	The alert type is <b>Vib. then ring</b> .
	<b>Silent</b> profile activated.

Icon	Indicates...
	Headset connected to the phone.
	WiFi is connected.

## 2 Getting Started

### Installing the SIM Card and the Battery

You can install up to two subscriber identity module (SIM) cards in the phone at the same time.

When installing a SIM card, ensure that the gold contact area faces down, and that the beveled edge of the SIM card aligns with that of the SIM card slot.

### Removing the Battery and the SIM Card

Before removing the battery and the SIM cards, ensure that your phone is powered off.

## Installing a microSD Card

 Before installing or removing a microSD card, power off the phone. Once the phone is powered on, it will indicate whether the microSD card has been installed properly.

You can install a microSD card to expand the memory capacity of your phone. When inserting the microSD card, ensure that the golden contact area on the microSD card is facing downward.

## Charging the Battery

To charge the battery, do the following:

1. Connect the smaller end of the USB cable to the charger jack of the phone and the larger end to the charger.
2. Connect the charger to a power socket.

3. Wait until the battery is fully charged.  
During the charging, the charging icon is displayed in animation. When the charging icon becomes static, it indicates that the battery is fully charged.
4. Disconnect the charger from the power socket and then from the phone.

### Working with the Main Menu

1. In standby mode, press  (**Menu**) to access the main menu.
2. Press  to scroll to the desired submenu, and then press  to access the submenu.
3. Press  or  to scroll to an option, and then press  (**OK**) or  to access the option.
4. Press  (**Back**) to return to the previous menu.  
To return to the standby mode, press .

### Automatically Switching Between Profiles

You can set your phone to activate different profiles at different times. The phone can automatically switch between profiles according to your settings.

1. Select **Menu > User profiles > Profile Switch Timing**.
2. Select a clock.
3. Set the status, time, profile, and repetition days.
4. Press  (**Done**) to save the settings.

## Phone Lock

The phone lock protects your phone from unauthorized use. By default, the phone lock is disabled. Once the phone lock is enabled, you are required to enter the phone code each time you power on the phone.

The phone code is set to **1234** by default. You can select **Menu > Settings > Security settings > Phone security > Change password** > to change the phone code to any numeric string of 4 to 8 digits.

Do remember your phone code.

If you forget the phone code, contact the service provider.

## Mass Storage

When the phone is connected to a personal computer (PC) through a USB cable, options such as **Mass storage** are displayed on the phone screen.

When you select **Mass storage**, you can manage the files stored in the phone memory and on the microSD card.

The microSD card and the phone memory are displayed as removable disks on the PC. You can perform the following operations:

- Double-click a disk to open it.
- Copy, paste, or delete files on a disk.
- Disconnect the phone from the PC.

- Ensure that you connect and disconnect the USB cable properly.
- Do not run the formatting command on the PC to format the phone memory. Otherwise, the phone memory may get permanently damaged.
- You can transfer data and charge the battery by connecting the phone to the PC through the USB cable.

## PIN and PUK

The personal identification number (PIN) protects your SIM card from unauthorized use. The PIN unblocking key (PUK) unlocks the blocked PIN. Both the PIN and the PUK are provided with the SIM card. For details, contact your service provider.

SIM1 and SIM2 PINs are configured separately.

To enable the PIN lock, do the following:

1. Select **Menu > Settings > Security settings > SIM1 or SIM2 security > PIN lock**.
2. Enter the PIN, and then press  (**OK**).

If you enter wrong PINs a specified number of times consecutively, the phone prompts you to enter the PUK.

If you enter wrong PUKs a specified number of times consecutively, the SIM card becomes permanently invalid. In that case, contact your service provider for a new SIM card.

## Locking the Keypad

To lock the keypad, press and hold  in standby mode for 3s. To unlock the keypad, press  (**Unlock**) and then  (**OK**).

If the **Auto keypad lock** function is enabled and if the phone is in standby mode for a preset period, the phone locks the keypad automatically.

To enable the **Auto keypad lock** function, select **Menu > Settings > Security settings > Auto keypad lock**, scroll to a preset duration, and then press  (**OK**) to select the duration.

 When the keypad is locked, you can press  to answer a call or make an emergency call.

## Other Applications

- **Calculator:** to perform simple calculation.
- **Stopwatch:** to time a process.
- **Ebook reader:** to read the ebooks.
- **Calendar:** to view dates and set events.
- **Tasks:** to view and set tasks.
- **Alarm:** to set alarms.
- **Fun&Games:** to play games.
- **Java:** to run Java applications.
