# 1 Getting to Know Your Phone

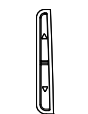

## Your Phone

The following figure shows the appearance of your phone.

- |   |                   |   |   |
|---|-------------------|---|---|
| 1 | Screen            | 6 | Charger/Universal serial bus (USB) port |
| 2 | Earpiece          | 7 | End/Power key                           |
| 3 | Volume/Scroll key | 8 | Menu key                                |
| 4 | Camera            | 9 | Call/Answer key                         |
| 5 | Headset jack      |   |   |

## Keys and Functions

Press...	To...
	<ul style="list-style-type: none"><li>• Make a call.</li><li>• Answer a call.</li><li>• View call logs in standby mode.</li></ul>
	Access the main menu.
	<ul style="list-style-type: none"><li>• End a call.</li><li>• Lock the keypad.</li><li>• Return to standby mode.</li><li>• Power the phone on or off.</li></ul>
	<ul style="list-style-type: none"><li>• Scroll up and down through menu options.</li><li>• Adjust the volume in standby mode, during a call or media playback, or while listening to the radio.</li></ul>

## Screen Icons

Icon	Indicates...
	Battery level.

Icon	Indicates...
	Keypad locked.
	Headset connected.
	New text messages.
	Missed calls.
	Alarms enabled.
	Bluetooth turned on.
	<b>General</b> profile activated.
	<b>Meeting</b> profile activated.
	<b>Outdoor</b> profile activated.
	<b>Silent</b> profile activated.
	<b>My profile</b> activated.

## 2 Getting Started

### Installing the SIM Cards and the Battery

You can install up to two subscriber identity module (SIM) cards in the phone at the same time.

When installing a SIM card, ensure that the gold contact area faces down, and that the beveled edge of the SIM card aligns with that of the SIM card slot.

To enable dual-SIM mode, power on the phone, press  to access the main menu, and tap **Settings > Dual SIM settings > Dual SIM open**.

### Removing the Battery and the SIM Cards

Before removing the battery and the SIM cards, ensure that your phone is powered off.

### Installing and Removing a microSD Card

 Before installing or removing a microSD card, power the phone off. When the phone is powered back on, it indicates whether the microSD card has been installed correctly.

You can expand your phone's memory capacity by installing a microSD card. When installing a microSD card, ensure that the gold contact area faces down.

### Charging the Battery

1. Connect the small end of the USB cable to the phone's charger jack and the large end to the charger.
2. Connect the charger to a power socket.
3. Wait until the battery is fully charged.  
While the battery is charging, the charging icon blinks. When the charging icon stops blinking, the battery is fully charged.
4. Unplug the charger from the power socket and the USB cable from the phone.

### Using Your Finger

You can perform various operations by tapping your finger on or dragging it across the touchscreen.

- Tap: Use your finger to touch the screen once to access a menu or select an item.
- Drag: Touch and hold an icon on the main menu, and then move the icon by moving your finger across the screen. You can also scroll through a menu, text document, or web page using the same 'touch and move' action.

## Calibrating the Screen

Once calibrated, the phone responds more accurately to your touch on the screen.

1. In standby mode, press  to access the main menu, and tap **Settings > Pen calibration**.

During the calibration, a series of  icons are displayed on the screen.

2. Tap each icon to complete the calibration.

 During the calibration, tap each icon in a normal way to ensure that the phone will respond accurately to your touch.

## USB

When you have connected your phone to a computer using the USB cable, a series of options, including **Mass storage**, are displayed on the phone screen.

 Tap **Mass storage** to manage the files stored in the phone memory or on the microSD card using the computer's file manager application.

## Phone Lock

The phone lock protects your phone from unauthorized use. The preset phone unlock code is **1234**. By default, the phone lock is disabled. Once the phone lock is enabled, you must enter the phone unlock code each time you power on the phone.

To enable the phone lock:

1. Press  to access the main menu and tap **Settings > Security settings > Phone security > Phone lock**.
2. Tap the text box to access the on-screen keypad.
3. Enter the phone unlock code, and tap **OK**.

To change the preset phone unlock code:

1. Press  to access the main menu and tap **Settings > Security settings > Phone security > Change password**.
2. Tap the text box to access the on-screen keypad.
3. Enter the preset phone unlock code, and tap **OK**.
4. Enter a new phone unlock code, and tap **OK**.  
The phone unlock code must be a numeric string between four and eight digits.
5. Enter the new phone unlock code again to confirm it.

