

FM Transmitter

Your mobile phone supports the Frequency Modulation (FM) function. With FM Transmitter, you can transmit FM signal in a certain distance and receive the signal through a wireless receiving device such as an FM radio.

To use the FM Transmitter function on your mobile phone, perform the following:

- 1 Open the cover of the multi-purpose interface, as shown in the following figure.

- 2 Insert the FM Transmitter into your mobile phone. The  icon is displayed on the standby screen. The following figure shows how to insert the FM Transmitter.

With golden contact down.

- 3 Select **Organiser & Tools > FM Transmitter**. Scroll up or down to select an available transmitting frequency.

- 4 Select **Options** and you can perform the following:

- Select: Select a default transmitting frequency.
- Auto inching: Automatically search a proper transmitting frequency.
- Manual inching: Manually tune a transmitting frequency.

- 5 Select **Save** to save the changes or **Cancel** to cancel the changes.

Note

Tuning the frequency on the receiving device to the same frequency as the FM Transmitter. Then, the receiving device can receive signals.

When playing audio files, you can select **Options > FM Transmitter** to transmit the broadcasting to the receiving device.

You can also transmit FM signal when there is an active call. Press the **OK** key to select the FM mode. Then the handset is shielded. The other party's voice is broadcasted through the FM radio. Your voice is transmitted to the other party's mobile phone through the microphone.

Note

- When charging the battery, please turn off FM transmitter.
- When using FM Transmitter, make sure the distance between the FM transmitter and persons is at least 20cm.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for com-

pliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
