Icon	Indicates...
	Vib. only enabled.
	Vib. and ring enabled.
	Vib. then ring enabled.
	Silence profile activated.
	microSD card inserted.

2 Getting Started

Installing the SIM Card and Battery

When installing the subscriber identification module (SIM) card, ensure that the gold contact area faces down, and that the beveled edge of the SIM card aligns with that of the SIM card slot.

 The phone supports two SIM cards, and you can select **Menu > Settings > Dual SIM settings > Dual SIM open** to enable dual-SIM mode. When this mode is enabled, you can use two SIM cards at one time.

Removing the Battery and SIM Card

Before removing the battery and SIM card, ensure that your phone is powered off.

Installing and Removing a microSD Card

 Before installing or removing a microSD card, power the phone off.

When installing a microSD card, ensure that the gold contact area faces down, and that the beveled edge of the microSD card aligns with that of the microSD card slot.

Charging the Battery

1. Connect the small end of the USB cable to the phone's charger jack and the large end to the charger.

2. Connect the charger to a power outlet.
3. Wait until the battery is fully charged.
While the battery is charging, the charging icon blinks. When the charging icon stops blinking, the battery is fully charged.
4. Unplug the charger from the power outlet and the USB cable from the phone.

Phone Lock

The phone lock protects your phone from unauthorized use. The preset password to unlock your phone is **1234**. By default, the phone lock is disabled. Once you enable the phone lock, you must enter the password each time you power on the phone.

To enable the phone lock:

1. In standby mode, select **Menu > Settings > Security settings > Phone security > Phone lock**.
2. Enter the preset password.

To change the preset password:

1. In standby mode, select **Menu > Settings > Security settings > Phone security > Change password**.
2. Enter the preset password.
3. Enter a new password.
The password must be a numeric string between four and eight digits.
4. Enter the new password again to confirm it.

If you forget the password, contact your service provider.

PIN and PUK

The personal identification number (PIN) protects your SIM card from unauthorized use.

If you incorrectly enter the PIN a specified number of times, the PIN is blocked and the phone prompts you to enter the PIN unblocking key (PUK). If this occurs, enter the PUK to unblock the blocked PIN.

If you incorrectly enter the PUK a specified number of times, the SIM card will become permanently invalid, and you must contact your service provider for a new SIM card.

Both the PIN and the PUK are provided with the SIM card. For details, contact your service provider.

To enable the PIN lock:

1. In standby mode, select **Menu > Settings > Security settings > SIM1/SIM2 security > PIN lock**.
2. Enter the PIN, and press  **1 (OK)** or .

Locking and Unlocking the Keypad

To lock the keypad, press and hold  for 3 seconds in standby mode. To unlock the keypad, press  **1 (Unlock)**, then  **2 (OK)**.

If the **Auto keypad lock** function is enabled, the phone will automatically lock the keypad after being idle in standby mode for a pre-defined period.

 When the keypad is locked, you can press  to answer a call, as well as  **1 (Options)** or , and then **Answer**. You can also press  to make an emergency call.

Entertainment

In addition to being a communication device, your phone also serves as an entertainment center by providing you with the following applications:

- **Image viewer:** view pictures stored in the phone memory or microSD card.
- **Video recorder:** record videos.

- **Video Player:** play video files stored in the phone memory or microSD card.
- **Audio Player:** play audio files stored in the phone memory or microSD card.
- **Sound Recorder:** record audio clips.
- **FM Radio:** listen to radio programs over the FM frequency.
- **Ebook Reader:** read ebooks stored in the phone memory or microSD card.
- **Java** (optional): to run Java applications.
- **Games:** to play games.
- **Camera:** take pictures.

3 Voice Services

Dual-Card Management

Your phone supports dual-card dual-standby mode, but the two SIM cards cannot be used simultaneously. When you are making a call or using data services with one SIM card, the other SIM card cannot access network services.

Making a Call

1. In standby mode, enter a phone number.
 - To make an international call, press  twice to enter the plus sign (+). Then enter the country or region code, area code, and phone number.
 - To call an extension number, enter the switchboard number, press  three times to enter **p**, and enter the extension number.

2. Press  or  and select **SIM1/SIM2 voice call** to call the number.
3. Press  to end the call.

- You can also make calls from the call history, phonebook, or messages.
- During a call, you can press  to adjust the in-call volume. You can also press  **1 (Options)** and select **Volume**, and then press .