If you forget the phone unlock code, contact the service provider.

## PIN and PUK

The personal identification number (PIN) protects your SIM card from unauthorized use. The PIN unblocking key (PUK) unlocks a blocked PIN. Both the PIN and the PUK are provided with the SIM card. For details, contact your service provider.

The PIN lock must be configured for each SIM card separately.

To enable the PIN lock:

1. Press  to access the main menu and tap **Settings** > **Security settings** > **SIM1** or **SIM2 security** > **PIN lock**.
2. Tap the text box to access the on-screen keypad.
3. Enter the PIN, and tap **OK**.

If you enter the incorrect PIN a specified number of times, the phone prompts you to enter the PUK. If you enter the incorrect PUK a specified number of times, the SIM card will become permanently invalid. If this occurs, contact your service provider for a new SIM card.

## Locking and Unlocking the Keypad

To lock the keypad, press . To unlock the keypad, slide  from left to right.

If the **Auto keypad lock** function is enabled, the phone will lock the keypad automatically after being idle in standby mode for a pre-defined period.

To enable the **Auto keypad lock** function, press  to access the main menu, tap **Settings** > **Security settings** > **Auto keypad lock**, and tap a desired duration (**5 sec**, **30 sec**, **1 min**, or **5 min**). If you tap **Off**, the **Auto keypad lock** function will be disabled.

 When the keypad is locked, you can press  to answer a call.

## 3 Voices Services

### Making a Call

1. In standby mode, tap  at the bottom of the screen to access the on-screen keypad.
  2. Enter a phone number.
    - To make an international call, tap the \* key twice to enter the plus sign (+). Then enter the country or region code, area code, and phone number.
    - To call an extension number, enter the phone number, tap the \* key three times to enter P, and enter the extension number.
  3. Press  or tap  to dial the number.
  4. Press  to end the call.
-  You can also make a call from the **Call log**, **Contacts**, and **Messaging** screen.

### Answering a Call

When there is an incoming call:

- Press  to answer the call.
- Press  to reject the call.

### Changing the Text Input Mode

The current text input mode indicator is displayed in the upper left corner of the screen. Tap  on the QWERTY or alphanumeric input screen to switch between text input modes.

Indicator	Text Input Mode
ABC and abc	Multi-tap input modes
sABC and sabc	Predictive input modes
123	Number input mode

### Text Input Screen

On the QWERTY input screen:

- Tap  once to delete the last character entered, or tap and hold  to delete all the characters.
- Tap  to start a new paragraph.
- Tap  to hide the keypad.
- Tap  to switch from the QWERTY input screen to the alphanumeric input screen.
- Tap  to access the symbol/number keypad.
- Tap  to switch between text input modes.
- Tap  to switch between upper case and lower case.

On the alphanumeric input screen:

- Tap  once to delete the last character entered, or tap and hold  to delete all the characters.

- Tap  to access the number keypad.
- Tap  to switch between upper case and lower case.
- Tap  to switch from the alphanumeric input screen to the QWERTY input screen.
- Tap  to hide the keypad.
- Tap  to switch between text input modes.
- Tap  to access the symbol keypad.

### Entering a Word

- To enter a word on the QWERTY input screen, tap the keys labeled with the letters that spell the word.
- To enter a word on the alphanumeric input screen in multi-tap input mode, repeatedly tap the keys labeled with the letters that spell the word until the desired letters are entered.
- To enter a word on the alphanumeric input screen in predictive input mode:
  1. Tap each key once according to the spelling sequence of the desired word.
  2. The phone displays words associated with the sequence entered.
  3. Tap  or  to scroll to the desired word.
  4. Tap the desired word.

## Entering Numbers

- On the QWERTY input screen, tap  to access the number/symbol keypad, and enter the desired numbers.
- On the alphanumeric input screen, tap  to access the number keypad, and enter the desired numbers.
- In number input mode, tap the desired number keys.

## Entering Symbols

- On the QWERTY input screen, tap  to access the symbol/number keypad to display commonly used symbols. If the symbol you want is not shown, tap  to access the complete symbol keypad to display all available symbols.
- On the alphanumeric input screen, tap  to access the symbol keypad, tap  or  to scroll to the desired symbol, and tap the desired symbol.

