to prevent any danger caused by lightning.
- When you are on a call, do not touch the antenna. Touching the antenna affects the call quality and results in increase in power consumption. As a result, the talk time and standby time are reduced.
- While using the device, observe the local laws and regulations, and respect others' privacy and legal rights.
- Use accessories authorized by manufacturers. Using unauthorized accessories will render the warranty null and void.
- Keep the ambient temperature between 0°C and 45°C while the device is being charged. Keep the ambient temperature between -10°C to 55°C for using the device powered by battery.

Preventing Hearing Damage

Using the receiver, earbuds, headphones, speakerphone, or earpieces at high volume can result in permanent hearing loss.

Be extremely careful when listening at high decibel levels. Set the volume to a safe level. If you experience strange sounds in your ears like ringing or if you hear muffled speech, get your hearing checked. If you continue to use high volume, your hearing will soon get affected.

Hearing experts offer the following suggestions to protect your hearing:

- Reduce the time you use the receiver, earbuds, headphones, speakerphone, or earpieces at high volume.
- Do not increase the volume to block noisy surroundings.
- Reduce the volume if you cannot hear people speaking near you.

Safety of Children

Please comply with all precautions with regard to children's safety. Letting the child play with your device or its accessories, which may include parts that can be detached from the device, may prove dangerous, as it may present a choking hazard. Make sure that small children are kept away from the device and accessories.

Environment Protection

Follow all the local regulations regarding the disposal of your devices or electrical accessories (such as chargers, headsets, or batteries). Recycle them. Do not dispose of an exhausted battery or a used device in a garbage can.

Accessories

Use only the accessories, such as the charger, battery, and headset, delivered by manufacturer. Using accessories of other manufacturers or vendors with this device model might invalidate any approval or warranty applicable to the device,

might result in the non-operation of the device, and might be dangerous.

Battery and Charger

- Unplug the charger from the electrical plug and the device when not in use.
- The battery can be charged and discharged hundreds of times before it eventually wears out. When the standby time and talk time are shorter than normal, replace the battery.
- Use the AC power supply defined in the specifications of the charger. An improper power voltage may cause fire or the charger may not function properly.
- If the ambient temperature is considerably low or high, the capacity and life of the battery is reduced. When the temperature is lower than 0°C, performance of the battery is affected.
- Do not connect two poles of the battery with conductors such as metal materials, keys or jewelries. Otherwise, the battery may be short-circuiting and may cause injuries and burns on your body.
- Do not disassemble the battery or solder the battery poles. Otherwise, it may lead to electrolyte leakage, overheating, fire, or explosion.
- If battery electrolyte leaks out, make sure that the electrolyte does not touch your skin and eyes. When the electrolyte touches your skin or splashes into your eyes, wash your eyes with clean water immediately and consult a doctor.
- If the battery is damaged, or the color changes or gets abnormally heated while you charge or store the battery, remove the battery immediately and stop using it. Otherwise, it may lead to battery leakage, overheating, explosion, or fire.

- If the power cable is damaged (for example, the lead is exposed or broken), or the plug loosens, stop using the cable at once. Otherwise, it may lead to electric shock, short-circuit of the charger, or a fire.
- Do not dispose of batteries in fire as they may explode. Batteries may also explode if damaged.

Clearing and Maintenance

- The device, battery, and charger are not water-resistant Keep them dry. Protect the device, battery and charger from water or vapor. Do not touch the device and charger with a wet hand. Otherwise, it may lead to short-circuit or malfunction of the device and electric shock to the user.
- Do not place your device, battery, or charger in places where it can get damaged because of collision. Otherwise, it may lead to battery leakage, device malfunction, overheating, fire, or explosion.
- Do not place magnetic storage media such as magnetic cards and floppy disks near the device. Radiation from the device may erase the information stored on them.
- Do not leave your device, battery, or charger in a very hot or cold place. Otherwise, they may not function properly and may lead to a fire or an explosion.
- Do not place sharp metal objects such as pins near the earpiece. The earpiece may attract these objects and hurt you when you are using the device.
- Before you clean or maintain the device, power off the device and disconnect it from the charger.
- Do not use any chemical detergent, powder, or other chemical agents (such as alcohol and benzene) to clean the device and the charger. Otherwise, parts of the device may

get damaged or a fire can be caused. You can clean the device and the charger with a piece of damp and soft antistatic cloth.

- Do not dismantle the device or accessories. Otherwise, manufacturer is not liable to pay for damages as the device and accessories are not covered by warranty.

Emergency Call

You can use your device for emergency calls in the service area. The connection, however, cannot be guaranteed in all conditions. You should not rely solely on the device for essential communications.

FCC Regulations:

●This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

●This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular

installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user‘s authority to operate the equipment.

●The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

RF Exposure Information (SAR)

This mobile phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the poser required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 1.53 W/kg and when worn on the body, as described in this user guide, is 0.874 W/kg (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements.)

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: QISG3501.

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do no t use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm from your body when the phone is switched on.