Answering a Call

When there is an incoming call:

- Press  to answer the call.
- Press  **1 (Options)** or , and select **Answer** to answer the call.
- Press  **2 (Silent)** to mute the ringtone, and press  **2 (Reject)** or  to reject the call.
- If the **Silence** profile is activated, press  **2 (Reject)** or  to reject the call.

If the **Any key** answer function is enabled, you can press any key except  **2** and  to answer a call.

4 Text Input

Changing the Text Input Mode

The current text input mode indicator is displayed in the upper left corner of the screen. Press  to switch between text input modes.

Indicator	Text Input Mode
ABC, abc, and Abc	Multi-tap input modes
S ABC, S abc, and S Abc	Predictive input modes
123	Number input mode

- In any text input mode, press  (Clear) to delete the last character entered, or press and hold  (Clear) for about 3 seconds to delete all the characters entered.
- In multi-tap input mode, repeatedly press  to select and enter commonly used symbols, and press  once to enter a space and twice to enter 0.
- In predictive input mode, press  to display commonly used symbols, and press  to enter a space.
- In any text input mode, press  to access the symbol list.

Entering a Word

- To enter a word in multi-tap input mode, repeatedly press the key labeled with each letter in the word until the desired letter is displayed on the screen. Then repeat this process until the full word is displayed.
- To enter a word in predictive input mode:
 1. Press each key once according to the spelling sequence of the desired word.
The phone displays candidate words that may be spelt by the keystroke sequence.
 2. Use  to scroll to the desired word, and press   to turn pages.
 3. Press  **(Select)** or  to enter the word.

Entering a Digit

- In number input mode, press the number key labeled with the desired digit.
- In multi-tap input mode, repeatedly press the number key labeled with the desired digit until it is displayed. You can also press and hold the number key labeled with the desired digit until it is displayed.
- In predictive input mode, press the number key labeled with the desired digit once, and press  to scroll to the desired digit.

Entering a Symbol

1. Press  to display the symbol list.
2. Use  to scroll to the desired symbol.
3. Press  **(OK)** or  to enter the symbol.

5 File Manager

The **File Manager** application lets you manage files and folders stored in the phone memory or microSD card.

To manage files and folders:

1. Select **Menu > File Manager**.
2. Use   to scroll to the desired folder, and press  to open the folder, or press  **1 (Options)** for the following options:
 - **Open**: open the folder.
 - **New folder**: create a folder.
 - **Rename**: rename the folder.
 - **Delete**: delete the folder.
 - **Sort by**: sort folders by name, type, time modified, or size.
3. Use   to scroll to the desired file, and press  to open the file or press  **1 (Options)** for additional operations. The operations applicable to files may be different from those applicable to folders.

6 Phonebook

Creating a Contact

1. In standby mode, select **Menu > Phonebook > Add new contact**.
2. Press  and select **To SIM1**, **To SIM2** or **To Phone** to select the location that you want to use to save the contact.

3. Enter the name and phone number of the contact.
4. Press  or  (**Options**) and select **Save** to save the contact.

- To choose a different storage location, select **Menu > Phonebook > Options > Phonebook settings > Preferred storage** and select **All**.
- You can edit **Email address**, **Caller picture**, and **Caller ringtone** only when you save contacts to the phone memory.

Searching for a Contact

1. In standby mode, select **Menu > Phonebook**.
2. Enter the first letter of the contact name.
3. Use   to scroll to the desired contact.

Setting a Speed Dial Number

1. In standby mode, select **Menu > Phonebook**.
2. Press  (**Options**), and select **Phonebook settings > Speed dial > Status > On**.
3. Select **Set numbers**, and set one of the 2–9 keys as a speed dial key.
4. Enter the number that you want to assign to the speed dial key. In standby mode, you can press and hold the speed dial key to speed-dial the number.

7 Multimedia

Image Viewer

The **Image viewer** application lets you manage your pictures.

To manage pictures:

1. Select **Menu > Multimedia > Image viewer**.

2. Use  to scroll to the desired picture, and press  to view the picture or press  (Options) for the following options:

- **View:** view the picture.
- **Image information:** display detailed information about the picture.
- **Browse style:** browse the picture in list or matrix style.
- **Send:** send the picture to other devices via multimedia message, email or Bluetooth.
- **Use as:** use the picture as wallpaper, screen saver, or contact picture.
- **Rename:** rename the picture.
- **Delete:** delete the picture.
- **Sort by:** sort pictures by name, type, time modified, or size.
- **Mark several:** select and mark one or more pictures to delete, copy, move or send.
- **Delete all files:** delete all pictures.
- **Storage:** view pictures stored in the phone memory or microSD card.