# 5 Messaging

## Sending a Text Message

1. In standby mode, tap  at the bottom of the screen to access the **Messaging** screen.
2. Tap **Write message**.
3. Tap  and enter the recipient's phone number; or tap  to add a recipient from the phonebook. Repeat this step to add multiple recipients.

4. Write the message.
5. Tap  to send the message from SIM card 1 or SIM card 2.

### Sending a Multimedia Message

1. In standby mode, tap  at the bottom of the screen to access the **Messaging** screen.
2. Tap **Write message**.
3. Tap **Options > Switch to MMS**.  
If you tap **Add picture**, **Add sound**, **Add video**, **Head info**, **Cc**, **Bcc**, or **Subject**, the message automatically changes from a text message to a multimedia message.
4. Tap  and enter the recipient's phone number; or tap  to add a recipient from the phonebook.  
Repeat this step to add multiple recipients.
5. To copy or blind copy the message to a recipient, tap **Cc** or **Bcc**, enter the recipient's phone number; or tap  to add a recipient from the phonebook.  
Repeat this step to add multiple recipients.
6. Tap **Subject** if you want to enter a subject for the message.
7. Edit the message.  
Tap  to add pictures, audio clips, video clips, text templates, attachments, or bookmarks to the message.
8. Tap  to send the message from SIM card 1 or SIM card 2.

### Creating a Contact

To add a contact to your SIM card:

1. In standby mode, tap  at the bottom of the screen to access the **Contacts** screen.  
All the contacts stored in the preferred storage are displayed. By default, the contacts are stored in the phone memory. If you have set **Preferred storage** to **SIM1** or **SIM2**, the contacts stored on SIM card 1 or SIM card 2 are displayed. If you have set **Preferred storage** to **All**, the contacts stored in the phone memory and on the two SIM cards are displayed.
2. Tap **Add new contact**.
3. Enter the **name** and **number** of the contact.
4. Tap **Options > Save > Yes**.

To add a contact to your phone:

1. In standby mode, tap  at the bottom of the screen to access the **Contacts** screen.  
All the contacts stored in your phone memory or on your SIM card are displayed.
2. Tap **Add new contact**.
3. Enter the contact information such as **Name**, **Number**, **Email address**, **Caller picture**, and **Caller ringtone**.
4. Tap **Options > Save > Yes**.

## Searching for a Contact

1. In standby mode, tap  at the bottom of the screen to access the **Contacts** screen.
2. Enter the first letter of the contact name in the search bar. Contacts who have names that start with this letter will be displayed.
3. Tap  to hide the keypad, and look for the desired contact.

## Setting the Preferred Storage

1. In standby mode, tap  at the bottom of the screen to access the **Contacts** screen.
2. Tap **Options > Phonebook settings > Preferred storage**.
3. Tap **SIM1, SIM2, Phone, or All**.

# 7 Camera

To take a picture:

1. In standby mode, press  to access the main menu.
2. Tap **Camera**.
3. On the viewfinder screen:
  - Tap  to access the **Options** screen to view pictures or configure the camera settings.
  - Tap  to adjust the exposure value.
  - Tap  to zoom in or zoom out.

- Tap  to set the picture resolution.
  - Tap  to set the picture quality.
  - Tap  to apply an effect to the picture.
  - Tap  to adjust the white balance.
  - Tap  to select the scene mode.
  - Tap  to set the self-timer.
  - Tap  to set continuous shooting.
  - Tap  to exit the camera.
4. Frame the picture you want to take on the viewfinder screen and tap  to take a picture.

## 8 Video Camera

To record a video clip:

1. In standby mode, press  to access the main menu.
2. Tap **Video camera**.
3. On the viewfinder screen:
  - Tap  to access the **Options** screen to configure the video camera settings.
  - Tap  to adjust the exposure value.
  - Tap  to zoom in or zoom out.

- Tap  to set the video quality.
- Tap  to activate night mode.
- Tap  to adjust the white balance.
- Tap  to activate audio recording.
- Tap  to exit the video camera.
- 4. Tap  to start recording.
- 5. Tap  to stop recording.
- 6. When asked whether to save the recorded video clip, tap **Yes** to save it or **No** to delete it.