Video Recorder

1. In standby mode, select **Menu > Multimedia > Video recorder**.
2. Press 1 to configure video settings.
3. Frame the scene you want to take on the viewfinder screen, and press  to begin recording the video.
4. When recording the video:
 - Press  to pause or continue.
 - Press 2 to stop recording.

After recording and saving the video, press 1 to delete or send it. You can send it via a multimedia message (video file cannot exceed 300 KB), an email, or Bluetooth.

Video Player

1. In standby mode, select **Menu > Multimedia > Video Player**.
2. Use   to scroll to a video file.
3. Select **Options > Play**.
While playing the video file:
 - Use   to adjust the volume.
 - Use  to rewind or fast-forward.
 - Press  to pause or continue.
 - Press 1 to switch between the full and standard screens.
4. Press 2 (**Stop**) to stop playing the video file.

All the video files are stored in **Videos** on your phone or microSD card depending on which storage you have set as the preferred storage for video files. You can select **Menu > File Manager > Phone/Memory card > Videos** to access these video files and perform operations, such as **Rename** and **Delete** on them.

Audio Player

1. In standby mode, select **Menu > Multimedia > Audio Player**.
2. Press  **1 (List)**, and select a music file.
3. Select **Options > Play**.
While playing the music file:
 - Use   to adjust the volume.
 - Press  to skip to the previous or next music file, or press  and hold  to rewind or fast-forward through the music file.
 - Press  to pause or continue.

All the music files are stored in **My Music** or **Audio** on your phone or microSD card depending on which storage you have set as the preferred storage for music files. You can select **Menu > File Manager > Phone/Memory card > My Music/Audio** to access these music files and perform operations, such as **Rename** and **Delete** on them.

Sound Recorder

The **Sound Recorder** application lets you record audio.

To record audio:

1. Select **Menu > Multimedia > Sound Recorder**.

2. Press  **1 (Options)** and select **New record**, or press  to start recording.

While recording, you can press  or  **1 (Pause/Continue)** to pause or continue.

3. Press  **2 (Stop)** to stop recording and enter the following options:

- **Send:** send the audio via multimedia message, email or Bluetooth.
- **Preview:** play the audio.

When playing the audio, press  or  to adjust the volume.

- **Save:** confirm whether to save the audio.
- **Discard:** confirm whether to discard the audio.

4. Select **Save** to save the recorded audio.

5. Press  **1 (Options)** for additional operations.

FM Radio (optional)

To listen to the radio:

1. In standby mode, select **Menu > Multimedia > FM Radio**.
When the FM radio is turned on, the phone plays the program on the current channel.
2. On the **FM Radio** screen:
 - Press  **1 (Options)**, and select **Auto search** to automatically search for and save channels.
 - Use , ,  or  to adjust the volume.
 - Press  to adjust the frequency at 0.1MHz intervals.

- Press **1** (**Options**) and select **Record** to record the current program.

When recording, press **1** (**Pause/Continue**) to pause or continue recording. Press **2** (**Stop**) to stop recording, edit the filename, and choose whether to save it.

- Press **1** (**Options**) and select **Settings** to configure settings such as **Background play**, **Audio quality** and **Record storage**.
3. Press  to pause or stop FM radio, and press **2** (**Back**) to exit the application.

8 Messaging

To send a message:

1. In standby mode, select **Menu > Messaging > Write message**.
2. Write the message.

You can also add pictures, audio files, video files, or other attachments to the message and send it as a multimedia message.

3. Enter a recipient's phone number or press **1** (**Options**), and select **Add recipient** to add a recipient from **Phonebook**.

Repeat this step to add more recipients.

4. Press **1** (**Options**), and select **Send > From SIM1/From SIM2** to send the message.

You can also press **1** (**Options**) to select **Input method**, **New Cstar word**, and others.

- Contact your service provider to determine the availability of the Multimedia Messaging Service (MMS) and how to subscribe to the service.
- Open multimedia messages with caution. Objects in multimedia messages may contain viruses and malicious software that can damage your phone.