## 9 Sound Recorder

To record an audio clip:

1. In standby mode, press  to access the main menu.
2. Tap **Applications > Sound recorder**.
3. On the **Sound recorder** screen:
  - Tap  to access the **Options** screen to configure the sound recorder settings.
  - Tap  to view the list of recorded clips.
  - Tap  to exit the sound recorder.

4. Tap  to start recording.  
While recording, you can tap  to pause. When recording has been paused, press  to continue.
5. Tap  to stop.  
If you choose to save the recorded clip, you can play it by tapping 

## 10 Media Player

The media player plays audio and video clips stored in the phone memory or on the microSD card. You can add any of these audio or video clips to a user-defined playlist.

### Creating a Playlist

1. In standby mode, press  to access the main menu.
2. Tap **Media player** > **My playlists** > **Options** > **New**.
3. Give the playlist a name.
4. Tap **Options** > **Done**.

### Adding an Audio or Video Clip to a Playlist

1. In standby mode, press  to access the main menu.
2. Tap **Media player** > **My playlists**.
3. Select the playlist to which you want to add an audio or video clip.
4. Tap **Options** > **Open** > **Add**, and select the audio or video clip that you want to add to the playlist from the phone memory or the microSD card.
5. Tap **OK**.

### Playing an Audio or Video Clip

1. In standby mode, press  to access the main menu.
2. Tap **Media player** > **My playlists**.

3. Select the desired playlist.
4. Tap **Options** > **Open**, and select the audio or video clip that you want to play.
5. Tap **Options** > **Play**.  
When the clip is being played:
  - Tap  to access the **Options** screen to configure the media player settings.
  - Tap  or  to advance to the next clip on the playlist or go back to the previous one.
  - Tap and hold  or  to fast-forward or rewind.
  - Tap  to pause and  to stop.
  - Tap  to play in full-screen mode.
  - Tap  to exit the media player.

## 11 FM Radio

The headset cable also functions as an antenna when the frequency modulation (FM) radio is turned on. To ensure good radio reception, do not disconnect the headset from the phone or severely bend the headset cable.

To listen to the radio:

1. In standby mode, press  to access the main menu.
2. Tap **FM**.
3. When listening to the radio:

- Tap  to access the **Options** screen to configure the relevant settings.
- Tap  to turn the FM radio on or off.
- Tap  or  to go to the next or previous channel in the channel list.
- Tap  or  to adjust the frequency in increments of 0.1 MHz.
- Tap  to record the current radio program.

## 12 WAP Browser

You can use your phone to access Wireless Application Protocol (WAP) sites and use WAP-based services. To browse WAP pages, you must subscribe to the corresponding service from your service provider and configure your phone's relevant settings.

If dual-SIM mode is enabled, you must select which SIM card to use when connecting to the Internet.

To access the **Internet service** screen, in standby mode tap  at the bottom of the screen.

On the Internet service screen:

- Tap **Settings > Data account** to select your service provider.
- Tap **Homepage** to access your homepage.
- Tap **Bookmarks**, select a WAP site that you have previously bookmarked, and tap **Options > Go to** to access the site.
- Tap **Input address**, enter a Uniform Resource Locator (URL), and tap **Options > Go to** to access the corresponding WAP site.

- Tap **Recent pages** to view WAP pages that you have browsed recently.

## 13 STK

The SIM Tool Kit (STK) function is only provided by some service providers. It is a value-added service that allows you to send text messages, read news, and use other applications. For details, contact your service provider.

To access the STK function, in standby mode press  to access the main menu, and tap **STK**.

## 14 Bluetooth

Your phone supports Bluetooth. You can synchronize files between your phone and a computer, transfer data between your phone and other Bluetooth devices, and talk on the phone using a Bluetooth headset.

### Transferring Data

1. In standby mode, press  to access the main menu.
2. Tap **Bluetooth > Power > On** to turn on Bluetooth.
3. Tap **My device > Search new device** to search for available Bluetooth devices.
4. Tap the desired Bluetooth device and pair the device with your phone.  
When you pair the device with your phone for the first time, a password is required.