9 Organizer

Calendar

The **Calendar** application lets you view dates, edit schedules, and set alerts. If you create a memo in the schedule for a particular date, that date will be highlighted. To view all memos for a day, press

to select the date. Press **1** (**Options**) for the following options:

- **View**: check memos for that specified day.
- **View all**: check all memos.
- **Add event**: enter **Type**, **Start**, **End**, **Subject**, **Alarm**, **Repeat**, **Location**, and **Details**. Press  or **1** (**Select/Edit**) to edit, or press **1** (**Save**) or  to save and exit.
- **Delete event**: clear memos in **All**, **Overdue**, or **Specific period**.
- **Jump to date**: enter and jump to a date.
- **Go to today**: go to today.
- **Go to weekly view**: display a weekly view of the calendar.

Tasks

The **Tasks** application lets you record important events.

World Clock

The **World clock** application lets you look up the local times of cities around the world with respect to their time zones. Use  to view different time zones. Press  or  **1 (Options)** to select **Daylight saving time for foreign city**.

Calculator

The **Calculator** application lets you perform a variety of mathematical operations. The accuracy of certain decimals is limited, and the calculator can only be used for simple calculations.

Unit Converter

The **Unit Converter** application lets you select weight and length convert.

Ebook Reader

1. In standby mode, select **Menu > Organizer > Ebook Reader** to display the bookshelf.

The phone automatically adds the ebooks stored in the default storage location (phone or microSD card) to the bookshelf.

2. Select an ebook.
3. Press  to open the ebook.

While reading the ebook, press  **1 (Options)** for options such as **Full screen on/off**, **Jump to**, **Add bookmark**, **Go to bookmark**, **Delete bookmark**, **Auto scroll on/off** and **Close**.

4. Press  **2 (Back)** to close the ebook.

 When reading an ebook, use  to turn pages, and use  to change lines.

Flashlight

The **Flashlight** application lets you shine a bright light.

- In standby mode, select **Menu > Organizer > Flashlight**, press  or  (**OK**) to turn the flashlight on or off.
- In standby mode, press and hold  to turn the flashlight on or off.

Java (optional)

This phone supports Java. Select **Menu > Organizer > Java** to use Java applications.

Chat Function

The built-in social networking service (SNS) applications **Facebook** and **Twitter** on your phone allow you to send instant messages and files any time.

To use **Facebook**:

1. Select **Menu > Organizer > Java > Facebook**.
2. Enter your registered email address and password.

- Check GPRS settings before using this application.
- Before saving the chat history, ensure that a microSD card has been inserted to the phone.
- Follow the same procedure to use **Twitter**.

Games

This phone comes with two built-in games. Select **Menu > Organizer > Games** to select a game.

Stopwatch

The **Stopwatch** application lets you timing in different ways.

10 Settings

Phone Settings

Select **Menu > Settings > Phone settings**.

Configure the following settings:

- **Time and date:** set the home city, time, date, format, and time zone.
- **Schedule power on/off:** set the time at which the phone will power on or off automatically.
- **Language:** set the display language.
- **Pref. input mode:** set the preferred input mode.
- **Display:** set the wallpaper, screen saver, time, date, and LCD backlight.
- **Themes:** set the phone's theme.
- **Shortcuts:** set the shortcuts style, menu, and dedicated key.
- **Auto update time:** set whether to turn auto update time on.

Security Settings

Changing PIN

To change the PIN, enable **PIN lock** first, and do the following:

1. Select **Menu > Settings > Security settings > SIM1/SIM2 security > Change PIN**.
2. Enter the PIN, and press or **—1 (OK)**.
3. Enter a new PIN, and press or **—1 (OK)**.
4. Re-enter the new PIN to confirm.

Changing PIN2

PIN2 is the personal identification number used for special functions provided by the network, such as billing.

SIM1 PIN2 and SIM2 PIN2 are configured separately.

To change PIN2, do the following:

1. Select **Menu > Settings > Security settings > SIM1/SIM2 security > Change PIN2**.
2. Enter PIN2, and press or **—1 (OK)**.
3. Enter a new PIN2, and press or **—1 (OK)**.
4. Re-enter the new PIN2 to confirm.

11 Connectivity

Bluetooth (optional)

Your phone supports Bluetooth. You can synchronize files between your phone and a computer, transfer data between your phone and other Bluetooth devices, and talk on the phone using a Bluetooth headset.

1. In standby mode, selecting **Menu > Settings > Connectivity > Bluetooth > Power > On** to turn on Bluetooth.
2. Select **My device > Search new device** to search for available Bluetooth devices.
3. Scroll to the desired Bluetooth device, and press **—1 (Pair)** or .

When you pair your phone with the device for the first time, a password is required.

4. Use the Bluetooth device to talk on the phone or transfer data with your phone.

Internet Services

You can use your phone to access Wireless Application Protocol (WAP) sites and use WAP-based services. To browse WAP pages, you must subscribe to the data service from your service provider and configure your phone's relevant settings.

Setting Up Your Data Account

Before accessing WAP sites on your phone, set up your data account as follows:

1. In standby mode, select **Menu > Services > Internet service > Settings > Data account**.
2. Select your service provider.
Your account settings are provided by your service provider.
3. Press  **1 (OK)** or  to save the settings.

Accessing a WAP Site

1. In standby mode, select **Menu > Services > Internet service > Input URL**.
2. Enter the Uniform Resource Locator (URL) of the desired WAP site.
3. Press  **1 (Options)**, and select **Done** to access the WAP site.

You can create and edit bookmarks so that you can quickly access your favorite WAP sites.

12 Alarm

The **Alarm** application lets you set alarms to ring at specified times.

To set an alarm:

1. In standby mode, select **Menu > Alarm**.
2. Press  to select an alarm, and then press  to enter and edit time, repeat mode, alarm tone, snooze, and alert type.
3. Press  **2 (Done)** to save the alarm.
4. Select the alarm you set, press  **1 (On/Off)** to turn the alarm on or off.

Once the alarm is enabled, the alarm icon is displayed on the notification panel.

13 STK

Select **Menu > STK** to enter STK function. The SIM Tool Kit (STK) function is a value-added service provided by your service provider; you can use it to send text messages, view news, and use other applications. For more information, contact your service provider.

14 Profiles

Your phone provides you with various profiles: **General**, **Silence**, **Meeting**, **Outdoor** and **My style**. You can customize the ringtone and other settings for each profile depending on the environment and need (except **Silence**). You can activate or deactivate a profile.

To customize a profile:

1. Select **Menu > Profiles**.
2. Use   to scroll to the desired profile, and press  to select the profile or press  (**Options**) for the following options (except **Silence**):
 - **Activate**: activate the profile.
 - **Customize**: set the alert type, ring type, SIM1/2 incoming call, ringtone volume, SIM1/2 message, message volume, keypad tone, keytone volume, power on/off tone, and system alert.
 - **Reset**: Reset to default settings.

 In the **My style** profile, you may **Rename** the profile name.

15 Camera

1. In standby mode, select **Menu > Camera** to enter camera.
2. Press  (**Options**) to view the photo album or configure the camera settings.
3. Frame the picture you want to take on the viewfinder screen, and press  to take the picture.

For continuous shot, press  to shoot. To use this function, press  **1 (Options)**, select **Camera settings > Cont. shot** to set take one or more shots.

4. After taking the picture:

- Press  **1 (Options)**, and select **Send** to send the picture or **Delete** to delete the picture.
- Press  **2 (Back)** to exit the camera.

All the pictures are stored in **Photos** on your phone or microSD card depending on which storage you have set as the preferred storage for pictures. You can select **Menu > File Manager > Phone/Memory card > Photos** to access these pictures and perform operations, such as **Rename** and **Delete**, on them.

16 Warnings and precautions

This section contains important information about the operation of your device. It also contains information about how to use the device safely. Read this information carefully before using your device.

Electronic device

Power off your device when use is prohibited. Do not use the device if doing so causes danger or interference with other electronic devices.

Accessories

- Using an unapproved or incompatible charger or battery may cause fire, explosion or other hazards.

- Choose only batteries, chargers, and accessories approved for use with this model by the device manufacturer. The use of any other types of batteries, chargers, or accessories may void the warranty, may violate local regulations and laws, and may be dangerous. Please contact your retailer for information about the availability of approved batteries, chargers, and accessories in your area.