5. Transfer data between your phone and the Bluetooth device.

## Connecting a Bluetooth Headset to Your Phone

1. In standby mode, press  to access the main menu.
2. Tap **Bluetooth** > **Power** > **On** to turn on Bluetooth.
3. Tap **Search audio device** to search for available Bluetooth headsets.
4. Tap the desired Bluetooth headset then **Pair**.
5. Enter the password to pair the Bluetooth headset with your phone.  
When the Bluetooth headset is connected to your phone, the headset icon is displayed on the standby screen, indicating that you can use the headset.

 A Bluetooth headset is not included in the product package and must be purchased separately.

## 15 Warnings and Precautions

This section contains important information pertaining to the operating instructions of your device. It also contains information about how to use the device safely. Read this information carefully before using your device.

#### Electronic Device

Power off your device if using the device is prohibited. Do not use the device when using the device causes danger or interference with electronic devices.

#### Medical Device

- Follow rules and regulations set forth by hospitals and health care facilities. Do not use your device when using the device is prohibited.
- Pacemaker manufacturers recommend that a minimum distance of 15 cm be maintained between a device and a pacemaker to prevent potential interference with the pacemaker. If you are using a pacemaker, use the device on the opposite side of the pacemaker and do not carry the device in your front pocket.

#### Potentially Explosive Atmosphere

Power off your device in any area with a potentially explosive atmosphere, and comply with all signs and instructions. Areas that may have potentially explosive atmospheres include the areas where you would normally be advised to turn off your vehicle engine. Triggering of sparks in such areas could cause an explosion or a fire, resulting in bodily injuries or even deaths. Do not power on your device at refueling points such as service stations. Comply with restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, and chemical plants. In addition, adhere to restrictions in areas where blasting operations are in progress. Before using the device, watch out for areas that have potentially explosive atmospheres that are often, but not always, clearly marked. Such locations include areas below the deck on boats, chemical transfer or storage facilities, and areas where the air contains chemicals or particles such as grain, dust, or metal powders. Ask the manufacturers of vehicles using liquefied

petroleum gas (such as propane or butane) whether this device can be safely used in their vicinity.

#### Traffic Security

Observe local laws and regulations while using the device. In addition, if using the device while driving a vehicle, comply with the following guidelines:

- Concentrate on driving. Your first responsibility is to drive safely.
- Do not talk on the device while driving. Use hands-free accessories.
- When you have to make or answer a call, park the vehicle at the road side before using your device.
- RF signals may affect electronic systems of motor vehicles. For more information, consult the vehicle manufacturer.
- In a motor vehicle, do not place the device over the air bag or in the air bag deployment area. Otherwise, the device may hurt you owing to the strong force when the air bag inflates.
- Do not use your device while flying in an aircraft. Power off your device before boarding an aircraft. Using wireless devices in an aircraft may cause danger to the operation of the aircraft and disrupt the wireless telephone network. It may also be considered illegal.

#### Operating Environment

- Do not use or charge the device in dusty, damp, and dirty places or places with magnetic fields. Otherwise, it may result in a malfunction of the circuit.
- The device complies with the RF specifications when the device is used near your ear or at a distance of 1.5 cm from your body. Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep

your device 1.5 cm away from your body to meet the requirement earlier mentioned.

- On a stormy day with thunder, do not use your device when it is being charged, to prevent any danger caused by lightning.
- When you are on a call, do not touch the antenna. Touching the antenna affects the call quality and results in increase in power consumption. As a result, the talk time and the standby time are reduced.
- While using the device, observe the local laws and regulations, and respect others' privacy and legal rights.
- Keep the ambient temperature between 0°C and 40°C while the device is being charged. Keep the ambient temperature between 0°C to 40°C for using the device powered by a battery.

#### Prevention of Hearing Damage

Using a headset at high volume can damage your hearing. To reduce the risk of damage to hearing, lower the headset volume to a safe and comfortable level.

#### Safety of Children

Comply with all precautions with regard to children's safety.

Letting the child play with your device or its accessories, which may include parts that can be detached from the device, may be dangerous, as it may present a choking hazard. Ensure that small children are kept away from the device and accessories.

#### Accessories

Use the accessories delivered only by the manufacturer. Using accessories of other manufacturers or vendors with this device model may invalidate any approval or warranty applicable to the device, result in the non-operation of the device, and cause danger.

### Battery and Charger

- Unplug the charger from the electrical plug and the device when not in use.
- The battery can be charged and discharged hundreds of times before it eventually wears out. When the standby time and the talk time are shorter than the normal time, replace the battery.
- Use the AC power supply defined in the specifications of the charger. An improper power voltage may cause a fire or a malfunction of the charger.
- Do not connect two poles of the battery with conductors, such as metal materials, keys, or jewelries. Otherwise, the battery may be short-circuited and may cause injuries and burns on your body.
- Do not disassemble the battery or solder the battery poles. Otherwise, it may lead to electrolyte leakage, overheating, fire, or explosion.
- If battery electrolyte leaks out, ensure that the electrolyte does not touch your skin and eyes. When the electrolyte touches your skin or splashes into your eyes, wash your eyes with clean water immediately and consult a doctor.
- If there is a case of battery deformation, color change, or abnormal heating while you charge or store the battery, remove the battery immediately and stop using it. Otherwise, it may lead to battery leakage, overheating, explosion, or fire.
- If the power cable is damaged (for example, the cord is exposed or broken), or the plug loosens, stop using the cable at once. Otherwise, it may lead to an electric shock, a short circuit of the charger, or a fire.
- Do not dispose of batteries in fire as they may explode. Batteries may also explode if damaged.

- Danger of explosion if battery is incorrectly replaced. Recycle or dispose of used batteries according to the local regulations or reference instruction supplied with your device.

#### Cleaning and Maintenance

- The device, battery, and charger are not water-resistant. Keep them dry. Protect the device, battery, and charger from water or vapor. Do not touch the device or the charger with a wet hand. Otherwise, it may lead to a short circuit, a malfunction of the device, and an electric shock to the user.
- Do not place your device, battery, and charger in places where they can get damaged because of collision. Otherwise, it may lead to battery leakage, device malfunction, overheating, fire, or explosion.
- Do not place magnetic storage media such as magnetic cards and floppy disks near the device. Radiation from the device may erase the information stored on them.
- Do not leave your device, battery, and charger in a place with an extreme high or low temperature. Otherwise, they may not function properly and may lead to a fire or an explosion. When the temperature is lower than 0°C, performance of the battery is affected.
- Do not place sharp metal objects such as pins near the earpiece. The earpiece may attract these objects and hurt you when you are using the device.
- Before you clean or maintain the device, power off the device and disconnect it from the charger.
- Do not use any chemical detergent, powder, or other chemical agents (such as alcohol and benzene) to clean the device and the charger. Otherwise, parts of the device may be damaged or a

fire can be caused. You can clean the device and the charger with a piece of damp and soft antistatic cloth.

- Do not dismantle the device or accessories. Otherwise, the warranty on the device and accessories is invalid and the manufacturer is not liable to pay for the damage.

#### Emergency Call

You can use your device for emergency calls in the service area. The connection, however, cannot be guaranteed in all conditions. You should not rely solely on the device for essential communications.

#### Certification Information (SAR)

This device meets guidelines for exposure to radio waves.

Your device is a low-power radio transmitter and receiver. As recommended by international guidelines, the device is designed not to exceed the limits for exposure to radio waves. These guidelines were developed by the independent scientific organization International Commission on Non-Ionizing Radiation Protection (ICNIRP) and include safety measures designed to ensure safety for all users, regardless of age and health.

The Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a device. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level of the device when being operated can be well below the value. This is because the device is designed to use the minimum power required to reach the network.

The SAR limit also adopted by Europe is 2.0 W/kg averaged over 10 grams of tissue. The highest SAR value for this device type when tested at the ear is 0.582 W/kg, and when properly worn on the body is 0.609 W/kg.

#### EU Regulatory Conformance

Hereby, Huawei Technologies Co., Ltd. declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

For the declaration of conformity, visit the Web site [www.huaweidevice.com/certification](http://www.huaweidevice.com/certification).

Notice: Observe the national local regulations in the location where the device is to be used. This device may be restricted for use in some or all member states of the European Union (EU).

#### FCC Regulations:

● This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

● This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

#### ▶ RF Exposure Information (SAR)

This mobile phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 0.733 W/kg and when worn on the body, as described in this user guide, is 1.05 W/kg (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements.)

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of [www.fcc.gov/oet/ea/fccid](http://www.fcc.gov/oet/ea/fccid) after searching on FCC ID: QISG7005 .

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm from your body when the phone is switched on.