Charger safety

- Unplug the charger from electrical outlets and the device when not in use.
- Do not drop or cause an impact to the charger.
- Do not touch the power cord with wet hands or pull the power cord to disconnect the charger.
- If the power cable is damaged (for example, the cord is exposed or broken), or the plug loosens, stop using it at once. Continued use may lead to electric shocks, short circuits, or fire.
- If your device has been exposed to water, other liquids, or excessive moisture, take it to an authorized service center for inspection.
- Connect the device only to products with the USB-IF logo or with USB-IF compliance program completion.
- For pluggable devices, the socket-outlet shall be installed near the devices and shall be easily accessible.

Battery safety

- Do not connect battery poles with conductors, such as keys, jewelry, or other metal materials. Doing so may short-circuit the battery and cause injuries or burns.
- Do not solder battery poles or dismantle the battery. Doing so may lead to electrolyte leakage, excessive heat, fire, or explosion.
- Do not attempt to modify or remanufacture the battery, insert foreign objects into it, or immerse or expose it to water or other liquids. Doing so may lead to fire, explosion, or other hazards.

- Keep the battery away from excessive heat and direct sunlight. Do not place it on or in heating devices, such as microwave ovens, stoves, or radiators. Batteries may explode if overheated.
- If the battery leaks, ensure that the electrolyte does not make direct contact with your skins or eyes. If the electrolyte touches your skins or splashes into your eyes, immediately flush with clean water and consult a doctor.
- In case of battery deformation, color change, or overheating while charging or storing, immediately stop using the device and remove the battery. Continued use may lead to battery leakage, fire, or explosion.
- Do not put batteries in fire as they may explode. Damaged batteries may also explode.
- Do not drop the device or battery. If the device or battery is dropped, especially on a hard surface, and may be damaged, take it to an authorized service center for inspection.
- Improper battery use may lead to fire, explosion, or other hazards.
- Dispose of used batteries in accordance with local regulations.
- Do not smash or pierce the battery, or expose it to high external pressure. Doing so may lead to a short circuit or overheating.
- If the device standby and talk time shortens significantly, replace the battery.

Operating environment

- Avoid dusty, damp, or dirty environments. Avoid magnetic fields. Using or charging your device in these environments may result in circuit malfunctions.
- Do not use your device during thunderstorms to protect your device against any danger caused by lightning.
- Observe local laws and regulations, and respect the privacy and legal rights of others.

- Avoid touching the antenna when you are on a call. Touching the antenna affects call quality, increases power consumption, and reduces talk and standby time.
- Ideal operating temperatures are 0°C to 40°C. Ideal storage temperatures are 0°C to 40°C. Extreme heat or cold may damage your device or accessories.
- Do not expose your device to direct sunlight (such as on a car dashboard) for prolonged periods.
- Do not place your device or batteries on or in heating devices, such as microwave ovens, stoves, water heaters, or radiators. Batteries may explode if overheated.
- Stop using your device or applications for a while if the device is overheated. If skin is exposed to an overheated device for an extended period, low temperature burn symptoms, such as red spots and darker pigmentation, may occur.
- If your device has a camera flash, do not use it directly in the eyes of people or pets. Otherwise temporary loss of vision or damage to the eyes may occur.
- Do not allow children or pets to bite or suck the device or battery. Doing so may result in damage or explosion.

Protecting your hearing when using a headset

- To prevent possible hearing damage, do not listen at high volume levels for long periods.
- Using a headset at high volumes may damage your hearing. To reduce this risk, lower the headset volume to a safe and comfortable level.
- Exposure to high volumes while driving may cause distraction and increase your risk of an accident.

Child's safety

- Comply with all precautions with regard to child's safety. Letting children play with the device or its accessories may be dangerous.

The device includes detachable parts that may present a choking hazard. Keep away from children.

- The device and its accessories are not intended for use by children. Children should only use the device with adult supervision.

Interference with medical equipment

- Follow rules and regulations set forth by hospitals and health care facilities. Do not use your device where prohibited.
- Pacemaker manufacturers recommend that a minimum distance of 15 cm be maintained between a device and a pacemaker to prevent potential interference with the pacemaker. If using a pacemaker, hold the device on the side opposite the pacemaker and do not carry the device in your front pocket.
- Some wireless devices may affect the performance of hearing aids or pacemakers. Consult your service provider for more information.

Areas with flammables and explosives

- Do not use the device where flammables or explosives are stored (in a gas station, oil depot, or chemical plant, for example). Using your device in these environments increases the risk of explosion or fire. In addition, follow the instructions indicated in text or symbols.
- Do not store or transport the device in containers with flammable liquids, gases, or explosives.

Traffic security

Observe local laws and regulations while using the device. If using the device while driving a vehicle, observe the following guidelines:

- Concentrate on driving. Your first responsibility is to drive safely.
- Do not hold the device while driving. Use hands-free accessories.
- When you must make or answer a call, pull off the road safely and park the vehicle first.

- RF signals may affect the electronic systems of motor vehicles. For more information, consult the vehicle manufacturer.
- Do not place the device over the air bag or in the air bag deployment area in a motor vehicle. Doing so may hurt you because of the strong force when the air bag inflates.
- Do not use your device while flying in an aircraft. Power off your device before boarding. Using wireless devices in an aircraft may disrupt wireless networks, present a hazard to aircraft operation, or be illegal.

Cleaning and maintenance

- Before you clean or maintain the device, power it off, and disconnect it from the charger.
- Do not use any chemical detergent, powder, or other chemical agents (such as alcohol and benzene) to clean the device or charger. These substances may cause damage to parts or present a fire hazard. Use a clean, soft, and dry cloth to clean the device and charger.
- Keep the device and accessories dry. Protect them from water and humidity. Do not touch the device or the charger with wet hands. Doing so may lead to short circuits, malfunctions, or electric shocks.
- Avoid collision, which may lead to battery leakage, device malfunctions, overheating, fire, or explosion.
- Do not place magnetic storage media, such as magnetic cards and floppy disks, near the device. Radiation from the device may erase the information on magnetic storage media.
- Do not expose your device, battery, or charger to extreme heat or cold. These environments may interfere with proper function and may lead to fire or explosion. Battery performance is affected at temperatures lower than 0°C.

- Do not place sharp metal objects, such as pins, near the earpiece or speaker. The earpiece may attract these objects and result in injury.
- Do not dismantle the device or accessories. This voids the warranty and releases the manufacturer from liability for damage.
- If the device screen is broken in a collision, immediately stop using the device. Do not touch or attempt to remove the broken parts. Promptly contact an authorized service center.

Emergency calls

The availability of emergency calls is subject to your cellular network quality, service provider policy, and local laws and regulations. Never rely solely on your device for critical communications like medical emergencies.

Environmental protection

- The device and its accessories, including but not limited to the power adapter, headset, and battery (if included) should not be disposed of with household garbage.
- Disposal of the device and its accessories is subject to local regulations. Support proper collection and recycling.

EU regulatory conformance

Body worn operation

The device complies with RF specifications when used near your ear or at a distance of 1.5 cm from your body. Ensure that the device accessories, such as a device case and device holster, are not composed of metal components. Keep the device away from your body to meet the distance requirement.

Certification information (SAR)

This device meets guidelines for exposure to radio waves.

Your device is a low-power radio transmitter and receiver. As recommended by international guidelines, the device is designed not to exceed the limits for exposure to radio waves. These guidelines

were developed by the International Commission on Non-Ionizing Radiation Protection (ICNIRP), an independent scientific organization, and include safety measures designed to ensure the safety of all users, regardless of age and health.

The Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a device. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level during operation can be well below the value. This is because the device is designed to use the minimum power required to reach the network.

The SAR limit adopted by Europe is 2.0 W/kg averaged over 10 grams of tissue, and the highest SAR value for this device complies with this limit.

The highest SAR value reported for this device type when tested at the ear is 0.517 W/kg, and when properly worn on the body is 0.822 W/kg.

Statement

Hereby, Huawei Technologies Co., Ltd. declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

For the declaration of conformity, visit the web site www.huaweidevice.com/certification.

The following marking is included in the product:

C € 0678

This device may be operated in all member states of the EU.

Notice:

Observe national and local regulations where the device is used.

This device may be restricted for use, depending on the local network.

FCC Regulatory Compliance

Body worn operation

The device complies with RF specifications when used near your ear or at a distance of 1.5 cm from your body. Ensure that the device accessories, such as a device case and device holster, are not composed of metal components. Keep the device away from your body to meet the distance requirement.

Certification information (SAR)

This device is also designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA).

The SAR limit adopted by the USA is 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported to the FCC for this device type complies with this limit.

The highest SAR value reported to the FCC for this device type when tested for use at the ear is 1.379 W/kg, when properly worn on the body is 0.960 W/kg.

FCC statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications to this device not expressly approved by Huawei Technologies Co., Ltd. for compliance could void the user's authority to operate the equipment.
